Lecture no.	Unit no.	Topics	Sub Topic	Reference
PART-I FINANCIAL ACCOUNTING				
1	1	Basic of accounting and book keeping	Introduction to Accounting, Book Keeping, Basic Accounting Concepts & Fundamental Conventions.	B.N. 1
CO: 1				
LO: Describe the conceptual framework of accounting				
2	2	Concepts of double entry system, basic knowledge of accounting process (journal)	Journal and Types of Entries	B.N.2
3			Ledger ,-Practical Questions	B.N.2
4			Trial Balance-Practical Questions	B.N.2
5			Rectification Errors	B.N.1
CO: 1				
LO: Understand the accounting concepts, principles, standards, and processes. Identify events that need to be recorded in the accounting records.				
6	3	Bank reconciliation statement	Concept of BRS	B.N.1
7			Numerical Questions	B.N.2
CO: 3				
LO: Understand and reconcile cash books and passbook statements.				
8	4	Depreciation	Depreciation and its importance in Decision making	B.N.2
9			SLM and WDV Method-Practical questions	B.N.2
10			Change in Method of Depreciation	B.N.2
CO: 3				
LO: Compare different depreciation methods, including straight-line methods, and written down value method.				
11	5	Preparation of final accounts with adjustments	Theory of Final Accounts.	B.N.1
12			Adjustment Entries	B.N.1
13			Practical Questions	B.N.1
14			Presentation	
		Assignment- Based on Numericals / Case Studies		
CO: 2, 3				
LO: Demonstrate the recording of business transactions, preparing accounting adjustments, construct financial statements, and close the books for the accounting period in accordance with Generally Accepted Accounting				

Standards.				
	PART-II COST ACCOUNTING			
15	1	Basic of Cost accounting	Need for Cost Information, Cost Objective Elements of Cost & Classification of Costs.	B.N. 9
CO: 1				
LO: Understand the cost concepts and classifications				
16	2	Costing methods	Unit Costing	B.N. 9
17			Batch Costing, Job Order Costing	B.N. 9
18			Contract Costing	B.N. 9
19			Practical Questions	B.N. 9
20			Process Costing	B.N. 9
21			Practical Questions	B.N. 9
22			Joint Product Cost and By-Product Cost	B.N. 9
CO: 3				
LO: demonstrate various types of costing techniques and its financial implication for organization				
23	3	Cost control and cost reduction	Cost Control, Cost Reduction	B.N. 9
24			Target Costing and Activity Based Costing	B.N. 9
		Assignment- Based on Numericals /Case Studies		
CO: 3				
LO: Understand importance of Cost control techniques.				
		PART-III MANAGEMENT ACCOUNTING		
25	1	Introduction to Management Accounting	Basic Management Accounting Concepts, Relationship With Financial Accounting & Cost Accounting	B.N. 10
CO: 1				
LO: Understanding of basic management accounting concepts and its relation with financial accounting and cost accounting is introduced.				
26	2	CVP analysis	Break Even Analysis, Contribution Analysis & Segment Contribution & There use in profit Planning.	B.N. 10
27			BEP Analysis-Practical Questions	B.N. 10
CO: 3				
LO: Understand the concepts of Break even analysis and CVP analysis and its implication in profit planning of				

organization				
28	3	Standard costing	Standard Costing & Variance Analysis – Material variance	B.N. 10
29			Labour and Overhead Variance	B.N. 10
30			Sales Volume Variance Margin & Profit Variance , use of there Variances	B.N. 10
CO: 3				
LO: Acquainted with concepts of Standard costing and various types of variances and their uses.				
31	4	Marginal Costing	Managerial Decision making through Accounting Information	B.N. 10
32	5		Presentation	
		Assignment- Based on Numericals/Case Studies		
CO: 3,4				
LO: Understand to utilise accounting information for managerial decision making.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Note:

1. There will be 2class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of marketing environment.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment			
Subject: Business Legislation			
MBA I Sem			
Goal: Students examine the legal environment in which businesses operate and how common law, provincial and federal government statutes influence decision making. Topics include the legal system and the law relating to t contracts, forms of business organization, agency, and sale of goods.			
Objective: Students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having an understanding of various laws, which are to be observed in performing the day-to-day business. Students having knowledge of latest provisions of the law and Its uses in the best interest of the organization without violating them rather than cases.	% Students having an understanding of various laws, which are to be observed in performing the day-to-day business. Students having knowledge of latest provisions of the law	% Students having understanding about management functions.	% Students Need More efforts for Concept of Laws.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** IT and E-Business Fundamentals**Session:** July - Dec**Class:** MBA - I Sem**I: Objective of course:**

The objective of this subject is to help students to understand the basics of Information Technology and e-Business Fundamentals. The students use the e-business applications in day to day life and should know its practicality in business processes.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. An External viva-voce will be of 30 marks. The end semester examination will be worth 50 marks having theory and cases/practical problems. There will be 7/8 questions out of which a student will be required to attempt any 5 questions.

III: Course Outcomes (CO):

CO1. Basic understanding of Information Technology and E-Business fundamentals

CO2. Knowledge of Computer fundamentals and applications of MS-Office in business

CO3. Awareness of E-business, Cyber security threats & other related issues

CO4. Learning optimum uses of e-resources like websites, search engines, shopping sites, etc.

Subject: Management Principles and Practices
Class: MBA – I Sem

Session: July-Dec.

I: Course Objective:

The objective of this course is to help the students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases. Cases prescribed below are only for classroom discussion and internal evaluation and not for end semester examinations.

III: Course Outcomes (CO):

CO 1: Understanding of the functions and responsibilities of the manager

CO2: Learn about the tools and techniques for the enhancement of the performance on the managerial profile.

CO 3: Enable the understanding of the student for organizational environment

CO 4: Integrate management principles into management practices.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Concept of Management	Functions and Responsibilities of Managers	B.N. 3, 5
2			Fayol's Principles of Management	B.N. 3, 8
3			The Classical School Management Thought	B.N. 5, 8
4			The Classical School Management Thought	B.N. 3, 5, 8
5			Human Relation Theory Case: Managers and Communication, Robbins, Coulter and Vohra, 10 th Edition, pp. 341	B.N. 3, 5
6			System Theory, Contingency Management Theory	B.N. 3, 5
7			Developing Excellent Manager, Cross Cultural Issues in Management	B.N. 3, 8
CO: 1, 4				
LO: It develops managerial skills and knowledge of basic management principles among the students.				
8	2	Planning	Nature and Purpose of Planning, Advantages and Limitations of Planning	B.N. 5, 8
9			The Planning Process, Principles of Planning	B.N. 3, 8
10			Types of Planning Case: Radiant Industries, Neeru Vasishth, 3 rd Edition, pp. 126	B.N. 5, 8
Assignment: Analysis of Indian companies plans at different levels				
CO: 4				
LO: Knows meaning of Contract of Sale and formalities of contract of sale.				
11	3	Concept and Nature of Objectives	Types of Objectives, Importance of Objectives Case: Sun Stampings Ltd., Neeru	B.N. 3, 5,8

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			Vasishth, 3 rd Edition, pp. 164	
12			Setting Objectives, Management by Objectives (MBO)	B.N. 5, 8
13			Benefits and Weaknesses of MBO.	B.N. 3, 5
CO: 3				
LO: It enhances the skills among the students to develop and set the objectives of the company and how to achieve the objectives.				
14	4	Strategies and Policies	Concept of Corporate Strategy, Formulation of Strategy	B.N. 3, 5, 8
15			Types of Strategies	B.N. 3, 5
16			The Strategic Planning Process	B.N. 3, 5
17			The TOWS Matrix	B.N. 5, 8
18			The Portfolio Matrix	B.N. 3, 5
19			Three Generic Competitive Strategies by Porter, Effective Implementation of Strategies	B.N. 5, 8
20			Types of Policies, Principles of Formulation of Policies Case: C.F. Martin Guitar Company, Robbins and Coulter, 8 th Edition, pp. 155	B.N. 3, 5, 8
21			Decision Making Process, Individual Decision Making Models	B.N. 3, 8
Assignment: Submit the Presentation on Current Corporate Affair				
CO: 2				
LO: Students will able to formulate different strategies and understand the different competitive strategies.				
22	5	Organizing	Nature and Purpose of Organizing	B.N. 3, 5, 8
23			Bases of Departmentation	B.N. 3, 5
24			Span of Management, Determinants of Span of Management	B.N. 8
25			Line and Staff Relationship	B.N. 3, 8

Lecture No.	Unit No.	Topic	Sub Topic	Reference
26			Line-Staff Conflict	B.N. 3, 5
27			Bases of Delegation, Kinds of Delegation Case: BASF, Robbins and Coulter, 8 th Edition, pp. 389	B.N. 3, 5
28			Centralization, Decentralization, Methods of Decentralization	B.N. 3
Assignment: Group Activity; Any organization's structure.				
CO: 3				
LO: It enables the students how to get optimum output from available resources.				
29	6	Controlling	Concept and Process of Control, Human Aspects of Control, Control as a Feedback System	B.N. 3, 5, 8
30			Control Techniques, Feed Forward Control, Preventive Control	B.N. 5, 8
31			Control Through Return on Investment, Profit and Loss Control Case: Wal-Mart in America and Around the Globe, Koontz and Weihrich, 9 th Eidtion, pp. 424	B.N. 3,5, 8
32			The Use of Computer for Controlling and Decision Making, The Challenges Created by IT as a Control Tool	B.N. 5
Assignment: SWOT analysis of discussed case.				
CO: 4				
LO: It develops the skills among the students to control over the resources as per requirement and achieve the objectives.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: Mathematics & Statistics for Managers

Session: July-Dec

Class: MBA I

I: Course Objective: The objectives of course are to equip the students with the mathematical & Statistical Technique & their application to business problem. The emphasis will be on the concepts & application rather than derivations.

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be worth 80 Marks (External evaluation). It will have two sections A & B, Section A worth 32 will consist of 4 theory questions out of which student will be required to attempt any two questions. Section B worth 48 marks will have 5 numerical problems out of which student will required to attempt any three questions.

III: Course Outcomes (CO):

1. To prepare students for lifelong learning and successful careers using their mathematical and statistical skills.
2. To develop decision making skills pertinent to the practice of mathematics and statistics, including the students' abilities to formulate problems, to think creatively, and to synthesize information.
3. To train students thoroughly in methods of analysis and algebra, including the computational skills appropriate for mathematicians to use when solving problems.
4. To teach students to use current mathematical and statistical concepts and data analysis techniques for problem solving.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	Part A-6	Vector, Matrices & Determinants with business application	Introduction &Types, Operation on Matrices	B.N -1, B.N - 11
2			Adjoint, Determinant, Minor & Cofactor	
3			Inverse of Matrices	
4			Elementary Row Operations Solution of Simultaneous Equation	
5			Input & Output analysis	
CO: 1, 3				
LO: To understand the concept and theory of determinant, matrices and input output analysis and use the concept and knowledge of matrices to solve complex problems in the field of business management and economics.				
6	Part B-1	Introduction to Statistics	Meaning, Definition& Role of Statistics in Business management	B.N - 7
First Group Assignment: Utility of Statistics in Current Scenario				
CO: 1, 4				
LO: To understand the concept and applicability of statistics in business management and also understand the roleplay of statistics in decision making for business problems.				
7	Part B-3	Correlation & Regression	Types of Correlation & its method, Karl Pearson Correlation	B.N-5, B.N-12
8			Spearman's & Concurrent Correlation	
9		Regression	Line of Regression , Curve Fitting	
10			Least Square	
A-1 Worksheet of Matrix and Correlation & Regression				
CO: 2				
LO: To understand the concept of correlation between two variables and quantitative measurement of correlation including the interpretation of positive, negative and zero correlation and also understand the concept and implications of regression.				
Lecture	Unit No.	Topic	Sub Topic	Reference

11	Part B-4	Time series	Meaning & its Components, Least Square	B.N -4,B.N-10	
12			Measurement of Seasonal Variation		
Second Group Assignment : Implication of Time Series in Business World					
CO: 4					
LO: To understand the concept of time series along with the components and be able to apply the knowledge of time series and data analysis for the purpose demand forecasting.					
13	Part A-1	Sets & Functions	Definition& its Types, Venn- Diagram & its Functions	B.N-2, B.N-10	
14			Types of Functions, Business application of Functions		
CO: 3					
LO: To understand the concepts and techniques that are developed to solve many complex business problems in a logical and simple way by structuring them in the set theory language. Further, to understand the applications of various functions in business management and also find the impact of independent variables on dependent variables.					
15	Part A-2	Limits & Continuity of Functions	Introduction, Limit of Variables & Functions		
16			Continuity of Function		
A-2 To explain Various types of Functions with their graphs					
CO:					
LO: To find out the limiting behavior of a function as the independent variable approaches a finite or infinite value and also find the point at which the given function is continuous.					
17	Part B-5	Statistical Decision Theory	Decision making process under uncertainty , Decision under Risk	B.N-7,B.N-9	
CO: 2					
LO: To demonstrate how to build statistical models with the help of decision tree when data is sparse and expert judgments need to be incorporated to cope up with the problem in the field of business management.					
18	Part A-3	Differentiation Concepts	Derivative of function	B.N-2,B.N-10	

19			Derivative of Sum, Difference, Product & quotient	
20			Application of Differentiaiation	
21			Maxima, Minima & its Uses	
CO: 3				
LO: To understand the concept of differential calculus in specific contents with emphasis on application to economics and be able to apply the theory and concept of change and proportion change in the mathematical functions in order to solve complex business problems.				
22	Part A-4	Integration Concept	Elementry Integration	B.N-2,B.N-10
23			Integration by parts	
24			Simple definite integral	
25			Economic Application	
26			Consumer & Producer Surplus	
A-3 Practice Questions on Differentiation and Integration				
CO: 4				
LO: To understand the concept of marginal cost, marginal revenue and marginal profit with the help of integral calculus and be able to apply the concept of integration in the complex problems of business management and economics.				
27	Part B-2	Probability	Concept, Additive & Multiplicative Probability	B.N-5, B.N-12
28			Conditional Probability & Baye's Theorem	
29			Binomial Distribution	
30			Poisson Distribution	
31			Normal Distribution	
A-4 To write the practical use of Probability in Managerial Decision Making				
CO: 2				
LO: Develop problem-solving techniques needed to accurately calculate probabilities and apply problem-solving techniques to solving real-world events.				
32	Part A-5	Discounting, Compounding &annuity	Discounting, Compounding &annuity	B.N-1
CO: 4				
LO: To understand the concept of discounting, compounding and annuity to solve financial mathematics of business and apply the concept of time value of money in the field of business management.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Note:

- 1 There will be Four home assignments, each carry 1 marks.
- 2 Two major group Assignments based on the practical aspect of the subject.
- 3 There will be one major Internal Test
- 4 Group size will be 4-5 students, & each group will be given separate topic of assignment
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan

VIII Rubric for Internal Assessment			
Subject: Mathematics and Statistics for Managers			
MBA I Sem			
Goal: Students are introduced to the use the concepts and methods of statistics, including variability, and probability as well as business mathematics.			
Objective: Students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having command on mathematical and statistical techniques and their application to business problems with concept and evaluation.	% Students having basic command on mathematical and statistical techniques and their application to business problems.	% Students having understanding about management functions.	% Students Need More Efforts for Solution and Basic Concept of Mathematical and Statistical Techniques.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Organizational Behavior and Processes**Session:** July-Dec**Class:** MBA I Sem

I: Course Objectives: Objective of this course is to help students to understand human Behavior in organizations at cross cultural level so that they improve their managerial effectiveness

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases.

III: Course Outcomes (CO):

CO1 Demonstrate an understanding of key terms, theories/ concepts and practices within the field of HRM.

CO2 Demonstrate competence in development and problem solving in the area of HR management.

CO3 Analyze the key issues related to administrating the human elements such as motivation, compensation, appraisal, career planning and training.

CO4 Describe the meaning of terminology and tools used in managing employees effectively.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	3			2	3		2
CO 2	2			2	3	3		3
CO 3	1	1		2	2	3		2
CO 4	-	1		3		1		1

V: Session Plan:

Lecture No.	Unit No.	Topics	Sub Topics	Reference
1	1	Foundations of Individual Behavior	Personality	B.N.1/B.N.2/B.N.6
2			Determinants and Attributes	B.N.1/B.N.2/B.N.6
3			Job Attitude	B.N.1/B.N.2/B.N.6

4			Learning And Learning Theories	B.N.1/B.N.2/B.N.6
5			Perception	B.N.1/B.N.2/B.N.6
6			Cross cultural issues in OB	B.N.1/B.N.2/B.N.6
7			Case Study- Personality traits	

CO: 1

LO: This unit will help the students to understand basic concept of OB and various theories of Personality, Learning, Perception and Job Attitudes.

8			Definition and concept, theories of motivation - Maslow's Hierarchy of Needs, Herzberg's Two Factor theory	B.N.1/B.N.3/ B.N.5
9			ERG theory, Vroom's Expectancy theory,	B.N.1/B.N.3/ B.N.5
10	2	Motivation	Equity theory	B.N.1/B.N.3/ B.N.5
11			Reinforcement theory and Behavior Modification.	B.N.1/B.N.3/ B.N.5
12			Case Study : Identifying Motivational Problems	B.N. 5 p.138

Assignment (Worksheet)**CO: 2**

LO: In this unit students will learn various theories of motivation that how motivated employees can lead to increased productivity and allow an organization to achieve higher levels of output.

13			Defining and Classifying Groups, stages of group development,	B.N.2/B.N. 4/B.N. 7
14	3	Foundations of Group Behavior	Group Structure, Group Processes, Group Dynamics,	B.N.2/ B.N. 4/B.N. 7
15			Group v/s Team, Team Effectiveness. Group and Intergroup Relations.	B.N.2/ B.N. 4/B.N. 7
16			Case Study - Handling Rajeev at Spectra	B.N. 5 p. 236

CO: 4

LO: Stages of group development, Group Structure, Group Processes, Group Dynamics and importance of Team Effectiveness will be learnt by the students in this Unit.

17	4	Leadership	Nature and Significance of leadership, leadership in different cultures	B.N.1/B.N.5/ B.N.7
18			leadership theories and Styles : Trait theories, Behavioral theories	B.N.1/B.N.5/ B.N.7

19			Contingency theories-- Fiedler's Model, Hersey and Blanchard's Situational theory	B.N.1/B.N.5/ B.N.7
20			Path Goal theory, emotional intelligence and leadership effectiveness	B.N.1/B.N.5/ B.N.7
21			Recent Development in Leadership Theory	B.N.1/B.N.5/ B.N.7
22			Case Study- The Caring Dictator	B.N. 5 p.- 260
CO: 4, 3				
LO: Various Leadership theories will be learnt by students in this unit. They will also learn emotional intelligence, leadership effectiveness and recent development in leadership theory.				
23			Transitions in Conflict Thought , Functional versus Dysfunctional Conflict, Conflict Process	B.N.2/ B.N.6
24	5	Conflict and Negotiation	Conflict Management Techniques, Negotiation process ,Bargaining strategies ,Global implication	B.N.-2/B.N.6
25			Case Study- Role conflict among telephone service employees	
CO: 2				
LO: This Unit helps the students to understand Conflict Process, Conflict Management Techniques, Negotiation process, Bargaining strategies to solve various employee related problem.				
26			Concept, Relationship of Culture with organizational behavior, National and Global Culture	B.N.1/B.N.2/B.N.5
27	6	Organizational Culture	Levels and analyzing and managing culture, Global Implications for manager, Analyzing managing and changing organizational culture	B B.N.1/B.N.2/B.N.5
28			Case Study- culture and make or break of an org	B.N.5 p.394
CO: 1, 4				
LO: The sixth unit will make the students understand relationship of culture with organizational behavior.They will also learn analyzing managing and changing organizational culture.				
29	7	Organizational Change and Stress Management	Forces for Change, Resistance to Change, approaches to managing organizational change	B.N.2/ B.N.3
30			Work stress and its management	B.N.2/ B.N.3
31	Presentation			
32	Presentation			

CO: 3

LO: The last Unit makes the students understand organizational change and various approaches to managing organizational change. It will also help to understand Work stress and its management in current scenario.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Note:

- 1 There will be 2 group major assignments. Group size will be 4-5 students
- 2 There will be Group presentations of 30 minutes.
- 3 Class performance and discipline will be an important factor for assessing internal marks, it carries 2 marks.
- 4 The results of each tests and assignments will be declared with in one week.
- 5 If any student does not submit assignments at time, credit will be given half mark after submission of assignment.
- 6 Attendance will be multiplying factor as per given in academic plan.

VIII Rubric for Internal Assessment			
Subject:			
MBA I Sem			
Goal: Students examine the behavior of individuals and how they interact with each other in different workplace organizations. Topics include an orientation to organizational behavior; individual behavior; individual and behavioral processes; team processes; organizational dynamics; and organizational processes.			
Objective: Students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

% Students having an understanding about Human Behavior in Organizations at cross cultural level so that they improve their managerial effectiveness towards Team.	% Students having to understand about human Behavior in organizations at cross cultural level.	% Students having understanding about management functions.	% Students Need More efforts for Understanding of Human Behavior in Organizations.
--	--	---	--

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Business Research Methodology**Session:** July – Dec**Class:** M.B.A. (FT) II Sem

I: Objectives of course: The objective of the course is to equip the students with the concept and methods of Business Research. The students will be able to plan, design and earn out business research using scientific methods and prepare research report(s) / paper (s)

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases

III: Course Outcomes (CO):

CO 1: To provide deeper knowledge and experience in applying commonly used qualitative and quantitative research methods to the research process.

CO 2: Refine research questions to meet high level research objectives/questions.

CO3: Develop data collection instrument according to the underlying theoretical framework.

CO 4: Understand the steps of conducting the business research and writing the research report.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3	1				
CO 2	2		3	2				
CO 3		2	3					
CO 4		2	3					

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub-topic	Reference Book Number
1	Unit 1	Business Research	Meaning and concept	6&7
2			Methods of research	1,6,
3			Research Process	6,7
4			Identification and formulation of Research Problem.	1,6
A-1 First Assignment Submission within 3 Days				
CO: 1,2				
LO: Student will able to understand and analyze business problems and find proper and effective ways to answer those problems.				
5	Unit II	Research Design	Research Design :types	6,7
6			Research Design:, Need for Research Design Features of a good research design and	6,7
7			Variables and types of variables	1,6,
A-2 Second Assignment Submission within 3 Days				
CO: 1				
LO: It enables the students to formulate clearly research problems and understand and apply the major types of research design.				
8	Unit III	Measurement Methods	Hypothesis, Types and formulation of Hypothesis,	
9			Different research design-- Exploratory, Descriptive.	1,6,
10			Diagnostic and Survey Research	6,7
11			Measurement Methods: Interviews	6,7
12			Surveys. Observation	6,7

Lecture No.	Unit No.	Topic	Sub-topic	Reference Book Number
13		Measurement Methods	Content Analysis	6,7
14	Unit III		Measurement Scales	
15			Reliability and Validity of scales.	1,6
A-3 Third Assignment Submission within 3 Days				
CO: 3				
LO: Students will gain understanding of various scales and construct new scales.				
16	Unit IV	Data analysis	Hypothesis Testing, Parametric and Non-Parametric Tests,	1,6,7
17			Analysis of Differences between a Single Sample	6,8
18			Analysis of Differences between a Single Sample	6,8
19			Analysis of Differences between Two or More than Two Levels of an Independent Variable,	6,8
21			Analysis of Differences between Two or More than Two Levels of an Independent Variable,	6,8
22			Analysis of Differences between Two or More than Two Levels of an Independent Variable,	6,8
23			Analysis of Designs with More than One Independent Variable, Analysis of relationships,	6,8
24			Analysis of Designs with More than One Independent Variable, Analysis of relationships,	6,8

Lecture No.	Unit No.	Topic	Sub-topic	Reference Book Number
25	Unit IV	Data Analysis	Analysis of Designs with More than One Independent Variable, Analysis of relationships,	6,8
26			Chi-square tests,	6,8
27			Chi-square tests,	6,8
28			Analysis of Covariance (ANCOVA) and Use of Multivariate Analysis in Business Research.	6,8
29			Analysis of Covariance (ANCOVA) and Use of Multivariate Analysis in Business Research.	6,8
30			Analysis of Covariance (ANCOVA) and Use of Multivariate Analysis in Business Research.	6,8
A-4 Fourth Assignment Submission within 3 Days				
CO: 4				
LO: Student will able to understand and use various statistical tools available for hypothesis testing.				
31	Unit V	Sharing the Results	Sharing the Results. Reporting Research, Types of reports	1,6,7
32			Characteristics of a research report.	1,6,7
A-5 Fifth Assignment Submission within 3 Days				
CO: 4				
LO: It helps students to formulate and present effective research report.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Reference Book

VII: Note:

1. There will be five class tests /assignment/presentation of 10-15 minutes each without declaration of the date. It will be of 4 marks.
2. There will be three major tests based on the practical and theoretical aspect of the subjects. Each carry two marks, marks of best of two major tests will be included in internal marks.
3. There will be two major group assignments; group size will be of 3 or 4 students. Each group will be given separate topic of assignment. Each assignment carry 3 marks.
4. Class performance and discipline will be an important factor for assessing internal marks, it carries 2 marks.
5. The result of each tests/assignment will be declared within one week.
6. If any student doesn't submit assignment on time, half marks credit will be given after submission of the assignment.
7. Attendance will be a multiplying factor as per given in academic plan.

VIII Rubric for Internal Assessment			
Subject: Business Research Methodology			
MBA II Sem			
Goal: To have a general understanding of research and its use in areas of management research.			
Objective: To grasp and comprehend the methods and techniques used in research and provide with the knowledge and skill to undertake research.			
20-16 Marks	15-11 Marks	10-06 Marks	05-00 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
___% students show high orientation towards research. Shows complete understanding of research concepts and able to plan business research using scientific methods for managerial decisions.	___% students show good understanding of concepts, but need to correlate these concepts more appropriately with managerial problems.	___% students show little understanding of research concept and need more clarity of concept for correlating and planning researches for managerial decisions.	___% students show very basic understanding of subject and find it difficult to plan or design research for managerial problems. need improvement for conceptual knowledge Need to correlate research concepts with managerial problems

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject: Entrepreneurship****Session: Jan-Jun****Class: MBA II Sem****I: Course Objective:**

The objective of this course is to familiarize the students with the ground realities of starting & managing their own Entrepreneurial ventures.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases.

III: Course Outcomes (CO):

- CO1 Understanding the basics of Entrepreneurship and real life issues therein.
- CO2 Application of Theoretical concepts into practice while facing business problems.
Contributes in Developing Reasoning and Analytical ability to foster Decision
- CO3 Making.
- CO4 Nurturing Entrepreneur Skills and Leadership Abilities.

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Entrepreneurship	Definition of Entrepreneur, Entrepreneurial Traits, and Entrepreneur vs. Manager,	B.N.1/B.N. 12

			Entrepreneur vs. Intrapreneur.	
2		Introduction to Entrepreneurship	The Entrepreneurial decision process. Role of Entrepreneurship in Economic Development	B.N.1/B.N.12
3			Ethics and Social responsibility of Entrepreneurs. Opportunities for Entrepreneurs in India and abroad	B.N.1/B.N.12
4			Woman as Entrepreneur. Case Study:- Entrepreneurship--Luck or Persistence	B.N.1/B.N.12
CO: 1				
LO: Understanding Concept of being an Entrepreneur; Decision making Process, Role, Ethics , Responsibility & Opportunities for an entrepreneur				
5	2	Creating and Starting the Venture	Sources of new Ideas, Methods of generating ideas	B.N.1/B.N.12
6			creating problem solving	B.N.1/B.N.12
7			Product planning and development process.	B.N.1/B.N.12
8			Case Study: - Calamity to Prosperity, NIRMA	
CO: 2, 4				
LO: Develops awareness about creative problem solving techniques and methods for generating new ideas and product planning process.				
9	3	The Business Plan	Define, Nature and scope of Business plan,	B.N.1/B.N.12
10			Writing Business Plan	B.N.1/B.N.12
11			Evaluating Business plans, Using and Implementing business plans.	B.N.1/B.N.12
12			Marketing plan, financial plan and the organizational plan, Launching formalities.	B.N.1/B.N.12
13			Case Study:-(1)The Story of Redbus (2) A New Spin On Music.(Kuratko)	
CO: 4				
LO: Knowledge of Writing a Business Plan, evaluating it and understanding the basic concepts of Launching formalities for a organization				
14	4	Financing and Managing the new venture	Sources of capital,	B.N.1/B.N.12
15			Record keeping, recruitment, motivating and leading teams	B.N.1/B.N.12
16			Financial controls.	B.N.1/B.N.

			Marketing and sales controls.	12
17			E-commerce and Entrepreneurship, Internet advertising	B.N.1/B.N.12
18			Case Study: - Chinese Restaurant	
Assignment Submission				
CO: 3				
LO: Awareness about; various sources of raising capital, leading teams, E-Commerce & Internet advertising				
19	5	New venture Expansion Strategies and Issues	Features and evaluation of joint ventures	B.N.1/B.N.12
20			acquisitions, merges, franchising	B.N.1/B.N.12
21			Public issues, rights issues, bonus issues and stock splits	B.N.1/B.N.12
22			Case Study: - Amazon.com	
CO: 4				
LO: knowledge about New venture expansion strategies ;joint venture, merger, acquisition, franchise,				
23	6	Institutional support to Entrepreneurship	Role of Directorate of Industries, District Industries, Centers (DICs) Industrial Development Corporation(IDC), State Financial corporation (SFCs)	B.N.1/B.N.12
24			Commercial banks Small Scale Industries Development Corporations (SSIDCs), Khadi and village Industries Commission (KVIC),	B.N.1/B.N.12
25			National Small Industries Corporation (NSIC), Small Industries Development Bank of India (SIDBI) Case Study:- IndiaCo.	B.N.1/B.N.12
CO: 5				
LO: Awareness about various institutional support to entrepreneurs like KYIC,DICs, SFCs, SIDBI, etc				
26	7	Choice of organization	Sole Proprietorship, partnership	B.N.1/B.N.12
27			joint stock co., and co-operatives	B.N.1/B.N.12
28			Class Presentation	
29			Class Presentation	
30			Class Presentation	

CO: 1				
LO: Helps understand different type of firms and their structure like sole proprietorship, joint stock, stock splits and more				
31	8	Exit strategies and social responsibilities	Introduction, Reasons for existing and long-term preparation, short-term preparation,	B.N.1/B.N.12
32			Introduction of social responsibility corporate social responsibility, Dimensions of CSR	B.N.1/B.N.12
CO: 4				
LO: Awareness about Social responsibility of entrepreneurs(CSR),its different dimensions and exit strategies				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	References
SECTION A: PART I – BUSINESS ETHICS				
1	1	The Nature and Purpose of Ethical Reflections	Introduction, Definition of Ethics, Moral Behaviour, Characteristics of Moral Standards. Case Study- Ethical Reflection (Study Material).	B.N.1/2/3/8

CO: 1				
LO: Develops Moral Values, Standards and Ethics among the students				
2	2	Business Ethics	Mediating between Moral Demands and Interest, Relative Autonomy of Business Morality, Studies in Business Ethics.	B.N.1/2/3/8
3			Role of Ethics in Business, Theory of Voluntary Mediation, Participatory Ethics.	B.N.1/2/3/8
CO: 2				
LO: It enhances Ethical Values among the students and they are able to apply them in Business and Profession.				
4	3	Moral Responsibility	Introduction; Balanced Concept of Freedom, Individual Responsibility, Implications related to Modern Issues, Public Accountability and Entrepreneurial Responsibility.	B.N.1/2/3/8
5			Moral Corporate Excellence, Corporate Responsibility.	B.N.1/2/3/8
CO: 2				
LO: Students will be aware about their responsibility towards Business, Society and Country.				
6	4	Business Ethics and Individual Interest	Interest based Outlook, Impact of Interest on Moral Goals and Moral Principles.	B.N.1/2/3/8
7			Utilitarian Views on Business Ethics, Enlightened Egoism through case discussion. Case Study- Act Utilitarianism Applied to the Ford Pinto Release.	B.N.1/2/3/8
CO: 3				
LO: Develops and understanding about the philosophy of Utilitarianism and Enlightened Egoism among the students				
8	5	Duty ethics	Duty ethics in the Business Environment.	B.N.1/2/3/8
CO: 3				
LO: Develops and understanding of Duty-based or Deontological ethics among the students.				
9	6	Theories of Virtue	Productive Practices and Team Motivation.	B.N.1/2/3/8
10			Theories of Virtue: Prospects of Virtues in Business Ethics and Management Theory.	B.N.1/2/3/8
Assignment No.1				
CO: 2				
LO: 1.It enables the students to identify the prospects of Virtues in Business Ethics & Management Theory 2. It develops various Productive Practices and effective methods of Motivating the team members among the students.				
SECTION A: PART II – MANAGEMENT BY INDIAN VALUES				
11	1	Management, Culture and Ethos	Management, Culture and Ethos: Salient features of Indian Ethos, Basic Principles Of Indian Ethos in Management.	B.N.7/9
12			Role and Significance of Ethos in Managerial Practices, Management is Culture Bound.	B.N.7/9
CO: 1				

LO: It creates and awareness of Indian Ethos and Culture among the students.				
13	2	Sources of Indian Ethos in Management	Sources of Indian Ethos in Management: Vedas, Shastras.	B.N.9
14			Smrities, Puranas, Upnishads.	B.N.9
15			Ramayan, Mahabharat, Ramcharitamanas. Case study-Metro turns to Bhagwad Gita for management lessons	B.N.9
16			Arthashastra, Panchatantra, Hitopdesh.	B.N.9
17			Guru GranthSahib, Teachings of Buddha and Mahaveer.	B.N.9
18			The Holy Bible, The Holy Quran.	B.N.9
CO: 4				
LO: Student will get the basic knowledge of our Spiritual Granthas				
19	3	Models of Leadership and Motivation	Models of Leadership in Indian Thoughts - Examples from Scriptures.	B.N.9
20			Models of Motivation in Indian Thoughts - Examples from Scriptures.	B.N.9
CO: 1				
LO: It develops concept of Spiritual Leadership among the students.				
21	4	Human Behaviour	Human Behaviour – Indian Thoughts and Sanskara Theory, Guna Theory and its application in management.	B.N.7/9
CO: 1				
LO: It creates awareness about Indian thoughts, Gunas and Sanskaras.				
22	5	Karma Theory	Karma Theory, Nishkama Karma Yoga and Professionalism.	B.N.7/9
Assignment No.2				
CO:1				
LO: It develops the understanding of the ‘Doctrine of Karma’ and the concept of ‘Nishkama Karma Yoga’ and Professionalism among the students.				
23	6	Personal and Managerial Effectiveness	Personal and Managerial Effectiveness in Indian Thoughts - Management of theSelf.	B.N.3/7/9
24			Management of Body, Thoughts and Emotions.	B.N.7/9
25			Interpersonal and GroupEffectiveness.	B.N.3/9
CO: 2				
LO: It develops Interpersonal Skills and group effectiveness, self management among the students.				
26	7	Cultural Heritage of India	Cultural Heritage of India and its relevance for Modern Management.	B.N.9/10
27			Concept of ‘Pancha - Rina’ (five- fold debt).	B.N.9/10
28			Corporate Social Responsibility.	B.N.7/9/10
29			Four – fold Life Goals (PurusharthChatushtheya) and Business.	B.N.9/10
30			SanskaraValues Vs. Skills – Supremacy of Values over Skills, Role Vs. Self.	B.N.7/9/10
CO: 4				
LO: It develops the role of Individual towards society and country.				
31	8	Work Place Spirituality	Work Place Spirituality.	B.N.9/10

32	Case Study	Corporate Social Responsibility.	B.N.9
CO: 4			
LO: It develops the concept of Work Place Spirituality among the students.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Fundamentals Of Financial Management			
MBA II Sem			
Goal : To acquire the skills necessary to manage a financial firm, to describe and apply financial concepts, theories, and tools, and to evaluate the role of technology and the legal, ethical and economic environment as it relates to financial institutions.			
Objective: To understand the theoretical framework of finance problems and issues and apply these concepts in practice. Through this students will be able to enhance their knowledge and understanding of financial management and will learn how managers should organize their financial transactions effectively.			
20-16 Marks	15-11 Marks	10-06 Marks	05-00 Marks
___Students	___Students	___Students	___Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
___% Students shows exceptionally high understanding of business finance concept. Students show skills of financial analysis and making financial decisions according to analysis. Students also show high familiarity with the financial tools and relationship of these tools with managerial decision making.	___% students show strong understanding of concepts but making mistakes. Some time found difficult to relate with practical aspect of subject.	___% students show good understanding of concepts, found difficult to solve completely and stuck between the problems. Required more conceptual clarity for relating practical and theory.	___% students show basic understanding of concepts, and found very much difficult to show relationship between financial tools and managerial decision making.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT AND RESEARCH, INDORE**Lesson Plan**

Subject: Fundamentals of Operations Management
Class-MBA-II

Session: January- June

I: Objectives of course: The objective of this course is to help the students understand the concepts of production function, inventory control, quality control and application of technical models and techniques for solving production problems.

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/ practical problems.

III: Course Outcomes (CO):

1. To gain an understanding and appreciation of the principles and applications relevant to the planning, design, and operations of manufacturing/service firms.
2. Understand the interdependence of the operations function with the other key functional areas of a firm
3. Apply analytical skills and problem-solving tools to the analysis of the operations problems
4. Increase the knowledge, and broaden the perspective of the world in which you will contribute your talents and leadership in business operations.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3						1	
CO 2						3		
CO 3		3	3	1	3			
CO 4	2			3		1	2	

V: Session Plan:

Lecture No	Unit	Topic	Sub Topic	Reference
1	1	Introduction to Production and Operations	Introduction of OM, Nature of OM, Production function and its environment	B.N-1,B.N-2
2			Function of production/operation management, organization of production function	B.N-1,B.N-2

3		Management :	Productivity -definition, types of productivity, Factor affecting productivity	B.N-1,B.N-2
4			Methods for improving productivity, Standardized service strategy	B.N-1,B.N-2
5			Assembly-to-order strategy, Customized service strategy	B.N-1,B.N-2
CO: 1				
LO: To familiarize students with the basic concepts, models and statements of the operations management theory.				
6	2	Facilities Planning	Product Selection and Design, Service Design, Process and Technology Selection	B.N-1,B.N-5
7			Location of Manufacturing / Service Facility - Centre of Gravity Model and Median Model of location	B.N-1,B.N-5
8			Dimensional Analysis, Brown & Gibson Model	B.N-1,B.N-5
9			Location Decision-Case-Tata Nano	B.N-1,B.N-5
CO: 2				
LO: Students will understand the concept of product selection and design, and will understand the quantitative as well as qualitative aspects of facility locations.				
10	3	Layout of Manufacturing/ service facility	Introduction of Product layout, process layout, fixed position and group layout	B.N-3,B.N-5
11			layout design: Relationship based and Load-Distance cost matrix	B.N-3,B.N-5
12			Materials handling concepts	B.N-3,B.N-5
13			Practical problems and Test-I	B.N-3
Assignment I – Types of Layouts with suitable example				
CO: 1, 2				
LO: Become familiar with the types of layout designs and also understand the material handling concept in given layout				
14	4	Resources Requirement Planning	capacity planning, machines and labor planning	B.N-1,B.N-5
15			computation of number of machines and number of workers	B.N-1,B.N-5
16			Concept and Application of Learning Curve.	B.N-4,B.N-5

17			practical problems and Test-II	B.N-4,B.N-5
CO: 3				
LO: Become familiar with the planning of resources required for an organization, and also understand the concept of capacity and its important for manufacturing a product. Students will able to develop capacity alternatives to fulfill the requirements.				
18	5	Production Planning and Control	Aggregate Production Planning - Chase strategy	B.N-3,B.N-4
19			Level production strategy, Mixed strategy	B.N-3,B.N-4
20			Materials Requirement Planning	B.N-3,B.N-4,B.N-5
21			Practical problems and Test-III	B.N-3,B.N-4,B.N-5
CO: 3				
LO: Students will able to determine the quantity and timing of material requirements, and also to maintain the priorities for production process. Students will also able to use the tools of MRPs as bridge between master planning, purchasing and production.				
22	6	Operations Scheduling and Production Activity Control	Control for Mass Manufacturing: Assembly line balancing	B.N-3,B.N-4
23			batch processing, Job shop -n-jobs on single machine	B.N-3,B.N-4
24			n-jobs on Two/Three machines (Johnson’s Rule)	B.N-3,B.N-4
25			2-jobs on machines (Graphical method – Aker’s Algorithm)	B.N-3,B.N-4
CO: 2,3				
LO: Students understand the importance of allocation of resources to a project, scheduling of operations with batch production and mass production on different machines. Also understand the relationship among scheduling, planning and prioritization of projects and task.				
26	7	Quality Management	Evolution of Quality Concept,TQM,Quality Gurus (Juran , Crosby, Deming)	B.N-1,B.N-3,B.N-4
27			Statistical Process Control - Control Charts and their Applications	B.N-1,B.N-3,B.N-4
28			Acceptance Sampling, Operating Characteristics Curve and its applications	B.N-1,B.N-3,B.N-4
29			Quality Circles, Six Sigma, ISO 9000 & ISO14000.	B.N-1,B.N-3,B.N-4
30			TQM-Case Study-Industry perspective on Quality: Tom’s of Maine	B.N-5
CO:				

LO: To understanding the quality of products before manufacturing, within manufacturing and after manufacturing through quality control charts and understand the quality standard. Students also learn the corrective measures to improve the quality of products.

31	8	Emerging Trends in Operations Management	Business Process Reengineering (Principles and guidelines for implementation)	B.N-6
32			Theory of constraints	B.N-6

Assignment II - Theory of Constraints

CO: 2,4

LO: Students will understand the concepts of business process reengineering, its principles to redesign business process for achieving improvement in critical, contemporary measures of performance such as cost, quality, service and speed.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

14			Training Methods	B.N. 4/B.N. 1

15			Process	B.N. 4/B.N. 1
16			Orientation	B.N. 4/B.N. 1
17			HRD mechanism, HRD for Organisational Effectiveness	B.N. 4/B.N. 1
18			Case Study: God Helps Celestine	B.N. 5 P.89

CO:1,2

LO: Human Resource Training and Development process and method will help the students to understand the development of effective training programmes. HRD mechanism for organizational effectiveness will be learnt by the students in this unit.

19			Basic Concepts Objectives and Process of Performance Appraisal Systems	B.N. 3/B.N.2
20			Performance verses Potential Appraisal	B.N. 3/B.N.2
21	4	Performance Appraisal	Types of Employee Appraisal Systems, New Trends in Performance Appraisal Systems at Global level,	B.N. 3/B.N.2
22			Succession Planning, Career Planning and Assessment Centers	B.N. 3/B.N.2
23			Case Study : The Bulge	B.N. 5 Pg139

CO:1,3

LO: This Unit will make the students understand Appraising and Improving Performance by Performance Appraisal Systems. It will also help to understand Potential Appraisal, Succession Planning and Career Planning used by MNCs for employees to improve their performance.

24			Job Evaluation, Incentive and Reward System, Objectives	B.N. 1/ B.N.3
25	5	Maintenance of Human Resources	Major Phases of Compensation Management, Cross-national variation in reward structures	B.N. 1/ B.N.3
26			Case Study : Troubles never come singly	B.N. 5 P.125

CO:1

LO: This Unit will help the students to understand the importance of Job Evaluation Incentive and Reward System. The various methods of calculating the wages will also be learnt by the

students.				
27	6	Knowledge Management	HRM Knowledge & knowledge transfer, knowledge and situation cognition	B.N. 1/ B.N.3
28			Implications for knowledge transfer, knowledge management in multinational companies,	B.N. 1/ B.N.3
29			Knowledge management & International HRM.	B.N. 1/ B.N.3
30			Case Study- A Foreign Business Partner	B.N. 5 P. 197
31	Presentation			
32	Presentation			
CO:4				
LO: The last Unit makes the students understand the importance of Knowledge Management in various multinational companies & International HRM.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book Reference:

- 1 V. S. P. Rao, Human Resource Management, Vikas Publications.
- 2 Dessler, Verckey, Human Resource Management, Pearson Education, 2009

- 4 Subba Rao, Essential of HRM and Industrial Relation, 2008, Himalaya Pub. House
- 5 H. Kaushal: Human Resource Development, MacMillan

VII: Note:

- 1 There will be 2 group major assignments. Group size will be 4-5 students
- 2 There will be Group presentations of 30 minutes.
- 3 Class performance and discipline will be an important factor for assessing internal marks, it carries 2 marks.
- 4 The results of each tests and assignments will be declared within one week.
- 5 If any student does not submit assignments at time, credit will be given half mark after submission of assignment.

VIII Rubric for Internal Assessment			
Subject: Fundamentals of Human Resource Management			
MBA II Sem			
Goal: To provide a strong grounding in broad-based fundamental human resource management knowledge and skills to prepare students for meaningful and productive careers as human resource managers and professionals.			
Objective: To develop the student's ability to think critically and analyze opportunities to improve organizational performance through human resources management and also to provide student with analytical skills to utilize Human Resources metrics and technological applications to enhance the effectiveness of recruitment, training, development and retention of human resources.			
20-16 Marks	15-11 Marks	10-06 Marks	05-00 Marks
___ Students	___ Students	___ Students	___ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
___% Students are exceptionally good with the understanding of the dimensions of the management of human resources, students are able to connect the various theories of human resources with organizational working.	___% students shows good understanding of the dimensions of the management of human resources, students are able to connect the various theories of human resources with organizational working at some extant	___% students show little understanding of the dimensions of the management of human resources but students find it difficult to connect the various theories of human resources with organizational working.	___% students show very basic understanding of subject and incapable to connect various aspects with organizational working.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF BUSINESS MANAGEMENT AND RESEARCH, INDORE
Lesson Plan

Subject: Fundamental of Marketing Management
Class: MBA – II Sem

Session: Jan. - June

I: Course Objective:

The objective of this course is to help the students gain understanding of the functions and responsibilities of the marketing manager, provide them tools and techniques to perform the marketing function smoothly in an organization.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be worth 80 marks. It will have two sections, A and B section. Section A, worth 60 marks, will consist for 6 theory questions out of which student will be required to attempt any 4 questions. Section B, worth 20 marks, will consist of a case study.

III: Course Outcomes (CO):

- CO1 Understand the dynamics of marketing in business
- CO2 Relate marketing theories to practical situation
- CO3 Develop unique marketing mix
- CO4 Construct sales plan and professional interactive presentation

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2				1			2
CO 2		2						
CO 3		3	2		2		3	2
CO 4		1				2	3	

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Marketing Concepts	Introduction to Marketing, Customer Value & Satisfaction, Customer Delight, Difference Between Marketing and Selling	B.N. 1
2			Marketing Philosophies, Customer Value Chain	B.N. 1, 2
3			Marketing Mix & Corporate Strategies	B.N. 1
4			Scanning Marketing Environment Case: Ramsay Bakery Ltd., Biplab Bose, 3 rd Edition, pp. 140	B.N. 1, 4
Assignment: Analyze the Case and Submit the Write-up				
CO: 1,2,3				
LO: Identify core concepts of marketing and the role of marketing in business and society.				
5	2	Market Segmentation, Targeting & Positioning	Introduction to Segmentation, Types & Levels	B.N. 2, 4
6			Requirements of Effective Segmentation, Procedure of Segmentation Case: Segmenting Rural Markets, Kotler, South Asian Edition (13 th), pp. 209	B.N. 1, 2, 7
7			Evaluating Segmentation and Steps of Selecting a Segment.	B.N. 1, 2, 8
8			Positioning Strategies, Tools for Competitive Differentiation	B.N. 3, 6
Assignment: Take a Product, Develop its Positioning Strategy and Submit the PPT.				
CO: 1				
LO: Describe major bases for segmenting consumer and business markets; understand how different situations in the competitive environment will affect choices in target marketing & how to position a product in market.				
9	3	Product Decision	Defining Product, Levels of Product, Product Mix Case: P & G's New Connect – And – Develop Approach to Innovation, Kotler, South Asian Edition (13th), pp. 562	B.N. 1, 2, 5
10			Product Life Cycle	B.N. 1, 4
11			Product Diffusion Process	B.N. 4, 8
12			New Product Development	B.N. 1, 4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			Process	
13			Branding, Packaging & Labeling	B.N. 2, 4
CO: 2				
LO: Understand the fundamental concepts of product and brand development and management				
14	4	Pricing Decision	Defining Pricing, Pricing Methods & Strategies	B.N. 1, 2
15			Factors Affecting Pricing, Transfer Pricing, High Seas Pricing Case: Peakon Electronics System Ltd., Biplab Bose, 3rd Edition, pp. 295	B.N. 1, 4
16			Demand Forecasting, Price Elasticity, Pricing Decision Framework	B.N. 1, 3, 4
Assignment: Group Activity on Analyzing Pricing Strategies of Various Companies				
CO: 2				
LO: Understanding different pricing methods its application in the business world.				
17	5	Distribution Decision	Defining Distribution, Importance, Functions of Distribution Network	B.N. 2, 4
18			Deign of Distribution Network, Channel Members	B.N. 1, 2, , 4
19			Channel Management, VMS and HMS (In-class Discussion of Case)	B.N. 4
20			Wholeselling and Retailing, Logistics	B.N. 1, 2, 4
Assignment: Watch Video Case on <i>Mumbai Dabbawala</i> for In-class Discussion				
CO: 2				
LO: Identify the costs and benefits of marketing channels; discuss the firms and the functions involved in typical channels in India.				
21	6	Promotion Decision	Marketing Communication and Its Process	B.N. 1, 2, , 4
22			Promotion Mix & IMC	B.N. 1, 2
23			Advertising, Personal Selling & Sales Promotion	B.N. 1, 4
24			Publicity, Public Relation and Direct Marketing	B.N. 1, 2
CO: 2, 3				
LO: Understanding the role of promotion mix in marketing.				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
25	7	Marketing Strategies for Leaders, Followers and Challengers	Expanding & Defending Market Share	B.N. 4
26			Defining Strategic Object and Openness,	B.N. 2, 4
27			Follower's Strategies Case: Maruti Udyog Ltd. - I, S Neelamegham, 3rd Revised Edition, pp. 85	B. N.1, 3, 5
28			Choosing Attacking Strategies.	B.N. 1, 2
Assignment: Select a Sector; Find out its Leader, Challenger, Followers and Nicher and Submit a Strategic Analysis				
CO: 1				
LO: Ability to formulate marketing strategies that incorporate leaders, challenges, followers and Nichers.				
29	8	Emerging Trends in Marketing	Internet Marketing, Multi-Level Marketing, CRM	Book 1, 2, 4
30			CRM Process & Importance to Business, E-Marketing	Book 1, 2, 4
31			Green Marketing, Event Marketing, Rural Marketing, Cause Related Marketing, Event Marketing	Book 1, 4
32			Case: Facebook vs. Whatsap: 2014	
CO: 3				
LO: Acknowledge the emerging trends in marketing.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Kotler, Keller, Koshy, Jha, Marketing Management– A South Asian Perspective, Pearson, 13th Edition, 2008.

VII: Note:

1. There will be 8 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of marketing environment.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII Rubric for Internal Assessment			
Subject: For Fundamentals Of Marketing Management			
MBA II Sem			
Goal : To familiarize the students with the basic concepts and principles of marketing, and help them in understanding the basic marketing language.			
Objective: Provide students the understanding of marketing environment, marketing information system, customer relationship management, strategic issues in marketing for competitiveness. Also give them insight into conceptual framework, covering basic elements of the marketing mix; globalisation of marketing for organisational growth.			
20-16 Marks	15-11 Marks	10-06 Marks	05-00 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
___% Students are exceptionally good with the understanding of modern marketing concepts, tools, and techniques, shows the abilities and skills required for the performance of marketing functions.	___% students shows high understandings about modern marketing concepts, tools, and techniques, shows reasonably good abilities and skills required for the performance of marketing functions.	___% students shows good understandings about modern marketing concepts, tools, and techniques, shows abilities and skills at some extent which required for the performance of marketing functions.	___% students relate very few concept of marketing and need improvements.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Operations Research in Decision Making**Session:** Jan-June**Class:** MBA II Sem

I: Objective of the Course: The objective of this course is to help the students acquire quantitative tools, and use this tool for the analysis and solution of business problems. The emphasis will be on the concepts and application rather than derivations.

II: Examination: The faculty member will award marks out of a maximum of 20 marks (Internal Evaluation).

The semester examination will be worth 80 Marks (External evaluation). It will have two sections A & B, Section A worth 20 will consist of 3 theory questions out of which student will be required to attempt any two questions. Section B worth 60 marks will have 5 numerical problem out of which student will require attempting any four questions.

III: Course Outcomes (CO):

CO1 Understand the basic concepts of different advanced models of operations research and their applications.

CO2. Apply the models to incorporate rational decision making process in real life situations.

CO3. Formulate organizational problems into OR models for seeking optimal solutions.

CO4. Understand & use analytical and numerical techniques to make predictions and decisions

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2					3	2	
CO 2	3	3	3	2		2	3	
CO 3		2			1	3		
CO 4		3	3		3		2	

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Quantitative Techniques And Operation Research	Meaning, Scope of Quantitative Techniques	B.N:2, B.N:9

2			Operations Research In Management, Advantages And Limitations of Quantitative Techniques.	
CO: 1				
LO: To familiarize students with the basic concepts, models and statements of the operations research theory.				
3	2	Linear Programming	Meaning of Linear Programming, Advantage And Limitations of LPP, General Mathematical Formulation	B.N:2, B.N:9
4			Graphical Analysis of LPP	
5			Simplex Method, Minimization case	
6			Big-M Method	
7			Simplex Method, Maximization case	
8			Two-Phase Method of simplex	
9			Duality And Post Optimality	
CO: 2, 3				
LO: Solve linear programming problems using appropriate techniques and optimization solvers, interpret the results obtained and translate solutions into directives for action.				
10	3	Assignment Problem	Assignment Model As A Particular case of Transportation Problem	B.N:5, B.N:9
11			Formulation of Assignment Problems, Solution of Assignment Problems Using Hungarian Method (Minimization)	
12			Hungarian Method (Maximization), Solution of Assignment Problems Using Hungarian Method (Route Allocation)	

13			Travelling Salesman (Stage Coach),	
A-1: First Assignment (Worksheet)				
CO: , 2,3				
LO: Able to assign the given jobs to some workers on a one-to-one basis when times of performances are given for each combination and it is desired to complete the jobs in the least time.				
14	4	Transportation Model	Introduction of Model, Basic Feasible Solution through NWCR,LCM, RM,CM & VAM	B.N:6, B.N7
15			Vogel's Approximation Method, Optimization (maximization)	
16			Modified Distribution Method	
17			Modified Distribution Method	
18			Stepping Stone Method	
A-2: Second Assignment (Worksheet)				
CO: 3,4				
LO: Able to identify the optimal way of shipping goods from various sources to different markets so as to minimize the total cost involved in the shipping.				
19	5	Game Theory	Introduction To Games, Maximin And Minimax Principles, Pure And Mixed Strategies	B.N:4 , B.N:8
20			Solutions of Games Using – Algebraic and	
21			Graphical Methods	
22			Game Theory and Linear Programming	
CO:3, 4				
LO: Propose the best strategy using decision making methods under uncertainty and game theory				
23	6	Replacement Models	Introduction, Scope In Management, Individual Replacement	B.N:3, B.N:11

24			Individual Replacement with time value of Money	
25			Group Replacement	
A-3: Third Assignment (Worksheet)				
First Group Assignment: Importance of LPP in various Management field				
CO: 3,4				
LO: Will be able to prepare a plan of action regarding the steps to be followed while carrying out a particular replacement activity				
26	7	Simulation & Computer Solutions	Introduction to Simulation, Monte Carlo	B.N:5, B.N:9
27			Technique and Its Applications	
CO:3,4				
LO: Represent strategic situation as a game and obtain adequate solution to the situation with the help of game theory.				
28	8	Waiting Line Models :	Introduction, Scope in Management Decisions, Probability Calculations	B.N:6, B.N9
29			Queuing Models M/M/1 (Infinite & Finite Model)	
A-4: Fourth Assignment (Worksheet)				
CO: 2				
LO: Can use waiting line models to estimate system performance & make managerial decisions				
30	9	Dynamic Programming	Nature of Dynamic Programming Problem, Dynamic Programming Solutions	B.N:2, B.N:10
31			Integer Linear Programming: Meaning, Application, Integer Programming Algorithm (Branch & Bound Algorithm, Cutting Plan Algorithm)	
CO: 2,4				
LO: Able to solve multi-level decision problems using dynamic programming method using deterministic and stochastic dynamic programming approaches.				

32	10	Markov Chain Analysis	Computation Of Sequential Probability Of States For Different Periods, Steady State Probability of States And Application of Markov Chain	B.N:3, B.N:12
Second Group Assignment: How OR helps in business decisions?				
CO: 4				
LO: Propose the best strategy using decision making methods under uncertainty and game theory.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily take 08 to 10 lectures on any of the topic related to the subject.

VII: Note:

- 1 There will be Four home assignments, each carry 1 marks.
- 2 Two major group Assignments based on the practical aspect of the subject.
- 3 There will be one major Internal Test
- 4 Group size will be 4-5 students, & each group will be given separate topic of assignment
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan

VIII Rubric for Internal Assessment Subject: Operation Research for Business Decisions MBA II Sem			
<p>Goal : To make students able to use operation research as a helpful tool for solving complex problems under uncertainty, and understand methods that quantify issues and give business managers a better basis for making decisions.</p> <p>Objective: To familiarize students with the basic concepts, models and statements of the operations research theory so that students will be able to understand how to solve a real-world problem and obtain the right solution with the application of appropriate optimization tools.</p>			
20-16 Marks	15-11 Marks	10-06 Marks	05-00 Marks
__ Students	__ Students	__ Students	__ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
__% Students are exceptionally good with the understanding of quantitative tools. Students are able to analyze these tools and also able to relate application of these tools with real life situations.	__% Shows high understanding of subject and relate tools and techniques with real life managerial problems at some extent.	__% students have basic understanding of concepts and getting stuck between the problems, they find it difficult to relate it with real life managerial problems.	__% of students found difficulty to understand the concept. Students fails to correlate concepts with real life managerial problems, need more practice for improvement.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Object Oriented Programming using C++**Session:** July - Dec**Class:** MBA - III Sem

I: Objective of course: The objective of this course is to help students to understand the concepts of Object Oriented programming using C++ and their use in organization and processing complex business information. Information system so as to enable them to make more efficient use of information for decision making.

II: Examination The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have 7 questions out of which students will be required to attempt any 5 questions.

III: Course Outcomes (CO):

- CO 1 Understand the fundamentals of object oriented design, and have the ability to apply them.
- CO 2 To develop an application using OOP principles and proper program structuring
- CO 3 Demonstrate the concepts of polymorphism and inheritance
- CO 4 Learn error and exception solution in C++ programs

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	2	1					
CO 2		2				3	3	
CO 3		3	1			2		
CO 4	2		1					

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Object Oriented Programming	Introduction, Advantages of Object Oriented Programming	B.N. 9
2			Procedural versus Object Oriented Languages	B.N. 9
3			The concept of Objects, Classes	B.N. 9

4			Encapsulation, Data Binding	B.N. 9
5			Inheritance and Polymorphism	B.N. 9
A-1. First assignment, submission within 3 days				
CO: 1, 2 & 3				
LO: Understanding the concept and use of Object oriented programming and its difference with other languages				
6	2	Programming with C++	General forms of a C++ programme, I/O with cout and cin	B.N. 9
7			Types of operators, scope resolution operator	B.N. 9
8			Data types used in C++	B.N. 9
9			Working with loops, For while, do-while	B.N. 9
10			if-else, switch and conditional statements	B.N. 9
11			Unions and classes	B.N. 9
12			Constructors and destructors	B.N. 9
13			Member functions	B.N. 9
A-2. Second assignment, Submission within 3 days				
CO: 2 & 4				
LO: Technical and practical working of Basic C++ Programs, syntax Classes and Objects, Conditional statements and its applications				
14	3	Arrays & Pointers	Introduction to arrays of objects	B.N. 3
15			Pointer to object	B.N. 3
16			Function: General form, Prototypes	B.N. 3
17			Passing objects to functions	B.N. 3
18			Recursion and references.	B.N. 3
A-3. Group assignment, Submission within 5 days				
CO: 1 & 2				
LO: Awareness of the concepts of Arrays and Pointers				

19	4	Inheritance	Multilevel and Multiple Inheritance	B.N. 3
20			Application of Constructor, Destructor	B.N. 3
21			Private, Public and Protected access	B.N. 3
22			Function and operator overloading.	B.N. 3

A-4. Presentations**CO: 1****LO:** Understanding the Inheritance programming concept in object oriented software development.

23	5	Functions & Templates	Virtual function, Pure virtual function	B.N. 3
24			Polymorphism, generic functions	B.N. 3
25			Overloading of templates and functions	B.N. 3
26			Standard parameters with template functions	B.N. 3
27			Applying generic functions, and generic class.	B.N. 3

A-5. Class test**CO: 1 & 3****LO:** Awareness and application of the polymorphism concept

28	6	File and Exception handling	Introduction to templates and Exception handling	B.N. 3
29			File Classes, Opening and Closing a file	B.N. 3
30			Reading and writing a text file,	B.N. 3
31			Detecting EOF	B.N. 3
32			Examples of exception handling	B.N. 3

CO: 2 & 4**LO:** Knowing benefits of OOPS Exceptional handling mechanism compared to other Programming Language, application of C++ programs to implement error handling techniques using exception handling

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

III: Course Outcomes (CO):

CO1. To understand the use of information system in Business operations

CO2. To learn the process and development of Management Information System

CO3. Awareness of computer operation of Manual Information System

CO4. Helps in Managerial Decision Making, with the support of Information System

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	2	1					
CO 2		2				3	3	
CO 3		3	1			2		
CO 4	2		1					

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to MIS	The meaning and use MIS	B.N. 9
2			System View of Business, Process of MIS,	B.N. 9
3			Development of MIS within the organization, Management Process,	B.N. 9

4			Information Needs, System Approach	B.N. 9
5			Systems Approach in Planning MIS	B.N. 9
6			Systems Approach in Organizing and Controlling	B.N. 9
A-1. First assignment, submission with in 3 days				
CO: 1				
LO: Understand the leadership role of Management Information Systems in achieving business competitive advantage through informed decision-making.				
7	2	Planning MIS	Information system at various levels of Management (TPS,OAS,DSS)	B.N. 9
8			Information system at various levels of Management(HRIS,ESS,KWS)	B.N. 9
9			Planning of MIS	B.N. 9
10			Types of Plan	B.N. 9
11			Implementation of Management Information System	B.N. 9
12			Controlling Management Information System	B.N. 9
A-2. Second assignment, Submission within 3 days				
CO: 2				
LO: Analyze and synthesize business information needs to facilitate evaluation of strategic alternatives.				
13	3	Data processing and Computer systems	Fundamentals of Data Processing	B.N. 12
14			Sources and flow of Data	B.N. 12
15			Components of Computer Systems	B.N. 12
16			Flow Charts, Examples of Flow chart	B.N. 12
17			Conversion of Manual to Computer Based Systems	B.N. 12
18			Computer Systems Software, Application Software, Telecommunication Modem	B.N. 12

A-3. Group assignment, Submission within 5 days				
CO: 2 & 3				
LO: Apply Management Information Systems knowledge and skills learned to facilitate the acquisition, development, deployment, and management of information systems.				
19	4	Managerial Decision Making	Decision Making, Definition	B.N. 10
20			Types of Decisions- Unstructured, Semi-structured and Structured decisions	B.N. 10
21			Decision Support System	B.N. 10
22			Components of Decision Support System	B.N. 10
23			Difference between MIS and DSS	B.N. 10
24			Examples of DSS	B.N. 10
A-4. Presentations				
CO: 4				
LO: Effectively communicate strategic alternatives to facilitate decision-making.				
25	5	System Design	System design consideration	B.N. 10
26			Input/output design	B.N. 10
27			Forms design	B.N. 10
28			File organization and database	B.N. 10
29			Data management	B.N. 10
30			File design	B.N. 10
31			Program design	B.N. 10
32			Control and security	B.N. 10
A-5. Class test				
CO: 2 & 3				
LO: Understanding the application of system design and database management.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Management Information System			
MBA III Sem			
Goal : Understand the leadership role of Management Information Systems in achieving business competitive advantage through informed decision-making.			
Objective: The objective of this course is to help the student acquire the basic knowledge of information system so as to enable them to make more efficient use of information for decision making.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% of the student can apply Management Information Systems knowledge and skills learned to facilitate the acquisition, development, deployment, and management of information systems.	% students have lesser knowledge and skills learned to facilitate the acquisition, development, deployment, and management of information systems.	% Offers minimal knowledge and skills learned to facilitate the acquisition, development, deployment, and management of information systems.	% Have Low degree of knowledge and skills learned to facilitate the acquisition, development, deployment, and management of information systems.

IX : Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** RDBMS using ORACLE
Dec**Session:** July -**Class:** MBA - III Sem**I: Objective of course:** The objective of this course is to help students to understand the basics of Relational Database Management System, and back-end Tool using ORACLE and their use in organization and processing complex business information.**II: Examination:** The faculty member will award internal marks out of 20 (10 marks for the internal performance of the student and 10 marks for viva voce). The semester examination carrying 80 marks will have 7 questions out of which students will be required to attempt any 5 questions.**III: Course Outcomes (CO):**

CO 1 To understand the basics of Relational Database Management System

CO 2 Managing the data into well organized manner

CO 3 Learn the SQL query languages in DBMS

CO 4 Learn the concept of centralize database using data mining and data warehousing

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1		1		2		1	
CO 2	1		1				2	
CO 3			2					
CO 4	2		3		3		3	

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Database Management Systems	Introduction to Data, Database, Database Management Systems	B.N. 9
2			Types of Database Management Systems	B.N. 9
3			Relational database management systems	B.N. 9

4			Hierarchical database management systems	B.N. 9
5			Network database management systems	B.N. 9
6			Object oriented database management systems	B.N. 9
7			Entity Relationship Model (E-R Model)	B.N. 9
8			Normalization Theory	B.N. 9
9			Codd's Rules for RDBMS	B.N. 9

A-1. First assignment, submission within 3 days

CO: 1 & 2

LO: Awareness about theory and application of Database Management Systems and other Relationship models in practical working situation.

10			Concepts of RDBMS, Components of RDBMS	B.N. 9
11			Introduction to SQL	B.N. 9
12			Data Definition language, Data Manipulation Language, Query Language, Data Control Language	B.N. 9
13			Cartesian Product and Joins	B.N. 9
14			Use of Union	B.N. 9
15			Use of Intersection, Minus	B.N. 9
16			SQL operators and functions	B.N. 9
17			SQL select statement and type of queries	B.N. 9
18			Exists, Group by Having and Like clause in SQL	B.N. 9

2

Relational Database Management Systems

19			View, Sequence and synonyms	B.N. 9
20			Creating reports using SQLPLUS	B.N. 9
A-2. Second assignment, Submission within 3 days				
CO: 1 & 3				
LO: Understanding and learning concepts of Relational Database Management Systems, SQL language commands and their utility in Computer programming.				
21	3	SQL/PLSQL	Introduction to PL/SQL	B.N. 3
22			The PL/SQL block constructs	B.N. 3
23			Using variables and SQL statement in the PL/SQL block	B.N. 3
24			PL/SQL constructs like If..Else..End if, Loop. .End loop, while loop	B.N. 3
25			working master detail relationship	B.N. 3
26			Writing triggers informs and creating list of values with cursors	B.N. 3
27			Creating and using stored functions	B.N. 3
28			Procedures and packages	B.N. 3
CO: 3				
LO: Basic knowledge about PL/SQL, The PL/SQL block constructs, learning of loops				
29	4	Advanced Database Concepts	Data mining, data warehousing-design	B.N. 3
30			Online Analytical Processing (OLAP)	B.N. 3
31			Transaction management	B.N. 3
32			Failure & recovery of Data	B.N. 3
A-3. Presentations				
CO: 4				
LO: Understanding the Advanced Database Concepts, knowledge about Data mining, Data warehousing and Data recovery				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: RDBMS using ORACLE			
MBA III Sem			
Goal : To have a broad understanding of database concepts and database management system software			
Objective: The objective of this course is to help students to understand the basics of Relational Database Management System, and back-end Tool using ORACLE and their use in organization and processing complex business information.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students can design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.	% students have lesser knowledge of design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.	% Offers minimal knowledge of computing and mathematics appropriate to the discipline.	% Have Low degree of knowledge and skills for concepts and database management system software

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

INSTITUTE OF BUSINESS MANAGEMENT AND RESEARCH
IPS ACADEMY, INDORE
Lesson Plan

Subject: Project Management

Session: Jul-Dec

Class: MBA- III

I: Objectives: To develop understanding of project planning. To develop ability to monitor and control projects and risk involved. To become familiar with tools and techniques used in managing projects.

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 32 marks will have 4 theory questions out of which students will be required to attempt any two questions. Section B carrying 48 marks will contain five numerical out of which students will be required to attempt any three questions.

III: Course Outcomes (CO):

- CO1 Understand the Concepts of Project management at the individual, team and organizational level and also understand the Team-building skills required to support successful performance
- CO2 Practical applications of project management to formulate strategies allowing organizations to achieve strategic goals. And give a perspective of leadership effectiveness in organizations
- CO3 Learn to develop a project scope while considering factors such as customer requirements and internal/external goals
- CO4 Develop Critical-thinking and analytical decision-making capabilities to investigate complex business problems to propose project-based solutions

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	1	2			2	1
CO 2	1	3	3	3	3	2	2	2
CO 3	1	1	2	2	3	2	2	3
CO 4		3	3		3		1	2

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub-topic	Reference
1	1	Project Management	Introduction to Project Management	B.N-6,B.N-5
2			Characteristics and types of projects	B.N-6,B.N-5
3			Gaining importance, project life cycle and its phases	B.N-6,B.N-5

CO: 1

LO: Understand the meaning of project management and to understand the importance of project management as it effects strategy and business success
--

Lecture No.	Unit No.	Topic	Sub-topic	Reference
4	2	Project Selection	Project selection, non quantitative and scoring models	B.N-2,B.N-8
5			technical analysis and technology selection,	B.N-2,B.N-5
6			market potential analysis	B.N-2,B.N-5
7			techniques of long term forecasting	B.N-2,B.N-5
CO: 2				
LO: 1.understand the methods of project selection and importance of strategic planning, of priority setting 2.understand project prioritization methods and scoring models and project forecasting				
8	3	Financial Analysis	Financial feasibility, determinants of cost of project	B.N-9,B.N-5
9			Project financing and deciding optimum capital structure	B.N-9,B.N-5
10			Cash flows from project and owner's perspective.	B.N-9,B.N-5
11			Project Appraisal	B.N-9,B.N-5
A1: Importance of Feasibility study in Current Scenario.				
CO: 2				
LO: 1.Adapt the Concept of Feasibility Analysis 2.understand various types of costs 3. understand the relationship between costs and schedules / the need for time based estimates 4.Understand estimates of times and costs which is fundamental to project success				
12	4	Financial feasibility with risk	Financial feasibility with risk. Types of risk	B.N-8,B.N-6
13			techniques of risk evaluation and its mitigation	B.N-8,B.N-6
14			Sensitivity analysis, Hiller's model	B.N-8,B.N-6
15			scenario analysis, simulation	B.N-8,B.N-6
CO: 4				
LO: 1.Understand the concept of risk and how risk differs from planned activities 2.Describe the different models of Sensitivity Analysis				
16	5	Network Analysis	Network analysis, construction of networks	B.N-8,B.N-7
17			CPM	B.N-8,B.N-7
18			various types of floats and their application	B.N-8,B.N-7
19			PERT and its applications	B.N-8,B.N-7
20			Practical Problems PERT	B.N-8,B.N-7
Class Test based on University Examination Pattern				
CO: 4				
LO: 1.understand the use and nature of a CPM and be able to define tasks, predecessors and successors 2.be familiar with project control mechanisms such as gant charts and networks				

Lecture No.	Unit No.	Topic	Sub-topic	Reference
21	6	Time Cost Relationship	Time cost relationship, crashing for optimum cost and optimum time	B.N-8,B.N-7
22			Practical Problems	B.N-8,B.N-7
23			Resource leveling	B.N-8,B.N-7
24			Introduction to project software and applications of MS Project	B.N-8,B.N-7
25			project manager's skills and functions	B.N-8,B.N-7

CO: 4

LO: understand the relationship between costs and schedules / the need for time based estimates also be able to compute early start / finish and late start/finish and critical paths and introduce the concept of slack and of crashing

26	7	Human Aspects of Project management	Matrix organization	B.N-5,B.N-6
27			Social Cost Benefit Analysis	B.N-5,B.N-6
28			UNIDO approach	B.N-5,B.N-6
29			Shadow pricing.	B.N-5,B.N-6

CO: 2

LO: ensure that all understand where and why project management and project leadership are different and where human aspect of project management is required.

30	8	Project Monitoring	Project monitoring, Earned Value Analysis	B.N-2,B.N-7
31			PMIS	B.N-2,B.N-7
32			Project Termination and Audit. Reasons for failure	B.N-2,B.N-7

A2: Why SCBA is important for Project evaluation

CO: 4

LO: 1. Understand the values of a project oversight function and practice within a company's management structure
2. Understand what an audit is, what its constituent parts are, and how an audit is best conducted and also the project closure process

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book Reference:

1. Gido Effective Project Management 3rd 2008 Cengage Learning
2. Gray & Larson, Project Management: The Managerial Process, 3e TMH 2010

7. Gopalakrishnan - Textbook of Project Management, 2005 - Macmillan Publishers
8. Rajiv M. Gupta, Project Management, PHI publication.
9. Vasant Dasai, Project management, Himalaya publication

VII: Note:

1. There will be 2 group assignments/presentations; group size will be 4-5 students.
2. There will be 1 major tests based on the practical and theory aspects of the subjects, marks of which will be included in internal marks.
3. Attendance will be a multiplying factor which will render significant impact on the internal marks of the student.
4. Class performance and discipline will be an important factor for assessing internal marks. It carries 2 marks.

VIII Rubric for Internal Assessment Project Management			
Subject: Project Management			
MBA III Sem			
Goal : Students will be able to demonstrate analytical and critical-thinking skills in the context of organizational decision making.			
Objective: To develop understanding of project planning. To develop ability to monitor and control projects and risk involved. To become familiar with tools and techniques used in managing projects.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Can implement project management knowledge, processes, lifecycle and the embodied concepts, tools and techniques in order to achieve project success.	% Accurately described most of the outcomes and expectations for the project, project initiation tools/templates, but some were completed incorrectly	% described less than half of the outcomes and expectations for the subject Learned some project concepts, but few were missing	% Content is unclear, inaccurate, and/or incomplete; Knowledge about subject is weak or poorly gained.

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject: Strategic Material & Supply Chain Management****Session: July - Dec****Class: M.B.A. III Sem**

I: Objectives of course: - This course would help students develop an understanding about the strategic role of supply chain, key issues of supply chain and the drivers of supply chain performance. The course would acquaint the students with various concepts, models and decision making tools pertaining to supply chain network design, forecasting, inventory, transportation etc. and also enable them to apply the tools in real-life situation

II: Examination The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/Numerical.

III: Course Outcomes (CO):

1. This course will expose students to the challenges involved in managing supply chains.
2. To demonstrate the students the complexity of inter-firm and intra-firm coordination.
3. The subject focuses on relatively long term decisions involving the investment in productive resources, configuration of processes, product designs, and development of partnerships with suppliers and channels of distribution.
4. This course will enhanced student's ability to use analytical tools and conceptual frameworks to make decisions in supply chain contexts as well as a better understanding of the major strategic issues and trade-offs that arise in supply chain management.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2							2
CO 2					2			
CO 3	2		3				1	
CO 4			3				1	

V: Session Plan:

Lecture No	Unit No.	Topic	Sub-topic	Reference
1	1	Material Management	Importance of materials management	B.N.1
2			Codification	B.N.1
3			Simplification	B.N.1
4			Value analysis	B.N.1
5			Value engineering	B.N.1
A-1 First Assignment Submission within 3 Days				
CO: 1				
LO: To understand factors that influence materials flow, Plan and control manufacturing systems, Improve communications and understanding of all functions in a manufacturing process				
6	2	Concepts and importance of a Supply Chain	Concept and Evolution of Supply Chain Management	B.N.5 & B.N. 6
7			Importance and Key issues of Supply Chain Management	B.N.5 & B.N. 6
8			Competitive and SC strategies	B.N.5 & B.N. 6
9			Achieving strategic fit	B.N.5 & B.N. 6
A-2 Second Assignment Submission within 3 Days				
CO: 1				
LO: Analyze the manufacturing operations of a firm and apply sales and operations planning, MRP and lean manufacturing concepts.				
10	3	Dynamics of supply chain:	Supply Chain Interventions,	B.N.5 & B.N. 6
11			Push-based, Pull-based SC	B.N.5 & B.N. 6
12			Push-Pull based supply chain	B.N.5 & B.N. 6
13			Network design in SCM	B.N.5 & B.N. 6
14			Operations in the Supply Chain	B.N.5 & B.N. 6

A-3 Group assignment Submission within 3 Days				
CO: 2				
LO: understand how supply chains behave in practice: reality and complexity and understand how to manage complexity in supply chains.				
15	4	Demand Forecasting in a Supply Chain	Demand Forecasting in a Supply Chain	B.N.5 & B.N. 6
16			The value of information, Bullwhip effect	B.N.5 & B.N. 6
17			Its Causes and remedial measures.	B.N.5 & B.N. 6
A-4 Fourth Assignment Submission within 3 Days				
CO: 2 & 3				
LO: To understand Overview of forecasting, Forecast errors, Aggregate planning in the supply chain, Managing demand and Managing capacity.				
18	5	Managing inventory in SC environment	Concept of inventory	B.N.5 & B.N. 6
19			Basic and Advanced inventory models	B.N.5 & B.N. 6
20			Multi-echelon inventory models	B.N 6
CO: 3				
LO: To understand Transportation Management, Inventory Management and the concept of Warehouse/Distribution Center Management				
21	6	Transportation in SC environment	Transportation in SC environment	B.N.5 & B.N. 65
22			Design options for a transportation network,	B.N.5 & B.N. 6
23		Case Study	Heinz Gets to one number forecasting	
CO: 3				
LO: Understand the components of an integrated logistics management system, Identify the decisions involved in transportation management and Describe the role of packaging in the transport, distribution, storage, sale, and use of goods.				
24	7	Strategic Outsourcing and Strategic Alliances	Strategic Outsourcing and Strategic Alliances	B.N.5 & B.N. 6

25			Third party logistics	B.N.5 & B.N.6
26			fourth party logistics	B.N.5 & B.N.6
CO: 2 & 3				
LO: To learn the precise definition of outsourcing and to learn why organizations outsource manufacturing and service business process.				
27	8	Retailer- Supplier partnerships (RSP)	Retailer- Supplier partnerships	B.N.5 & B.N.6
28			Supplier evaluation and selection	B.N.5 & B.N.6
29			Use of best practices	B.N.5 & B.N.6
A-5 Fifth Assignment Submission within 3 Days				
CO: 3				
LO: To understand reason Supplier partnerships, vision, mission and goals of supplier partnership and to understand reason, principles, sourcing and selection of supplier.				
30	9	Information Technology (IT) in Supply Chain Management	Information Technology (IT) in Supply Chain Management	B.N.5 & B.N.6
31			SC performance model: SCOR model	B.N.5 & B.N.6
32		Case Study	Dell’s Supply Chain Management Strategy 2010	
A-6 Group Assignment Submission within 3 Days				
CO: 3				
LO: develop logistics-related information technology concepts and their practical relevance, support the management in logistics and supply chain operation mode with the use of information technology.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Text Book

1. Gopalakrishnan Purchasing and Materials Management, 1e TMH 2008
2. Upendra Kachru Exploring the Supply Chain, Excel Books, 2009

9. Shapiro, Modelling the Supply Chain, 2007 New Delhi:
10. Cengage Learning Webster Principles & Tools for Supply Chain Management, 2008,

VII: Note

1. There will be six class tests /assignment/presentation of 10-15 minutes each without declaration of the date. It Carries 4 Marks.
2. There will be three major tests based on the practical and theoretical aspect of the subjects. Each carry two marks, the marks of the best of two major tests will be included in internal marks.
3. There will be two major group assignments; group size will be of 3 or 4 students. Each group will be given separate topic of assignment. Each assignment carries 3 marks.
4. Class performance and discipline will be an important factor for assessing internal marks, it carries 4 marks.
5. The result of each tests/assignment will be declared within one week.
6. If any student doesn't submit assignment on time, half marks credit will be given after submission of the assignment.
7. Attendance will be a multiplying factor as per given in academic plan.

VIII Rubric for Internal Assessment			
Subject: Strategic Management & Supply Chain Management			
MBA III Sem			
Goal : This course would help students develop an understanding about the strategic role of supply chain, key issues of supply chain and the drivers of supply chain performance.			
Objective: The course would acquaint the students with various concepts, models and decisionmaking tools pertaining to supply chain network design, forecasting, inventory, transportation etc. and also enable them to apply the tools In real-life situation.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% are able to take decisions in logistics and supply chain management considering its operational, tactical and strategic aspects from an integrated perspective by covering subjects from technology, engineering and business.	% be able to take into account the relationships between this discipline and other areas of business to make holistic judgments when analyzing business situations.	% Students have basic understanding about logistics and supply chain management.	% Students have not appropriate understanding about logistics and supply chain management.

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Bank and Insurance Management**Session:** Jan.-June**Class:** M.B.A III Sem**I: Objective of the course:**

The objectives of this course are to explain to the student operations of upcoming insurance and banking sector, statutory requirements and understanding of financial environment and market in which they operate

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/Numerical.

III: Course Outcomes (CO):

- CO1 Critically understand the theories, concepts and legal implications related to banking and insurance subject areas.
- CO2 Understand the risks faced by banks and ways to overcome them.
- CO3 Understand the importance of life and non life insurance in risk management and selection of right type of policy.
- CO4 Analyze financial statements of banking and insurance sector

CO: 1 & 2				
LO: Understand the concept and types of product to be sold to the target customers.				
5	2	Product Strategy & Planning Model	Product Strategy and its types	B.N. 2, 4
6			Defining Product Planning Model Case: Dabur India Limited, Product Policy & Brand Management, A.K. Chitle& Ravi Gupta, pp.257.	B.N. 1, 2, 7
7			Objective Setting, Types of Objectives	B.N. 1, 2, 8
8			Monitoring the Environment for Planning Product	B.N. 3, 6
9			Situational Analysis and Development of Market Program	B.N.5,6,7
10			Product Mix Strategy	B.N.1,2,4
Assignment: Group Assignment- Submit Presentation on Case Study				
CO: 2 & 3				
LO: Able to plan a product, product development process and formulating product related strategies.				
11	3	Product Line and Mix Decision	What is Product Line, Line Elements Case: Lux Beauty Soap,Product Management, S.A. Chunawalla, 9 th Edition , pp.271.	B.N. 1, 2, 5
12			Line Extension/ Stretching and Retrenchment	B.N. 1, 4
13			Product Mix Decision	B.N. 4, 8

Lecture No.	Unit No.	Topic	Sub Topic	Reference
14			Benefits of Product Mix	B.N. 1, 4
Assignment: Group Activity on Analyzing Product Mix of Various Companies				
CO: 3 & 4				
LO: Able to understand product mix and take decision for mix expansion.				
15	4	Market Structuring	What is Market Structure, Types of Market Structure	B.N. 2, 4
16			Characteristics of Each Market Structure	B.N. 1, 2, , 4
17			Positioning Strategies for Each Market Structure (In-class Discussion of Case)	B.N. 4
Assignment: Give Write up on Positioning Strategies Adopted by Companies in India				
CO: 1 & 2				
LO: Become aware of different types of market structure with important positioning styles to particular market.				
18	5	Strategic Management of Brand and Their Equities	Brand Management, Importance of Brand Management	B.N. 1, 2, , 4
19			Techniques of Brand Management	B.N. 1, 2
20			Defining Brand Equity, Benefits of Brand Equity, How Equity Create Case: Brand Architecture: A Case Study of Colgate, product Management & New Product Development, Dr. R.K. Shrivastava, pp.169	B.N. 1, 4
CO: 1 & 3				
LO: Able to understand the brand and create equity.				
21	6	Product Development	Product Development, Key Parameters to be Considered While Product Development	B.N. 4
22			New Product Development Process, Stages of Product Development	B.N. 2, 4
23			Characteristics of Successful Product Development Case: Kinetic Honda, U.C.Mathur, pp.501	B. N.1, 3, 5
Assignment: Group Assignment to Develop a Product and Define Market Strategies				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
CO: 3 & 4				
LO: Get to know about new product development process.				
24	7	Test Marketing	Test Market, Test Marketing & Its Objectives	B.N. 1, 2, 4
25			Testing a Product and Study of Other Critical Elements of Marketing Mix	B.N. 1, 2, 4
26			Design Consideration in Test Marketing	B.N. 1, 4
27			Alternatives to Test Marketing Procedures	B.N.1,4
28			Product Launch Tracking & Re-launch	B.N.1,3,4
29			Limitations of Test Marketing	B.N.1,3,4
CO: 2 & 4				
LO: Understand the methods of market testing.				
30	8	Test Market Planning	Test Market Planning, Stages of Test Market Planning	B.N.2,3
31			Market Evaluation	B.N.5,7,8,10
32			Introduce Strategies	B.N.5,6
Assignment: Class Test & Discussion				
CO: 3				
LO: Ability to Conduct test marketing in target market.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE

Lesson Plan**Subject:** Product Innovation and Planning**Session:** Jul-Dec**Class:** MBA III Sem**I: Objective of the course:**

The objective of this course is to improve the understanding of and competence in making product-market choices, managing brands, and managing new product introduction. Explore the emerging concepts, techniques, and analytical approaches relevant to the above areas. The emphasis will be on the application of concepts and tools used in PPC for achieving efficiency and quality superiority.

II: Examination:

The faculty member will award internal marks out of 20 (12 for Tests and 8 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases.

III: Course Outcomes (CO):

1. This provide students an in-depth understanding of innovation and new product development using a management framework
2. It focuses on how to create value and growth through innovation in new and existing markets
3. Students will explore the concepts, methods and tools on how to organize and manage innovation process with the objective to better control cost and risk, examine the process of developing new products and many of the new product management issues faced by companies
4. students will learn to understand how firms can improve the way they manage their innovation processes to develop new products and services and keep abreast of the most recent developments in the innovation field

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Product strategy	Proposed Product Planning	B.N.4/B.N.6
2			Model-Setting Objectives	B.N.4/B.N.6
3			Monitoring the Environment, Situation Analysis,	B.N.4/B.N.6
4			Development of a Product/Market Program,	B.N.4/B.N.6
5			Product Mix Strategy	B.N.7
6			Analysis of product line and product mix decisions	B.N.10
CO: 1				
LO: To understand the development of an integrated marketing communication strategy for marketing products, concepts, goods, or services based on an identified target market.				
7	2	Idea generation	Concept and product development and evaluation, and business analysis	B.N. 10
8			Characteristics of Successful Product Development, New Product Development Process and Organizations.	B.N.9
Assignment Submission				
CO: 1				
LO: Based on analysis of the product context, the students can build a vision on the new product to be developed and determine its focus, its added value, its degree of innovation and its conditions.				
10	3	Product testing	Testing products and other critical elements of marketing mix	B.N.5/B.N.6
11			Test Marketing Objectives, Limitations of Test Marketing, Design Consideration in Test Marketing, Alternatives to test Marketing Procedures	B.N.5/B.N.6

12			Product Launch Tracking, Relaunch	B.N.5/B.N.6
13			Test market planning, evaluation, and introduction strategies.	B.N.5/B.N.6
Assignment Submission				
CO: 2				
LO: Demonstrate understanding of market segmentation and targeting and demonstrate understanding of consumer behavior.				
15	4	Materials Planning and Control	Input Required for Materials Planning and Control	B.N.1/B.N.3
16			Steps in Materials Planning and Control,	B.N.1/B.N.3
17			Techniques of Materials Planning and Control	B.N.1/B.N.3
18			Machining Allowances, Make or Buy Decision,	B.N.1/B.N.3
19			Scientific Stock Control Techniques (Inventory Control Models)	B.N.1/B.N.3
20		Case Study-Nissan Motor company Ltd		
CO: 2 & 3				
LO: Understand the core features of the operations and production management function at the operational and strategic levels, specifically the relationships between people, process, technology, productivity and quality and how it contributes to the competitiveness of firms.				
22	5	Factors Influencing Process Planning	Step in Process Planning	B.N.2/B.N.3
23			Process Selection	B.N.2/B.N.3
CO: 3				
LO: Be able to understand different Factors Influencing Process Planning, various Step in Process Planning, and Process Selection.				
24	6	Manufacturing resource planning (MRPII)	Introduction, Aggregate production planning, master production scheduling,	B.N.2/B.N.3
25			MRP II (Introduction, concepts), MRP II with Just in Time	B.N.2/B.N.3
26			choice of	B.N.2/B.N.3

			software, making MRP II system work	
27			achieving business objectives with MRP II	B.N.2/B.N.3
Group Assignment				
CO: 3&4				
LO: Be able to understand that material and components are available for production, and final products are ready for dispatch.				
28	7	Scheduling	Factors Influencing Scheduling, Working and Scheduling Charts	B.N.1
29			Job Sequences (n job on two machines, n job on three machines)	B.N.1
30			Project Scheduling,	B.N.1
			Critical Ratio Scheduling	B.N.1
CO: 3				
LO: Understand what scheduling involves and the importance of good scheduling and discuss scheduling needs in high-volume and intermediate-volume systems.				
31	8	Capacity Planning	Capacity Planning	B.N.2/B.N.3
32			Integrated Production Planning and Control	B.N.2/B.N.3
CO: 4				
LO: Understanding methods of measuring capacity, planning capacity, and calculating capacity utilization. Explain the impact of economies of scale, diseconomies of scale, and experience curves on capacity.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be worth 80 marks. It will have two sections: A and B. Section A, worth 60 marks, will consist for 6 theory questions out of which student will be required to attempt any 4 questions. Section B, worth 20 marks, will be consist of one or more numerical questions.

III: Course Outcomes (CO):

CO 1: Students are able to understand the techniques of raising productivity.

CO 2: Students are able to understand how optimum use of human and other resources can be obtained.

CO 3: Students will be able to evaluate the work-content through work-measurement.

CO 4: Students will learn to select the appropriate jobs and set the time standards for jobs.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	2					
CO 2	2		3	1		2		
CO 3								
CO 4			1			1		

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Concepts and Definition of Productivity	Concepts and Definition of Productivity	B.N. 1, 3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
2			Productivity Improvement Factors	B.N. 1, 2
3			Types of Productivity	B.N. 2, 3
4			Numerical on Productivity	B.N. 1, 2
CO: 1				
LO: Students understand to apply relevant techniques and problem-solving methodologies so as to enable them to manage projects concerned with productivity improvement successfully.				
5	2	Work Content	Work Content of a Job	B.N. 1
6			Concept of Ineffective Time	B.N. 1, 2
7			Management Techniques to Reduce Work Contents	B.N. 1, 3
8			Management Techniques to Reduce Ineffective Time	B.N. 1, 3
CO: 1 & 2				
LO: Students will able to identify non-value adding operations by investigation of all the factors affecting the jobs, will able to establish time standard for jobs.				
9	3	Human Aspects of Work Study	Roles of Management and Supervisor	B.N. 1, 2
10			Role of the Work Study Man	B.N. 3
11			Factors Affecting Working Conditions, Ergonomics	B.N. 1, 2
CO: 2				
LO: Students learn to deal with the human resource of organization while assigning the jobs.				
12	4	Introduction and Selection of Jobs	Introduction and Selection of Jobs	B.N. 1, 3
13			Flow Diagram, String Diagram	B.N. 2, 3
14			Flow Process Chart	B.N. 3
15			Multiple Activity Chart, Travel Chart	B. N. 2, 3
CO: 4				
LO: Students understand the basic manufacturing system and also able to determine sequence of assembly and scheduling activities of organizations.				
16	5	Principles of Motion Economy	Definition and Concepts	B.N. 2
17			Classification of Movements	B.N. 1,3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
18			Micro Motion Study	B.N. 1, 2
19			SIMO Charts	B.N. 1, 2
CO: 2				
LO: Students learn to eliminate wastage of time and labour.				
20	6	Work Measurement	Concept, Purpose and Use	B.N. 2, 3
21			Procedure of Work Measurement	B.N. 1, 3
22			Time Study	B.N. 1
23			Selection of a Job	B.N. 1, 2
CO: 3				
LO: Students are able to calculate standard time required for completing various operations of organizations.				
24	7	Making a Time Study	Rating a Job	B.N. 2, 3
25			Allowance and Types	B.N. 2
26			Techniques of Work Measurement	B. N.1, 3
27			Numerical on Time Study	B.N. 1, 2
CO: 3 & 4				
LO: Students understand the purpose of work measurement and methods that organizations use to perform time studies, calculate standard times, and estimate the proportion of time spent performing different types of tasks.				
28	8	Sampling and PMTS	Sampling and Synthesis	B.N. 1, 2
29			Analytical Estimating	B.N. 3
30			Pre Determined Motion Time Systems (PMTS)	B.N. 2, 3
31			Numerical on PMTS	B.N. 1, 2
32			Detailed Discussion on 5 DAVV Exam Papers	B.N. 2, 3
CO: 1 & 2				
LO: Students understand the concept of work-study and its techniques.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan**

Subject: Strategic Management
Class: MBA IV Sem

Session: January - June

I: Objective of the Course: This is a top-level management course, and the objective of teaching this course is to enable students to integrate knowledge of various functional areas and other aspects of management, required for perceiving opportunities and threats for an organization in the long run and second generation planning and implementation of suitable contingency strategies for seizing / facing these opportunities & threats.

II: Examination: The faculty member will award marks out of a maximum of 20 and the bifurcation is mention in the scheme of internal marks.

Students shall be evaluated on two components, internal and end semester examination. Internal component shall be of 20 marks based on continuous evaluation .The Semester Examination will be worth 80 marks, it will have two Section, A and B. Section A, worth 60 marks will comprise of seven theory questions out of which a student will be required to attempt any four questions. Section B worth 20 marks will contain Cases.

III: Course Outcomes (CO):

CO 1: Knowledge of various functional areas and other aspects of management.

CO 2: Understanding for the concepts and tools that support strategic management in organizations is developed.

CO 3: Ability to apply the concepts to analyze strategic issues in organizations and to develop strategies for implementation is developed.

CO 4: Specific knowledge of frameworks and concepts related to strategy formation, strategic change, and strategic innovation.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	1		3			
CO 2	3	2		1				
CO 3	3	3	3	2	2	2	1	
CO 4	3	3	3	3	3	3	3	

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Strategic Management	Meaning, Need and Process of Strategic Management	B.N: 1 , B.N: 5
2			Business Policy, Corporate Planning and Strategic Management	
3			Single and Multiple SBU organizations	
4			Strategic Decision–Making Processes	
5			Strategists at Corporate Level and at SBU Level	
6			Interpersonal, Informational and Decision Roles of a Manager. <i>Case: McDonalds’ Corporation.</i>	
A-1: First Assignment				
CO: 1 & 2				
LO: Students get acquainted with the concept of strategic management and able to utilize different strategies at corporate level.				
7	2	Mission and Its Objective	Mission	B.N: 2 , B.N: 5
8			Business Definition and Objectives	
9			Need, Formulation and changes	
10			Modified Distribution Method	
11			Hierarchy of objectives, Specificity of Mission and Objectives. <i>Case: Wal-Mart</i>	
First Group Assignment: Case Analysis (MRF Limited)				
CO: 1 & 2				
LO: Developed understanding of the process of formulation of Mission and Objectives of business organizations.				

12	3	Strategic Environment	SWOT Analysis, General, Industry and International Environmental Factors.	B.N: 3, B.N: 4
13			Analysis of Environment, Diagnosis of Environment – factors influencing it	
14			Environmental Threat and Opportunity Profile (ETOP)	
15			Internal Strengths and Weaknesses; Factors affecting; Techniques of Internal Analysis	
16			Strategic Advantage Profile (SAP).	

CO: 3

LO: It develops the skill of utilizing different tools to analyze the organization's situation through SWOT, ETOP and SAP analysis.

17	4	Strategy Alternatives	Strategy Alternatives, Grand Strategies and their sub strategies	B.N: 2, B.N: 9
18			Stability, Expansion, Retrenchment and Combination;	
19			Internal and External Alternatives; Related and Unrelated Alternatives,	
20			Horizontal and Vertical Alternatives; Active and Passive Alternatives	
21			International Strategy Variations	

A-2 : Second Assignment**CO: 2 & 4**

LO: Insights developed in relation to the concept, importance and various types of strategies and sub-strategies useful for any organization.

22	5	Strategic Choice and Analysis	Strategic Choice and Analysis; Managerial Choice Factors	B.N: 3 ,B.N: 6
23			Choice Processes – Strategic Gap Analysis, ETOP-SAP Matching,	

24			BCG Product – Portfolio Matrix, G.E. Nine Cell Planning Grid	
25			Prescriptions for choice of Business Strategy; Choosing International Strategies. <i>Case : Apple</i>	
A-4: Fourth Assignment				
CO: 2 & 3				
LO: It acquaints the students with the Strategic Analysis techniques.				
26	6	Implementation of Strategies	Strategy Implementation, Concept, Barriers, Implementation Process;	B.N: 1, B.N: 6
27			Project & Procedural Implementation, Structural Implementation; Plan and Policy Implementation;	
28			Leadership Implementation; Behavioral Implementation,	
29			Implementing Strategy in International Setting	
CO: 2 & 4				
LO: Create understanding of how to implement strategy in International Setting.				
30	7	Evaluation of Strategies	Strategy Evaluations and Control, Control and Evaluation Process	B.N: 1 , B.N:8
31			Motivation to Evaluate; Criteria for Evaluation	
32			Measuring and Feedback; Evaluation and Corrective Action. <i>Case : Family Dollar Stores.</i>	
Second Group Assignment: Case Analysis (Nestle)				
CO: 3				
LO: Students get acquainted with the process and importance of strategy evaluations and Control.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

V: Session Plan:

Session No.	Unit	Topics	Sub Topic	References
1	1	An overview of risk management	Investor and risk management, the profitable side of risk management	B.N-1,B.N-2
2			Risk management process, risk models, derivatives	B.N-1,B.N-2
3			Hedging, currency risk, hedging risk through forward contracts	B.N-1,B.N-2

4			Indian Derivative Market	B.N-1,B.N-2
CO: 1 & 2				
LO: Describe the risk management process and uses of various derivatives instruments for risk management				
5	2	Interest rate Swap	Interest rate swap, rational	B.N-2,B.N-3
6			Liability and asset based interest rate swaps	B.N-2,B.N-3
7			Pricing of swaps	B.N-2,B.N-3
8			Forwards and options on swaps	B.N-2,B.N-3
CO: 2 & 3				
LO: Define interest rate swaps and application of swaps for hedging risk				
9	3	Creating value with risk management	Financial distress and investment	B.N-2,B.N-3
10			Risk in banking, credit risk	B.N-2,B.N-3
11			Foreign exchange risk, political risk	B.N-2,B.N-3
12			Country risk, liquidity risk	B.N-3
CO: 1 & 2				
LO: Describe the various types of risk exists in the banking sector				
13	4	Financial Engineering	Construction of option strategies in various market situation and pay off	B.N-2,B.N-3
14			Construction of option strategies in various market situation and pay off	B.N-2,B.N-3
15			Construction of option strategies in various market situation and pay off	B.N-2,B.N-3
16			Betting on large price increase	B.N-2,B.N-3
17			Betting on small price increase	B.N-2,B.N-3
CO: 3 & 4				

LO: Describe various types of option strategies and its uses by various market payers				
18	5	Option Market	Types of option, Uses of option, Payoffs from option, Trading strategies	B.N-2,B.N-3
19			Bull, bear, butterfly spread, calendar and diagonal spread,	B.N-2,B.N-3
20			Straddles, strip and straps, Option valuation and pricing, factor determining option price	B.N-2,B.N-3
21			Black scholes model	B.N-2,B.N-3
22			Concept of Delta, Theta, Gamma, Vega, Exchange traded option, stock option	B.N-2,B.N-3
23			Currency option, over the counter exchange option, index option, put call parity	B.N-2,B.N-3
CO: 3 & 4				
LO: Describe how the different factors affect the option and application of different models for pricing derivatives				
24	6	Exotic options	Compound, binary, barrier and Asian options	B.N-2
25			Option involving several assets	B.N-2
26			Swap transactions, currency swap, commodity swap, equity swap	B.N-2
27			Valuation of swap and credit default swap	B.N-2
CO: 3 & 4				
LO: Define various types of exotic options and valuation of swaps				
28	7	Future Contracts	Introduction to future markets, future contract and future trading	B.N-2,B.N-3
29			Specifications of future contracts, newspaper quotes, types of future contracts	B.N-2,B.N-3
30			Difference between forward and future contracts, hedging using future contracts	B.N-2,B.N-3
31			Mechanism of future contracts, operations of margin, convergence clearing process	B.N-2,B.N-3
32			Clearing house and clearing margins	B.N-2,B.N-3
CO: 3 & 4				

LO: Describe basics of futures market and its application by the various market players

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub - Topic	Reference
1	I	Wage and Salary	Introduction, Definition	B.N.1/3/6/8
2			Goals	B.N.1/3/6/8

3		Administration	Job Evaluation	B.N.1/3/5/8
4			Wage and Salary Surveys	B.N.1/3/8
5			Time and Piece Rate	B.N.1/2/3/8
6			Merit Pay /Skill Based Pay	B.N.1/2/3/8
7			Factors affecting wage concept of pay of performance.	B.N.1/3/8
8			Case Study: New Delhi Shopping Point	B.N.3
CO: 1				
LO: This Unit will help the students understand the importance of Job Evaluation and how it can be used for wage and salary determination. The various methods of calculating the wages will also be learnt by the students.				
9	II	Incentive Plans	Individual and Group incentive plans	B.N.1/3/6
10			Productivity Gain sharing plans	B.N.1/3/6
11			Profit Sharing Plans	B.N.1/3/6
12			Non - Financial and Financial incentives	B.N.2/3/6
13			Measuring Cost - to - Company (CTC)	B.N.1/3/6
14			Case Study: Performance – related pay at Auto India Ltd.	B.N.3
Assignment No.1				
CO: 3				
LO: The concept of individual and group incentives and Gain sharing plans will be learnt by the students in this Unit. The difference between Financial and Non-financial will also become clear to the students in this Unit.				
15	III	Employee Benefits	Supplemented Pay benefits (pay for time not worked) insurance benefits	B.N.1/3/8
16			Retirement benefits	B.N.1/3/8
17			Employees’ service benefits	B.N.1/3/8
18			ESOP - Employee Stock Ownership Plan	B.N.1/3/8
19			Flexible benefits and Benefit Surveys.	B.N.1/3/8
20			Case Study: Innovative Design of Employee Benefits at Narmada Ltd.	B.N.3
CO: 2,3				
LO: The Benefits enjoyed by employees are made clear in this Unit. The students come to learn the various benefits which the employees enjoy besides the salary and wages.				
21	IV	Governing Laws	Provident Fund Act 1952	B.N.1/3/4
22			Minimum wages Act 1948	B.N.1/3/4
23			Payment of Wages Act 1948	B.N.1/3/4
24			Payment of Bonus Act, 1965	B.N.1/3/4
Assignment No.2				
CO: 4				
LO: The students will come to know the laws provided by the Government in relation to the employees of any organisation.				
25	V	Current Trends	Current Trends in Compensation and Reward Management.	B.N.1/3/7/8
26			Case Study: Strategic Compensation Initiative at New Age Technologies.	B.N.3
CO: 1				

LO: This Unit helps the students to understand the present trends in compensation and reward management.				
27	VI	Concept of Human Capital	Concept of human capital and its implications for compensating human resources.	B.N.1/3/5
28			Determinants of intra and inter-industry differentials in compensation.	B.N.1/3/5
29			Case Study: Differential Pay Policy at Nita International.	
30			Internal and External equity in compensation systems	B.N.1/3/5
CO: 1,2				
LO: This Unit helps the students to understand the importance of human capital and the difference of compensation in various industries.				
31	VII	Compensation Designing	Designing compensation for Chief Executives, senior managers, knowledge workers etc.	B.N.2/3/8
32			Case Study: Executive Compensation Strategy in Fortune Furnitech	B.N.3
CO: 1,2,3				
LO: Designing the compensation of the higher executives and the senior managers is an important task which will be learnt by the students in this Unit.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of Compensation Management.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII Rubric for Internal Assessment			
Subject: Compensation Management			
MBA IV Sem (2015-17)			
Goal : Students will be able to understand the art and science of compensation practice and its role in promoting a company's competitive advantage			
Objective: To familiarize students with the dynamics of wage and salary administration and current trends in India.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%.... students were outstanding and able to demonstrate basic compensation concepts and the context of compensation practice. They were able to illustrate different ways to strengthen the pay-for-performance link and also well described the concepts of Payment and employee benefits issues for contingent workers.	%.... students were accomplished and able to articulate Some perspectives of Compensation Management. Some of the students were able to demonstrate basic compensation concepts and the context of compensation practice. Some of the students were able to illustrate different ways to strengthen the pay-for-performance link and also well described the concepts of Payment and employee benefits issues for contingent workers.	%.... students fall in this criteria. They showed minimal knowledge of the subject.	%.... Students need improvement to understand the concept of compensation management. They need more efforts to illustrate different ways to strengthen the pay-for-performance link and also well described the concepts of Payment and employee benefits issues for contingent workers.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Organizational Development**Session:** Jan-Jun**Class:** MBA Sem IV

I: Course Objective: The objectives of this course are to acquaint the students with the importance of Organization Development, and to offer insights into design, development and delivery of OD programmes.

II: Examination: Students shall be evaluated on two components, internal and end semester examination. Internal component shall be of 20 marks based on continuous evaluation .The Semester Examination will be worth 80 marks, it will have two Section, A and B. Section A, worth 60 marks will comprise of seven theory questions out of which a student will be required to attempt any four questions. Section B worth 20 marks will contain Cases.

III: Course Outcomes (CO):

- CO1 Learn methods and techniques to improve the organizations and individual capacity to handle its intern
- CO2 To offer insights into organization design, development and delivery of OD programmes for improved
- CO3 To acquaint the students learning organizational improvement strategy to have more effective commun
organizational problems of all kinds
- CO4 To acquaint the students learning integrated framework capable of solving most of the important proble
organizations

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		3	2			2	2	
CO 2	3	2	2	1		2	1	
CO 3	1	2	3	3		2	2	
CO 4	3	2	2	2	2	2	2	2

V: Session Plan:

Lecture No.	Unit No.	Topics	Sub Topics	References
1	1	Organizational Development	Definition	B.N. 1/B.N.2
2			History , Assumptions	B.N. 1/B.N.2
3			Values & Beliefs in O.D	B.N. 1/B.N.2
4			Organization Development & Transformation	B.N. 1/B.N.2

5			Case Study	
CO: 1,4				
LO: This Unit will help the students to understand various terms relating to organizational development & transformation				
6	2	Theory and Management of OD	Foundations of OD	B.N. 1/B.N.2
7			OD Process	B.N. 1/B.N.2
8			Action Research and OD	B.N. 1/B.N.2
9			Case Study	
Assignment (Worksheet)				
CO: 2				
LO: The second Unit will make the students gain a general understanding of organizational change and foundation of development concepts				
10	3	OD interventions	Overview, Types	B.N. 1/B.N. 2
11			Team interventions, Inter- Group interventions	B.N. 1/B.N. 2
12			Comprehensive and Structural interventions	B.N. 1/B.N. 2
13			Choosing the Depth of Organizational Intervention	B.N. 1/B.N. 2
14	Presentation			
CO: 2,4				
LO: This Unit helps the students to understand identify organizational situations that would benefit from OD interventions, Understand OD diagnostic models				
15	4	Issues and Considerations in OD	Consultant-Client Relationships	B.N. 1/B.N.2
16			System Ramifications	B.N. 1/B.N.2
17			Power- Politics.	B.N. 1/B.N.2
18			Case Study	
CO: 1,3				
LO: This Unit helps the students to understand explain and act upon the differences between insider and outsider approaches to consulting and OD interventions				
19	5	Emerging Trends in OD	Special emphasis on future organizations.	B.N. 1/ B.N.2
20			Special emphasis on future organizations.	B.N. 1/ B.N.2
21			Case Study	
CO: 4				
LO: The students will study emerging trends in OD for foresightedness & better decision making				

22	6	Organization Design	Processes	B.N. 1/ B.N.2
23			Culture	B.N. 1/ B.N.2
24			Life Cycle	B.N. 1/ B.N.2
25			Phases of growth	B.N. 1/ B.N.2
26			Organizational Effectiveness	B.N. 1/ B.N.2
27			Organizational Excellence	B.N. 1/ B.N.2
28			Organization Culture	B.N. 1/ B.N.2
29			Values & Ethics	B.N. 1/ B.N.2
30			Case Study	

CO: 1

LO: This unit will help students to design and plan the implementation of multiple OD interventions for achieving organizational excellence

31	7	Organization Development	Planned change strategy Managing Change in Times of Turbulence.	B.N. 1/ B.N.2
32	Presentation			

CO: 3,4

LO: The last unit will help students to understand the dynamics and appreciate the difficulties of change as applied to organizational culture and human behavior

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: FT 405I Computer Networks

Session: January - June

Class: MBA - IV Sem

I: Objective of course: The objective of this course is to help students to understand the concepts of Data Communication and Computer Networks and related issues and their use in organization and processing complex business information.

II: Examination: Students shall be evaluated on two components , internal and end semester examination. Internal component shall be of 20 marks based on continuous evaluation .The Semester examination will be worth 80 marks, the question paper will comprise of eight questions out of which a student will be required to attempt any five questions.

III: Course Outcomes (CO):

- CO1 Understand the concepts of Data Communication and Computer Networks and related issues
- CO2 To establish the data communication network among multiple computers
- CO3 To understand data transmission technology through topologies
- CO4 Managing the data securely from one network to another

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1		2			1		
CO 2	2		1			2		
CO 3	3		2			3		
CO 4	2	1	3		3	3		

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Computer Networks	Introduction, Distributed Systems, Network Goals & its Applications	B.N. 4
2			Protocol Hierarchies, network architecture, design issues for the layers	B.N. 4
3			Simplex, half-duplex, full-duplex, interfaces and services	B.N. 4

4			Connection oriented and connection less services, service primitives	B.N. 4
A-1. First assignment, submission with in 3 days				
CO: 1				
LO: Understanding of Computer Networks, Distributed systems, Network Architecture & Application of Layers, Hierarchies and Data transfers				
5	2	Reference Models	The OSI Reference Mode	B.N. 6
6			The TCP/IP Reference Model	B.N. 6
7			Comparison and Critique of the OSI and TCP/IP Reference Models	B.N. 6
A-2. Second assignment, Submission within 3 days				
CO: 2				
LO: Knowledge about OSI Reference Model and TCP/IP Reference Model				
8	3	Physical Layer	Concepts of data transmission, transmission media, guided and unguided media	B.N. 6
9			Digital and analog transmission, transmission impairments	B.N. 6
10			Multiplexing- TDM, WDM, FDM	B.N. 6
11			Switching techniques- circuit, packet and message,	B.N. 6
12			Cellular Radio, wireless transmission	B.N. 6
13			Modems, DSL, cable modem, ISDN introduction, ISDN channels, ISDN layers, services, and Communication Satellites	B.N. 6
A-3. Group assignment, Submission within 5 days				
CO: 3				
LO: Basic understanding of data transmission & transmission media technique on physical layer, sending of Packet or Data using Switching techniques				
14	4	Data Link Layer	Framing, error control, flow control	B.N. 4
15			Unrestricted simplex, simplex stop-and-wait protocol, HDLC, SLIP, PPP	B.N. 4
CO: 4				

LO: Application of Data link layer, error and flow control, understanding of the terms HDLC, SLIP, PPP				
16	5	Network Layer	Internal organization	B.N. 6
17			Routing, congestion, routing-shortest path	B.N. 6
18			Preallocation of buffers, choke packets, deadlocks	B.N. 6
19			Services of network layer	B.N. 6
A-4. Presentations				
CO: 3				
LO: Understanding and application of Network Layer in Internal organization. Knowledge about deadlocks and Services of network layer				
20	6	Transport Layer	Services of transport layer	B.N. 6
21			Transport protocols	B.N. 6
22			Connection management	B.N. 6
A-5. Assignment, Submission within 3 days				
CO: 4				
LO: Understanding and implementation of services of transport layer, Transport protocols				
23	7	Upper OSI layers	Session layer and Transport Interaction	B.N. 6
24			Presentation Layer – Translation, Authentication	B.N. 6
25			Data Compression	B.N. 6
26			Application layers – Message Handling System(MHS)	B.N. 6
27			File transfer, Access and Management (FTAM)	B.N. 6
A-6. Group assignment, Submission within 7 days				
CO: 3				

LO: Application of the Upper OSI layers, Session layer and Transport Interaction , understanding the terms Access and Management (FTAM)

28	8	Transmission Technology	Broadcast networks, Point-to-Point Networks	B.N. 4
29			LAN, MAN & WAN topologies	B.N. 4
30			Wireless networks, Internetworking	B.N. 4
31			Routers, Bridges, Switches, Gateways & Repeaters	B.N. 4
32			Windows NT, Novell Netware, Network Operating System	B.N. 4

A-7. Class test

CO: 3

LO: Understanding Transmission Technology, concept of different networks (LAN, MAN, WAN, etc.) and network topologies

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Operating Systems and UNIX	Concepts History and Functions.	B.N.2
2			The UNIX Operating System: Back ground, Philosophy	B.N.2
3			General Overview of the system, Introduction to Kernal concepts Help Facility	B.N.2
A-1. First assignment, submission within 3 days				
CO: 1				

LO: Understand the concept of UNIX operating system				
4	2	The File Systems, Utilities and Filters	File Systems : Structure of file system	B.N.2
5			Internal representation of files	B.N.2
6			System calls for the file system, pwd, cd ls, cat, mkdir, rmdir, chmod, cp rm, mv commands	B.N.2
7			Utilities: more, file wc, od, cmp, comm..., diff, lp, banner, cal, date who tty, sty commands.	B.N.2
8			Simple Filter: Pr head, tail, cut, paste, sort, unip, nl commands	B.N.2
9			Advanced filters: grep, egrap, sed tr, join, awk, filtering	B.N.2
A-2. Second assignment, Submission within 3 days				
CO: 1				
LO: Learn to work with UNIX commands with advance filters				
10	3	Shell and Shell Programming	The Bourne shell : Sh, proceeding a command by its path	B.N.2
11			Combining commands, pattern matching, echo, pipes	B.N.2
12			Tees, shell variables, shell scripts	B.N.2
13			Programming with the Shell	B.N.2
14			System variables, The profile conditional execution	B.N.2
15			Script termination, if, case, while-until, for, et shifts statements	B.N.2
A-3. Group assignment, Submission with in 5 days				
CO: 4				
LO: Learn to work w4ith shell programs using control structures and loops				
16	4	The Process	The structure of process, process control	B.N.2
17			Process scheduling and time	B.N.2
18			Shell process, parent and children process	B.N.2
19			Process status, system process	B.N.2
20			Multiple job in background, wait command	B.N.2
21			Premature termination of a process, job execution with low priority	B.N.2
22			Multiple jobs in foreground-shell layers, timing processes	B.N.2

A-4. Presentations				
CO: 4				
LO: Learning to schedule and control processes				
23	5	Communicating and Scheduling	Bulletin Board, Message of the day	B.N.2
24			Two way communication, Insulation from the other users	B.N.2
25			Using Mailbox, Address all users	B.N.2
26			Delay, Execute in shell script later	B.N.2
27			Running jobs periodically	B.N.2
A-5. Assignment, Submission with in 3 days				
CO: 2				
LO: Understand the method of communicating and scheduling with mailbox and Running multiple jobs in foreground				
28	6	System Administration:	Super user, security, user services	B.N.2
29			Floppy disk management, Operation, file system administration, backups	B.N.2
A-6. Group assignment, Submission with in 7 days				
CO: 3				
LO: Familiarity with file system and security with UNIX and creating backups				
30	7	Introduction to Linux Operating System	Basic Commands -1	B.N.1
31			Basic Commands -2	B.N.1
32			Utilities: Linux Operating System	B.N.1
A-7. Class test				
CO: 1				
LO: Understanding and using the basic features of Linux operating system and application of Linux basic commands				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

CO 2		2	1					
CO 3	1	1	1				2	
CO 4	2	3	1		1		1	

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Visual Basic	Enhanced features, introduction to graphical user interface, introduction to front end tools	B.N.1
2			Event driven programming, object and controls	B.N.1
3			Attributes and events of objects, form events and properties, and using control	B.N.1

4			text box control, command buttons, list box , combo box and Scroll bars, working with control array	B.N.1
A-1. First assignment, submission within 3 days				
CO: 1				
LO: Awareness about Visual Basic Programming concept, Event driven programming Principles and benefits of graphical user interface				
5	2	Managing Projects	Control structures, scope and life time of variables, arrays	B.N.2
6			Static array, Dynamic array, User defined data type	B.N.2
7			Collections understanding projects, structure of visual basic application, variables, methods, procedures, functions	B.N.2
A-2. Second assignment, Submission within 3 days				
CO: 3				
LO: Technical and practical knowledge about VB Program, Syntax Array, meaning and use of Data Types.				
8	3	Working with Forms	Loading, showing and hiding a form, controlling one form, from within another, creating menus using menu editor	B.N.1
9			Menu control array, creation of objects during run time, MDI (Multiple Document Interface)	B.N.1
A-3. Group assignment, Submission within 5 days				
CO: 3				
LO: Application and use of Forms and MDI				
10	4	Files	Sequential file, random file, Binary file, File controls	B.N.1
11			Drive list box, directory list box, and file list box.	B.N.1
12			Drive list box, directory list box, and file list box.	B.N.1
13	5	Creating graphical applications	Timer object, mouse events	B.N.1
14			Drag and drop event	B.N.1
15			Image box and picture box, shape control	B.N.1
A-4. Presentations				
CO: 1				
LO: Understanding types of file systems and file controls				

16	6	Active X control	Common dialog box, grid control, tool bar & status bar	B.N.2
17			Animation control, tree view control,	B.N.2
18			List view control, image list control, Tabstrip	B.N.2
19			SSTab control, Slider and Progress bar control.	B.N.2

A-5. Assignment, Submission within 3 days

CO: 2

LO: Awareness and application of graphics

20	7	Database Management	Introduction to MS-Access & Oracle 8i	B.N.1
21			Properties of Data controls	B.N.1
22			Navigating Database through data control, using DB combo & dblist with data control	B.N.1
23			Using DB grid with data control	B.N.1
24			Data control and SQL	B.N.1

A-6. Group assignment, Submission within 7 days

CO: 4

LO: Understanding of common controls & Grids like; dialog box, grid control, animation controls, etc.

25	8	ADO	Creating application using ADO, understanding ADO	B.N.2
26			Hierarchy using methods and properties of ADO objects	B.N.2
27			ADO and SQL	B.N.2
28			Introduction to client server environment connecting to oracle with data control	B.N.2

A-7. Group presentations

CO: 3

LO: Understanding the concept of Database management system and use of SQL in it.

LO: Students will be able to identify an understanding of the different types of operations process types on which operational capability can be based and the strategic implications of the process choice decision				
13	4	Process analysis and design	Process analysis	B.N.1/2
14			Process analysis	B.N.1/2
15			Process design	B.N.1/2
CO: 2 & 3				
LO: Students will be able to redesign a given process using improvement patterns and learnt to simulate the new processes for optimum results based on the project plan				
16	5	Planning and implementing the transition	Planning the transition	B.N.1/2
17			Planning the transition	B.N.1/2
18			implementing the transition	B.N.1/2
19			implementing the transition	B.N.1/3
20			tracking and measuring process performance	B.N.1/2
21			tracking and measuring process performance	B.N.1/2
CO: 2 & 3				
LO: Understand how business processes can be radically improved, dramatically reducing process cycle time and cost, and improving the quality of the process products or outcomes				
22	6	Tools and techniques used in BPR	Case tools	B.N.1/2
23			Work flow systems	B.N.1/3
24			Imaging technology	B.N.1/2/3
25			Imaging technology	B.N.1/2
26			Floware	B.N.1/2
27			Business design facility tools	B.N.1/2
28			Business design facility tools	B.N.1/2
29			Change management tools	B.N.1/2/3
CO: 3 & 4				
LO: Learn to model and develop improved business processes that requires IT and organizational redesign				
30	7	Risk and impact	Risk and impact measurement	B.N.1/2

31		measurement	Risk and impact measurement	B.N.1/2/3
32			Risk and impact measurement	B.N.1/2
Assignment-BPR practices in Textile Industry				
CO: 3 & 4				
LO: learn to identify the characteristics of an effective control system; Decide which control technique (or combination of techniques) would be most suitable for a given context				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Reference Book:

1. Lon Roberts, Process Re-engineering: The Key to Achieving Breakthrough Success, Tata McGraw Hill.
2. Henry J. Johanson, Palrik Mchine, A.John Pandilebury, William A Wheeler, Business Process Reengineering: Breakpoint Strategies for Market Dominance, Chichester, John Wiley & Sons.
3. K.Shridhara Bhat, Business Process Reengineering, Himalaya Publishing House, 2007.

VII: Note:

1. There will be 4 class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of Business Process Reengineering.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII Rubric for Internal Assessment			
Subject: Business Process Reengineering			
MBA IV Sem (2015-17)			
Goal : Students will be able to understand radical change of the business processes which includes both strategic level and operational level in an business organization.			
Objective: Understanding process orientation in business management and develop skills and abilities in re-engineering and business process for optimum performance.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%.... students were outstanding and able to explain the concepts of Business Process Reengineering. They can model simple business processes in terms of people, and activity sequences involved, the data and materials flowing through those sequences and the dependencies between business information and operational activities.	%.... students were accomplished and able to articulate some perspectives of Business Process Reengineering. Most of them Applied the various techniques of BPR.	%.... students fall in this criterion. They showed minimal knowledge of the subject.	%.... students fall in this criterion. They showed no knowledge of the subject.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan**

Subject: Production Planning and Control
Class: MBA – IV Sem

Session: Jan. - June

I: Course Objective:

The course is design to equip the students with the concepts of Production Planning and Control (PPC). The emphasis will be on the application of concepts and tools used in PPC for achieving efficiency and quality superiority.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be worth 80 marks. It will have two sections: A and B. Section A, worth 60 marks, will consist for 6 theory questions out of which student will be required to attempt any 4 questions. Section B, worth 20 marks, will consist of one or two numericals.

III: Course Outcomes (CO):

- CO 1 Learn the various concepts associated with the analysis, design, and implementation of Production Planning and Control
- CO 2 Learn analytical constructs to business problem solving
- CO 3 Understand design and plans to meet business goals under limited resource (e.g., money, people, and equipment) restrictions.
- CO 4 Learn to design organizational systems to recognize (external) opportunities, and to create opportunities

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3				3	
CO 2		3	3					
CO 3	3			3		3		
CO 4	2				2			

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Production Planning and Control	Definition and Concept of PPC	B.N. 1, 3
2			Need and Functions of PPC	B.N. 1, 2, 5
3			Factors Influencing PPC in Organization	B.N. 2, 3
4			Manufacturing Methods and Managerial Policies	B.N. 1, 2
5			Pre-requisites of PPC	B.N. 1, 3
Group Assignment I: Visit a Manufacturing Unit, Explore Their PPC Practices and Submit a Report				
CO: 1				
LO: Understand the role of production planning in the overall business strategy of the firm and the interdependence of the operating system with other key functional areas of the firm				
6	2	Material Planning and Control (MPC)	Definition and Concepts	B.N. 1, 4
7			Inputs Required for MPC	B.N. 1, 2
8			Steps in MPC	B.N. 1, 3, 5
9			Techniques of MPC	B.N. 1, 3
10			Significance and Limitations	B.N. 1, 3
CO: 1 & 2				
LO: Learn to apply the principles and techniques for planning and control of the production and service systems to optimize/make best use of resources.				
11	3	Machining Allowances	Machining Allowances and Types	B.N. 1, 2
12			Make or Buy Decision	B.N. 3, 5
13			Inventory and its Types	B.N. 1, 2
14			Inventory Control Models	B.N. 1, 3
Assignment I: Worksheet on Inventory Control Models				
CO: 2 & 3				
LO: Understand the importance and function of inventory and to be able to apply selected techniques for its control and management under dependent and independent demand circumstances.				
15	4	Process Planning	Definition and Concepts	B.N. 1, 3
16			Factors Influencing Process	B.N. 2, 3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			Planning	
17			Steps in Process Planning	B.N. 3, 5
18			Factors Influencing Process Selection	B. N. 2, 3
CO: 1 & 3				
LO: Learn to measure manufacturing process variables in a manufacturing laboratory and make technical inference about the process.				
19	5	Manufacturing Resource Planning (MRP II)	Definition and Concepts	B.N. 2, 4
20			Aggregate Production Planning	B.N. 1, 3
21			Master Production Scheduling and MRP II	B.N. 1, 2
22			MRP II and JIT	B.N. 1, 2
23			Achieving Business Objectives through MRP II	B.N. 1, 3, 4
CO: 3 & 4				
LO: Understanding of the behavior and properties of materials as they are altered and influenced by manufacturing processes.				
24	6	Scheduling	Concepts, Factors Influencing Scheduling	B.N. 2, 3
25			Working and Scheduling Charts	B.N. 1, 3
26			Job Sequencing	B.N. 1, 4
27			Project and Critical Ratio Scheduling	B.N. 1, 2
28			Assignment Techniques/Model	B.N. 1, 3
29			Numerical of Scheduling	B.N. 1, 3, 4
CO:				
LO: Develop and analyze production and inventory planning/control systems, and scheduling techniques by using engineering techniques for a complete production facility.				
30	7	Capacity Planning	Definition and Concepts	B.N. 2, 3
31			Integrated Production Planning and Control	B.N. 2, 5
32			Numerical on Capacity Planning	B. N.1, 3
CO:				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Develop and analyze the capacity planning process. Identify characteristics and relationship to business operations in regard to managing product demand versus product capacity.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Total Quality Management**Session:** July – Dec.**Class:** MBA IV**I: Course Objective:**

The key objective of this course is to acquaint the students with the conceptualization of Total Quality (TQ) from design assurance to processes' assurance to service assurance.

II: Examination:

Students shall be evaluated on two components, internal and end semester examination. Internal component shall be of 20 marks based on continuous evaluation. The Semester examination will be worth 80 marks; the question paper will comprise of eight questions out of which a student will be required to attempt any five questions.

III: Course Outcomes (CO):

CO1: Develop an understanding on quality management philosophies and frameworks know the principles of total quality management and peculiarities of their implementation

CO2: Able to use quality management methods analyzing and solving problems of organization

CO3: Know business excellence models and be able assess organization's performance making reference to their criteria

CO4: Learn the applications of quality tools and techniques in both manufacturing and service industry.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	3	1		3	1		1
CO 2		3	3				3	
CO 3	2	2	1		2	3		
CO 4				2				

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Concept of Total Quality	Introduction & Concept of Quality	BN1 & BN6
2			Concept of Total Quality	

3			Evolution of total quality	
4			Components of Total Quality loops	
CO: 1				
LO: Identify the elements that are part of the quality measuring process in the industry which enable to learn the concepts of Total Quality Management.				
5	2	Quality of Design	Concept of Quality design	BN2 & BN5
6			Concept of Taguich design	
7			Taguich Process	
8			Taguich loss function	
CO: 1 & 2				
LO: Will learn the concept of Total Quality (TQ) from design assurance to processes' assurance				
9	3	Quality of Purchasing	Concept of quality of purchasing	BN1 & BN5
10			Supplier qualification	
Group Assignment: Industry visit to understand the practical aspect of quality control.				
CO: 2 & 3				
LO: Develop in-depth knowledge on various tools and techniques of quality management from supplier perspective				
11	4	Critical-to-Quality Characteristics	Attributes of variables	BN2 & BN5
12			Acceptance sampling plan	
13			Acceptance sampling plan	
14			Acceptance sampling plan	
16			Acceptance sampling plan	
CO: 3 & 4				
LO: Understand the main purpose of acceptance sampling is to decide whether or not the lot is likely to be acceptable, not to estimate the quality of the lot.				
17	5	Statistical process control	Introduction to statistical process control	BN4 & BN8

18			Tools of statistical process control	
19			Process capability	
20			Inspection sampling plan	
21			Inspection sampling plan	
22			Quality control	
23			Quality control	
24			Application of quality control	

Assignment 1: Work Sheet on process capability and sampling plan.

CO: 4

LO: Able to provides a picture of the process variable over time and understand the type of variation the organization is dealing with as move forward with continuous improvement. This understanding of variation is the key to using control charts effectively.

25			Concept of 6-sigma	
26			Concept and application of of 3-sigma	
27	6	Concepts & Application of 6 – Sigma Quality	Concept and Application of 6-sigma	BN2 & BN7
28			Comparision between the 3-sigma and 6- sigma	
29			DMAIC approach to 6-sigma	

Assignment 2: Read the case on Mumbai Dubba Wala and solve it.

CO: 1 & 3

LO: Will able to apply six sigma process to improve quality in industries

30			link between 6- sigma & DOE.	
31	7	ISO	ISO-9000 & ISO-14000	BN4 & BN8
32			Quality Circle	

CO: 1 , 3 & 4

LO: Assess appropriateness of using the criteria for quality awards as a framework for organizational improvement and changes.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Text Books & Reference Books:

Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

PROGRAM OUTCOME: MBA (INTERNATIONAL BUSINESS)

PO 1. Provide an inclusive coverage of International Business integrating all the essential areas and disciplines pertaining to international business activities.

PO 2. Enrich student by a foreign language (French or German), facilitating the students to acquire a functional proficiency in one of the languages.

PO 3. Create awareness of International financial market and its terminology.

PO 4. Develop awareness related to International Environment and world economy.

PO 5. Create ability to develop creative skills in the students to identify the dynamics of the competitive market and distinctive positioning.

PO 6. Ability to understand and analyze rules, regulations and procedures related to import-export in India.

PO 7. Enable students to identify different potential markets and products for International trade.

PO 8. Foster the analytical and critical strategies adopted in the foreign markets to succeed with an appropriate market plan.

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** International Trade Operations and WTO**Session:** July - December**Class:** MBA (IB) – I Semester**I: Course Objective:**

The objective of this paper is to understand the working of WTO in promotion of trade and its policy implications in India's trade operations.

II: Examination:

The external semester examination will carry 85 marks and the faculty member will award internal marks out of 15.

III: Course Outcomes (CO):

CO1: To understand the basics of international trade operation.

CO2: To learn the skills related to international trade operation

CO3: To develop the insight regarding Regional economic Integration.

CO4: To know the working of world trade organization.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

Assignment: Group Activity on Analyzing Pricing Strategies of Various Companies				
CO: 3				
LO6: Understand different pricing methods & its strategic application				
25	7	Distribution Decisions	Distribution Channel: Importance & Functions	B.N. 4
26			Considerations in Distribution Channel decision, Distribution	B.N. 4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			Channel Members	
Assignment: Watch Video Case on <i>Mumbai Dabbawala</i> for In-class Discussion				
CO: 4				
LO7: Identify the benefits & costs of distribution channels; discuss the channel decisions & functions involved in distribution channel members				
27	8	Promotion Decisions	Promotion a view of communication process	B.N. 2, 7
28			Developing effective communication	B.N. 2
29			Promotion Mix elements	B.N. 2
CO: 3				
LO8: Understand role of promotional mix in marketing. Developing the view of communication process				
30	9	Marketing Strategies	Marketing Strategies: Leaders, Challengers, Followers & Nichers	B.N. 2
Assignment: Select a Sector; Find out its Leader, Challenger, Followers and Nicher and Submit a Strategic Analysis				
CO: 2,3				
LO9: Ability to formulate marketing strategies for leaders, challengers, followers and Nichers				
31	10	Emerging Trends in Marketing	Internet Marketing Case: Facebook vs. Whatsap: 2014	B.N. 2, 4
32			CRM & Event Marketing	B.N. 2, 4
CO: 1,4				
LO10: Acknowledge the emerging trends in marketing via. Internet marketing, event marketing & CRM				

VI: Book References:

VI: Note:

1. There will be class tests/assignments/presentations of equal weightage.
2. There will be group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of marketing management.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubrics for Internal Assessment For Marketing Management			
MBA I Sem (IB)			
Goal : We want students in the MBA Program to be adequately prepared to function as a competent business manager in relevant functional areas with sufficient knowledge and understanding of contemporary business in general.			
Objective: Students will understand and apply content knowledge in major business functional areas.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Considers multiple perspectives like Subject knowledge, Language Command, Non Verbal Communication, Convincing Ability, Polished Behavior & Managerial approach towards the concept.	Able to articulate Some perspectives like Subject knowledge, Language Command, Non Verbal Communication, Convincing Ability, towards the concept.	Can relate with few perspective like Subject knowledge, Non Verbal Communication, Convincing Ability, towards the concept.	Cannot relate the concept to any happening. Has no Conceptual Clarity either.

IX: Scheme of Internal Marks:

Class Participation		Internal Assessment			TOTAL 150	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Out of 15		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Principles and Practices of Management & Organisational behaviour **Session:** July – Dec**Class:** MBA (IB) I Sem

I: Objective of the course: The objective of this paper is to develop managerial skills in the students to cope up with the changing business environment and becoming successful entrepreneur.

II: Examination: The faculty member will award internal marks out of 15. The semester examination carrying 85 marks. The semester examination will be worth 85 Marks (External evaluation). It will have two sections A & B, Section A worth 51 Marks will consist of 5 questions out of which student will be required to attempt any 3 questions. Section B worth 34 marks will have 5 numerical problems out of which student will required to attempt any 2 questions.

III: Course Outcomes (CO):

- CO1: Gain an understanding of functions & responsibilities of manager and develop managerial skills to analyze & understand the environment of business.
- CO2: Integrate management principles into management practices to cope up with changing business environment.
- CO3: Demonstrate an understanding of key terms, theories concept and practices within the field of OB and apply them to solve issues relating to administration of human resource.
- CO4: Understanding the human behavior to have efficiency & effectiveness with the total development of organization.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2		3	2				
CO 2					3			2
CO 3	2							
CO 4	2							2

V: Session Plan:**Section A**

Lecture No.	Unit No.	Topic	Sub - Topic	Reference
1	1	Introduction	Concept & functions of management, functions and responsibilities of managers	B.N. 4, B.N. 6
2			Fayol's principles of management.	B.N. 4, B.N. 6

3			Case Study	
CO: 1				
LO1: It develops the managerial skills & knowledge of basic management principles among the students.				
4	2	Planning	Nature and purpose of planning including strategic planning, principles of planning	B.N. 5, B.N. 7
5			Types of Planning, Advantages and Limitations of planning	B.N. 5, B.N. 7
6			Case Study	
Assignment No.1				
CO: 1				
LO2: It develops an understanding of process of planning among the students & enables them to identify & formulate different types of plans.				
7	3	Objectives	Concept, nature, Types & Importance of objectives	B.N. 4, B.N. 8
8			Setting objectives, Management by objectives	B.N. 4, B.N. 8
CO: 1				
LO3: It enhances the skills among the students to develop & set the objectives of the company & how to achieve these objectives.				
9	4	Strategies and Policies	Concept of corporate strategy, formulation of strategy, types of strategies, TOWS matrix, the Portfolio matrix	B.N. 4, B.N. 6
10			Three generic competitive strategies by Porter, effective implementation of strategies,	B.N. 4, B.N. 6
11			Case Study	B.N. 4, B.N. 6
CO: 1				
LO4: Students will be able to understand the concept of corporate strategies & formulate different types of strategies				
12	5	Organizing	Nature and purpose of organizing, Bases of Departmentation, Span of management, Line and Staff relationship, Line-staff conflict	B.N. 5, B.N. 7
13			Delegation, kinds of delegation, Delegation and Decentralization, Methods of Decentralization.	B.N. 5, B.N. 7
14			Case Study	B.N. 5, B.N. 7
CO: 2				
LO5: It enables the students to develop skills as to how to get optimum output from available resources.				
15	6	Control	Concept and process of control,	B.N. 6, B.N. 8
16			Control techniques, Control as a feedback system, Feed forward control, Preventive Control	B.N. 6, B.N. 8
17			Case Study	B.N. 6, B.N. 8

CO: 2				
LO6: Understand the concept, meaning and process of controlling, describe the relationship between planning & controlling, & understand various techniques of controlling.				
	Section B			
Lecture No.	Unit No.	Topic	Sub - Topic	Reference
18	1	Organizational Behaviour	OB Models, Personality Determinants and Attributes	B.N.1, B.N. 3
19			Learning and Learning Theories, Perception-Factors affecting Perception	B.N.1, B.N. 3
20			Case Study	
CO: 3				
LO1: Understand basic concept & various theories of personality, learning, perception & job attitude.				
21	2	Motivation	Needs, Contents and Processes; Maslow's Hierarchy of Needs, Herzberg's Two Factor theory, ERG theory, Vroom's Expectancy theory, Reinforcement Theory	B.N.2, B.N. 3
22			Case Study	
Assignment No.2				
CO: 3				
LO2: Learn various theories of motivation & how motivated employees can lead to increased productivity & allow an organisation to achieve higher levels of output.				
23	3	Foundations of Group Behaviour	Defining and Classifying Groups, Group Structure and Processes	B.N.1, B.N. 3
24			Process of Group formation, Group Decision Making, Group v/s Team, Team Effectiveness	B.N.1, B.N. 3
25			Case Study	
CO: 3				
LO3: Understand stages of group development, group structure, group process, group dynamics & importance of team effectiveness.				
26	5	Leadership	Trait theories, Behavioural theories-- Ohio State Studies, Michigan Studies, and Managerial Grid.	B.N.2, B.N. 3
27			Contingency theories- Leader-Member Exchange theory	B.N.2, B.N. 3
28			Path Goal theory, Charismatic Leadership	B.N.2, B.N. 3
29			Case Study	
CO: 3				
LO5: Understand various theories of leadership and understand concept of emotional intelligence, leadership, effectiveness & recent developments in leadership theories.				
30	6	Conflict & Organizational Change	Interpersonal Conflict, Inter group Conflict, Organizational Conflict, forces of Change, Resistance to Change	B.N.1, B.N. 3
31			Case Study	
32	Presentation			
CO: 4				
LO6: Understand conflict process, conflict management techniques. Negotiation process, bargaining strategies to solve various employee related problems.

VII: Note :

1. There will be group major assignment. Group size will be 4-5 students
2. There will be Group presentations.
3. Class performance and discipline will be an important factor for assessing internal marks, it carries 4 marks.
4. If any student does not submit assignments at time, credit will be given half mark after submission of assignment.
5. Attendance will be multiplying factor as per given in academic plan.

VIII: Rubric for Internal Assessment			
Principles of Management & Organizational Behaviour			
MBA Ist Sem(IB)			
Goal : Students examine a basic framework for understanding the role and functions of management and an explanation for the principles, concepts and techniques that can be used in carrying out these functions. Topics include planning, organizing, staffing, leading and controlling, as well as decision-making and managing change. Also examine the behaviour of individuals and how they interact with each other in different workplace organizations. Topics include an orientation to organizational behaviour; individual behaviour; individual and behavioural processes; team processes; organizational dynamics; and organizational processes.			
Objective: Students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization. It also help students to understand human Behavior in organizations at cross cultural level so that they improve their managerial effectiveness.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks

.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students having an understanding about management functions, responsibilities of manager, idea of tools and techniques to be used in the managerial activity. Simultaneously students are also having an understanding about Human Behavior in Organizations at cross cultural level so that they improve their managerial effectiveness towards Team.	Students having understanding about management functions, responsibilities of manager, having understanding about human Behavior in organizations at cross cultural level.	Students having understanding about management functions and human behavior in organizations.	Students Need More efforts for Learning about Functions of Management and Its Uses and for Understanding of Human Behavior in Organizations.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		TOTAL 75	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Out of 15		

Lesson Plan

Subject: Quantitative Techniques & Statistical Methods

Session: July –Dec.

Class: MBA(IB) I Sem

I: Objective of the Course: The objective of this course is to help the students acquire quantitative tools, and use these tools for the analysis and solution of business problems. The emphasis will be on the concepts and application rather than derivations.

II: Examination: The faculty member will award marks out of a maximum of 15 marks (Internal Evaluation).

The semester examination will be worth 85 Marks (External evaluation). It will have two sections A & B, Section A worth 51 Marks will consist of 5 questions out of which student will be required to attempt any 3 questions. Section B worth 34 marks will have 5 numerical problems out of which student will required to attempt any 2 questions.

III: Course Outcomes (CO):

- CO1: Understand the basic concepts of different advanced models of operations research, statistics and data analysis. Also understand their applications into international business.
- CO2: Apply the models to incorporate rational decision making process in real life situations.
- CO3: Formulate organizational problems into OR models for seeking optimal solutions
- CO4: Understand & use analytical and numerical techniques to make predictions and decisions.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	-	-	-	2	-	-	2
CO 2	3	-	-	2	1	-	-	-
CO 3	-	-	-	-	1	-	-	1
CO 4	2	-	-	1	3	-	2	2

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	Part A-1	Quantitative Techniques And Operation Research	Meaning, Scope of Quantitative Techniques	B.N:1, B.N:2
CO: 1				

LO1: To familiarize students with the basic concepts, models and statements of the operations research theory.				
2			Operations Research In Management, Advantages And Limitations of Quantitative Techniques.	
CO: 2				
LO2: Solve linear programming problems using appropriate techniques and optimization solvers, interpret the results obtained and translate solutions into directives for action.				
3	Part A-3	Assignment Problem	Assignment Model As A Particular case of Transportation Problem	B.N:1, B.N:6
4			Formulation of Assignment Problems, Solution of Assignment Problems Using Hungarian Method (Minimization)	
5			Hungarian Method (Maximization), Solution of Assignment Problems Using Hungarian Method (Route Allocation)	
6			Travelling Salesman (Stage Coach),	
A-1: First Assignment (Worksheet)				
CO: 3				
LO3: Become familiar with the types of problems that can be solved by applying a transportation model and also with the assignment model as a special case of transportation model.				
7	Part A-3	Transportation Model	Introduction of Model,Basic Feasible Solution through NWCR,LCM, RM,CM & VAM	B.N:5, B.N7
8			Vogel's Approximation Method, Optimization (maximization)	
9			Modified Distribution Method	
10			Modified Distribution Method	
11			Stepping Stone Method	

A-2: Second Assignment (Worksheet)**CO: 3**

LO3: Become familiar with the types of problems that can be solved by applying a transportation model and also with the assignment model as a special case of transportation model.

12	Part A-4	Game Theory	Introduction To Games, Maximin And Minimax Principles, Pure And Mixed Strategies	B.N:4 , B.N:5
13			Solutions of Games Using –Algebraic and	
14			Graphical Methods	
15			Game Theory and Linear Programming	

CO:4

LO4: Able to draw Network for projects and can identify the PERT and CPM for network.

16	Part B-1	Basic Measures of Dispersion & Correlation	Introduction to Dispersion	B.N:9, B.N:8
17			Correlation Meaning, Its types and methods	
18			Correlation Methods	

A-3: Third Assignment (Worksheet)**CO: 1**

LO1: To become familiar with concept of dispersion and correlation. Also be able to draw relationship between the variables of international business.

19	Part A-2	Linear Programming	Meaning of Linear Programming, Advantage And Limitations of LPP, General Mathematical Formulation	B.N:2, B.N:3
20			Graphical Analysis of LPP	
21			Simplex Method, Minimization case	
22			Big-M Method	
23			Simplex Method, Maximization case	

24			Two-Phase Method of simplex, Duality And Post Optimality	
First Group Assignment: Importance of LPP in various Management field				
CO: 2				
LO2: Become familiar with the concept of sampling distribution, standard error and be able to draw inferences from various data set.				
25	Part A-5	Network Analysis	Introduction to CPM	B.N:4, B.N:7
26			Technique and Its Applications	
27			Concept of Floats & its Application	B.N:9, B.N:8
28			Understanding PERT Problem	
A-4: Fourth Assignment (Worksheet)				
CO: 2				
LO5: Able to draw Network for projects and can identify the PERT and CPM for network.				
29	Part B-2	Sampling	Sampling Distribution meaning & its types	B.N:8, B.N:9
CO: 2				
LO2: Become familiar with the concept of sampling distribution, standard error and be able to draw inferences from various data set.				
30	Part B-3	Hypothesis Testing	Meaning & Its Types, significance level & confidence limit	
31			T-Test	B.N:4, B.N:8
32			T-Test, F Test	
Second Group Assignment: How QTSM helps in business decisions?				
CO: 3				
LO3: Become familiar with the concept of hypothesis and also able to formulate hypothesis for research problems.

VII: Note:

- 1 There will be Four home assignments, each carry 0.5 marks.
- 2 Two major group Assignments based on the practical aspect of the subject.
- 3 There will be one major Internal Test
- 4 Group size will be 4-5 students, & each group will be given separate topic of assignment
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan

VIII: Rubrics for Internal Assessment For QTSM			
MBA (IB) I Sem			
Goal : We want students in the MBA Program to be adequately prepared to function as a competent business manager in relevant functional areas with sufficient knowledge and understanding of contemporary business in general.			
Objective: Students will understand and apply content knowledge in major business functional areas.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Subject knowledge is judged on the basis of different criteria. Presentation, viva assignments and quiz are used to evaluate performances of students. Students show the complete understanding towards the practical problems of subjects.	Shows high understanding of subject but fails to relate it with real life situations.	Basic understanding of concepts and getting stuck between the problems so need more practice for problems.	Cannot relate the concept to any hapenning.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		TOTAL 75	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Out of 15		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Computer Applications**Session:** Jan-June**Class:** MBA (IB) - II Sem

I: Objective of course: The objective of this paper is to understand the basic knowledge of computers to proceed with the information technology adopted in the business.

II: Examination: The faculty member will award internal marks out of 15. An External viva-voce will be of 20 marks. The end semester examination will be worth 65 marks having theory and cases/practical problems.

III: Course Outcomes (CO):

CO1: Knowledge of Computer fundamentals, applications in International Business and Network (unit-1)

CO2: Understanding Database and types of Data models used in DBMS (Unit 2)

CO3: Awareness of Query Language and instructions (Unit 3)

Knowledge of Information Technology, e-commerce and use of modern technology in international

CO4: business (Unit 5)

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2			1	2	2		
CO 2	2			1	2			1

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Computers	Anatomy of computer	B.N. 1
2			Hardware & Software Concepts	B.N. 1

3			Program language translator	B.N. 1
4			Networking, Types of network	B.N. 1
5			Hardware requirement for Network, Hub, router	B.N. 1
6			Wireless Technology and devices	B.N. 7
7			Wi-fi	B.N. 7
A-1. First assignment				
CO: 1				
LO1: Understand basic functioning of Computers and its application in International Business.				
5			Data, database, database management system	B.N. 9
6			Purpose of database system, Data Abstraction, view of data	B.N. 9
7			Instances and schemas	B.N. 9
8			Data independence- physical data independence, logical data independence	B.N. 9
9			Data models- Relational, Network, Hierarchical	B.N. 9
10			Introduction to RDBMS,	B.N. 9
11			Tuple, Attribute, Domain	B.N. 9
12			Degree, Relation	B.N. 9
A-2. Second assignment				
CO: 2				
LO1: Understanding the concepts of database management system (DBMS)				

13	3	Introduction to SQL	SQL, Use and Features	B.N. 9
14			Database languages-data definition language, data manipulation language, data control language	B.N. 9
15			SQL Data types	B.N. 9
16			SQL Operators- Arithmetic, comparison, logical	B.N. 9
17			SQL commands- create, alter, drop	B.N. 9
18			SQL commands- select, insert, update, delete	B.N. 9
19			SQL commands- create, alter, drop	B.N. 9
20			String operations	B.N. 9
21			Set Operations(union, intersection, except)	B.N. 9

A-3. Group assignment

CO: 3

LO1: Enhance Analytical skills by using commands for data-based operations using SQL.

22	4	Information Technology	Introduction to IT and its development	B.N. 3
23			E-commerce, Introduction and applications of E-commerce	B.N. 3
24			Transactions with E—commerce (B2C,B2B,C2B,C2C,C2G)	B.N. 3
25			Modern technologies in computer application	B.N. 3
26			Role of IT in economy,	B.N. 3

A-4. Presentations

CO: 4

LO 4: Learning the practical use of Database using case studies.				
27	5	Information Technology	Fifth generation Computing technologies- Artificial Intelligence, Robotics, Virtual Reality	B.N. 1
28			Bio informatics	Notes
29			Introduction to GPS, GIS	Notes
30			Mobile technology 1 G,2G,3G,4G	B.N. 7
31			Multimedia	B.N. 7
32			Application of computers in Business	B.N. 7
A-5. Class Test				
CO: 4				
LO5: Learning the application of IT and e-commerce. Knowledge about the latest technologies used in Business.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.

6. Attendance will be a major factor for assessing class performance.
7. The students are required to submit practical assignment in computer practical notebook for external viva voce.

VIII: Rubric for Internal Assessment

Commodity Derivative & Price Risk Management

MBA IB 2nd Sem (2018-20)

Goal : Students will be able to understand the investments field along with Commodity Derivative and Price Risk Management and practiced for sound investment decisions making.

Objective: To provide the students in-depth understanding of investment techniques as applied to various forms of securities and acquaint them with the functioning of Commodity Derivative and Price Risk Management.

12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%.... students were outstanding and were able to describe and analyze the investment environment, different types of commodity derivative, Price, Risk Management with the help of Commodity market, Advanced Futures. Option Markets and Future Contracts along with Swaps.	%.... students were accomplished and able to articulate Some perspectives of commodity derivative, Price, Risk Management with the help of Commodity market, Advanced Futures. Option Markets and Future Contracts along with Swaps.	%.... students fall in this criterion. They showed minimal knowledge of the subject.	%.... students need More efforts to understand the commodity derivative, Price, Risk Management with the help of Commodity market, Advanced Futures. Option Markets and Future Contracts along with Swaps.

IX: Scheme of Internals Marks:

Class Participation			Internal Assessment		TOTAL	Final Internal Marks out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Out of 15

VII: Notes

- 1 There will be two assignments, each carry 1.5 marks.
- 2 Two group presentation based on the practical aspect of the subject.
- 3 There will be one major Internal Test.
- 4 Group size will be 4-5 students, & each group will be given separate topic of Presentation.
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan.

VIII: Rubric for Internal Assessment			
Overseas Project Management			
MBA IB 4th Sem (2017-19)			
Goal : Students will be able to demonstrate analytical and critical-thinking skills in the context of organizational, overseas project management.			
Objective: To develop understanding of project planning. To develop ability to monitor and control projects and risk involved. To become familiar with tools and techniques used in managing projects.			
12-15Marks	9-11 Marks	05-8 Marks	00-04Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Can implement project management knowledge, processes, lifecycle and the embodied concepts, tools and techniques in order to achieve project success.	% Accurately described most of the outcomes and expectations for the project, project initiation tools/templates, but some were completed incorrectly	% described less than half of the outcomes and expectations for the subject Learned some project concepts, but few were missing	% Content is unclear, inaccurate, and/or incomplete; Knowledge about subject is weak or poorly gained.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		TOTAL 75	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Out of 15		

PROGRAM OUTCOME: MBA (BUSINESS ECONOMICS)

PO 1. Understand the relevance of Business Economics in Business Management holistically.

PO 2. Apply knowledge of Economic policy and principles to solve business problems.

PO 3. Understanding of recent developments in Micro and Macro economic theories and policies.

PO 4. Understanding of how markets and government organize core economic activities, such as production, distribution, consumption, and the growth of productive resources.

PO 5. Develop the analytical and empirical skills necessary to succeed in securing professional employment.

PO 6. Ability to critically evaluate the consequences of basic macroeconomic policy options under different economic conditions within a business cycle.

PO 7. Ability to discuss the major economic theories of international trade, and to analyze the economic implications of alternative trade policies.

PO 8. Ability to evaluate the consequences of economic activities and institutions for individual and social welfare.

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject: Business Statistics and Research Methodology****Session: July-Jan****Class: MBA (BE) I Sem****I: Course Objective:**

Objective: The objective of this paper is to understand the statistical tools and techniques, Used in the business decision and analysis. Knowledge of basic concepts of statistics including measures of Central Tendency is a prerequisite for this subject

II: Examination:

The faculty member will award marks out of a maximum of 15 marks (Internal Evaluation) .The semester examination will be worth 85 Marks (External evaluation). It will have two sections A & B, Section A worth 25 will consist of 5 theory questions out of which student will be required to attempt all five questions. Section B worth 60 marks will have 5 numericals problem out of which student will require attempting any four questions.

III: Course Outcomes (CO):

- CO1: Basic understanding of Statistics and Research methodology
 CO2: Knowledge about Basic concepts of statistics required in Research
 CO3: Preparing students for Research work with the knowledge of basic statistical tools
 CO4: Develop awareness of contextualizing and findings of Research into practice

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1							
CO 2								
CO 3		1	2					2
CO 4					2	3		

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	References
1	Unit- 1	Standard Deviation	Meaning and properties of Standard deviation	B.N. 1 & B.N.6
2			Actual mean and Assumed mean method of S.D. For individual series and C.V.	
3			Actual mean and Assumed mean method of S.D. for Discrete Series and C. V.	
4			Actual Mean and Assumed mean method for Continuous series and C.V.	
5			Standard deviation with Step Deviation Method and C.V	
CO: 1				
LO1: Understanding of Standard Deviation & Coefficient Variation				
6	Unit-2	Correlation & Regression	Types of Correlation & its method	BN.3 & B.N.4
7			Karl Pearson Correlation	
8			Spearman's & Concurrent Correlation	
9			Line of Regression	
10			Curve Fitting	
11			Least Square	
Assignment -1(Worksheet)				
CO: 2				
LO2: Study of Business with reference to Correlation and Regression Analysis				
12	Unit-3	Index Number	Meaning and types of Index Number	B. N. 1 & B.N. 5
13			Methods of Construction of Index Number	
14			Characteristics of a good Index number and Test for perfection	
15			Cost of living Index Number	
CO: 3				
LO3: Learning how to construct Index Numbers				

16	Unit - 4	Probability	Concept, Additive & Multiplicative Probability	B.N.9 & B.N.7
17			Conditional Probability & Baye's Theorem	
18			Application of Conditional probability in Business	
CO:3				
LO4: Basic concepts of Probability and their applications in business				
19	Unit-5	Random Variable and Probability Distributions	Binomial Distribution	B.N.9 & B.N.7
20			Poisson Distribution	
21			Normal Distribution	
22			Application of Distribution	
CO:3				
LO5: Understanding of Random Variable and Probability distribution and their applications in business				
23	Unit - 6	Research Methodology	Concept of Research and types of research	B.N. 8
24			Research Design and its types	
CO:4				
LO6: Developing awareness of Research methodologies and their importance				
25	Unit -7	Sampling Theory	Concept of Sampling Theory and Methods of sampling	B.N. 1 & B.N. 11
26			Sampling Distribution, Standard Error and Sampling Error	
Assignment-2				
CO:4				
LO7: Understanding of Sampling and its use in research				
27	Unit-8	Testing of Hypothesis	Testing of Hypothesis, Type I and Type II Errors	B.N.8
28			concept of Confidence Limits and critical region,	
29			Test of significance for large samples-test for mean	
30			Test of significance for large samples-test for mean	
31			Test of significance for small samples - test for mean	
32			Difference between means F tests	

Group Assignment
CO: 3,4
LO8: Developing Hypothesis and testing it for the purpose of Research with the help of Statistics

VI: Text Books & Reference Books:**Text Reading**

VII: Note:

1. There will be Four home assignments, each carry 0.5 marks.
2. Two major group Assignments based on the practical aspect of the subject.
3. There will be one major group assignment. Group size will be 4-5 students, & each group will be given separate topic of assignment
4. Class performance & Discipline will be an important factor for assessing internal marks.
5. Attendance will be multiplying factor as per given in academic plan

VIII: Rubric for Internal Assessment			
Subject: Business Statistics and Research Methodology			
MBA BE I Sem			
Goal : To make students able to use Statistics as a helpful tool for solving complex business research problems under uncertainty, and understand methods that quantify issues and give business managers a better basis for making decisions.			
Objective: The objective of this paper is to understand the statistical tools and techniques, Used in the business decision and analysis. Knowledge of basic concepts of statistics including measures of Central Tendency is a prerequisite for this subject.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents

Outstanding	Accomplished	Meets the Criteria	Need Improvement
___% Students are exceptionally good with the understanding of statistical tools. Students are able to analyze these tools and also able to relate application of these tools with real life situations.	___% Shows high understanding of subject and relate tools and techniques with real life managerial problems at some extant.	___% students have basic understanding of concepts and getting stuck between the problems, they find it difficult to relate it with real life managerial problems.	___% of students found difficulty to understand the concept. Students fails to correlate concepts with real life managerial problems, need more practice for improvement.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		TOTAL 75	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Test Out of 15		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Business finance and Accounts**Session:** July-Dec**Class:** M.B.A (BE) I Sem**I: Objective of the course:**

The objective of this paper is to go through the financial concepts and understand the techniques to manage the finance for the organization.

II: Examination: The external semester examination will be of 85 marks. The faculty member will award internal marks out of 15.

III: Course Outcomes (CO):

- CO1: Acquaintance with the basic concept of finance, cost accounting & financial management.
 CO2: Preparation & financial analysis of financial statement.
 CO3: Analyze financial data & develop critical thinking skills to manage the finance of an organization.
 CO4: Methodology to present accounting data effectively to make information meaningful & knowledgeable.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 4						3		3

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub - Topic	Reference
1	1	Introduction to Financial Accounting	Meaning & function of Accounting; Generally accepted Accounting Concepts & Conventions;	B.N. 1
2			Nature of Accounts; Rules for Debiting & Crediting; Journalizing the transactions	B.N. 1
3			Posting from the Journal to the Ledger	
4			Preparation of Trial Balance.	B.N.1
CO: 1				
LO1: Describe the conceptual framework of accounting and rules to record the transactions.				
5	2	Final Accounts - Preparation of financial Statements	Trading, Profit & Loss Account, and Balance Sheet with the help of Adjustment Entries.	B.N.1/2
6			Numerical Questions	B.N.1/2
7			Numerical Questions	B.N.1/2
8			Numerical Questions	B.N.1/2
CO: 2				
LO2: Understanding the preparation of final accounts with adjustments.				
9	3	Depreciation	Meaning and Need, Methods of Charging depreciation – Straight Line Method;	B.N.1
10			WDV Method; Accounting for depreciation in the Books of Account.	B.N.1
11			Change in the Method of Depreciation, Numerical Questions	B.N.1
12			Presentation I	
Assignment I				
CO: 3				
LO3: Comparative study of various methods of depreciation & their practical implication.				
13	4	Analysis and Interpreting of	Financial Ratio Analysis-Liquidity Ratios; Profitability Ratios	B.N.3

14		the Financial Statements	Turnover Ratios; Solvency Ratio	B.N.3
15			Building An Income Statement and Balance sheet.	B.N.3
16			Numerical Questions	B.N.3
17			Numerical Questions	B.N.3
18			Numerical Questions	B.N.3
CO: 4				
LO4: Understanding and analysing financial statements with the help of financial ratio analysis.				
19	5	Fund flow statement	Meaning, uses and preparation.	B.N.3
20			Numerical Questions	B.N.3
21			Numerical Questions	B.N.3
22			Numerical Questions	B.N.3
CO: 1				
LO5: To have a conceptual knowledge of cost accounting.				
23	6	Cash Flow statement (AS-3)	Meaning, uses and preparation	B.N.3
24			Numerical Questions	B.N.3
25			Numerical Questions	B.N.3
26			Numerical Questions	B.N.3
CO: 1,3				
LO6: Learn to calculate No Profit No Loss point & margin of safety.				
27	7	Introduction to Cost Accounts	Meaning, Objectives, Difference between cost Accounts and Financial Accounts	B.N.4
28			Elements of Cost.	B.N.4
29			Numerical Questions	B.N.4
CO: 3				
LO7: Calculation of leverage and its implications for business decision making.				
30	8	Analysis of financial statements	Analysis of financial statements of any public limited company	B.N.3/11
31			Analysis of financial statements Contd...	B.N.3/11
32			Presentation II	
Assignment II				
CO: 4				
LO8: Apply the financial tools for analysis of financial statements of public limited companies.

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan**

Subject: Business Law
Class: M.B.A (BE) II Sem

Session: Jan.-June

I: Objective of the course:

The objective of this course is to acquire the students various laws, which are to be observed in performing the day-to-day business. Here the emphasis will be on the different latest provisions of the law and on how these can be used in the best interest of the organization without violating them rather than cases.

II: Examination:

The semester examination will carry 85 marks. The faculty member will award internal marks out of 15.

III: Course Outcomes (CO):

- CO1: To provide students with an understanding of certain economics and commercial legislations which have direct bearing on functioning of business and companies.
- CO2: Develop an understanding about protection of Intellectual property electronic commerce and payment mechanisms and foreign investment.
- CO3: To provide students with specialized knowledge of law and practices related to transportation and insurance of goods.
- CO4: To provide students with knowledge of practical and procedural aspects of Direct and Indirect taxation laws international taxation issues.

Lecture No.	Unit No.	Topic	Sub - Topic	Reference
1	1	Legal Framework	The Customs 1962.	Bare Act/ Study Material
2			Foreign Exchange Management Act	Bare Act/ Study Material
3			Foreign Exchange Management Act	
4			The Money Laundering Act,2002.(penalties, contraventions and general features).	Bare Act/ Study Material
5			Laws related to Insolvency	B.N.1/2/3
6			Information and technology Act 2000 (salient features and general aspects)	Bare Act/ Study Material
7			Competitions Act 2002	Bare Act/ Study Material
8			CompetitionsAct2002	
9			Consumer Protection Act - Definitions, Consumer Rights, Exploitation of Consumer and Utility of Consumerism. <u>Case:</u> Life Insurance Corporation of India vs. Shri ChaturBihariLal, Appeal no.29/89 (Raj.) <u>Case:</u> Oswal Fine Arts Vs. M/s. HMT, Madras – Petition No. 1/88 (Del).	B.N.1/2/3
10			Consumer Protection – Consumer Forums and Advisory Councils	B.N.1/2/3
11			Environmental Act.	Bare Act/ Study Material
Assignment No.1				
CO: 1				
LO1: Develop and understanding of certain general and economics laws affecting business and gain insight on the contractual Mercantile laws that influence business transaction .Develop an understanding of the companies Act ,1956				
12	2	Contractual Relations and company regulations	The Indian Contract Act. 1872	B.N.1/2/3
13			The Indian Contract Act. 1872	B.N.1/2/3
14			Companies Act, 1956 – Characteristics of a Company, Lifting of Corporate veil <u>Case:</u> Salomon v A Salomon & Co Ltd [1896] UKHL 1, [1897] AC 22 Types of Companies.	B.N.1/2/3
15			Memorandum and Article of Association and difference between the two Doctrine of ultra vires	B.N.1/2/3
16			Doctrine of Indoor Management Doctrine of Constructive Notice	B.N.1/2/3
17			Shares, Prospectus	B.N.1/2/3

18			Meetings of the Company	B.N.1/2/3
19			Winding-up of Companies	B.N.1/2/3
Assignment No.2				
CO: 1				
LO2: 1.Develop an understanding of The Companies Act, 1956 2. Describe Characteristics of Company & Corporate Veil 3. Knows the various classes of companies under the Companies Act. 4. Understand the meaning of Memorandum of Association and Articles of Association and compare between the two. 5. Knows the meaning of Oppression & its prevention 6. Describe Winding Up of Companies & Modes of Winding Up.				
20	3	Property Rights: Intellectual Property	The Copyright Act, 1957	Bare Act/ Study Material
21			The Patent Act	Bare Act/ Study Material
22			The Merchandise Marks Act	Bare Act/ Study Material
23			The Designs Act & Trade Marks Act.	Bare Act/ Study Material
CO: 2				
LO2: Students will gain in depth knowledge in intellectual property and legislation framework, practices and procedures of IP protected through patents, trademarks, copyrights, design and graphical indication.				
24	4	Insurance	Carriage of goods Act.	B.N.1/2/3
25			Multimodal Transport & Insurance	Study material
CO: 3				
LO3: Understand the laws related to transportation and insurance affecting national and international transportation of goods.				
26	5	Taxation	Sales Tax – Central	B.N.6/ Study Material
27			Income Tax	B.N.4/5
28			Income Tax	B.N.4/5
29			Avoidance of Double Taxation (General features, penalties and agreement)	B.N.4/5
CO: 4				
LO4: Develop an understanding of direct and indirect taxation laws and DTAA.				
30	6	Payments	Letters of Credit	Study Material
31			Electronic Transfer	Study Material
CO: 1				
LO1: This unit introduces the students to documentary credit transactions and electronic payment systems in India.

7. BARE Acts with short notes (Latest Edition) for all relevant topics.

VII: Note:

1. There will be 4 class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of Business Legislation.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

Rubric for Internal Assessment			
Subject: Business Legislation			
MBA BE II Sem			
Goal : Students examine the legal environment in which businesses operate and how common law, provincial and federal government statutes influence decision making. Topics include the legal system and the law relating to t contracts, forms of business organization, agency, sale of goods.			
Objective: The objective of this course is to acquire the students various laws, which are to be observed in performing the day-to-day business. Here the emphasis will be on the different latest provisions of the law and on how these can be used in the best interest of the organization without violating them rather than cases.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents

% Students having an understanding of various laws, which are to be observed in performing the day-to-day business. Students having knowledge of latest provisions of the law and Its uses in the best interest of the organization without violating them rather than cases.	% Students having an understanding of various laws, which are to be observed in performing the day-to-day business. Students having knowledge of latest provisions of the law	% Students having an understanding of basic about laws.	% Students Need More efforts for Concept of Laws.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		TOTAL 75	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Test Out of 15		

Lesson Plan**Subject: Operation Research****Session: Jan - June****Class: MBA(BE) II sem**

I: Objective of the Course: The objective of this course is to help the students acquire quantitative tools, and use these tools for the analysis and solution of business problems. The emphasis will be on the concepts and application rather than derivations.

II: Examination: The faculty member will award marks out of a maximum of 15 marks (Internal Evaluation) .

The semester examination will be worth 85 Marks (External evaluation). It will have two sections A & B, Section A worth 25 will consist of 5 theory questions out of which student will be required to attempt all five questions. Section B worth 60 marks will have 5 numericals problem out of which student will required to attempt any four questions.

III: Course Outcomes (CO):

- CO1: Understand the basic concepts of different advanced models of operations research and their applications into business. (Unit-1)
- CO2: Apply the models to incorporate rational decision making process in real life situations. (Units- 2, 3, 4, 5, 6, 7, 8)
- CO3: Formulate organizational problems into OR models for seeking optimal solutions. (Units- 2, 3, 4, 5, 6, 7, 8)
- CO4: Understand & use analytical and numerical techniques to make predictions and decisions. (Units- 2, 3, 4, 5, 6, 7, 8)

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 4	1	-	-	3	2	2	-	1

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Quantitative Techniques And Operation Research	Meaning, Scope of Quantitative Techniques	B.N:2, B.N:9
2			Operations Research In Management, Advantages And Limitations of Quantitative Techniques.	
CO: 1				
LO1: To familiarize students with the basic concepts, models and statements of the operations research theory.				
3	2	Linear Programming	Meaning of Linear Programming, Advantage And Limitationsof LPP, General Mathematical Formulation	B.N:2, B.N:9
4			Graphical Analysis of LPP	
5			Simplex Method, Minimization case	
6			Big-M Method	
7			Simplex Method, Maximization case	
8			Two-Phase Method of simplex	
9			Duality And Post Optimality	
First Group Assignment: Importance of LPP in various Management field				
CO: 2,3,4				
LO2: Solve linear programming problems using appropriate techniques and optimization solvers, interpret the results obtained and translate solutions into directives for action.				
10	3	Assignment Problem	Assignment Model As A Particular case of Transportation Problem	B.N:5, B.N:9
11			Formulation of Assignment Problems, Solution of Assignment Problems Using Hungarian Method (Minimization)	
12			Hungarian Method (Maximization), Solution of Assignment Problems Using Hungarian Method (Route Allocation)	

13			Travelling Salesman (Stage Coach),	
14	3	Transportation Model	Introduction of Model,Basic Feasible Solution through NWCR,LCM, RM,CM & VAM	B.N:6, B.N7
15			Vogel’s Approximation Method, Optimization (maximization)	
16			Modified Distribution Method	
17			Modified Distribution Method	
18			Stepping Stone Method	
A-2: Second Assignment (Worksheet)				
CO: 2,3,4				
LO3: Become familiar with the types of problems that can be solved by applying a transportation model and also with the assignment model as a special case of transportation model.				
19	8	Game Theory	Introduction To Games, Maximin And Minimax Principles, Pure And Mixed Strategies	B.N:4 , B.N:8
20			Solutions of Games Using – Algebraic and	
21			Graphical Methods	
22			Game Theory and Linear Programming	
CO: 2,3,4				
LO8: Able to draw Network for projects and can identify the PERT and CPM for network.				
23	7	Replacement Models	In trodution, Scope In Management, Individual Replacement	B.N:3, B.N:11
24			Individual Replacement with time value of Money	
25			Group Replacement	
A-3: Third Assignment (Worksheet)				
CO: 2,3,4				
LO7: Represent strategic situation as a game and obtain adequate solution to the situation with the help of game theory.				
26	9	Network Analysis	Introduction to CPM	B.N:5, B.N:9
27			Technique and Its Applications	
28			Concept of Floats & its Application	B.N:6, B.N9
29			Understanding PERT Problem	
A-4: Fourth Assignment (Worksheet)				
CO: 2,3,4				
LO9: Understanding of CPM, PERT and their applications				

30	5	Dynamic Programming	Nature of Dynamic Programming Problem, Dynamic Programming Solutions	B.N:2, B.N:10
31			Integer Linear Programming: Meaning, Application, Integer Programming Algorithm (Branch & Bound Algorithm, Cutting Plan Algorithm)	
CO: 2,3,4				
LO5: Able to solve multi-level decision problems using dynamic programming method using deterministic and stochastic dynamic programming approaches.				
32	4	Inventory Management	Meaning & Type, Inventory Decisions, EOQ Model	B.N:3, B.N:12
Second Group Assignment: How OR helps in business decisions?				
CO: 2,3,4				
LO4: Become familiar with the concept of Inventory Management and able to take decisions regarding inventory management.

VII: Note:

- 1 There will be Four home assignments, each carry 0.5 marks.
- 2 Two major group Assignments based on the practical aspect of the subject.
- 3 There will be one major Internal Test
- 4 Group size will be 4-5 students, & each group will be given separate topic of assignment
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan

VIII: Rubric for Internal Assessment			
Subject: Operation Research			
MBA BE II Sem			
Goal : To make students able to use operation research as a helpful tool for solving complex problems under uncertainty, and understand methods that quantify issues and give business managers a better basis for making decisions.			
Objective: The objective of this course is to help the students acquire quantitative tools, and use this tools for the analysis and solution of business problems. The emphasis will be on the concepts and application rather than derivations.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
___% Students are exceptionally good with the understanding of quantitative tools. Students are able to analyse these tools and also able to relate application of these tools with real life situations.	___% Shows high understanding of subject and relate tools and techniques with real life managerial problems at some extant.	___% students have basic understanding of concepts and getting stuk between the problems, they find it difficult to relate it with real life managerial problems.	___% of students found difficulty to understand the concept. Students fails to corelate concepts with real life managerial problems, need more practice for improvement.

Subject: Financial Markets & Environment**Session: Jan-June****Class: MBA (BE) – II Sem****I: Course Objective:**

The objective of this course is to help the students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization.

II: Examination:

The faculty member will award internal marks out of 20 (As per academic plan). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases. Cases prescribed below are only for classroom discussion and internal evaluation and not for end semester examinations.

III: Course Outcomes (CO):

- CO1: Describe the role and structure of the Financial system and financial markets.
 Explain the key concepts such as primary market, secondary market, money market,
 CO2: capital market, bond market.
 CO3: Describe the regulatory framework of NBFC and services provided by NBFC's.
 CO4: Explain the concept of technology and foreign exchange.

VII: Notes:

- 1 There will be two assignments, each carry 1.5 marks.
- 2 Two group presentation based on the practical aspect of the subject.
- 3 There will be one major Internal Test.
- 4 Group size will be 4-5 students, & each group will be given separate topic of presentation.
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan.

VIII: Rubric for Internal Assessment			
Subject: Financial Management and Corporate Finance			
MBA BE II Sem			
Goal : To acquire the skills necessary to manage a financial firm, to describe and apply financial concepts, theories, and tools, and to evaluate the role of technology and the legal, ethical and economic environment as it relates to financial institutions.			
Objective: The objective of this paper is to understand the different sources of finance, available for any corporate. To acquaint the students with the fundamentals and practices of corporate governance in India. This course also critically analyses stakeholder participation in decision-making and the moral obligations of corporate managers.			
12-15 Marks	08-11 Marks	04-07 Marks	00-03 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement

___% Students shows exceptionally high understanding of business finance concept. Students show skills of financial analysis and making financial decisions according to analysis. Students also show high familiarity with the financial tools and relationship of these tools with managerial decision making.	___% students show strong understanding of concepts but making mistakes. Some time found difficult to relate with practical aspect of subject.	___% students show good understanding of concepts, found difficult to solve completely and stuck between the problems. Required more conceptual clarity for relating practical and theory.	___% students show basic understanding of concepts, and found very much difficult to show relationship between financial tools and managerial decision making.

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	Unit 1	Introduction	Meaning, scope and application of Macro Economics.	B.N.1 & B.N. 3
2			Meaning, scope and application of Macro Economics	B.N.1 & B.N. 3 B.N.1 & B.N. 3
3			Concept of stock and flow variables.	B.N.1 & B.N. 3
A-1 First Assignment Submission within 3 Days				
CO:1				
LO1: To explain concepts of Macro Economics with circular flow of income				
4	Unit 2	National Income	National Income-Meaning, Measurement	B.N.1 & B.N. 6
5			National Income-Meaning, Measurement	B.N.1 & B.N. 3
6			Relationship with Economic Welfare.	B.N.1 & B.N. 3
CO:1,2				
LO2: Analyse various economic indicators related to national income				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
7	Unit 3		Theory of Money Supply,	B.N.1 & B.N. 6
8	Unit 3		components of Money Supply	B.N.1 & B.N. 3
9			components of Money Supply & money multiplier	B.N.1 & B.N. 3
10			Interest rate And Liquidity Preference Theory.	B.N.1 & B.N. 7
A-2 Second Assignment Submission within 3 Days				
CO:3,4				
LO3: To understand the money supply and its real effects on economy.				
11	Unit 4	T-heory of money	Quantity theory of money-Views of Fisher, Cambridge School and Friedman.	B.N.1 & B.N. 6
12			Quantity theory of money-Views of Fisher, Cambridge School and Friedman.	B.N.1 & B.N. 6
CO:1,4				
LO4: To develop understanding of classical and quantity theory of money				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
13	Unit 5		Classical Economics vs. Keynesian Economics.	B.N.1& B.N. 2
14			Neo-classical & Rationale Expectation Theory.,	B.N.1& B.N. 5
A-3 Third Assignment (case study)Submission within 3 Days				
CO:4				
LO5: To understand Keynesian and neoclassic perceptive of economics				
15	Unit 6	Income Determination	Model of Income Determination- simple model with consumption function,	B.N.12& B.N. 3
16			Model of Income Determination- simple model with consumption function,	B.N.12& B.N. 3
17			Investment function,	B.N.12 & B.N. 3
18			Concept of multiplier and accelerator, Govt. Sector, Foreign Sector and multiplier.	B.N.12 & B.N. 3
19			Policy Implication IS-LM analysis	B.N.1& B.N. 6
20			Integration of Product and Money market Effects of shifting IS and LM curves.	B.N 6
A-4 Fourth Assignment Submission within 3 Days				
CO:1,4				
LO6: Demonstrate the determinants of long term economic growth, including role of saving and investment on the growth of economy				
21	Unit 7	Business cycles	Business cycles -	B.N 2 & B.N. 7

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			Meaning and Phases.	
22			Theory of Hicks, Henson and Keynes. Inflation^, Recession, Stagflation.	B.N 6
23			Measures to control Inflation	B.N 6
24			Measures to control Inflation	B.N 6& B.N 7
A-4 Fourth Assignment Submission within 3 Days				
CO:1,3				
LO7: Understand the causes, consequences of business cycles and inflation				
25	Unit 8	Policy	Monetary Policy	B.N 1 & B.N. 5
26			Monetary Policy	B.N 2& B.N 7
27			Fiscal Policy	B.N 4& B.N 7
28			Fiscal Policy instruments and Relationship	B.N 1
CO:2				
LO8: To understand the implication of interference of monetary and fiscal policy in economy				
29	Unit 9	Application of the Input-output Model	Input-output Model, Presentation of Input-output System and Assumptions,	B.N 6
30			Solution of Input-output Model,	B.N 5
31			Application of the Model in Macro Economic Equilibrium	B.N 5 & B.N 7
32			Application of the Model in Macro Economic Equilibrium	B.N 5 & B.N 7
A-5 Fifth Assignment Submission within 3 Days				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
CO: 4				
LO9: Develop skills to assess the environmental impacts associated with production and consumption activities.

1. Zeithmal, Bitner, Service Marketing (SIE), Tata McGraw Hill, New Delhi
2. Harsh V. Verma, Services Marketing, Pearson Education, New Delhi
3. Services Marketing: People, Technology, Strategy by Christopher Lovelock, Jochen Wirtz Prentice-Hall Series Publication.

VII: Note:

1. There will be several unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the theoretical concepts.
3. Regular attendance, Class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment			
Subject: Service Marketing			
MBA BE II Sem			
Goal : Students will be able to define service marketing and understand what marketing means to business executives and academics and understand the ways that marketers use service marketing tools and techniques to interact with their customers.			
Objective: The objective of this paper is to understand the various processes of services and the related strategies for establishment of services as a successful product.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
.....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement

%.... students were outstanding and able to understand the conceptual and organizational aspects of the service sector, including strategic planning and management in the service industry. Understands the key elements in planning, managing, and executing the service marketing concepts.	%.... students were accomplished and able to articulate some perspectives of the service sector, including strategic planning and management in the retail industry. Understand the few key elements in planning, managing, and executing the service marketing concepts.	%.... students fall in this criterion. They showed minimal knowledge of the subject.	%.... student fall in this criterion. They all were not able to articulate some perspectives of the service sector, including strategic planning and management in the retail industry.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		TOTAL 75	Final Internal Marks Out of 15
Presentation out of 15	Quiz out of 15	Assignment out of 15	Viva out of 15	Internal Test Out of 15		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH, INDORE

Lesson Plan

Subject: Econometrics

Session: Jul-Dec

Class: MBA(BE)-III

I: Course Objectives: The objective of this paper is to understand the different economics and mathematical tool that are applied to business problems to find their solutions.

II: Examination: The faculty member will award internal marks out of 15. The semester examination carrying 85marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 25 marks.

III: Course Outcomes (CO):

- Demonstrate an understanding of various and generalization of the basic regression model.
- CO1: model.
- CO2: A broad knowledge of regression analysis relevant for analysis economic data To broaden the knowledge and understanding of methods needed for quantitative analysis of micro and macro data relevant to development issues
- CO3: analysis of micro and macro data relevant to development issues
- CO4: Demonstrate an understanding of estimation frameworks in econometric mode

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		1		3				1
CO 2	3		2		3			2
CO 3		3		2		2		
CO 4	2		1				3	

V: Session Plan:

V. Session Plan:				
Lecture No.	Unit No.	Topics	Sub Topics	Reference
1	1	Differentiation of a function:	Application of diff. in Economics and Managerial problems like Revenue, Cost	B.N-5
2			Demand and Supply Functions	B.N-5
3			Elasticities , Maxima and Minima	B.N-5
CO:1				

LO1: Learn the mathematical tools required for econometric analysis which includes differential calculus and its applications in theories of economics				
4	2	Integration of a function:	Application of Integration in Economic Problems	B.N-5
5			Consumer’s and Producer’s Surplus	B.N-5
CO:2				
LO2: Learn to apply integration in econometric analysis to fruitfully calculate producers and consumers surplus in economics				
6	3	Meaning and Methodology of Econometrics	Meaning and Methodology of Econometrics	B.N.-1,B.N.-3
7			Nature and Scope of Econometrics	B.N.-1,B.N.-3
8			The Nature of Regression Analysis	B.N.-1,B.N.-3
9			Basics of Two-Variable Regression Analysis	B.N.-1,B.N.-3
10			Estimation and Hypothesis Testing &Case Study	B.N.-1,B.N.-3
CO:3				
LO3: Know the basic principles of econometric modelling and analysis				
11	4	Extensions of the Two-variable Linear Regression Model	Extensions of the Two-variable Linear Regression Model	B.N.-1,B.N.-3
12			Multiple Regression Model	B.N.-1,B.N.-3
13			Multiple Regression Model Estimation	B.N.-1,B.N.-3
14			Multiple Regression Model Inference	B.N.-1,B.N.-3
15			Case Study	B.N.-1,B.N.-3
16	Assignment			
CO:3				
LO4: Be able to understand both the fundamental techniques and application involving linear regression estimation				
17	5	Multi Co linearity	Nature and Consequences of Multi Co linearity	B.N.-1,B.N.-3
18			Detection of Multi Co linearity	B.N.-1,B.N.-3
19			Remedial Measures of Multi Co linearity	B.N.-1,B.N.-3

20	5	Multi Co linearity	Heteroscedasticity	B.N.-1,B.N.-3
21			Autocorrelation & Case Study	B.N.-1,B.N.-3
CO:3				
LO5: To understand the theoretical properties of different econometric estimation and testing procedure under various modelling assumptions				
22	6	Regression on Dummy Variable	Regression on Dummy Variable	B.N.-1,B.N.-3
23			Autoregressive	B.N.-1,B.N.-3
24			Autoregressive model	B.N.-1,B.N.-3
25			Distributed Lag Models	B.N.-1,B.N.-3
26			Case Study	B.N.-1,B.N.-3
CO:4				
LO6: To understand estimation issues and their implications including dummy variables , auto regression and distributed lag models				
27	7	Systems of Equations	Identification and Estimation Methods (ILS)	B.N.-1
28			Identification and Estimation Methods (2SLS)	B.N.-1
29			Business Applications of Single Equation Econometrics Model	B.N.-1
30			Systems of Equations	B.N.-1
31			Case Study	B.N.-1
32	Presentation			
CO:4				
LO7: Learn model construction and estimation with application in consumer and producer theory

CO 4								

V: Session Plan:

Lecture No.	Unit No.	Topics	Sub Topics	References
1	1	The field of HRM	Need and significance of HRM	B.N. 1/B.N.4
2			HRM function	B.N. 1/B.N.4
3			Environmental influence of HRM	B.N. 1/B.N.4
4			H.R Audit	B.N. 1/B.N.5
5			ASTD HRM model	B.N. 2/B.N.5

6			Case Study : CIC Logistic Ltd.	
CO:1				
LO1: The unit will help the students to understand the basic concepts of HRM, HRM functions and HR audit.				
7	2	HR Policies	Formulation of sound policies	B.N. 1/B.N.2
8			Essentials of sound personnel policies	B.N. 1/B.N.2
9			Case Study : Fanta Cola Ltd.	
	Assignment (Worksheet)			
CO:1				
LO2: It helps to understand the formulation and essentials of HRM policies				
10	3	Acquisition of Human Resources	Job Analysis	B.N. 1/B.N. 2
11			Job Description	B.N. 1/B.N. 2
12			Job Specification	B.N. 1/B.N. 2
13			Manpower planning objectives, importance	B.N. 1/B.N. 2
14			Manpower planning process	B.N. 2/B.N. 3
15			Recruitment policy, sources, Techniques	B.N. 2/B.N. 3
16			Selection methods , Induction	B.N. 1/B.N. 4
17			Placement	B.N. 1/B.N. 4
18	Presentation			
CO:1,2				
LO3: It helps the students to understand the HR acquisition process.				
19	4	Development of Human Resources	Training & Development	B.N. 4/B.N.2
20			Training Methods	B.N. 1/B.N.2
21			Introduction to Performance Appraisal	B.N. 4/B.N.2
22			Performance Appraisal methods	B.N. 4
23			Career and Succession Planning	B.N. 4
24			Case Study : Engler Enterprises	
CO:3				
LO4: It helps to understand the T&D Process and methods. It also helps to understand P. Appraisal methods.				
25	5	Maintenance of Human Resources	Job Evaluation	B.N. 1/ B.N.3
26			Designing wage and salary structure	B.N. 1/ B.N.3
27			Administering the wage and salary structure	B.N. 1/ B.N.3
28			Employee Incentives	B.N. 1/ B.N.3

CO:3				
LO5: It helps the students to understand the importance of job evaluation, incentive and reward system.				
29	6	Grievance Handling	Grievance Handling procedure and solution	B.N. 1/ B.N.2
CO:4				
LO6: To understand the reasons of employee grievance and procedure of handling them.				
30	7	Separation Processes	Turnover , Retirement	B.N. 1/ B.N.2
31			Layoff and VRS	B.N. 1/ B.N.2
CO:4				
LO7: To understand the ways of separation from the organisation.				
32	8	Research and the Future	Current Trends andFuture Challenge for HRM	B.N. 1/ B.N.2
CO:1				
LO8: To open their minds for future challenges and research in HRM.

Lesson Plan

Subject: Business Forecasting & Planning Techniques.

Session: July – Dec

Class: M.B.A (BE) IV Sem

I: Objectives of course:

The objective of this paper is to teach the different forecasting techniques that are helpful in trade and business.

II: Examination: The faculty member will award internal marks out of 15 (4 for Tests and 11 for class participation). The semester examination carrying 85 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 25 marks will contain one or more cases/Numerical.

III: Course Outcomes (CO):

- CO1: Basic understanding of the relationship between the two terms Forecasting & Planning
- CO2: Understanding of basic methodologies of business forecasting
- CO3: Awareness of basic applications of forecasting in decision making for a business
- CO4: Optimum utilization of forecasting for the purpose of planning in an organization

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

Subject: Commodity, Derivative & Price Risk Management

Class: MBA (BE) – IV Semester

Session: January - June

I: Course Objective:

The objectives of this course are to explain to the student the commodity derivatives, evolution of commodity market in India, risk return tradeoff and manage financial risk through the use of various derivatives and to make them understand operations of derivatives market.

II: Examination:

The external semester examination will carry 85 marks and the faculty member will award internal marks out of 15.

III: Course Outcomes (CO):

- CO1: Describe the basic characteristics of derivatives market
 CO2: Describe the uses of derivatives by hedgers, speculators and arbitrageurs
 Define and describe the traded and over-the-counter derivative contracts on different
 CO3: underlying assets
 Describe and use the different models used for pricing derivatives and used of various
 CO4: strategies

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1				2				
CO 2						2		1

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Derivatives	Introduction to Derivatives, Meaning of Forwards and Futures.	B.N.-2, B.N.-3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
2			Meaning and concept of Options and Swaps.	B.N.-2, B.N.-3
3			Difference between Spot and Future Markets	B.N.-2, B.N.-3
4			Difference between Forward and Future Markets, Types of Orders.	B.N.-2, B.N.-3
Assignment: Prepare an assignment on meaning and concept of derivatives and its instruments.				
CO: 1				
LO1: Introduction to Derivatives and types of contracts.				
5	2	History of Commodity Markets	Evolution of commodity markets.	B.N.-4
6			Commodity markets of India, National Commodity Future Exchanges in India.	B.N.-4
CO: 2				
LO2: History of Commodity Market in India				
7	3	Commodity Futures in India and its Regulations	Economic perspective of commodity and future markets.	B.N.-4
8			Regulatory Framework –Forward Contract Regulation Act 1952, Discussion on Kabra Committee Report	B.N.-4
9			Forward Market commission and its functions.	B.N.-4
10			Regulatory Measures evolved by the commission, Amendments to FCRA 1952.	B.N.-4
Assignment: Throw light on the features of FCRA 1952 and its amendments based on the recommendations of Kabra Committee?				
CO: 3				
LO3: Highlights on Committees reports, regulations in relation to Commodity, Future Market in India				
11	4	Commodity Futures	Meaning and objective of commodity futures, Pricing commodity futures.	B.N.-4
12			Factors affecting cost of carry, Investment and consumption commodities	B.N.-4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
13			Meaning and explanation of Basis and Spreads.	B.N.-4
14			Participants in commodity derivatives – Hedgers, Speculators and Arbitrageurs.	B.N.-4
CO: 2				
LO4: Working of financial participants in Commodity future markets				
15	5	Advanced concepts in Commodity Futures	Hedging – concept, Hedge ratio, Long (buy) hedge, uses of long hedge strategy.	B.N.-4
16			Buying hedge with basis risk, short (sell) hedge, uses of selling hedge strategy,	B.N.-4
17			Selling hedge with basis risk, rolling over of hedge position, advantages and limitations of hedging and speculation.	B.N.-4
CO:2				
LO5: Hedging strategies in commodity future market				
18	6	Options Markets And Trading Strategies	Types of options, uses of options, payoffs from options.	B.N.-1, B.N.-2
19			Trading strategies involving Bull and Bear.	B.N.-1, B.N.-2
20			Butterfly, Calendar and diagonal spread.	B.N.-1, B.N.-2
21			Straddles, Strip and Straps.	B.N.-1, B.N.-2
22			Options valuation and pricing.	B.N.-1, B.N.-2
23			Over the counter exchange options and Index options.	B.N.-1, B.N.-2
Presentations: Class room power point presentation on different kinds of options trading and pay-off strategies.				
CO:3				
LO6: Highlights of option Market Strategies				
24	7	Future Contracts	Introduction to future markets, future contracts.	B.N.-1, B.N.-2
25			Future trading, Specification of the future contract, newspaper quotes.	B.N.-1, B.N.-2
26			Hedging using futures, Index futures, Interest rate futures.	B.N.-1, B.N.-2

Lecture No.	Unit No.	Topic	Sub Topic	Reference
27			Foreign exchange and currency futures, Mechanism of future contracts.	B.N.-1, B.N.-2
28			Operations of margin, convergence clearing process	B.N.-1, B.N.-2
29			Clearing house and clearing margins.	B.N.-1, B.N.-2
CO: 4				
LO7: Mechanism of Future Contract Market				
30	8	Swaps	Introduction to swaps, basic swap structure,	B.N.-2
31			Types of swaps: Interest rate swaps and Currency swaps.	B.N.-2
32			Mechanics of swaps transactions, Swap-Options	B.N.-2
CO: 4				
LO8: Mechanism of Swap Market

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

Lesson Plan**Subject: Accounting for Managers****Session: Jul-Dec****Class: MBA (TM) - I Sem**

I: Objective of course: The objective of this course is to develop the acquaintance of the students with the various concepts of financial accounting, cost accounting, and management accounting and to develop understanding of accounting for managers for decision making.

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 20 marks will have 4 theory questions out of which students will be required to attempt any two questions. Section B carrying 60 marks will contain five practical/numerical problem(s), out of which a candidate is required to attempt any three. These questions would require the candidates to take decision on management problems considering quantitative and non-quantitative factors both and to defend their decisions. Relevant data leading to simple calculations for arriving at relevant figures will be given to them.

III: Course Outcomes (CO):

- CO1 To develop the acquaintance of basic concept of accounting and financial management among the students.
- CO2 To develop in students decision making skills related to financial position of the company.
- CO3 To thrive an insight to understanding and analyzing financial statements of the companies.
- CO4 To imbibe the knowledge of solving management and cost related problems after taking into account of quantitative and qualitative factors.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
PART-I FINANCIAL ACCOUNTING				
1	1	Fundamentals of Financial Accounting	Introduction to Accounting, Book Keeping, Importance and limitations of accounting. Relation with other disciplines.	B.N. 1
2			Basic Accounting Concepts & Fundamental Conventions. Introduction to accounting standards and GAAPs.	
CO: 1				
LO: Describe the conceptual framework of accounting along with the understanding of accounting standards.				
3	2	Concepts of double entry system, basic knowledge of accounting process (journal). Preparation of final account with adjustments.	Double entry system of accounting, Journal and Types of Entries	B.N.2
4			Ledger- Practical Questions	B.N.2
5			Trial Balance-Practical Questions	B.N.2
6			Final Accounts – simple problems	B.N.1
7			Final Accounts – Problems with adjustments	B.N.1
8			Final Accounts – Problems with adjustments	B.N.1
CO: 1 & 2				
LO: Understand the accounting entries and preparation of final accounts with adjustments.				
9	3	Fundamentals of Cost accounting	Concept, need and classification of cost and cost accounting.	B.N.1
10			Advantages and limitations of Cost accounting.	
11			Techniques of Cost accounting and cost accounting system.	
12			Cost reduction and Cost control	
13			Cost Management. Components of Total Cost.	
14			Preparation of Cost Sheet.(Theory and numerical)	
15			Numerical Questions on Cost Sheet.	B.N.2
CO: 2 & 3				
LO: Understand the concept of cost accounting, cost management techniques and preparation of cost sheet.				
16	4	Fundamentals of Management Accounting	Introduction to Management Accounting, concept and its scope.	B.N.2
17			Need, importance and limitations of Management Accounting.	B.N.2
18			Balance sheet and Profit & loss account and related concepts.	B.N.2

19	4		Difference between Management, Cost and Financial Accounting.	
CO: 1, 2 & 3				
LO: Develop acquaintance with the fundamentals of management accounting along with the importance and limitations of management accounting.				
20	5	Analysis of Financial Statements	Overview of Financial Statements analysis, objectives and importance.	B.N.1
21			Various Methods of analysis of financial statements. (Theory)	B.N.1
22			Ratio Analysis and its numerical problems.	B.N.1
23			Ratio Analysis and its numerical problems.	
24			Fund Flow Analysis and its numerical problems.	
25			Fund Flow Analysis and its numerical problems.	
26			Cash Flow Analysis and its numerical problems.	
		Assignment- Based on Numerical		
CO: 2, 3 & 4				
LO: Demonstrate the various methods of analyzing financial statements.				
27	6	Cost Analysis and Decision Making	. Marginal, absorption costing and differential costing.	B.N. 9
28			Break even Analysis and CVP Analysis.	B.N. 10
29			Budget and its various types.	B.N. 10
30			Preparation of budgets viz. cash budget, sales budget, production budget, Sales and revenue budget.	
31			Standard Costing	
32			Variance Analysis.	
CO: 2, 3 & 4				
LO: Acquaintance related with cost analysis, standard costing and variance analysis will be developed amongst students along with concepts of several kinds of budgets.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lesson Plan

Subject: Travel Agency and Tour Operations Management
Class: MBA – II Sem

Session: Jan- Jun

I: Course Objective:

Travel agency & tour operation are integral part of travel & tourism industry without which both the aspects would not be possible. In this the students are required to learn the ropes of the industry in order to facilitate the procedure. Many students are likely to pursue their career in this field and hence it becomes imperative for them to get acquainted with both travel agency & tour operation business.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases. Cases prescribed below are only for classroom discussion and internal evaluation and not for end semester examinations.

III: Course Outcomes (CO):

CO 1: Understand the significance of travel agency and tour operation business.

CO 2: Know the current trends and practices in the tourism and travel trade sector.

CO 3: Illustrating the Travel accounting procedures towards the tourist agencies and their functions for developing managerial skills

CO 4: Develop adequate knowledge and skills applicable to travel industry.

6. Attendance will be a major factor for assessing class performance.

VIII: Rubric for Internal Assessment			
Subject: Business statistics			
MBA (TM)- II Sem			
Goal: The <i>Statistics in Business</i> is for students to describe data and make evidence-based decisions using inferential statistics that are based on well-reasoned statistical arguments.			
Objective: The objective of this course is to familiarize the students with fundamental statistical tools which can help them in analyzing the business data. This course will provide students with hands-on experience to use statistical tools in order to make scientific decisions even in uncertain business environment.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

% Students having knowledge of Statistical methods and know how to correctly applied them. Their results and discussion well focused and included all important points.	% Students having knowledge of the statistical methods but their results are not specific	% Students having understanding about statistical methods but are not specific and poorly supported by criteria.	% Students Need More Efforts for applying statistical methods

Lesson Plan

Subject: Cargo and Airline Management

Session: Jan- Jun

Class: MBA(TM) - II Sem

I: Objective of course: The primary objective of Cargo & Airline Management is to introduce the students about cargo industry of India and to impart the basic knowledge about trends of handling cargo business & Airline Management.

II: Examination: The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will consist of 8 theory questions out of which students will be required to attempt any 5 questions.

III: Course Outcomes (CO):

- CO1: Understand the basic concepts and recent developments cargo management along with the documentations requires.
- CO2: Evaluate the different modes of transportation and preparation of INCO terms along with various schemes.
- CO3: Understand the basic concepts and recent developments airline management and regulatory authorities
- CO4: Develop skills related to the aircrafts and various abbreviations and terminology of Airline management

Lesson Plan

Subject: Consumer Behavior

Session: Jan - June

Class: M.B.A. (TM) III Sem

I: Objectives of course: The objective of the course is to equip the students with the concept and methods of Business Research. The students will be able to plan, design and carry out business research using scientific methods and prepare research report(s) / paper (s)

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mentioned in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases

III :Course Outcome (CO) :

CO 1 Understand various concepts of consumer behavior mechanism.

CO 2 Understand consumer behavior models to design advertising, product and overall business strategies.

CO 3 Apply knowledge of consumer demographics on business decision making for product, price and promotion & place..

CO 4 Able to determine potential factors influencing consumer decision making and brand selection.

Lesson Plan

Subject: International ticketing
Class: MBA (TM) – III Sem

Session: Jul-Dec

I: Objective of course: the course covers the basic and advance level learning modules related to the aviation industry & international ticketing standards which will make students familiar with internationally used technologies.

II: Examination: The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 80 marks will have two sections A and B. Section A worth 20 marks will have 4 theory questions out of which students will be required to attempt any two questions. Section B carrying 60 marks will contain five practical/numerical problem(s), out of which a candidate is required to attempt any three. These questions would require the candidates to take decision on management problems considering quantitative and non-quantitative factors both and to defend their decisions. Relevant data leading to simple calculations for arriving at relevant figures will be given to them.

III: Course Outcomes (CO):

CO1 To understands the time calculations and the concept of standard and daylight saving time

CO2 Familiarization with air tariff and currency regulation, general rules.

CO3 Familiarization with passport viva currency, health regulation, different types of credit cards

CO4 Understanding of fare construction and mileage principles

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO:1				
LO: To understand national income statistics and to describe and analyze the economy in quantitative terms.				
5	Assignment			
6	2	Demand Analysis Supply Analysis	Meaning of Demand, Types of Demand,	B.N. 1, B.N.2
7			Law of Demand, Determinants of Demand	B.N. 1, B.N.2
8			Demand Function ,Elasticity of demand	B.N. 3
9			Price elasticity of demand. Income elasticity of demand, Cross Elasticity of demand ^[L] _[SEP]	B.N. 2, B.N.3
10			Law of Supply, Supply Schedule, Supply Curve ^[L] _[SEP]	B.N. 1
11			Price elasticity of supply ^[L] _[SEP]	B.N. 1
12			Case Study	B.N. 1
CO:2				
LO: To explain the concepts of employment and unemployment with Keynesian and say's law and also to know highlights of investment function and consumption function.				
13	Assignment			
14	3	Production Analysis	Production function, Types of Production Function	B.N. 1, B.N.4
15			Law of Variable Proportions	B.N. 1, B.N.4
16			Law of Returns	B.N. 1, B.N.4
17			Diminishing Returns, Returns to Scale	B.N. 1, B.N.5
18	Presentation			

CO:3				
LO: To describe the determinants of the demand for money, the supply of money and its theories.				
19	4	Cost & Revenue Analysis	Cost concepts, Elements of Cost, Relationship between Production and Cost,	B.N. 1, B.N.3
20			Average and Marginal cost curves, Relationship between average and marginal cost	B.N. 2, B.N.5
21			Concept of revenue, Revenue Curve, Relationship between average and marginal revenue	B.N. 2, B.N.4
22			Output & Pricing under different markets & Case Study	B.N. 1, B.N.3
23			Case Study	B.N. 1, B.N.3
CO:4				
LO: to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.				
24	5	Market Structures	Perfect Competition	B.N. 1, B.N.3
25			Monopoly	B.N. 2, B.N.3
26			Monopolistic Competition	B.N. 2, B.N.4
27			Oligopoly, features & characteristics	B.N. 1, B.N.3
CO:2,3				
LO: To understand the role of banking and other financial institutions in the economy.				
28	Presentation			
29	6	International Trade	Balance of Payments, Concepts	B.N. 1, B.N.2
30			Disequilibrium in BOP: Methods of Correction	B.N. 1, B.N.2
31			Tread Barriers and Tread Strategy, Free Trade vs. Protection	B.N. 1, B.N.3
32	Presentation			
CO:4				
LO: To understand the role of regulatory bodies like RBI in regulating nation’s financial system.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

Managerial Skills

Objective: To offer exposure of essential managerial skills to students and developing these skills in the students.

Scheme: Internal evaluation shall be of 20 marks. Internal- 10 marks for written test (Best of 2 out of 3), 10 marks will be for Project/Assignment/Presentation/Case Study. End semester exams will be of 80 marks will have 7 theory questions out of which students will be required to attempt any 5 questions.

Syllabus Unit I: Introduction to skills & personal skills Importance of competent managers, skills of effective managers, developing self awareness on the issues of emotional intelligence, self learning styles, values, attitude towards change, learning of skills and applications of skills.

Unit II: Problem solving and building relationship: Problem solving, creativity, innovation, steps of analytical problem solving, limitations of analytical problem solving, impediments of creativity, multiple approaches to creativity, conceptual blocks, conceptual block bursting. Skills development and application for above areas.

Unit III: Building relationship Skills for developing positive interpersonal communication, importance of supportive communication, coaching and counseling, defensiveness and disconfirmation, principles of supportive communications. Personal interview management. Skill analysis and application on above areas.

Unit IV: Team building: Developing teams and team work, advantages of team, leading team, team membership. Skill development and skill application.

Unit V: Empowering and delegating: Meaning of empowerment, dimensions of empowerment, how to develop empowerment, inhibitors of empowerment, delegating works. Skills development and skill application on above areas.

Unit VI: Communication related to course: How to make oral presentations, conducting meetings, reporting of projects, reporting of case analysis, answering in Viva Voce, Assignment writing.

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE

Lesson Plan

Subject: Economics II

Session: Jan-June

Class: B.B.A. II Sem

I: Objectives of course: To generate understanding of the macroeconomics and impart knowledge of the function.

II: Examination: 20 marks for internal evaluation. The assessment shall be done on the basis of test, case and assignments. External examination shall be of 80 marks for two sections section A & B. The section A shall have 6 questions, questions shall be of logical and analytical type. Emphasis shall be on real life situation based questions rather than direct theory based questions. Out of 6 questions 4 shall be solved for 64 marks and there shall be a case for 16 marks in section B.

III: Course Outcomes(CO):

CO1 Demonstrate knowledge of basic economic concepts and principles.

CO2 Acquaintance with the necessary analytical tools to analyze decision making by individual firms such as demand, supply, pricing and resource allocation

CO3 To learn how cost and revenue curves are analysed and how they vary in short and long run.

CO4 Demonstrate pure understanding of output price determination in various market structures and also to outline the role of comparative advantage in exchange. Describe the role of international trade and finance in domestic economic activity.

VII Note

1. There will be a Group presentations of 30 minutes
2. Class performance and discipline will be an important factor for assessment.

VIII Rubric for Internal Assessment
Subject: Human Resource Management
BBA II Sem

Goal : Students develop the ability to understand the various aspects of human resource in an organization. Topics include -introduction to HRM, procurement and development, compensation function, maintenance and integration function, audit and control function, etc.

Objective: To generate understanding of the human resource management and impart knowledge of the function.

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
__ Students	__ Students	__ Students	__ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having an understanding about Human Resource Management in Organizations so that they improve their managerial effectiveness towards employees and have a knowledge of their function.	% Students having an understanding of human resource management and their function.	% Students having an understanding about Human resource management in an organization.	% Students need more efforts to develop an understanding of Human resource management and their functions in Organizations.

IX: Scheme of Internals Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Management Information System**Session:** July - Dec**Class:** BBA - II Sem

I: Objective of course: The objective of this course is to help the student acquire the basic knowledge of information system so as to enable them to make more efficient use of information for decision making.

II: Examination : There shall be internal evaluation of 10 marks and practical examination for 20 marks. There shall be external examination for 70 marks in the paper. Internal shall be evaluated on the basis of test and assignment.

III: Course Outcomes(CO):

CO1 To understand the applications of information tools in Business operations

CO2 To study the development process of Management Information System

CO3 To learn use of information system to achieve business competitive advantages and data processing

CO4 To understand system design and the role of Information System in Managerial Decision Making

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to MIS	The meaning and use MIS	B.N. 9
2			System View of Business, Process of MIS,	B.N. 9
3			Development of MIS within the organization, Management Process,	B.N. 9
4			Information Needs, System Approach	B.N. 9
5			Systems Approach in Planning MIS	B.N. 9

6			Systems Approach in Organizing and Controlling	B.N. 9
Assignment-1				
CO:1				
LO: To understand the concept of system in organization				
7	2	Planning MIS	Information system at various levels of Management(TPS,OAS,DSS)	B.N. 9
8			Information system at various levels of Management(HRIS,ESS,KWS)	B.N. 9
9			Planning of MIS	B.N. 9
10			Types of Plan	B.N. 9
11			Implementation of Management Information System	B.N. 9
12			Controlling Management Information System	B.N. 9
Assignment 2				
CO:2				
LO: To understand concepts of Management Information System (MIS).				
13	3	Data processing and Computer systems	Fundamentals of Data Processing	B.N. 12
14			Sources and flow of Data	B.N. 12
15			Components of Computer Systems	B.N. 12
16			Flow Charts, Examples of Flow chart	B.N. 12
17			Conversion of Manual to Computer Based Systems	B.N. 12
18			Computer Systems Software, Application Software, Telecommunication Modem	B.N. 12

Assignment-3. Group assignment,				
CO:3				
LO: To understand concepts of data processing.				
19	4	Managerial Decision Making	Decision Making, Definition	B.N. 10
20			Types of Decisions- Unstructured,Semi-structured and Structured decisions	B.N. 10
21			Decision Support System	B.N. 10
22			Components of Decision Support System	B.N. 10
23			Difference between MIS and DSS	B.N. 10
24			Examples of DSS	B.N. 10
Assignment-4				
CO:4				
LO: To know about managerial decision and its types and how DSS is supporting in decision making.				

25	5	System Design	System design consideration	B.N. 10
26			Input/output design	B.N. 10
27			Forms design	B.N. 10
28			File organization and database	B.N. 10
29			Data management	B.N. 10
30			File design	B.N. 10
31			Program design	B.N. 10
32			Control and security	B.N. 10
Class test				
CO:4				
LO: To understand basic concepts of system design.

VII: Note:

1. There will be 6 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major group assignments, group size of 4, each group will be given separate topics for to discuss and presentation which will increase the understanding and practical approach of towards business environment concepts.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII : Rubric for Internal Assessment

Subject: Business Environment

BBA III Sem

Goal : It will provides students with the knowledge and skills to get knowledge about international business environment and various economic factors and international organizations by which they can easily identify challenges and opportunities of doing business in international market.

Objective: To generate understanding of business environment and impart knowledge of the function

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students Having an understanding about business environment Particularly economic, Sociocultural, Political and Its Impact on Business in India and world	% Students Having basic understanding about business environment prevailing in India and world with Implications to business.	% Students Having understanding about business environment.	% Students Need More efforts for Concept at Business Environment Level.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT AND RESEARCH, INDORE**Lesson Plan**

Subject: Business Statistics
Class-BBA- III

Session: July- December

I: Objectives of course: To generate understanding of the statistics in business decision making and impart knowledge of the tools of statistics.

II: Examination: 20 marks for internal evaluation. The assessment shall be done on the basis of test, case and assignments. External examination shall be of 80 marks for two sections section A & B. The section A shall have 6 questions; questions shall be of logical and analytical type. Emphasis shall be on real life situation based questions rather direct theory based questions. Out of 6 questions 4 shall be solved for 64 marks and there shall be a case for 16 marks in section B.

III: Course Outcome:

CO1. To prepare students for lifelong learning and successful careers using their statistical skills and application in business problems.

CO2. To develop decision making skills pertinent to the practice of statistics, including the students' abilities to formulate problems, to think creatively, and to synthesize information.

CO3. To train students thoroughly in methods of analysis and computation, including the computational skills appropriate for statistical tool based data analysis.

CO4. To teach students different forms of data and also help them in evaluating different concepts of probability and applying them.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO1	2	-	-	3	1	-	-	-
CO2	2	1	-	3	-	-	2	-
CO3	-	-	1	3	-	-	-	-
CO4	-	-	-	3	-	-	-	-

V: Session Plan:

Lecture No	Unit	Topic	Sub Topic	Reference
1	1	Introduction to statistics	purpose of statistics kinds of numbers, measurements, variables	BN-1,BN-2
2			attributes, UNITs, discrete and continuous data	BN-1,BN-2
3			Frequency distributions, continuous frequency distribution graphic representation	BN-1,BN-2
4			Histogram, frequency polygon and their uses	BN-1,BN-2
CO:1				
LO: To understand the purpose of Statistics and examine different forms of data including their graphical representation.				
5	2	Measures of central tendency	Mean, Median	BN-2,BN-3
6			Mode	BN-2,BN-3
7			Measure of Dispersion, Range, mean deviation	BN-2,BN-3
8			standard deviation, coefficient of variations	BN-2,BN-3
CO:2				
LO: To understand one of the most important concepts of statistics, the central tendency and measures of dispersion.				
9	3	Concept of probability	Law of Addition	BN-2,BN-3
10			Law of Multiplication	BN-2,BN-3
11			conditional probabilities	BN-2,BN-3
12			Random variables, its expectation and variances, Applications	BN-2,BN-3
13			Probability distributions, Binomial distribution	BN-2,BN-3
14			Poisson distribution	BN-2,BN-3
15			Normal distribution	BN-2,BN-3
Assignment 1: Meaning, definition and business applications of statistics				
CO:4				
LO: To understand the concept of probability and develop the efficiency in application of probability				

distribution.				
16	4	Population parameters and sample statistics	Introduction	BN-2,BN-3
17			standard error, sampling distributions of statistics	BN-2,BN-3
18			large sample tests	BN-2,BN-3
19			large sample tests	BN-2,BN-3
20			single mean, Difference of means	BN-2,BN-3
21			single proportion, Difference of proportions	BN-2,BN-3
CO:3				
LO: To understand the concept of population and samples including forming an idea about different sample tests..				
22	5	Correlation and regression	Scatter Diagram, Coefficient of correlation	BN-2,BN-3
23			Rank Correlation	BN-2,BN-3
24			Lines of Regression	BN-2,BN-3
25			index numbers, Simple, weighted	BN-2,BN-3
26			consumer price index wholesale price index	BN-2,BN-3
CO:3				
LO: To understand the concept of correlation and regression.				
27	6	Time Series	Time series and its components	BN-2,BN-4
28			Trends- seasonal, cyclical, irregular	BN-2,BN-4
29			Measurement of trends- semi average, moving average	BN-2,BN-4
30			Least square method	BN-2,BN-4
31			Measurement of seasonal fluctuations, simple averages Ratio to trend method	BN-2,BN-4
32			Ratio to moving average method, simple problems	BN-2,BN-4
Assignment II: Define Components of Time series with suitable examples and diagrams				
CO:2,3				

LO: To develop an understanding of time series analysis including problem solving applications.

3. Ajay goyal & Alka goyal, Mathematics and statistics, 4th edition, taxman publication
4. D.C sancheti & V K kapoor, statistics-theory, methods and application, sultan chand & sons

VII: Note:

1. There will be 2 individual assignments.
2. There will be 2 major tests based on the practical and theory aspects of the subjects, each carry 4 marks, the marks of the better of two major tests will be included in internal marks.
3. Attendance will be a multiplying factor which will render significant impact on the internal marks of the student.
4. Class performance and discipline will be an important factor for assessing internal marks. It carries 4 marks.

VIII : Rubric for Internal Assessment **Subject: Business and Statistics** **BBA III Sem**

Goal : Students are introduced to the use the concepts and methods of statistics, including Time series, correlations and regression.

Objective: To generate understanding of the statistics in business decision making and impart knowledge of the tools of statistics.

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having command on statistical techniques and their application to business problems with concept and evaluation.	% Students having basic command on statistical techniques and their application to business problems.	% Students having command on statistical techniques.	% Students Need More Efforts for Solution and Basic Concept of Statistical Techniques.

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject: Marketing Management****Session: July-December****Class: BBA III Sem**

I: Objective of the Course: The objective of this paper is to create awareness about International management system of different countries.

II: Examination: The faculty member will award marks out of a maximum of 20 marks (Internal Evaluation). The semester examination will be worth 80 Marks (External evaluation).

III: Course Outcome:

CO1. Understand the role and functions of marketing within a range of organizations.

CO2. Capture market insights from the environment.

CO3. Understand distribution networks and implementation of marketing strategies accordingly.

CO4. Apply sustainable marketing practices into business

IV: PO-CO Mapping: High 3, Medium 2, Low 1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3				2			
CO 2	1	2	3					
CO 3		2	2	3			1

VII: Note:

1. There will be 5 class tests/assignments/presentations of equal weightage.
2. There will be one major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of Comparative International Management.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII : Rubric for Internal Assessment**Subject: Marketing Management****BBA III Sem**

Goal : The subject gives an insight about marketing environments, modern marketing techniques and its importance into current business scenario. Topics under this subject are basics of marketing, segmentation, targeting and positioning and marketing mix.

Objective: To generate understanding of the marketing management and impart knowledge of the function.

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
__ Students	__ Students	__ Students	__ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having an command over subject that includes basics of marketing, marketing mix, recent trends and its implementation in current business scenario.	% Students having understanding about marketing and its basic function.	% Students' subject knowledge is moderate.	% students need to put efforts for learning and understanding the subject.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT AND RESEARCH, INDORE**Lesson Plan****Subject: Operations Management****Session: July- December****Class-BBA-III**

I: Objectives of course: To give understanding of operations as function and skills of major decisions area in operations as function.

II: Examination: There shall be 20 marks for internal evaluation and 80 for external paper. Examination paper shall have two sections Section A and Section B. Section A shall have theoretical questions and section B shall have numerical. There shall be five questions in section A and three shall be answered for 48 marks. The section B shall have 4 questions and two to be answered for 32 marks.

III: Course Outcome:

CO1: To understand the core features of operations and production management functions at the strategic and operational level both to improve the working of organization.

CO2: To understand and describe the boundaries of operation management and recognize its interface with other functional area within the organization.

CO3: To understand analysis of operational situations on the basis of qualitative and quantitative both level. And also able to evaluate production management strategies critically for the application of analytical models, frameworks, tools and techniques relevant to production.

CO4: To understand the quality management and development of skills needed for the effective operations management.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO1	-	3	-	-	-	-	-	-
CO2	1	2	1	-	-	-	-	-
CO3	3	2	1	3	-	-	3	-
CO4	3	2	-	3	-	-	-	-

V:Session Plan:

Lecture No	Unit	Topic	Sub Topic	Reference
1	1	Introduction to Production and Operations Management	Nature of Production, productions and system, production as an organizational function	BN-1,BN-2
2			decision making in production, production management and operations management	BN-1,BN-2
3			Characteristics of modern production and operation management	BN-1,BN-2
4			Organization of Production function	BN-1,BN-2
5			recent trends in production/operations management	BN-1,BN-2
CO:1				
LO: To introduce students with the basic concepts, models and statements of the operations management theory.				
6	2	Production process, manufacturing and service operations	production process, manufacturing operation	BN-1,BN-2
7			service operations, selection of process non manufacturing or service operations	BN-1,BN-2
8			difference between manufacturing and service operations, classification of manufacturing process	BN-1,BN-2
9			manufacturing operations as conversion process, characteristics of modern manufacturing process	BN-1,BN-2
CO:2				
LO: Student will understand production process, manufacturing process and service operations. Students will also understand the basic difference of all these three processes.				
10	3	Design of production system	Product, process and production design	BN-1,BN-5
11			factors influencing product design	BN-1 BN-5
12			approaches for product design, process planning and process design	BN-1 BN-5
13			process selection, process management, major process decisions	BN-1,BN-5

Assignment I: Define production process and approaches to production design				
CO:3				
LO: Students will understand the concept of production process, selection and design, and will also understand the concept of product design and its approaches.				
14	4	Plant location & Plant layout	Location theories, freedom of locations	BN-3,BN-4
15			errors in selection, steps in location selection, relative importance of location factors	BN-3,BN-4
16			location models	BN-3,BN-4
17			location models	BN-3,BN-4
18			Meaning, definition scope and of facility layout, factors influencing layout	BN-3,BN-4
19			types of layout, importance of layout, layout planning, layout tools and techniques	BN-3,BN-4
20			layout planning, layout tools and techniques	BN-3,BN-4
21			analysis if layout with computers, criteria for selection and design of layout, layout design procedure	BN-3,BN-4
CO:4				
LO: Become familiar with the concept of location and layout planning and also types of location and layout designs.				
22	5	Materials Management	Overview of materials planning	BN-3 BN-5
23			functions, meaning and operations of material planning	BN-3,BN-5
24			material requirement planning-Numerical	BN-3,BN-5
25			material requirement planning-Numerical	BN-3,BN-5
26			over view of Store management objectives & functions	BN-3,BN-5
CO:3				
LO: Student will understand the material management and store management concept within given layout. Also become familiar with the planning of material required for an organization.				
27	6	Quality control	Purpose of inspection and quality control	BN-3,BN-5

28		control charts	BN-3,BN-5
29		acceptance sampling by variable and attribute	BN-3,BN-5
30		Numerical- control charts	BN-3,BN-5
31		Numerical control charts	BN-3,BN-5
32		Sample plan OC curve, AQL, AOQL, LTPD	BN-3,BN-5
Assignment II: Layout planning, different types of layouts with suitable example			
CO:4			
LO: Student will understand the concept of quality control for both product and process. They will be able to use different tools and techniques of quality control.

VII:Note:

1. There will be 2 individual assignments.
2. There will be 2 major tests based on the practical and theory aspects of the subjects, each carry 4 marks, the marks of the better of two major tests will be included in internal marks.
3. Attendance will be a multiplying factor which will render significant impact on the internal marks of the student.
4. Class performance and discipline will be an important factor for assessing internal marks. It carries 4 marks.

VIII : Rubric for Internal Assessment
Subject: Operations Management
BBA III Sem

Goal : To provide skills and competencies in operations management to contribute to an organization upon entry. Students will develop an awareness of the principal operational issues and constantly evaluate and modify processes to maintain efficiency and effectiveness in accordance with the company's goals.

Objective: The course will give student understanding of operations as function and skills of major decision area in operations as follows

20-16 Marks	15-11 Marks	10-06 Marks	05-00 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% of the student will be able to apply the of concepts and theories used in operations management for achieving efficiency and quality superiority.	% students have lesser understanding of the concepts & theories used in operations management for achieving efficiency and quality superiority.	% Offers minimal understanding of the concepts & theories used in operations management for achieving efficiency and quality superiority.	% Have Low degree of association & attempt to identify and summarize the problem accurately.

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Session:** Jul-Dec**Subject:** Organization Behavior**Class:** BBA III Sem

I: Course Objective: The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources and impart knowledge of the function.

II: Examination: 20 marks for internal evaluation. The assessment shall be done on the basis of test, case and assignment. External examination shall be of 80 marks for two sections, section A and B. The section A shall have 6 questions; questions shall be of logical and analytical type. Emphasis shall be on real life situation based questions rather direct theory based questions. Out of 6 questions 4 shall be solved for 64 marks and there shall be a case for 16 marks in section B.

III: Course Outcomes (CO):

CO 1 Recognize, explain, predict and manage individual behaviour in organizations.

CO 2 Employ theories and skills of coordinating and motivating teammates to achieve the best results.

CO 3 Identify and develop employees' leadership potential to its fullest.

CO 4 Apply inter-personal communication skills to diagnose and analyse organizational and behavioural problems and recommend appropriate courses of action.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

Lecture No.	Unit No.	Topics	Sub Topics	References
1	1	OB	OB History and Development; Importance of OB to the field of management	B.N. 5/B. N. 6
2			Basic behavioral Process:	B.N.5/B. N. 6
3			Cognitive functions - intelligence, Creativity, Problem solving,	B.N. 5/B. N. 6
4			Learning and its process - implications	B.N. 5/B. N. 6
5			Case Study	
CO:1				
LO: Helping students to understand basic concept of OB to help them analyze the behavioral and learning process in an organization.				
6	2	Attitudes and Values	Attitudes	B.N. 3/B. N. 6
7			Values	B.N. 3/B. N. 6
8			Personality - Concepts, theories, estimation and applications	B.N. 3/B. N. 6
9			Perception - implications,	B.N. 3/B. N. 6
10			Counseling - importance and relevance.	B.N. 3/B. N. 6
11			Case Study	
Assignment (Worksheet)				
CO:2				
LO: The concept of attitude, personality and perception is learnt by the students with the help of various theories.				
12	3	Motivation	Theories	B.N. 4/B.N. 1
13			Theories	B.N. 4/B.N. 1
14			Applications to management	B.N. 4/B.N. 1

15			Case Study	
CO: 2				
LO: An understanding of various theories of motivation and their application by managers in an organization to motivate the employees and gain increased productivity.				
16	4	Leadership	Role and functions of a leader,	B.N. 3/B. N. 6
17			Leadership theories and styles	B.N. 3/B. N. 6
18			Implications for management, Alternatives to leadership	B.N. 3/B. N. 6
19			Case Study	
CO:3				
LO: Students will learn different leadership theories and styles that have an implication for management, also various functions of a leader will be learned.				
20	5	Organizational Development	Approaches	B.N. 1/ B. N. 5
21			Intervention strategies & implementation	B.N. 1/ B. N. 5
23			Organizational culture: relevance of culture in the changing scenario	B.N. 1/ B. N. 5
24			Organizational Politics	B.N. 1/ B. N. 5
25			Impression management and defensive behavior	B.N. 1/ B. N. 5
26			Case Study	
CO:4				
LO: This unit will guide the students to develop an understanding of organizational development and culture through which they will learn to analyze and manage the changing culture.				
27	6	Organizational change	Approaches and resistance to change, Manager as a change agent	B.N. 1/ B. N. 5
28			Conflict management, nature, sources	B.N. 1/ B. N. 5
29			Current applications and future trends in OB	B.N. 1/ B. N. 5
30			Case Study	
31	Presentation			

32	Presentation
CO:4	
LO: To enhance the conflict management technique and to make them understand organizational change and various approaches to manage organizational changes and conflicts.

INSTITUTE OF BUSINESS MANAGEMENT AND RESEARCH
IPS ACADEMY, INDORE
Lesson Plan

Subject: Entrepreneurship

Session: Jan- June

Class: BBA IV Sem

I: Course Objectives: The objective of this course is to familiarise the students with the ground realities of starting & managing their own Entrepreneurial ventures.

II: Examination: 20 marks for internal evaluation. The assessment will be done on the basis of test, case and assignments. External examination shall be of 80 marks for two sections section A & B. The section A shall have 6 questions; questions shall be of logical and analytical type. Emphasis shall be on real life situation based questions rather direct theory based questions. Out of 6 questions 4 shall be solved for 64 marks and there shall be a case for 16 marks in section B.

III: Course Outcome:

CO1 Understanding the basics of Entrepreneurship and real life issues therein.

CO2 Application of Theoretical concepts into practice while facing business problems.

CO3 Contributes in Developing Reasoning and Analytical ability to foster Decision Making.

CO4 Nurturing Entrepreneur Skills and Leadership Abilities.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Indian Legal System for Business**Session:** Jan.-June**Class:** B.B.A IV Sem**I: Objective of the course:**

The objective of this course is to acquire the students various laws, which are to be observed in performing the day-to-day business. Here the emphasis will be on the different latest provisions of the law and on how these can be used in the best interest of the organization without violating them rather than cases.

II: Examination: 20 marks for internal evaluation. The assessment shall be done on the basis of test, case and assignments. External examination shall be of 80 marks for two sections section A & B. The section A shall have 6 questions; questions shall be of logical and analytical type. Emphasis shall be on real life situation based questions rather direct theory based questions. Out of 6 questions 4 shall be solved for 64 marks and there shall be a case for 16 marks in section B

III: Course Outcome:

CO 1: Understanding the nature and sources of law, and the governing legal and judicial system.

CO 2: Apply basic legal knowledge to business contracts.

CO 3: Awareness of different latest provisions of law.

CO 4: Application of legal theory to determine the legal issues in assigned cases.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject: Operation Research****Session****Class: BBA IV Sem**

I: Objective of the Course: The objective of this course is to help the students acquire quantitative tools, and use these to analysis and solution of business problems. The emphasis will be on the concepts and application rather than derivations.

II: Examination:

There shall be 20 marks for internal evaluation and 80 for external paper. Examination paper shall have two sections Section A and B. Section A shall have theoretical questions and section B shall have numerical. There shall be five questions in section A to be answered for 48 marks. The section B shall have 4 questions and two to be answered for 32 marks.

III: Course Outcome:

1. To Understand the concepts and importance of Operations Research
2. To analyze real life system with limited constraints and depict it in a model form.
3. To develop the skills of formulating mathematical models in day to day business operations
4. To develop skills in decision making by applying Operations Research theories in real life

- 1 There will be Four home assignments, each carry 1 marks.
- 2 Two major group Assignments based on the practical aspect of the subject.
- 3 There will be one major Internal Test
- 4 Group size will be 4-5 students, & each group will be given separate topic of assignment
- 5 Class performance & Discipline will be an important factor for assessing internal marks.
- 6 Attendance will be multiplying factor as per given in academic plan

VIII : Rubric for Internal Assessment**Subject: Operation Research****BBA IVSem**

Goal : The learners will be able to determine and analyze the system behaviour by developing appropriate models.

Objective: To develop the knowledge of quantitative tools, and use these tools for the analysis and solution of business problems. The emphasis will be on the concepts and application.

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% of the student demonstrate the ability to construct a clear and insightful problem statement with evidence of all factors in relevant context .	% able to make accurate judgments and draw appropriate conclusions based on the analysis of data	% demonstrate limited ability in identifying a problem statement or related factors in certain context.	% Have Low degree of association to analyze the problem within specific context from subject perspective.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Supply Chain Management**Session:** January - June**Class:** BBA - IV Sem

I: Objective of the Course: To offer understanding of supply chain functions and advantages for business.

II: Examination: There shall be 20 marks for internal evaluation and 80 for external paper. Examination paper shall have two sections Section A and Section B. Section A shall have theoretical questions and section B shall have numerical. There shall be five questions in section A and three shall be answered for 48 marks. The section B shall have 4 questions and two to be answered for 32 marks.

III: Course Outcome:

CO1 Understand the structure of supply chains and the different ways through which supply chains can become competitive in the market

CO2 Learn the methods used by organizations to procure the property, facilities, equipment, materials and services required to operate.

CO3 Design a procurement system that effectively employs demand forecasting, demand management and inventory management techniques.

CO4 To provide an insight into the role of Internet Technologies in supply chain operations Utilize and select appropriate web-based technology.

IV:PO-CO Mapping: High 3, Medium 2, Low 1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO1	3	2					1	2
CO2		1		2				
CO3	1			3	2			
CO4						3	2	

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Understanding Supply Chain	SCM concepts and Definitions	B.N:1, B.N:4
2			Key decision areas	
3			Strategic Supply Chain Management and Key components	
4			External Drivers of Change	
5			Dimensions of Logistics	
6			Macro perspective and the macro dimension	
7			Logistic system analysis	
8			Case: Amazon	
CO:1				
LO: To understand the fundamental concepts of supply chain management concepts.				
9	2	Sourcing strategy	Manufacturing Management	B.N:2 , B.N:4
10			Make or buy decision	
11			Distribution Centers	
12			Capacity Management	
13			Materials Management	
14			Choice of Sources	
15			Procurement Planning	

A-1 First Assignment Submission within 3 Days**CO:2**

LO: Able to identify and assess tradeoffs between the three key areas of transportation, inventory, and warehouse management and recommend actionable plans and strategies.

16	3	Distribution strategy	Choice of Market	B.N:1, B.N:2
17			Network Design	
18			Warehouse Designed Operation	
19		Distribution strategy	Distribution planning	B.N:1, B.N:4
20			Transportation	
21			Packaging	
22			Demand forecasting	

CO:3

LO: Learn the process of getting the right products to the right places, at the right time, in the right size or quantities and in the condition expected by the consumer, yet at the lowest possible cost.

23	4	Inventory Strategy	Inventory Planning	B.N:2, B.N:4
24			Planning of stocking facilities	
25			warehouse location allocation	
26			Warehouse design and operations - inventory norms	
27			Customer Service Strategy	

First Group Presentation**CO:3**

LO: Demonstrate the effective use of different forecasting techniques in solving business and economic problems.

28	5	Channels of Distribution	Service Needs, Cost of Services	B.N:1, B.N:2
29			Revenue Management	

A-2 Second Assignment Submission within 3 Days				
CO:3				
LO: Understand the foundational role of logistics as it relates to transportation and warehousing.				
30	6	IT & SCM	E Commerce and Supply Chain Management	B.N:2, B.N:4
31			Organizational Issues and Supply Chain	
32			ERP and Supply Chain Management	
Second Group Presentation				
CO:4				
LO: Understands how technology has and continues to change logistics and supply chain management.				

VI: Text Readings:

I: Course Objective:

The objective of this course is to develop an insight and understanding of Human Resource Development.

II: Examination scheme:

Students shall be evaluated on two components, internal and end semester examination. Internal component shall be of 20 marks based on continuous evaluation. The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases.

III: Course Outcome:

CO1 :Demonstrate an understanding of key terms and concepts of HRD

CO2 : Demonstrate Roles and Competencies of HRD professionals for employee development and problem solving in the areas of HRD.

CO3 : Analyse the key issues related to the development of human resource such as mentoring, counseling, work life balance, career planning and training.

CO4 : Describe the meaning of terminology and tools used in HRD Audit and it's use in business improvement.

V:Session Plan:

.Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	HRD Concepts:	Definition, Evolution of HRD Concepts	B.N.3/B.N.1
2			Differentiate between HRM & HRD.	B.N.3/B.N.4
3			Challenges & Goals of HRD.	B.N.3/B.N.5
4			Case Study Analysis	
CO:1				
LO: This Unit will help the students to understand the basic concepts of HRD, along with the challenges and goals of the HRD professionals in an organisation				
5	2	HRD Function:	Brief -HRD department structure,	B.N.3/ B.N.5
6			Detailed Discussion of HRD department structure	B.N.3 / B.N.4
7			HRD department functions	B.N.5 / B.N.4
8			HRD staffing functions	B.N.3/ B.N.4
CO:2				
LO: The second Unit will make the students understand the various structures of the HRD department according to the number of employees in an organisation and the process of managing staff for them				
9	3	HRD Professionals:	Roles and Competencies,	B.N.5
10			Live Case Discussion	
CO:3				
LO: This Unit emphasizes the Roles played by the HRD professionals and it will help the students to understand the competencies which these professionals possess.				
11	4	Career Management and Development.	Career Management and Development	B.N.3
12			Mentoring at workplace.	B.N.3
13			Work-Life Integration,	B.N.3
14			Performance Management System	B.N.3
15			Case Discussion	

Assignment Submission				
CO:3				
LO: This unit will makes the students understand the path of Career development along with the concept and usage of Mentoring. Understand to Balance between professional and personal life.				
16	5	HRD Audit	HRD Audit-Meaning and Concept	B.N.7
17			Need, Designing HRD Audit Process	B.N.7
18			Parameters to be Audited	B.N.7
19			Audit Results, Preventive and Corrective Actions	B.N.7
20			Role in Business Improvement	B.N.7
21			Methodology and Limitations	B.N.7
22			Case Discussion	
CO:4				
LO: This Unit makes the students understand the Audit process for the HR activities. The process, the documentation, the results, the preventive measures and also the HRD Score card.				
23	6	Applications of HRD	HRD Climate	B.N.8
24			HRD for managing organizational change	B.N.8
25			HRD for Workers (blue collar employees)	B.N.8
26		Presentations by students		
27		Presentations by students		
28		Group discussion		
29		Case study analysis		
30		Presentations		
CO:4				
LO: This Unit helps the students to understand the Organizational climate and at the same time they also understand how to manage change in the work place.

VII: Notes:

1. Class participation in all activities is must and carries marks.
2. Class participation activity like Group discussion, etc. carries 4 marks.
3. Class presentation constitutes 4 marks for each student either in group or as individual.
4. Assignment submission of case study analysis carries 4 marks.
5. Attendance in class is compulsory and carries 4 marks.
6. One internal test to be conducted after the syllabus completion will carry 8 marks.

VIII : Rubric for Internal Assessment
Subject: Human Resource Development and Audit
BBA V Sem

Goal : The students are to be acquainted with various concepts, process and practices of HRD in the present Corporate world.

Objective: The objective of this course is to develop an insight and understanding of Human Resource Development.

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

% students were outstanding and have knowledge and skills that HRD professional need in performing their strategic role.	%...students were accomplished and able to articulate some perspectives of HRD practices.	%.... students fall in this criteria. They showed minimal knowledge of the subject.	%.... student fall in this criteria. They need improvement to understand the concept of human resource development.

IX: Scheme of Internals Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH**Lesson Plan****Subject: Indian Financial Systems****Session: July-Dec****Class: BBA V Sem**

I: Objective of the Course: The objective of this paper is to create awareness about International management system of different countries.

II: Examination: The faculty member will award marks out of a maximum of 20 marks (Internal Evaluation). The semester examination will be worth 80 Marks (External evaluation).

III: Course Outcomes(CO):

CO1 Explain the Basic function of Financial system and describe the basic of financial Institutional & Market are working for development of Indian Economy.

CO 2 Explain the understanding of operation of Financial Market as well as Financial Institutions and apply the function of SEBI in Indian Capital Market.

CO 3 Analyze the use of Leasing & Hire Purchase and Forfeiting in Corporate Financing.

CO 4 Explain the uses of Credit Rating by Investors for Investment in Indian Financial Market.

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	CONCEPT OF FINANCIAL SYSTEM;	Formal and informal financial systems	B.N. 1,2
2			Functions of financial system,	B.N. 1,2
3			Nature and Role of financial institutions	B.N. 1,2
4			Nature and Role of financial markets	B.N. 1,2
5			Financial system and the economy.	B.N. 2,3
6			Case study	B.N. 2,3

7			Class test	
CO:1				
LO: Demonstrate the types features & operations of financial system in India.				
8	2	MONEY MARKET	Emerging Structure of Indian Money Market	B.N. 2,3
9			Instruments of Money Market Money Mutual Funds	B.N. 2,4
10			An Overview and 1213I's Regulatory Guidelines	B.N. 2,4
11			Commercial Banks — Role in Industrial Finance and Working Capital Finance	B.N. 2,3
12			Class test	B.N. 3
13			Assignment	
CO:2				
LO: Demonstrate knowledge about the concept & operation of Money Market In India.				
14	3	CAPITAL MARKET	Concept, Structure and Functions of Capital Market;	B.N. 3,4
15			Primary MarketInstruments of Issue and Methods of Flotation	B.N. 3,4
16			Secondary Market — Concept, Market Players,	B.N. 4
17			trading System and Settlement	B.N. 4
CO:2				
LO: Demonstrate the system of Capital Market in India.				

18	4	INSTITUTIONAL STRUCTURE	INDIAN FINANCIAL INSTITUTION: Development Banks- FCLICICI, Sits and IDBI	B.N. 2,6
19			Investment Institutions —UTI and other Mutual Funds	B.N. 3
20			Insurance Organization- Life Insurance Corporation of India	B.N. 3,4
21			SEBI: Scope and Functions, Objectives of SEBI	B.N. 2,3

Assignment**CO:2****LO:** Develop the understanding about the Working of Financial Institutions working in India.

22	5	FINANCIAL PRODUCTS	Leasing overview	B.N. 2,3
23			Leasing numerical Hire Purchase overview	B.N. 5
24			Hire Purchase numerical	B.N. 5,6
25			Factoring	B.N. 7
26			Forfeiting	B.N. 2
27			Case study	B.N. 3

CO:3				
LO: Develop the understanding of Leasing & Hire Purchase and difference among them.				
28	6	CREDIT RATING	Meaning	B.N. 4, 7
29			DERIVATIVES: Basic Introduction	B.N. 2
30			Case study	B.N. 1
31	Assignment			
CO:4				
LO: Demonstrate the understanding of Credit Rating Agencies & Derivatives Operation In India.				

VI: Reference Books:

1. BHole, LM, Indian Financial system, Chug Publication, Allahabad.
2. Johnson, H.J, Financial institutions & Markets, Mc Graw Hill.
3. Machiraju, M.R, Indian Financial System, Vikas Publication House, New Delhi.

Lesson Plan**

Subject: Project Management

Session: Jul-Dec

Class: BBA- V

I: Objectives: To develop understanding of project planning. To develop ability to monitor and control projects and risk involved. To become familiar with tools and techniques used in managing projects.

II: Examination: Students shall be evaluated on two components, internal and end semester examination. Internal component shall be of 20 marks based on continuous evaluation. The Semester Examination will be worth 80 marks, it will have two Section, A and B. Section A, worth 60 marks will comprise of seven theory questions out of which a student will be required to attempt any four questions. Section B worth 20 marks will contain Cases.

III: Course Outcome:

CO1 Learn and become familiar with advanced terminology, concepts, and insights of project and develop the mindset, key skills and processes for project management.

CO2 To apply key project management system techniques and formulate feasibility analysis, identify and solve problems when considering project alternatives and making the correct choice.

CO3 Apply techniques to accurately define project scope, develop plans and control measures to manage projects effectively.

CO4 Integrate the Project Management functions to assist in delivering successful projects.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

V:Session Plan:

Lecture No.	Unit No.	Topic	Sub-topic	Reference
1	1	Project Management	Introduction to Project Management	B.N-6,B.N-5
2			Characteristics and types of projects	B.N-6,B.N-5
3			Gaining importance, project life cycle and its phases	B.N-6,B.N-5
4		Project Selection	Project selection, non quantitative and scoring models	B.N-2,B.N-8
5			technical analysis and technology selection,	B.N-2,B.N-5
6			market potential analysis	B.N-2,B.N-5
7			techniques of long term forecasting	B.N-2,B.N-5
CO:1				
LO: Identify project goals, constraints, deliverables, performance criteria, control needs, and resource requirements and Implement project management knowledge, processes, lifecycle and the embodied concepts, tools and techniques in order to achieve project success.				
8	2	Financial Analysis	Financial feasibility, determinants of cost of project	B.N-9,B.N-5
9			Project financing and deciding optimum capital structure	B.N-9,B.N-5
10			Cash flows from project and owner’s perspective.	B.N-9,B.N-5
11			Project Appraisal	B.N-9,B.N-5
12		Financial feasibility with risk	Financial feasibility with risk. Types of risk	B.N-8,B.N-6

Lecture No.	Unit No.	Topic	Sub-topic	Reference
13			techniques of risk evaluation and its mitigation	B.N-8,B.N-6
14			Sensitivity analysis, Hiller's model	B.N-8,B.N-6
15			scenario analysis, simulation	B.N-8,B.N-6
A1: Importance of Feasibility study in Current Scenario.				
CO:2				
LO: Manage the selection and initiation of individual projects and of portfolios of projects in the enterprise. Conduct project planning activities that accurately forecast project costs, timelines, and quality. Implement processes for successful resource, communication, and risk and risk management.				
16	3	Network Analysis & Time Cost Relationship	Network analysis, construction of networks	B.N-8,B.N-7
17			CPM	B.N-8,B.N-7
18			various types of floats and their application	B.N-8,B.N-7
19			PERT and its applications	B.N-8,B.N-7
20			Practical Problems PERT	B.N-8,B.N-7
21			Time cost relationship, crashing for optimum cost and optimum time	B.N-8,B.N-7
22			Practical Problems	B.N-8,B.N-7
23			Resource leveling	B.N-8,B.N-7
CO:3				
LO: To understand pictorial representation of the interrelationship of all types of activities through CPM and PERT methods and has come to forefront for planning, scheduling and controlling the complex projects consisting of number of work contents in order to minimize resources and cost of the project.				
24	4	Introduction to project software and applications of MS Project	Introduction to project software and applications of MS Project	B.N-1,B.N-7
25			project manager's skills and functions	B.N-1,B.N-7
Class Test based on University Examination Pattern				
CO:4				
LO: To understand the insights of project software along with the application and interfaces included for better decision making in project management.				
26	5	Human Aspects of Project management	Matrix organization	B.N-5,B.N-6

Lecture No.	Unit No.	Topic	Sub-topic	Reference
27			Social Cost Benefit Analysis	B.N-5,B.N-6
28			UNIDO approach	B.N-5,B.N-6
29			Shadow pricing.	B.N-5,B.N-6
CO:4				
LO: Adapt project management practices to meet the needs of stakeholders from multiple sectors of the economy. And apply project management practices to the launch of new programs, initiatives, products, services, and events relative to the needs of stakeholders.				
30	6	Project Monitoring	Project monitoring, Earned Value Analysis	B.N-2,B.N-7
31			PMIS	B.N-2,B.N-7
32			Project Termination and Audit. Reasons for failure	B.N-2,B.N-7
A2: Why SCBA is important for Project evaluation				
CO:2,3				
LO: Understanding Monitoring and evaluation which are essential to track whether a project is delivering against its desired outcomes. Study the process that helps learn from past successes and make the right decisions, so that current and future initiatives are better able to improve people's lives.

7	2	Mission, Objectives, Goals and Ethics	What is mission, Concept of goals, Integration of individual and Organisation goals: A Challenge,	B.N: 2 , B.N: 5
8			How Objectives are pursued, How are mission and objectives are formulated	
9			Why do mission and objective change, Vision mission, Objectives	
10			Goals and Strategy: Mutual relationships	
11			Core of strategic management: vision A-must, ethics and strategy . <i>Case: Wal-Mart</i>	

First Group Assignment: Case Analysis (MRF Limited)

CO:2

LO: Understand the concept of Corporate Vision - Mission and Objectives.

12	3	External environment: Analysis and Appraisal	Concept of environment, environmental analysis and appraisal	B.N: 3, B.N: 4
13			Why environmental scanning and analysis,	

			component of environment	
14			SWOT: A tool of environment analysis	
15			Techniques of environmental search and analysis,	
16			ETOP: A technique of diagnosis, decision making on environmental information.	
CO:3				
LO: Students will develop the skill to identify opportunities and threats as well as strengths and weakness in the operating environment Business using different methods and techniques for strategic analysis.				
17	4	Organizational change and innovation	Planned and unplanned change, Causes or forces of organizational change	B.N: 2, B.N: 9
18			Managing planned change, Choosing a change strategy	
19			Creativity and innovation in Organizations	
20			Organizational creativity and innovation process,	
21			learning Organization	
A-2 : Second Assignment				

CO:4

LO: Students will gain insight of concept of change management, stimulating forces of change and strategies used by the organizations to manage change and develop organizational evolution and innovation.

22	5A	Generic competitive strategy	Generic vs. Competitive strategy	B.N: 3 ,B.N: 6
23			The five generic competitive strategy	
24			Competitive marketing strategy option	
25			Offensive vs. Defensive strategy. <i>Case : Apple</i>	

A-4: Fourth Assignment**CO:2**

LO: Students will understand and distinguish between different types and levels of strategy.

26	5B	Corporate strategy	Concept of corporate strategy	B.N: 1, B.N: 6
27			offensive strategy	
28			defensive strategy	
29			scope and significance of corporate strategy	

CO:2**LO:**

30			Evaluation of strategy and strategic control, why strategy evaluating	
31	6	Strategic Evaluation and Control	Criteria for evaluation and the evaluation process,	B.N: 1 , B.N:8
32			Strategic control process, Types of external controls <i>Case: Family Dollar Stores.</i>	
Second Group Assignment: Case Analysis (Nestle)				
CO:4				
LO: Students get acquainted with the process formulation, implementation, evaluation and control of strategies.

Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	Internal Out of 20	VIVA Out of 20		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan**

Subject: Total Quality Management
Class: BBA – VI Sem

Session: Jan. – Jul.

I: Course Objective:

The objective of this course is to develop an insight and understanding of Total Quality Management.

II: Examination:

Students shall be evaluated on two components, internal and end semester examination. The Semester Exam shall be worth 80 marks, it will have two sections A and B. Section A worth 60 marks will comprise of seven theory questions, out of which a student will be required to attempt any four questions. Section B worth 20 marks will contain a case or numerical question.

III: Course Outcomes(CO):

CO1 Develop an understanding on quality management philosophies and frameworks

CO2 Develop in-depth knowledge on various tools and techniques of quality management

CO3 Learn the applications of quality tools and techniques in both manufacturing and service industry

CO4 Develop analytical skills for investigating and analyzing quality management issues in the industry and suggest implement able solutions to those.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO1	1	2						
CO2				3	2	1		
CO3			3				2	2
CO4								1

V:Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction	Quality and Its Concepts	B.N. 1
2			Evolution of Quality	B.N. 1, 2
3			Definition and Concepts of TQM	B.N. 1, 3
4			Features of TQM	B.N. 1, 3
5			Eight Building Blocks of TQM	B.N. 1, 2
Assignment: Visit an Industry and Understand Quality Practices Adopted.				
CO:1				
LO: Learning the different meanings of the quality concept and its influence. Understanding the concepts of quality management and performance excellence in organizations and historical developments in the quality movement and their importance.				
6	2	TQM Thoughts	Juran’s Trilogy	B.N. 2, 3
7			PDSA Cycle and 5S	B.N. 1, 2
8			Kaizen and Concepts	B.N. 1, 2
9			Crosby’s Theory of TQM	B.N. 1, 3
10			Quality Performance Excellence Awards	B.N. 1, 2
11			Deming Application Awards	B.N. 2
12			Malcolm Baldrige National Quality Award	B.N. 3
CO:2				
LO: Learning the prominent philosophies of quality management, such as those of Deming and Juran, which provide a basis for today’s quality and performance excellence. 2. Assessing the criteria for performance excellence used in the Malcolm Baldrige Award and related award programs.				
13	3	TQM Tools	Benchmarking: Definition and Concepts	B.N. 1, 2
14			Elements and Reasons for Benchmarking	B.N. 1
15			Process of Benchmarking	B.N. 2, 3
16			FMEA: Concepts and Details	B.N. 3
17			Quality Function Deployment (QFD), Process, Benefits	B.N. 3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
18			Taguchi Quality Loss Function	B.N. 2, 3
19			Total Productive Maintenance	B.N. 1, 3
CO:3				
LO: Understanding the concept, meaning and elements of benchmarking. Learning the role of QFD and TPM and its need in the total quality management.				
20	4	Six Sigma	Six Sigma: Definition and Concepts	B.N. 1, 2
21			Features and Goals of Six Sigma	B.N. 1
22			DMAIC and Six Sigma Implementation	B.N. 1, 3
CO:2,4				
LO: Understanding the application of a variety of tools for process improvement such as the Six Sigma, Lean Six Sigma, and Total Quality Management.				
23	5	Statistical Process Control	Measure of Central Tendency	B.N. 2, 4
24			The Seven Tools of Quality	B.N. 1, 2, 4
25			Normal Curve and Characteristics	B.N. 2,3
26			Control Charts and Types	B.N. 1, 4
27			Process Capability	B.N. 4
28			Acceptance Sampling	B.N. 1, 2, 4
Assignment: Assignment Sheet on Numericals of Control Charts				
CO:3,4				
LO: Understanding the concept of Statistical Process Control(SPC) and the types of variation and Describing how to construct and interpret simple process control charts for continuous and discrete data.				
29	6	Quality Systems	ISO 9000	B.N. 1, 2, 4
30			ISO 9000: 2000	B.N. 1, 2
31			ISO 14000	B.N. 1, 4
32			Other Quality Systems	B.N. 1, 2
Assignment: ISO Certified Company: Industrial Visit				
CO:4				
LO: Understanding the basic frameworks for quality and performance such as ISO 9000, ISO 14000 and other quality system in Total Quality Management (TQM).

Presentation Out of 30	Quiz Out of 30	Assignment Out of 30	Internal Out of 30	VIVA Out of 30		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** Global Business Communication and Public Relation**Session:** Jan - June**Class:** BBA (Foreign Trade) - I Sem

I: Objective of course: The objective of this subject is to familiarize the students with the special terminology used in export import business and equip him with the expertise in writing global business letters concerning all aspects of foreign trade with the objective of developing exports and imports business.

II: Examination: The faculty member will award internal marks out of 30. The end semester examination will be worth 70 marks.

III: Course Outcomes(CO):

CO1. To gain an understanding with the terms used in export and import business.

CO 2. To develop competence and expertise in writing global business letters.

CO 3. To understand the various aspects of foreign trade while writing effectively.

CO 4. To enhance inter-personal skills for building strong trade relations.

Assignment: Submission of Assignment Sheet on Types of Planning				
CO:2				
LO: In this unit students will learn planning and decision making process. Forecasting techniques will also be learnt by the students.				
14	3	Organization Structure	Organization Structure	B.N. 1, 2
15			Coordination	B.N. 1
16			Coordination	B.N. 2, 3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
17			Group Dynamics – I	B.N. 3
18			Group Dynamics – II	B.N. 3
19			Delegation of Authority	B.N. 2, 3
20			Line and Staff Relationships	B.N. 1, 3
CO:2				
LO: Organization structure, coordination, group dynamics, delegation will be learnt by the students in this unit.				
21	4	Motivation and Leadership	Motivation	B.N. 1, 2
22			Theories of Motivation	B.N. 1
23			Leadership	B.N. 1, 3
24			Theories of Leadership	B.N. 2, 3
25			Communication and OB	B.N. 1, 2
26			Staffing and HRD	B.N. 1
Assignment: Identify World’s Famous Leaders (At least 10), Identify Their Leadership Style, Submit a Report.				
CO:3				
LO: This unit will help the students to understand the importance and theories of motivation and leadership styles.				
27	5	Control	Definition and Concepts	B.N. 2, 4
28			The Control Process	B.N. 1, 2
29			Controlling Techniques	B.N. 2,3
30			Conflict Management	B.N. 1, 2
31			Strategies of Conflict Management	B.N. 1, 3
32			Dynamics of Change	B.N. 1, 2
CO:4				
LO: The last unit will help the students to Understand control processes and techniques.

Presentation Out of 30	Quiz Out of 30	Assignment Out of 30	Internal Out of 30	VIVA Out of 30		

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE**Lesson Plan****Subject:** 504 : Global Market Research And Demand Forecasting**Session:** July-December**Class:** BBA (FT) – V Sem

I: Objective of course: The objective of this course is to give conceptual and practical training to the students in conducting desk field research for export and import market of goods by collecting, tabulating, analysing and interpreting relevant data.

II: Examination: The faculty member will award internal marks out of 30 marks .The semester examination carrying 70 marks.

III: Course Outcomes(CO):

CO1.Plan and undertake qualitative or quantitative Market Research and demonstrate the ability to appropriately analyze data to resolve marketing issues and be able to assess market research for quality and relevance.

CO2. Critically analyze market research methods and understand their strengths and weaknesses. Demonstrate an understanding the framework that market research needs to operate within.

CO3.Develop skills related to the analysis of international marketing data, in particular the use of secondary data in assessing the international marketing opportunities.

CO4.Provide an understanding about statistical methods of demand analysis and forecasting and increase knowledge and skills to help in developing international market entry strategies.

IV: PO-CO Mapping: High 3, Medium 2, Low 1

4. Srivastava, R.M., International Strategic Management

VII: Note:

1. There will be assignments of equal weightage, given to students.
2. There will be major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of marketing environment.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII : Rubrics for Internal Assessment For New Techniques in Multinational Marketing**BFT VI Sem**

Goal : Students will understand benefits of global marketing along with its various strategies for entering in International Market.

Objective: Students have conceptual and detailed information about the development of new techniques of foreign trade in the light of ongoing changes into the world economy

23-30 Marks	16-22 Marks	08-015 Marks	00-07 Marks
....StudentsStudentsStudentsStudents
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%.... students were outstanding and able to understand understanding of marketing theories and conceptual frameworks that explain why and how firms internationalize. Students provide an insight the conceptual frameworks learned in this course in a real-life experiential learning project that comprises an analyses of international economic, institutional and market environments. Students understood the impact of world issues on an organization's international business	%.... students were accomplished and able to articulate some perspectives of the impact of world issues on an organization's international business opportunities. and also able to understand understanding of marketing theories and conceptual frameworks that explain why and how firms internationalize	%.... students fall in this criteria. They showed minimal knowledge of the subject.	%.... student fall in this criteria. They all were not able to articulate the ongoing changes in world economy along with the development of new techniques in multinational marketing.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 150	Final Internal Marks out of 30
Presentation Out of 30	Quiz Out of 30	Assignment Out of 30	Internal Out of 30	VIVA Out of 30		

IPS ACADEMY, INDORE
Department of Chemistry
M.Sc. Chemistry

Programme Outcomes

PO-1	Student will be professionally skilled in all major section of production, R & D, QC, QA. of Chemical & Pharmaceutical industries
PO-2	Student will be able to undertake research in emerging area of green environment, polymer & medicinal Chemistry.
PO-3	Able to apply mathematical methods, physical parameters, computational tools designing & synthesis of new molecule.
PO-4	Ability to analyze implement & evaluate the analytical problem & structure elucidation of organic & inorganic molecule through spectroscopic tools.
PO-5	Student gain knowledge of specific physical & Chemical properties and reaction mechanism that lead to discovery of new drugs.
PO-6	Able to develop functional knowledge of instrumentation & laboratory techniques to design , formulation & characterization of new drug.
PO-7	Able to employ critical thinking & scientific enquiry in performing design interpretation and documentation of laboratory experiments and various formulation to chemical & pharmaceutical industries.
PO-8	Student acquire fundamental aspect of all chemistry & able to solve all key environmental issue facing our society in energy & health.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Inorganic Chemistry Code (MCH): 401	Session: Jul-Dec
Class	M.Sc. – Chemistry I Sem	

I: Objective of course: The objective of this course is to acquaint the students with the basic theory, structure & bonding of coordination complexes and learn basic concept of acid & bases.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional questions carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes (CO):

- CO1 Develop criteria to predict structure and bonding of molecules.
- CO2 Student will learn fundamental of coordination chemistry and its application in allied field
- CO3 Acquire cognitive knowledge of properties, bonding and reaction mechanism of Inorganic Complexes
- CO4 Determine the application of hard & soft Acid Base with broad concept of various theories along with E & C equations

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2	1	2	3	3		1
CO 2	2	3						3
CO 3	2	3	2	2	2			
CO 4	2	2	1		3		3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Stereochemistry & Bonding in Main group Compound	Introduction and Postulates of VSEPR	B.No 1,2,5,6,3,7,12,13
2			Examples of VSEPR	
3			Walsh diagram for tri Atomic Molecule	
4			Walsh diagram for Penta Atomic Molecule	
5			dπ – pπ bond	
6			Bent rule Energetic of Hybridization	
7			Some simple reactions of covalently bonded molecules	
8			Energetic of Hybridization	
9			Solve and draw structure for various molecules	
CO: 1,3				
LO: Understand structure & bonding of various molecules on the basis of VSEPR theory & Walsh Diagram				
10	2	Metal Ligand Equilibrium in Solutions	Stability of Complexes & their Types	B.No.1,2,3,4,8,9, 13,15
11			Stepwise stability constant, its trends with example	
12			Factors Affecting Stability Constants -Metals	
13			Factors Affecting Stability Constants -Ligands	
14			Chelate Effect & its Thermodynamic origin	
15			Determination of formation constant	
16			Solve numerical based on Formation constant	
CO: 2, 3				
LO: Illustrate the mechanism and principle of formation constant of complexes and study factors affecting stability constant				
12	3	Reaction Mechanism of Transition Metal Complexes	Energy Profile of a reaction & reactivity of metal complex	B.No.1,2,3,4,5,7, 8,12,13,14
13			Application of Valence Bond Theories	
14			Kinetics of Octahedral Complexes	
15			Acid Hydrolysis & Factors affecting it	
16			Base Hydrolysis and Conjugate Base Mechanism	
17			Substitution Reaction in Square Planer Complexes	
18			Application of & Crystal Field theories	
19			Trans Effect: Theory & Example	

20			Trans Effect: Theory & Example	
21			Mechanism of Substitution Reaction	
22			Electron transfer reaction: one electron transfer	
23			Cross reaction	
24			Marcus Hush theory	
25			Inner Sphere Reaction	
26			Inner Sphere Reaction	
27			Outer Sphere Reaction	
28			Outer Sphere Reaction	

CO: 1 & 3**LO:** Enlighten the reaction mechanism & theory of different category of Inorganic complex

29			Crystal Field Theory	
30			Limitation of Crystal Field Theory	
31			Concept of Molecular Orbital Theory	
32			Linear Combination of Atomic Orbital	
33			Molecular Orbital Theory for Octahedral Complexes	
34	4		Molecular Orbital Theory for Octahedral Complexes example of High & low spin complexes	
35		Metal Ligand Bonding	Molecular Orbital Theory for Tetrahedral Complexes	B.No.1,2,3,7,8,12
36			Molecular Orbital Theory for Tetrahedral Complexes	
37			Molecular Orbital Theory for Square Planer Complexes	
38			Pi Bonding in Octahedral Complexes	
39			Examples of Tetrahedral Complexes	
40			Examples of Square Planer Complexes	
41			Group Assignments of Metal Ligand Bonding	

CO: 1,2

LO: Aquire knowledge of Principle and application of various theories of Metal Ligand Bonding				
35	5	Hard and Soft Acid & Bases	Theory, concept: Hard Soft Acid & Bases	B.No.1,2,3,4,8,9,12
43			Theoretical basis of Hardness & Softness	
44			Lewis Acid Base reactivity approximation	
45			Concept of Donor & Acceptor numbers.	
46			E & C equation and Application of Acid & Bases	
		Assignment- Based on applications of HSAB		
CO: 4				
LO: Understand Theories Application of Hard Soft Acid & Bases				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

13. Theoretical Principles of Inorganic Chemistry: G.S. Manku
14. Inorganic chemistry-Gurdeep Raj

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.

6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Inorganic Chemistry			
M.Sc Chemistry I Sem			
Goal : Students develop the ability to understand , analyze theories of structure Bonding , Coordination bonding, Hard & soft Acid & Bases. Topics include an overview of major fields of Coordination compounds VSEPR theory, Walsh diagram , Hybridization, Crystal Field theory, Molecular Orbital Theory , reaction mechanism , stability constant .Acid & Bases.			
Objective: Students gain the knowledge , basic concept, theories , structure & bonding of coordination complexes and learn basic concept of acid & bases.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the fundamental concept of structure bonding , theories, reaction mechanism and able to conclude it over various example .	% Students having the basic concept of theories coordination chemistry, acid & bases and reaction mechanism	% Students having understanding about different reaction mechanism & theories	% Students Need More Efforts for Solutions, practices , Remedial classes to learn Basics of all theories of Coordination Chemistry

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Organic Chemistry Code (MCH): 402	Session: Jul-Dec
Class	M.Sc. – Chemistry I Sem	

I: Objective of course: The objective of this course is to acquaint the students with optical activity of asymmetric and dissymmetric molecules, Basic idea about aliphatic nucleophilic reactions, aromaticity. Various reaction mechanism and conformational Analysis.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic.

III: Course Outcomes (CO):

- CO1 Identify the various physical and chemical properties of organic compounds
- CO2 Understand chemical and molecular process that take place in organic chemical reaction.
- CO3 Predict major and minor product of variety of chemical reaction with appropriate stereochemistry and regiochemistry.
- CO4 Know and recall the fundamental principle of organic chemistry that includes chemical bonding, nomenclature, stereochemistry, structural isomerism and various reaction mechanisms.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2	2	3	3		3
CO 2	2	2			3	2		2
CO 3	2	3		2	3		3	2
CO 4	2	3	3	3	1	2		1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Nature of Bonding in organic Molecules	Delocalized chemical bonding-conjugation, cross conjugation and resonance.	B.N. 1,2 ,3&11
2			Hyper conjugation, bonding in fullerenes, tautomerism	
3			Aromaticity in benzenoid and non-benzenoid compounds, alternate and no-alternate hydrocarbon and huckel rule.	
4			Energy level of pi molecular orbital's, annuelenes, anti and homo aromaticity.	
5			PMO approach ,Bonds weaker than covalent-addition compound,	
6			Crown ether complexes and cryptands	
7			Inclusion compound , catenanes and rotaxnes.	
CO: 4				
LO: Knowledge about resonance, conjugation, concept of aromaticity and their properties.				
1	2	Stereochemistry	Strain due to unavoidable crowding, Elements of symmetry	B.N. 1,2 ,3&11
3			Chirality , molecules with more than one chiral atom and threo and ertho isomers.	
4			Method of resolution and optical activity. Enantiotpic and distereotopic atoms.	
5			Stereospecific and stereoselective synthesis. Asymmetric synthesis.	
6			Optical activity in the absence of chiral carbon.in biphenyl	
7.			Optical activity in the absence of chiral carbon. in in allenes and spiranes.	
8			Chirality due to helical shape	
9.			Stereochemistry of the compound containing nitrogen,sulphur and phosphorus	
CO: 4				
LO The reactivity and stability of an organic molecule based on structure, including Conformation and its stereochemistry.				

1	3	Conformational analysis and linear free relationship	Conformational analysis of cycloalkanes and decalines	B.N.1,2 , 3&11
2			Conformation on reactivity and conformation of sugars.	
3			Generation, structure, stability and reactivity of carbocation.	
4			Generation, structure, stability and reactivity of carboanions.	
5			Generation, structure, stability and reactivity of free radical.	
6			Generation, structure, stability and reactivity of carbene and nitrenes.	
7			The Hammett Equation	
8			Linear free energy relationship, substituents and reaction constants.	
9			Taft Equation.	

CO: 2

LO : Learn about linear free relationship, Hammett equation and its application and understand physical significance of substituent constant and reaction constant.

1	4	Reaction Mechanism	Type of mechanism and type of reaction	B.N.1 , 2,10&11
2			Thermodynamic and kinetic requirements and controls.	
3			The Hammonds postulates	
4			curtin- Hammett principle.	
5			Potential energy Diagram, Transition states and intermediates	
6			Methods of determining mechanism	
7			Isotopes Effects	

CO: 1,2

LO: Recognize the basic practical skill for the synthesis and analysis of organic compounds..

1	5	Aliphatic Nucleophilic Substitution	SN1 and SN2 reaction	
2			SN1 and SN2 reaction, mixed SN1 and SN2	
3			SET Mechanism	

4		Neighboring group mechanism, anchimeric assistance	
5		Neighbouring group participation by p and s bond	
6		Classical and non-classical carbocations	
7		Phenonium ion, norbornyl system and common carbocation rearrangements,	
8		Application of NMR spectroscopy in the detection of carbocation, and S _N i Mechanism	B.N.1, 2, & 8
9		Nucleophilic substitution at an allylic and aliphatic trigonal carbon.	
10		Nucleophilic substitution at a vinylic carbon.	
11		Reactivity effects of substrates structure, and attacking nucleophile.	
12		Reactivity effects of leaving groups and reaction medium.	
13		Phase transfer catalysis and ultrasound	
14		Ambident nucleophile and regioselectivity.	
		ASSIGNMENT ; Mechanism of nucleophilic substitution reaction	
CO: 3,4			
LO: Detail analysis of nucleophilic reaction and factor affecting influence mechanism with the effect of its stereochemistry			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1	1	Introduction to quantum mechanics	Schrodinger wave equation	B.N. 1
2			Postulates of Quantum mechanics	
3			Particle in a box theory	
4			Harmonic oscillator	
5			Rigid rotor	
6			Hydrogen and Helium atom	
7			Presentation	
CO: 1,4				
LO:Solutions of the Schrodinger equation to some model system.				
8	2	Approximate Methods	The Variation Theorem, Perturbation Theory	B.N1 &.2
9			Application of Perturbation Theory to the Helium atom	
10			Molecular Orbital Theory	
11			Huckle Theory of different conjugated systems	
12			Application to ethylene and butadiene	
13			Introduction to extended Huckle Theory	
14			Cyclopropenyl, radicals	
15			Radical cyclobutadiene	
16			Presentation	
CO: 3				
LO:Discussion of the Huckle theory and applications to butadiene.				
17	3	Angular Momentum	Ordinary and Generalized angular momentum	B.N.1&2
18			Eigen functions for angular Momentum,	
19			Pauli exclusion principle	
20			Spin, antisymmetry	
21		Eigen values for angular momentum operator		
22		Addition of angular momentum		
CO: 4				
LO:Students will learn the angular momentum basics to different Eigen functions.				
23	4	Classical Thermodynamics	Laws of Thermodynamics, Free energy	B.N.2
24			Potential molar free energy, Partial molar volume, Partial molar heat content and significance	
			Concept and determination of fugacity, Non ideal systems	
			Activity coefficient, Debye Huckle Theory	

25			Coefficient of electrolytic solutions	
26				
27			Determination of activity and activity coefficient	
28				
29			Ionic strength, Phase rule	
30			Application of phase rule to three components	
31				
32			Second order phase transitions	
33			Chemical potential and entropies	
34			Non ideal systems	
35			Excess functions for non ideal systems	
36			Presentation	
CO: 1,3				
LO: State and apply the laws of Thermodynamics.				
37			Concept of distribution, Thermodynamic probability	
38			Grand canonical and micro canonical ensembles	
39		Statistical Thermodynamics	Calculation of Thermodynamic properties in terms of Partition	
40	5		Fermi Dirac statistics, Applications of Partition functions	B.N.1 &2
41			Distribution law and applications to metal	
42			Bose- Einstein statistics distribution and application to helium	
43			Postulates of ensemble averaging	
44			Addition of partition function	
45			Presentation	
CO: 1, 4				
LO: Students will learn to perform the calculation using Thermodynamic cycles.				
		Assignment- Based on Thermodynamics and quantum mechanics		

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

9			Symmetry aspects of molecular vibrations of h ₂ o molecules	
CO: 3				
LO: Determination of symmetry elements , groups and sub groups of molecules and validates the application in IR spectroscopy				
1	2	Microwave Spectroscopy	Introduction and classification of molecules	B.N. 9 &10
2			Description of rigid rotor model	
3			Effect of isotopic substitution on the transition frequency.	
4			Intensities of microwave active compound.	
5			Concept of Non rigid rotor model	
6			Stark Effect	
7				
CO: 1				
LO: Be able to interpret rotational spectra, get information about molecular dimension and atomic masses.				
1	3	Infrared Spectroscopy	Review of linear Harmonic oscillator	B.N.2
2			Vibration energies of diatomic molecules and Zero point energy	
3			Force constant, bond strength and anharmonicity	
4			Morse potential energy diagram	
5			Vibrational rotational spectroscopy and P,Q,R branches	
6			Breakdown of born oppenheimer approximation.	
7			Vibration of polyatomic molecules and selection	

			rules.	
8			Normal modes of vibration and group frequency.	
9			Over tones , hot bands and factor affecting band position and intenecsty	
10			Far IR Region and metal ligand vibration	
11			Normal coordinate analysis	
CO: 2				
LO: Analysis and interpretation of chemical structure of organic compound through IR spectra				
1	4	Raman spectroscopy	Classical and quantum theories of raman effect.	B.N.2
2			Pure rotational, vibrational and vibrational rotational raman spectra.	
3			Selection rules and mutual exclusion principle.	
4			Resonance Raman spectroscopy.	
5			Coherent anti stokes Raman spectroscopy (CARS)	
			Examples of Square Planer Complexes	
CO: 4				
LO: Analyses the physical approach of Raman spectroscopy..				
1	5	Electronic Spectroscopy	Energy levels and molecular orbitals	B.N.4
2			Vibronic transition , vibrational progression and geometry of excited states.	
3			Franck –codon principle	
4			Electronic spectra of polyatomic molecules	
5		Molecular spectroscopy	Emission Spectra and radioactive and non-radioactive decay	
6			Internal conversion and spectra of transition metal complexes	
7			Charge transfer spectra.	
8		Photoelectron spectroscopy	Basic principle of photo electron spectroscopy and photoelectric effect.	
9			Ionization process and Koopmans’s theorem	
10			photoelectron spectra of simple molecules	
11			ESCA and chemical information from ESCA	
12			Auger electron spectroscopy – basic idea	
CO: 1				

LO : Determine the structure of complex using electronic spectroscopy.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Chemical application of group theory, F.A. Cotton and Wilkinson , John Wiley
2. Spectroscopy C.K Banwell
3. Modern spectroscopy J.M. Hollas , John viley
4. Applied electron spectroscopy for chemical analysis D.H. Windawi
5. NMR,NQR,EPR and Mossbauer spectroscopy in inorganic chemistry.R.V Parrish,Ellies Harwood
6. Physical method in chemistry R.S. Drago Saunders College
7. Introduction to molecular spectroscopy G.M. Barrow, Mc graw Hill
8. Basic principle of spectroscopy R.Chang, Mc graw Hill
9. Introduction to photoelectron spectroscopy. P.K.ghosh, John Wiley
10. Spectroscopy H.Kaur

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment

Subject: Group theory &Spectroscopy

M.Sc Chemistry I Sem

Goal : The student gain knowledge about interaction of light with matter and able to understand different spectroscopic terms . Learns the basic idea about Emission and absorption.

Objective: The objective of this course is to acquaint the students with the basic principle , structure elucidation and characterization through spectroscopic methods via IR ,Raman and microwave spectroscopy			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
____ Students	____ Students	____ Students	____ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of spectroscopic methods via IR ,Raman ,Electronic and microwave spectroscopy	% Students having the basic concept of spectroscopic methods via IR ,Raman ,Electronic spectroscopy	% Students having understanding about t Spectroscopic technique.	% Students Need More Efforts to understand the Basic Concept of spectroscopic technique

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

**DEPARTMENT OF CHEMISTRY
IPS ACADEMY, INDORE**

Lesson Plan

Subject	Mathematics for Chemist , Code (MCH): 405(a)	Session: Jul-Dec
Class	M.Sc. – Chemistry I Sem	

I: Objective of course:

The aim of this course is to develop learning and understanding skills in students for the basic elements of mathematics. So students will be able to apply its application in their core subjects.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional questions carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

CO1: The emphasis of the unit is on developing the skill of applying existing mathematical problems to chemical problems.

CO2: Basic mathematical methods for solving chemical theory and modeling problems.

CO3: Determine the uncertainty in derived quantities and manipulate them to convert between units.

CO4: To provide a broad foundation of mathematics that stresses scientific reasoning and analytical problem solving perspective.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	3		3		3	
CO 2	2	2	2	2	3		2	
CO 3	3							
CO 4	3	3	3					3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Vectors and matrix algebra	Vectors, scalar and vector product	B.N. 1,2
2			Dot and cross product	
3			Triple and fourth product	
4			Problems on above topics	
5			Gradient , divergence curl	
6			Matrix algebra	
7			Definitions and operations on matrix	
8			transpose of matrix	
9			Adjoint of matrix	
10			Inverse and its problems.	
CO: 1				
LO1: Student will understand about the importance of elementary Vector algebra and Matrix Algebra in which vector addition, subtraction, vector product of three and four vectors, gradient divergence curl. As well as knowledge about Matrix addition, multiplication, inverse, adjoint and transpose. .				
11	2	Differential calculus	Functions, continuity and differentiability.	B.N. 1,2
12			Rules for differentiation	
13			Application of differentiation	
14			Problems on differentiation	
15			Maxima and minima	
16			Practice problems	
17			Bohr’s radius	
18			Maxwell’s distribution	
19			Practice problems	
CO: 2				
LO2: Students will get knowledge of elementary Differential calculus in which he learns about functions, continuity and differentiability, rules for differentiation. Application of differential calculus including Maxima and minima to calculate Bohr's radius and Maxwell's distribution.				
20	3	Integral calculus	Basic rules of integration	B.N. 1,2
21			Integration by parts	
22			Partial fraction and substitution	
23			Reduction formula	
24			Application of integral calculus	

25		Functions of several variables	
26		Partial differentiation	
27		Continuous transformation	
28		Practice problems.	

CO: 4

LO3: Students will also learn Integral Calculus in which basic rules, integration by parts, partial fractions and substitution. Reduction formula, applications of integral calculus. Student should know about functions of several variables, partial differentiation.

29	4	Elementary differential equation	First order and first degree differential equation	B.N. 1,2
30			Homogeneous and exact differential equation	
31			Practice problems	
32			Application to chemical kinetics	
33			Practice problems	
34			Second order differential equation	
35			Practice problems	
36			And their solutions	
37			Practice problems	

CO: 4

LO4: Students will also be able to know about elementary Differential equation after basic knowledge of differential calculus that includes first order and first degree differential equations, homogeneous, exact and linear equations. Applications to chemical kinetics.

38	5	Permutation and probability	Permutation and combination	B.N. 1,2
39			Practice problems	
40			Probability and probability theorem on average	
41			variance	
42			Root mean square deviation	
43			Practice problems	
44			Examples on above topics.	
45			Miscellaneous examples	

CO: 1, 3

LO5: Develop the skills to apply basic Permutation and Probability in which Permutation and combinations, probability and its theorems average, variance, root mean square deviations from kinetic theory of gases and fitting of curves.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Books as Text and Reference:

1. The chemistry mathematics book, E. Steiner, oxford university.
2. Mathematics for chemistry, Bhupendra singh, pragati edition.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Mathematics for Chemist			
M.Sc. I Sem.			
Goal: To provide a broad foundation of mathematics that stresses scientific reasoning and analytical problem solving perspective			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
12-15Marks	8-12 Marks	04-08Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of subject thoroughly. Can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education.	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15

Lesson Plan

Subject	Biology for Chemist , Code (MCH): 405(b)	Session: Jul-Dec
Class	M.Sc. – Chemistry I Sem	

I: Objective of course: The objective of this course is to acquaint the students with the biological concept of Carbohydrates, Lipids, Amino acids and nucleic acid.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

- CO1 Knowledge of multiple disciplines of biology and chemistry including cell biology, genetics and bio chemistry.
- CO2 To understand fundamental biochemical principles such as structure, function of molecular metabolic pathway and regulation of biological process.
- CO3 Awareness of major issues at the fore front of the discipline.
- CO4 Implement theoretical protocol and adapt them to plan and carry out simple investigation.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		3						1
CO 2	2	3			3		3	2
CO 3	3	2		1				2
CO 4	3	3			2		3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Cell structure and functions	Structure of prokaryotic and eukaryotic cells	B.N.2
2			Intracellular organelles and functions	
3			Comparison of Plant and animal cells	
4			Overview and functions	
5			Overview of metabolic process, catabolism and Anabolism	
6			Introduction to ATP, the biological energy currency	
7			Origin of life and Theories.	
8			Introduction to biomolecules	
9		Macromolecules		
10		presentation		
CO: 1,3				
LO: Understand the knowledge of cellular component and functions				
11	2	Carbohydrates	Conformation of Monosaccharide’s	B.N.1&2
12			Structure and function of important derivatives of monosaccharide’s	
13			Structure and function of Disaccharides	
14			Structure and function of Polysaccharides	
15			Cellulose and chitine	
16			Storage Polysaccharides, Starch and glycogen	
17			Structure and biological functions of glucosaminoglycanes of mucopolysaccharides	
18		Carbohydrates of glycoprotein’s and glycolipids.		
19		Roll of sugars in biological recognition, blood group substances and ascorbic acids.		
CO: 4				
LO: Understand the different classes of Carbohydrate , mono, di and polysaccharides				
20	3	Lipids	Fatty acids, essential fatty acids	B.N.2
21			Structure and function of tri acylglycerols	

22			Glycerophospholipids, Sphingolipids	B.N.2
23			Cholesterol, bile acids, prostaglandins	
24			Composition and functions of lipoproteins, Role in atherosclerosis, properties of lipids	
25			Aggregates Micelles, bilayers, liposomes, and their possible biological functions	
26			Biological membranes, fluid mosaic model of membrane structure	
27			Lipid metabolism, beta oxidation of Fatty acids	
CO: 1,3				
LO: Enlighten structure, biosynthesis, molecular modeling of proteins.				
28	4	Amino acids, Peptides and proteins	Chemical and enzymatic hydrolysis of proteins to peptides	B.N.1
29			Amino acids sequencing	
30			Secondary structure of Proteins	
31			Alpha helix, beta sheets and super secondary structures	
32			Triple helix structure of collagen	
33			Tertiary structure of protein folding and domain structures	
34			Quaternary structures	
35			Metabolic degradation and biosynthesis of amino acids, Sequence determination, Chemistry of Oxytocin and TRH Hormones	
CO: 2, 3				
LO: Study the structure of phospholipids and tri glycerides, Comparison between different types of Fats and the functions.				
36	5	Nucleic acids	Purines and pyrimidines, bases of nucleic acids	B.N. 1,2 &4
37			Structure of DNA and RNA	
38			Double helix model of DNA	
39			Forces responsible for holding DNA	
40			Chemical and Enzymatic hydrolysis of nucleic acid	
41			Chemical bases of Heredity	

42			Replication of DNA	
43			Transcription, Translation and Genetic code	
44			Chemical synthesis of mono and trinucleosides	
45			Presentation	
CO: 3				
LO: Describe the basic structure of nucleic acid and compare the structure of DNA and RNA.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Principle of biochemistry, A.L. Lehninger
2. Biochemistry, L. Stryer
3. Biochemistry, Voet and Voet
4. outlines of biochemistry, E.E. Conn and P.K. Stumpf

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Biology for Chemists			
M.Sc Chemistry I Sem			
Goal : Students will develop the ability to understand the structure, functions of Carbohydrate, Lipids, in different physiological process. The structure of RNA and DNA will be explained.			
Objective: The objective of this course is to acquaint the students with the biological concept of Carbohydrates, Lipids, Amino acids and nucleic acid.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students

DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Practical	Session: Jul-Dec
Class	M.Sc. – Chemistry I Sem	

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge and instrumental techniques of Chemistry.

II: Examination: The semester practical examination carrying 100 marks will have one section of Inorganic chemistry of 33 marks, second section Organic chemistry 33 marks and third section of 34 marks.

III: Course Outcomes (CO):

- CO1 Will acquire the understanding of laboratory methodologies and skill for the synthesis, purification and characterization of organic/inorganic compounds of moderate complexity, containing multiple functional groups, with some knowledge of considerations of reactivity.
- CO2 Carry out quantitative and qualitative analysis of organic/inorganic substances, and use the selected instrumental analysis techniques for the analysis.
- CO3 To be able to run experimental techniques, procedures with safe laboratory practices.
- CO4 To gain ability of taking observation, make conclusion, perform calculation by processing of raw data, reporting of result and maintenance of notebook using proper record-keeping procedures.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
CO1	3	3	3	2	2	3	2	3
CO2	3	3	3	3	3	3	2	3
CO3	3	3	3			3	3	3
CO4	3	3	2			3	3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-3		Practical Organic Chemistry	Purification and identification of compounds using TLC, chemical test	B.No 1
4-9			Acetylation, Nitration, Halogenation, Ploymerisation	
10-12			IR spectral analysis	
CO:				
LO: Gain the procedure of organic separations, preparations, identification of components & developed the various rout of recrystallization.				
13-16		Practical Inorganic chemistry	Qualitative and quantitative analysis of different metal ions	
17-20			Separation and identification of different metal ions.	
21-26			Synthesis of different Inorganic complexes.	
CO:				
LO: Understand the preparation & characterization of inorganic complexes, enlightening qualitative and quantitative estimation of metal ions.				
27-30		Practical Physical chemistry	Error analysis and statistical data analysis	B.No.1,2
31-33			Phase diagram of three component systems	
34			Determination of congruent temperature of binary systems	
35			Determination of activation energy	
CO:				
LO: The Lab course will teach the reaction rates and calculations of activation energy of the systems.				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogel's textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Inorganic Chemistry , Code (MCH): 406	Session: Jan-Jun
Class	M.Sc. – Chemistry II Sem	

I: Objective of course: The objective of this course is to acquaint the students with the concept of electronic structure of molecules and Preparation of Inorganic compounds.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

- CO1 This course deals with the explanation of atomic and electronic structure of molecules.
- CO2 Course will discuss the synthetic preparation and structural elucidation of inorganic compounds.
- CO3 Students will be able to explain the structure and bonding in molecules and crystal structures.
- CO4 Course deals with metal clusters and magnetic properties of transition metal complexes.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

1	1	Electronic Spectral studies of Transition Metal complexes	Spectroscopic ground states	B.N.1& 2
2			Orgel and Tanabe Sugano diagram	
3			Selection rule for electronic spectroscopy	
4			Intensity of various types of electronic transitions	
5			Calculation of 10 Dq, B and beta parameters	
6			Charge transfer spectra	
7			Correlation diagram	
8			Transition metal complexes	
9				
10		presentation		
CO: 1,3				
LO:Students will be able to understand the structure and bonding of transition metal complexes.				
11	2	Magnetic properties of Transition metal complexes	Introduction of Magnetic properties	B.N.1&2
12			Anomalous magnetic moments	
13			Quenching of Orbital contribution	
14			Orbital contribution to Magnetic moment	
15			Magnetic exchange coupling	
16			Spin crossover	
17			Calculation of spin quantum no.	
18		Magnetic moment		
19		Presentation		
CO: 4				
LO:Discussion of the magnetic properties of metal complexes and magnetic exchange coupling.				
20	3	Metal complexes	Metal carbonyl, structure and bonding	B.N.2
21			Vibrational spectra of metal carbonyls	
22			Important reactions of metal carbonyls	
23			Preparation, bonding and structure of transition metal nitrosyls	
24			Dinitrogen and dioxygen complexes	

25			Tertiary phosphine as ligand	
26			Structure of Transition metal complexes	
27			Structural elucidation	
CO: 1,3				
LO:Compare different depreciation methods, including straight-line methods, and written down value method.				
28	4	Metal clusters	Higher boranes	B.N.1
29			Carboranes	
30			metalloboranes	
31			Compounds with metal-metal multiple bonds	
32			Metallocarboranes	
33			Examples of different metal complexes	
34			Presentations	
CO: 2, 3				
LO:Demonstrate the recording of business transactions, preparing accounting adjustments, construct financial statements, and close the books for the accounting period in accordance with Generally Accepted Accounting Standards.				
35	5	Optical Rotatory Dispersion and circular Dichroism	Linearly and circularly polarized lights	B.N.1,2 & 6
36			Optical rotatory power and circular birefringence	
37			Elipticity and circular dichroism	
38			ORD and cotton effect	
39			Faraday and Kerr effects	
40			Assignment of electronic transitions.	
41			Absolute configuration of complexes	
42			Isomerism due to non planarity of chelate rings	
43			Applications of ORD	
44			Applications of CD	
45		presentation		
CO: 3				

LO: Students will learn the circularly polarized lights, Faraday effects and assignment of electronic transition.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Aromatic Electrophilic Substitution And Aromatic Nucleophilic substitution	The arenium ion mechanism, orientation and reactivity and energy profile diagrams.	B.N. 1,2,3 &11
2			Ortho/Para ratio, IPSO attack, Orientation in other ring systems	
3			Quantitative treatment of reactivity in substrate and electrophile, Diazonium Coupling	
4			Vilsemeir reaction, Gatterman-Koch reaction,	
5			SNar and SN1 Mechanism.	
6			Benzyne mechanism Reactivity effect of substrate structure, leaving group	
7			Reactivity effect of attacking nucleophile, The Von Richter reaction.	
8			Sommelet Hauser and smiles rearrangement.	
CO: 1				
LO: To know about eletrophilic and nuceleophilic substtitution reaction of aromatic compounds..				
1	2	Free Radical Reactions	Types of free radical reaction, free radical mechanism, mechanism at aromatic substrates.	B.N.1,2,3& 11
3			Neighboring group assistance, Reactivity for aliphatic and aromatic substrate at bridgehead.	
4			Reactivity in the attacking radicals. The effects of solvents on reactivity.	
5			Allylic Halgenation (NBS), Oxidation of aldehydes to carboxylic acids	
6			Coupling of alkynes and arylation of aromatics compound by daizonium salts,	
7.			Hunsdiceker reaction, Free radical rearrangements and sandmeyer reaction	
CO:				
LO : The reactivity and stability of an organic molecule based on structure, including Conformation and its stereochemistry				
1	3	Addition reaction	Mechanistic and stereo chemical aspects of addition reactions involving nucleophile.	B.N.1,2
2			Mechanistic and stereochemical aspects of	

		addition reactions involving electrophile and free radicals.	
3		Regio and chemo selectivity, orientation and reactivity	
4		Addition to cyclopropane ring. Hydrogenation of double and triple bonds	
5		Hydrogenation of aromatic rings, Hydroboration.	
6		Michael's reaction	
7		Sharpless asymmetric epoxidation.	

CO: 2

LO: Reaction of simple unconjugated alkenes with electrophile and converting carbon-carbon double bond to other functional group and mechanism and stereochemistry of addition reaction.

1			Mechanism of metal hydride reduction of saturated and unsaturated carbonyl compounds, acid ester and nitriles.	
2			Addition to Grignard Reagents, organozinc reagents to carbonyl and unsaturated carbonyl compounds.	
3			Organolithium reagents to carbonyl and unsaturated carbonyl compounds and Wittig reaction.	
4			Mechanism of condensation reactions involving enolates-aldol	
5			Knoevenagel and Claisen reaction with their mechanism	
6			Mannich and benzoin reaction with their mechanism	
7			Stobbe and Perkin reaction with their mechanism	
8			Hydrolysis of esters and amides and ammonolysis of ester.	
9			The E1, E2, E1cB mechanism with their spectrum.	
10			Orientation of the double bond, Reactivity effect of substrate structure.	
11			Reactivity effect of leaving group and medium, Mechanism and orientation in pyrolytic elimination	

B.N.1 &3

CO: 1,2

LO: Learn about hydrogenation and hydrogenated catalysts, asymmetric hydrogenation also analysis of hydrogenation reaction for alkenes, alkynes or aromatic ring and elimination reaction and factor affecting.

1	5	Pericyclic Reactions.	Molecular Orbital symmetry , Frontier orbital of ethylene	B.N.1 &9
2			Frontier orbital of 1,3-Butadiene and 1,3,5-Hexdiene and allyl system	
3			Classification of pericyclic Reactions, Woodward-Hoffmann correlation diagrams	
4			FMO and PMO approach	
5			Electrocyclic reactions- conrotatory and disrotatory motions. $4n, 4n+2$ systems.	
6			Cycloaddition-antarafacial and suprafacial additions. $4n$ and $4n+2$ systems.	
7			2+2 addition of ketenes, 1,3 dipolar cycloadditions and cheletropic reactions.	
8			Sigmatropic rearrangements – Suprafacial and antarafacial shifts of H	
9			Sigmatropic involving carbon molecules 3,3 and 5,5 - Sigmatropic rearrangements	
10			Claisen , cope and aza-cope rearrangements	
11			Fluxional tautomerism and Ene reaction.	
CO: 1,2				
LO: Know about pericyclic reaction and evaluate application of Woodward Hoffmann rule and analyze type of pericyclic mechanism in organic reaction				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: ORGANIC CHEMISTRY			
M.Sc. II Sem			
Goal : Students develop the ability to prepare and analyze the structure ,properties,compostion, reactions ,and preparation of carbon containing compounds and their various reaction mechanism and stereochemical aspect.			
Objective :The objective of this course is to acquaint the students with optical activity of asymmetric and dissymmetric molecules, Basic idea about aromatic electrophilic and nucleophilic reactions , pericyclic ,addtition reaction and free radical reaction .Various reaction mechanism and conformational Analysis.			
16-20 Marks		06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept pericyclic reaction, various addition and aromatic substitution reaction .free radical reaction with their mechanism.	% Students having the basic concept of. aromatic substitution reaction .free radical reaction with their mechanism	% Students having understanding about various reaction mechanisms.	% Students Need More Efforts to understand the different type of reactions with their mechanism.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Physical Chemistry , Code (MCH): 408	Session: Jan-Jun
Class	M.Sc. – Chemistry II Sem	

I: Objective of course: The objective of this course is to develop understanding the concept and ability to deduce enormous applications of rate equation , surface Chemistry , Macromolecules, Non Equilibrium Thermodynamics & Electrochemistry .

II: Examination : The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

- CO1 Examine basic principle of Kinetics, CMC, Macromolecule, Electrochemistry, Irreducible thermodynamics
- CO2 Investigate and understand the current perception of electrochemistry, surface chemistry and Kinetic study at molecular level.
- CO3 Develop an ability to use concept and mathematical tool to derive equation for various atoms & molecule.
- CO4 Analysis and interpretation of experimental data using Physiochemical Theories.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3			3	2	2	2
CO 2	3	3			2	3	3	1
CO 3	2	3	3	3	1	3	3	2
CO 4	3	2	2		2	3	3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Chemical Dynamics	Method of Determining Rate laws	B. No.1,2,3,4,12,
2			Collision Theory & concept of Steric factor	
3			Arrhenius Equation	
4			Activated Complex Theory –Derivation and Thermodynamic Formulation	
5			Ionic Reaction	
6			Kinetic salt Effect	
7			Treatment of Unimolecular reaction	
8			Dynamic chain reaction –Hydrogen Bromine reaction & Hydrogen Chlorine reaction	
9			Homogenous catalysis	
10			Fast reaction by Nuclear Magnetic resonance method, Flash photolysis Fast reaction by Flow method & Relaxation Method	
CO: 1,2,3				
LO: Employee Eyring & Collision theories to solve and derive rate of reaction for various molecules				
11	2	Surface Chemistry	Surface tension & Capillary Action	B.No.1,2,3,4,5,6
12			Derivation of Laplace Equation, Kelvin Equation	
13			Gibbs Adsorption Isotherm, Derivation of BET Equation ,Electro kinetic phenomena	
14			Surface Active reagent concept & classification Micellization -concept,	
15			CMC , Factors affecting the CMC of surfactant ,Counter ion binding to micelles	
16			Thermodynamics of Micellization	
17			Phase action & Mass action modeling	
18			Reverse Micelles	
19			Solublization & Micro emulsion	
CO: 2, 3				
LO: Abstract the knowledge of Adsorption, surfactant, Micelle and test the validity of various isotherm				
20	3	Macro Molecules	Polymer : Definition & types	B.N.1,2,3,4,5,6, 9
21			Electrically Conducting & Fire resistant Polymer	
22			Liquid Crystal polymer	
23			Kinetics of polymerization	

24		Mechanism of Polymerization	
25		Concept of Molecular mass & Number of polymer	
26		Determination of Molecular mass by Osmometry Viscometry, Light Scattering	
27		Determination of Molecular mass by Diffusion of light	
28		Calculation of average dimension of various chain structures	

CO: 1,2 & 3**LO:** Acquire knowledge of Polymerization and determination of Molecular weight of polymers

29	4	Non Equilibrium Thermodynamics	Thermodynamics criteria for Non equilibrium states	B.No.1,2,3,10
30			Entropy production and Entropy flow: concept	
31			Heat flow & Matter flow for Non Equilibrium Thermodynamics	
32			Transformation of generalized forces & fluxes	
33			Non Equilibrium stationary state	
34			Phenomenological Equations, Electro kinetic phenomena	
35			Microscopic reversibility, Onsager's Reciprocity relation, Diffusion & Electric Conduction	

CO: 1,2**LO:** Develop fundamentals of Entropy production and validate Phenomenological equation for Irreversible process.

36	5	Electro Chemistry	Debye Huckel Onsager treatment & its extension, Ion solvent Interaction	B.No. 8,10,5,6,
37			Debye Huckel Jerum Mode, Thermodynamics of electrified interface equation	
38			Electro Capillarity: concept & Derivation , Surface Active phenomena	
39			Derivation of Lippmann Equation	
40			Method of determination of surface excess, Structure of Electrified Interfaces	
41			Over potential , Exchange current density,	
42			Derivation of Butler Volmer Equation, Tafel Plot	
43			Effect of light at semiconductor solution interfaces	

44		Paleography Theory: Theory & Instrumentation, Ilkovic Equation	
45		Half wave potential and its significance	
CO: 4			
LO: Enlighten the knowledge of Polar graph, Over potential, Semiconductor, half wave potential and mathematical derivation of their study			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

Lesson Plan

Subject	Spectroscopy II & Diffraction Method, Code (MCH): 409	Session: Jan-Jun
Class	M.Sc. – Chemistry II Sem	

I: Objective of course: Description of the theory and combine concepts of techniques and applications of NMR, NQR and ESR and electronic spectroscopy

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

CO-1	Broad and detailed overview of state of art spectroscopic methods used in chemistry for structure elucidation and analysis of unknown samples.
CO-2	Description of the theory and combine concepts of techniques and applications of NMR, NQR and ESR spectroscopy.
CO-3	Fundamental and advanced knowledge about the interaction of electromagnetic radiations with matter and electron diffraction patterns.
CO-4	Be able to solve problems related to the structure property purity and concentration of chemicals and to study molecular interpretation by choosing suitable spectroscopic methods and corresponding data.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	3	3	3	3	3	
CO 2	3	3	3	3		3	2	
CO 3	2	3	3	2		3	3	3
CO 4	3	2	2	3		2	3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Nuclear Magnetic resonance spectroscopy	Nuclear spin , nuclear resonance and saturation.	B.N 1
2			Shieldling of magnetic nuclei,	
3			Chemical shift and its measurements	
4			Factors affecting chemical shift	
5			Deshielding effect	
6			Spin-spin interactions	
7			Factors affecting coupling constant J	
8			Classification of NMR spectra	
9			Spin decoupling and instrumentation	
10			NMR studies of nuclei other than proton ¹³ C, ¹⁹ F, ³¹ P ,FT- NMR and its advantages	
CO: 2				
LO: Explain principle spectrum and outline of elemental analysis technique. Interpretation of HNMR spectra and determine the magnetic properties of spinning nuclei by NMR.				
1	2	Nuclear Quadrupole resonance spectroscopy	Introduction of Quadrupole nuclei, Quadrupole moment	B.N.2
2			Electric field gradients	
3			Coupling constant	
4			Splitting and application.	
CO: 2				
LO: NQR offers unique means for the study of structural, dynamics and chemical bonding in solids. To determine the quadruple element and density of matrix				
1	3	Electron spin resonance spectroscopy	Basic principle of ESR, Zero field splitting	B.N.1
2			Kramer’s degeneracy	
3			Factor affecting G value	
4			Isotropic and anisotropic hyperfine coupling constants.	
5			Spin Hamiltonian	
6			Spin Densities & Mc Connel Relationship	
7			Far IR Region and metal ligand vibration	
8			Normal coordinate analysis	
CO: 3				

LO: Employs the ESR as analytical tool for structure Elucidation. Understand the magnetic properties of spinning electron..				
1	4	X Ray Diffraction	Bragg’s Equation, Miller Indices	B.N. 10
2			Laue Method & Bragg Method	
3			Debye Shirer Method , Identification of unit cell	
4			Structure of simple lattice & X ray intensity	
5			Description of procedure for an X ray structure analysis	
6			Absolute configuration of Molecule	
CO: 1				
LO: Gains the knowledge about basics and theoretical concept of X-rays diffraction. To know the process of crystal structure analysis.				
1	5	Electron Diffraction	Scattering Intensity Vs Angle	B.N 9
2				
3			Wierl Equation	
4				
5			Measurement Techniques	
6			Structure Elucidation of gas phase molecule	
7		Neutron Diffraction	LED & Structure of surfaces	
8				
9			Scattering of neutron by solid measurement technique	
10			Structure elucidation of magnetically ordered unit cells	
11				
12				
CO: 3				
LO: To know the basic principle and measurement technique of electron and neutron diffraction along with their application				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Chemical application of group theory, F.A. Cotton and Wilkinson , John Wiley
2. C.K Banwell
3. Modern spectroscopy J.M. Hollas , John viley
4. Applied electron spectroscopy for chemical analysis D.H. Windawi
5. NMR,NQR,EPR and Mossbauer spectroscopy in inorganic chemistry.R.V Parrish,Ellies Harwood
6. Physical method in chemistry R.S. Drago Saunders College
7. Introduction to molecular spectroscopy G.M. Barrow, Mc graw Hill
8. Basic principle of spectroscopy R.Chang, Mc graw Hill
9. Introduction to photoelectron spectroscopy. P.K.ghosh, John Wiley
10. Spectroscopy H.Kaur

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction to Computer & Computing	Basic Structure & functioning of computer with a PC as Example	B.No. 1,2,3
2			Memory Input Output device	
3			Secondary storage Computer language	
			Operating System -DOS	
4			Introduction to UNIX & Windows	
5			Principle of Programming Algorithm	
6			Principle of Flow Chart	
CO: 1				
LO: To learn basic principle of using windows operating system				
7	2	Computer Programming FORT AN/C/BAS IC	Introduction to Fortan	B.No.1,2,3
8			Element of Computer Language	
9			Constants & Variable	
10			Operation & Symbol Expression	
11			Arithmetic Assignment statement, Input & Output	
12			Termination & Branching Statement –IF or GO	
13			Double precision & Subscripted variable	
14			Dimension variable	
15			DO statement FUNCTION AND SUB ROUTINE	
16			COMMON and DATA Statement	
CO: 1,2				
LO: Apply fundamental programming concepts & evaluation of various operations in C..				
17	3	Programming in Chemistry	Developing of small computer code using C Language	B.No.2,3
18			Formula in Chemistry – Vander waal Equation	
19			Formula in Chemistry-Chemical Kinetics, Determination of Rate Constant	
20			Formula in Chemistry- Radio Active Decay(Half & Average rate	
21			Determination of Molarity Normality of Solution	
22			Evaluation of Electro negativity of atom	
23			Experimental determation of moleculer weight & Lattice Energy	

24			Calculate percentage of Element of Organic Compound using data		
25			Representation of molecule in term of Elementary structural features-Bond Length & Bond Angle		
CO: 1,2					
LO: To developed small computer program based on physical chemistry with the help of FORTAN language					
26	4	Use of Computer programmes	Operation of PC data processing	B.No.1,2,3	
27			Running of standard programme & package- MS Word		
28			Running of standard programme & package- MS Excel		
29			Chart formation & calculation		
30			Plotting X Y plot & calculation		
31			Simpson’s Numerical Integration method		
32			Computer programming for Chemistry Lab Experiments		
33			Computer programming for Chemistry Lab Experiments		
34			Computer programming for Chemistry Lab Experiments		
CO: 1,3					
LO: Gain knowledge of computer program with special emphasis on MS word & MS Excel					
35	5	Internet	Application of Internet for Chemistry with search engine	B.N.1,3	
36			PDF- Concept & Application		
37			PDF- Concept & Application		
38			JPG- Concept & Application		
39			RTF- Concept & Application		
40			Bitmap- Concept & Application		
41			Web camera		
42			Scanning		
43			OMR		
44			Practicals on programming Language		
45			Practicals on programming Language		

CO: 4
LO: Develop skills of internet protocol and enlightening various types of files.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Fundamental of Computers –V.Raja Raman
2. Computer in Chemistry –K.V. Raman
3. Computer programming in FORTRAN IV-V RajaRaman

VII: Notes:

Lesson Plan

Subject	Practical	Session: Jan-Jun
Class	M.Sc. – Chemistry II Sem	

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge and instrumental techniques of Chemistry.

II: Examination: The semester practical examination carrying 100 marks will have one section of Inorganic chemistry of 33 marks, second section Organic chemistry 33 marks and third section of 34 marks.

III: Course Outcomes (CO):

- CO1 Will acquire the understanding of laboratory methodologies and skill for the synthesis, purification and characterization of organic/inorganic compounds of moderate complexity, containing multiple functional groups, with some knowledge of considerations of reactivity.
- CO2 Carry out quantitative and qualitative analysis of organic/inorganic substances, and use the selected instrumental analysis techniques for the analysis.
- CO3 To be able to run experimental techniques, procedures with safe laboratory practices.
- CO4 To gain ability of taking observation, make conclusion, perform calculation by processing of raw data, reporting of result and maintenance of notebook using proper record-keeping procedures.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
CO1	3	3	3	2	2	3	2	3
CO2	3	3	3	3	3	3	2	3
CO3	3	3	3			3	3	3
CO4	3	3	2			3	3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-3		Practical Organic Chemistry	Synthesis involving name reactions	B.No 1,5
4-9			Synthesis of Dyes	
10-12			Estimation of amine, phenols	
LO: Carry out experiments in the area of organic analysis & quantitative estimation and perform name reactions.				
13-16		Practical Inorganic chemistry	Qualitative and quantitative analysis of different Cations and anions	B.No 1,2
17-20			Preparation of Inorganic chemistry compounds and their characterization.	
21-26			Synthesis of different Inorganic complexes.	
LO: To gain the Knowledge about qualitative and quantitative analysis and various separation technique like chromatography.				
27-30		Practical Physical chemistry	Conductometry analysis	B.No.1,2
31-33			Polarimetry analysis	
34			pH metry titration	
35			Refractrometry	
LO: Gains the procedure and applications for conductometric, pH metric, potentiometric determination.				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.
5. Experiments and techniques in Organic chemisrty

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Application of Spectroscopy-I (MCH): 501	Code	Session: Jul- Dec
Class	M.Sc. – Chemistry III Sem		

I: Objective of course: Student will gained knowledge of different branches of spectroscopy like Electronic, Vibration, NMR, & Mossbauer spectroscopy & their applications.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes (CO):

- CO1 To study the basic aspects of various spectroscopic techniques e.g. Electronic, Vibration, NMR & Mossbauer spectroscopy.
- CO2 To impart knowledge of Electronic, Vibration, NMR, & Mossbauer spectroscopy & their applications.
- CO3 Use of different spectroscopic techniques in structure elucidation of organic and inorganic compounds & their shapes.
- CO4 Understand basic principles of spectroscopy where electromagnetic radiations interact with chemical substances.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 4	2	3	3	3	3	3	3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Electronic spectroscopy.	General introduction of electronic spectroscopy & Types.	B.N.1,4,5
2			Concept of d^1 - d^9 systems & Types of complexes (octahedral, tetrahedral & square planar).	
3			Spectral studies of octahedral complexes.	
4			Spectral studies tetrahedral complexes.	
5			Spectral square planar complexes.	
6			Spectral studies of other examples	
CO: 1				
LO: To understand electronic spectral studies for d^1 , d^9 system in various complexes.				
7	2	Vibrational spectroscopy	Basic of vibrational spectroscopy, types of molecules and their examples.	B.N. 1,2,7 3,6 & 8
8			Study of Shapes of AB_1 & AB_2 type of molecules by vibrational spectroscopy.	
9			Study of Shapes of AB_3 & AB_4 type of molecules by vibrational spectroscopy.	
10			Study of Shapes of AB_5 types of molecules & general introduction of types of ligands	
11			Bonding in molecules.	
12			Concept of bonding in multidentate ligands (nitrosyl, ethylenediamine etc.).	
13			Applications of Raman spectroscopy with suitable examples.	
14			Bonding in ligands (multicenter)	
15			Concept of bonding in polydentate ligands and types	
CO: 2				
LO: Explain shapes of molecules, mode of bonding in ambidentate ligands by vibrational spectroscopy.				
16	3	NMR,(Nuclear Magnetic Resonance Spectroscopy- I	Concept of NMR and its applications	
17			Definition & measurement of values of chemical shift in organic compounds.	
18			spin spin coupling constant by taking some	

			examples.	
19			Determination of spin spin coupling	B.N.1, 2, 4,6, 8 & 12
20			Concept of shielding and deshielding effect by various aliphatic & olefinic organic compounds.	
21			Chemical shift and correlation with aldehydic & aromatic compounds.	
22			Chemical shift and correlation for proton bonded to carbon alcohols, phenols, carboxylic acid etc.	
23			Determination of value of chemical shift and coupling constant	
24			Spin spin coupling in organic molecules with suitable examples	
CO:2, 3				
LO: Explain basic concepts of NMR Spectroscopy and measurement of chemical shift in various organic compounds.				
25	4	NMR ,(Nuclear Magnetic Resonance Spectroscopy-II)	General introduction of chemical exchange.	B.N.1,2,3,4,5 & 7
26			Effect of deuteration in various compounds.	
27			Spin spin interactions between two and three nuclei with suitable examples.	
28			spin spin interactions between three and four nuclei with suitable examples.	
29			General introduction of Karplus curve variation and spin spin interactions in five nuclei compounds.	
30			Coupling constant and disordered.	
31			NMR shift reagents, solvent effect.	
32			Nuclear Overhauser Effect (NOE).	
33			Study of NOE in organic compounds with suitable examples	
34			Determination of chemical shift by other examples	
CO: 2				
LO: Understand complex spin –spin interactions between two, three, four and five nuclei and effect of solvent by NMR spectroscopy.				

35	5	Mossbauer spectroscopy.	Mossbauer spectroscopy & its scope	B.N.1,2,4,5 & 11	
36			Spectral studies & parameters.		
37			studies of (1) bonding and structures of Fe ⁺² and Fe ⁺³ compounds		
38			studies of (1) bonding and structures Sn ⁺² and Sn ⁺⁴ compounds		
39			nature of M-L bond and its types.		
40			coordination number metal ions in inorganic complexes.		
41			Structure of inorganic complexes & examples.		
42			detection of oxidation state.		
43			Inequivalent MB atoms & Types.		
44		Study of other iron complexes by Mossbauer			
45		Study of M-L bonding in other molecules			
CO: 1, 2					
LO: To be able to understand Mossbauer spectroscopy, its applications & implementation on inorganic compounds.					

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Spectroscopy of organic compounds, P.S Kalsi, 6 th edition, New age international publisher.
2. Spectroscopy, H Kour, Pragati edition.

15. Structural Methods in Inorganic Chemistry, E.A.V. Ebsworth, D.W.H. Rankin and S. Cradock, ELBS.
16. Introduction to NMR spectroscopy, R.J. Abraham, J. Fisher and P. Loftus, Wiley.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Application of Spectroscopy-I			
M.Sc. Chemistry III Sem.			
Goal: Students applied spectroscopic techniques in the identification and characterization of various organic compounds. Topic include Spectral Studies for $d^1 - d^9$ systems, Symmetry and shapes of AB_2 , AB_3 , AB_4 , AB_5 and AB_6 , chemical shift, spin-spin interaction, shielding and deshielding mechanism, Karplus curve-variation of coupling constant with disordered angle, bonding and structures of Fe^{+2} and Fe^{+3} compounds including those of intermediate spin, (2) Sn^{+2} and Sn^{+4} compounds and nature of M-L bond.			
Objective: Student will gained knowledge of different branches of spectroscopy like Electronic, Vibration, NMR, & Mossbauer spectroscopy & their applications.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of various types of spectroscopic techniques and applied it to characterization of organic compounds.	% Students having the basic concept of NMR, Mossbauer, IR, Electronic and vibrational spectroscopic techniques.	% Students having understanding about the techniques which will be helpful in the identification of compounds	% Students Need More Efforts for identification and characterization of compounds by various spectroscopic techniques.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Photochemistry Code (MCH): 502	Session: Jul- Dec
Class	M.Sc. – Chemistry III Sem	

I: Objective of course: Course provides deep knowledge of organic and inorganic photochemical reactions.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic.

III: Course Outcomes (CO):

- CO1 To understand basic concept of Photochemistry & types of photochemical reactions.
- CO2 Understand photochemistry of organic compounds like Alkenes, carbonyl compounds & study of various miscellaneous photochemical reactions..
- CO3 Understand reaction mechanism of photochemical reactions & applications of photochemistry to organic synthesis.
- CO4 Study of various miscellaneous photochemical reactions.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	2		3		3	3
CO 2	2	3		3	3		2	2
CO 3	2	3	2	2	3	2		
CO 4	1	2			2		3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Photo Chemical Reaction	Basic of EMR & types.	B.N.1,2,3,4,5 & 6
2			Interaction with matters.	
3			Excitations and types.	
4			quantum yield & transfer of excitation energy	
5			Types of EMR and its effects	
6			Basic concept of Actinometry.	
7			Study of Qunatum yield	
CO: 1				
LO: To understand photochemical reactions & their chemistry				
8	2	Determination of Reaction Mechanism.	Types of photochemical reactions & mechanism	B.N.1,2,3,4,5
9			Determination of Rate constant for various photochemical reactions (zero order, first order etc.)	
10			Concept of Threshold and activation energy.	
11			Factors affect the rate of reactions.	
12			Study of effect of light intensity on the rate of photochemical reactions.	
13			Study of Gas phase photolysis	
14			Concept of Photo dissociation	
15			Study of cyclisation reaction	
16			gas-phase photolysis.	
CO: 2				
LO: To understand rate of photochemical reactions and determination of rate constant by reaction mechanism.				

17	3	Photo Chemistry of Alkenes & Aromatics Compounds	General introduction of Photochemistry of alkenes & types of bonds.	B.N.1,2,3,4,5
18			Isomerism in olefinic compounds	
19			Types of isomerism in organic compounds.	
20			Cyclisation reactions	
21			addition reactions in olefinic and aromatic compounds. Types	
22			Rearrangement of 1,4- dienes.	
23			rearrangement of 1,5- dienes.	
CO: 2				
LO: To understand photochemistry of alkenes and aromatic compounds & rearrangement reactions.				
24	4	Photo Chemistry of Carbonyl Compounds.	Photo chemical reactions of Carbonyl compounds.	B.N.1,2,3,4,5,6
25			Intramolecular reactions.	
26			saturated, cyclic and acyclic, β , γ unsaturated	
27			Reactions of α , β unsaturated compounds	
28			Intermolecular reactions of cyclohexadienones	
29			cyloaddition reactions & types	
30			cyloaddition reactions - dimerisations	
31			Formation of oxetane.	
32			Intermolecular reaction in other organic molecules	
CO: 2				
LO: To understand intermolecular reactions of saturated and unsaturated carbonyl compounds & intermolecular cycloaddition reactions.				
33	5	Miscellaneous PhotoChemical Reactions	Photo-Fries reactions & Types	B.N.1,2,3,4
34			Photo-Fries reactions of annilides	
35			Photo-Fries rearrangement	
36			Photo-Fries rearrangement with examples	
37			Singlet molecular oxygen and chemical reactions	

38		Mechanism of formation of smog Photochemically
39		Photodegradation of polymers
40		Photochemistry of vision.
41		Study of Photochemical formation of smog
42		Mechanism of formation of smog
43		Photo fries rearrangement reaction.
44		Study of photodegradation of polymers
45		Role of photochemistry in various polymers
CO: 4		
LO: To understand various rearrangement in different photochemical reactions and role of light of degradation of polymers.		

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Fundamentals of photochemistry, K.K. Rothagi-Mukheriji, Wiley-Eastern.
2. Essentials of Molecular Photochemistry, A Gilbert and J. Baggott, Blackwell Scientific Publication.
3. Molecular Photochemistry, N.J. Turro, W.A. Benjamin.
4. Introductory Photochemistry, A. Cox and T. Camp, McGraw Hill.
5. Photochemistry, R.P. Kundall and A. Gilbert. Thomson Nelson.
6. Organic Photochemistry, J. Coxon and B.Halton, Cambridge University Press.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment

Subject: Photochemistry			
M.Sc. Chemistry III Sem			
Goal : Students can understand various types of organic and inorganic photochemical reactions, topic include EMR, Actinometry, Types of photochemical reactions, rearrangement of 1,4- and 1,5-dienes, Photochemistry of cyclic and acyclic, β , γ unsaturated and α , β unsaturated compounds and various miscellaneous photochemical reactions.			
Objective: Students gain knowledge of various types of organic and inorganic photochemical reactions.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

Subject	Environmental Chemistry Code (MCH): 503	Session: Jul- Dec
Class	M.Sc. – Chemistry III Sem	

I: Objective of course: Course provides knowledge of various chemical reactions takes place in environment and various types of pollutions.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic.

III: Course Outcomes (CO):

- CO1 To understand different concepts of atmosphere, stratosphere and tropospheric chemistry, photochemical smog, acid rain, biogeochemical cycles and formation of oxides such as NO_x, SO_x, CO_x & radicals.
- CO2 Study of chemical processes taking place in earths, atmosphere, hydrosphere & to learn various types of pollution & their control methods.
- CO3 To understand structure of atmosphere, important chemical reactions in the atmosphere, types of pollution, ozone chemistry & disasters.
- CO4 Understand basic principles of Environmental Chemistry and interactions between different sectors of the environment (Air, Soil & Water) and effects of human activity on the natural chemical processes.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		3						3
CO 2	2	2				2	2	2
CO 3	1	3		3				3
CO 4	3	2			3			3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference	
1	1	Atomosphere	General introduction of Atmospheric layers, Vertical temperature profile, heat/radiation budget of the earth atmosphere systems.	B.N. 1,2,3	
2			Properties of troposphere, thermodynamic derivation of lapse rate.		
3			Biogeochemical cycles of carbon, nitrogen, sulphur, phosphorus, oxygen.		
4			Sources of trace atmospheric constituents: nitrogen oxides, sulphurdioxide and other sulphur compounds.		
5			Pressure variation in atmosphere and scale height.		
6		Atomospheric Chemistry	Reactions of oxides of carbon, chlorofluorocarbons and other halogen compounds, methane and other hydrocarbons.		
7			Mechanism of Photochemical decomposition of NO ₂ and formation of ozone.		
8			Formation of oxygen atoms, hydroxyl, hydroperoxy and organic radicals and hydrogen peroxide.		
9			Reactions of hydroxyl radicals with methane and other organic compounds.		
10			Photochemical smog meteorological conditions and chemistry of its formation.		
11		Tropospheric PhotoChemistry	Study of formation of oxides and reactions		
12			Study of formation of nitrate radicals and reactions		
13			Study of global mean temperature		
CO: 1					

LO: Understand structure of atmosphere, biogeochemical cycles, temperature inversions & Chemistry of formation of oxides of N, S & C and study of formation of organic radicals.

14	2	Air Pollution	Sources of air pollution and types	B.N. 1,2,3,4,5
15		Acid Rain	Effects of air pollutants on health, visibility and climate.	
16			Definition, Acid rain precursors and their aqueous and gas phase atmospheric oxidation reactions.	
17			Damaging effects on aquatic life, plants, buildings and health.	
18		Stratospheric Ozone Depletion	Monitoring of SO ₂ and NO ₂ . Acid rain control strategies.	
19			Mechanism of Ozone formation, Mechanism of catalytic ozone depletion & Ozone hole	
20		Green House Effect Urban Air Pollution	Green house effect, green house gases and their sources, damaging effects of carbon monoxide. Monitoring of CO.	

CO: 2, 3,				
LO: Understand causes & effects of Air pollution on living organisms , depletion of ozone & green house effect				
21	3	Aquatic Chemistry and Water Pollution	Sources of water pollutants.	B.N. 1,2,3,4,5
22			Definition & determination of DO, BOD and COD.	
23			Aerobic and anaerobic reactions of organic sulphur and nitrogen compounds in water	
24			Acid-base chemistry of fresh water and sea water concentration of aluminum, nitrate and fluoride in water.	
28			Effect of Al, F and and nitrate	
29			Study of Redox reactions in natural water	
30			Waste water treatment methods of sewage and textile water.	
31			Effect of S and N on plants	
32			Purification methods of drinking water.	
33			Techniques of purification and disinfection.	
CO: 4				
LO: Explain water chemistry and effects of water pollutants on DO, BOD and COD and purification of water by different techniques.				
34	4	Environmental Toxicology	Toxicology and toxic pollutants.	B.N. 1,2,3,4
35			Toxic heavy metals	
36		Toxic Organic Compound		
37			Pesticides, classification, properties and uses of organochlorine and ionospheres pesticides.	
38		Polychlorinated biphenyls	Effects of organochlorine and ionospheres pesticides on human health.	
39		Polynuclear Aromatic Hydrocarbons	Polychlorinated biphenyls, Properties, use and effects.	
40			Polynuclear Aromatic Hydrocarbons, Source, structures and as pollutants.	

CO: 3 To understand structure of atmosphere, important chemical reactions in the atmosphere, types of pollution, ozone chemistry & disasters.

LO: To understand toxic effects of heavy metals and organic pollutants & their separation techniques.

41	5	Soil & Environmental Disaster	Soil composition & micro and macronutrients.	
42			soil pollution by fertilizers, plastic an metals.	
43			Bhopal gas tragedy, Chernobyl, three mile island	
44			Minimata Disease, Sevoso (Italy), London smog.	
45		Remediation methods of soil		

CO: 3

LO: To understand chemistry of soil pollution by fertilizers, plastic and toxic metals and environmental disasters (Bhopal gas tragedy etc.)

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

CO 2	3	3	2	2	2			
CO 3	3	3	3	3	3			
CO 4	2	2	3	2	3	2		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Alkyls and Aryls of Transition Metals Compounds of Transition Metal-Carbon Multiple Bonds	Introduction of organ metallic compounds	B.N. 1,2,4,4 & 5
2			Synthesis of alkyl and aryl OMC & stability	
3			Role of organocopper in organic synthesis.	
4			Types of Transition Metal-Carbon Multiple Bonds.	
5			Synthetic route of Alkylidenes, low valent carbenes and carbines.	
6			Nature of bond OMC.	
7			nucleophilic and electrophilic reactions of ligands & role in synthesis of organic compounds.	
CO: 4				
LO: To understand types, synthesis, stability & decomposition of alkyls and aryls of transition metals & role of organic synthesis.				
8	2	Transition Metal π-Complexes	Role of Transition metal π -complexes in organic molecules like alkenes, alkynes, allyl, diene, dienyl, arenes.	B.N. 1,2,3 & 4
9			Synthesis and nature of bond in alkenes, alkynes, allyls.	
10			Synthesis and nature of bond in diene, dienyl, arenes.	
11			trienyl complexes their synthesis.	
12			nucleophilic and electrophilic attack on ligands	
13			Study of trienyl complexes.	
14			Preparation of pai complexes	
15			Role of various organometallic compounds organic synthesis.	
16			Properties of Transition metal π -complexes	
CO: 2				

LO: Understand relation of transition metal π - complexes with unsaturated organic molecules.				
17	3	Transition organometallic compounds:	bonding of organometallic compounds with elements.	B.N.1,2,3 & 4
18			Bonding with Hydrogen	
19			Bonding with boron	
20			Bonding with silicon	
21			Study of bonding & structure of silicon organometallic complexes	
22			Study of properties of boron complexes	
23			Role of organometallic compounds containing H, B and Si in organic chemistry.	
24			Study of hydrogen containing transition metal complexes	
CO: 1				
LO: To understand how to bind organ metallic compounds with H, B & Si.				
25	4	Homogeneous Catalysis	Types of catalysis Homogeneous and heterogeneous catalysis	B.N.1,2,3 & 4
26			Homogeneous catalysis of compounds.	
27			homogeneous catalytic hydrogenation.	
28			polymerization of olefins by Zeigler-Natta catalyst	
29			catalytic reactions involving carbon monoxide.	
30			hydrocarbonylation of olefins	
31			Activation of C-H bond by homogeneous catalysis.	
32			Role of various catalyst like Wilkinson catalyst, Ziglar Natta Catalyst,	
33			Role of tetraethyl lead in organic synthesis and catalysis.	
34			Study of homogeneous catalysis in other TMC	
CO: 1				
LO: Explain role & types of catalyst in homogeneous reactions.				
35	5	Fluxional	Definition of Flexionality & examples.	B.N.1,2,3 & 4

36	Organometallic Compounds	Role of Flexionality in organic chemistry	
37		dynamic equilibrium in organic compounds	
38		dynamic equilibrium in compounds such as η^2 olefine	
39		equilibrium in η^3 -allyl	
40		equilibrium in dienyl complexes.	
41		Role of flexionality in various multiple bonded organic compounds	
42		Explanation of flexionality by different examples.	
43		Importance of flexionality in OMC.	
44		Flexionality in other organometallic compounds	
45		Presentation on flexionality	
CO: 4			
LO: Explain fluxionality and dynamic equilibrium in organic complexes.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

- CO1 Course provides basic concepts of polymers, characterization and analysis of polymers by various techniques.
- CO2 Students gained thorough knowledge about organic and inorganic polymers.
- CO3 Course provides an integrated view of polymer chemistry including chemical structure of various inorganic polymers, methods of measuring molecular weight.
- CO4 Understand depth knowledge on different types of polymers & their properties, synthesis and application. Course will be helpful in plastic industries.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3		2				
CO 2	2	2				2		
CO 3	2	3	3					
CO 4	3	3						3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basics of polymers	Basic of Polymers	B.N. 1, 2,3, 9
2			Types (Linear, branched and network polymers) of polymers and basic unit monomers	
3			Sources of natural and synthetic polymers	
4			degree of polymerization	
5			Polymerization & types (condensation & addition)	
6			co-ordination and copolymerization	
7			Polymerization conditions and polymer reactions	
8			Polymerization in homogeneous and heterogeneous systems.	
9			Study of structure of polymers	
10			Study of monomers	
11			Importance of polymers in industries	
CO: 1				
LO: Understand types, sources & polymerization reaction of polymers.				
12	2	Polymer Characterization	Polydispersion-average molecular weight concept	B.N. 1, 2, 3, 9
13			viscosity of polymeric compounds	
14			Poly disparity and molecular weight distribution.	
15			The practical significance of molecular weight	
16			Measurement of molecular-weight.	
17			Practical significance of molecular weight	
18			Study of end groups	
19			Properties like viscosity, light scattering, osmotic	

20			Ultracentrifugation methods.	
CO: 3				
LO: How to characterized polymers and concept of significance of molecular weight of polymers.				
21	3	Analysis & Testing of polymer	Methods of analysis of polymers, Mass spectroscopy.	B.N. 1, 2, 3
22			Chemical analysis of polymers by Gas chromatography.	
23			Analysis of polymers by X-ray diffraction study.	
24			Analysis of polymers Microscopy	
25			Thermal analysis and physical testing-tensile Strength of polymers	
26			fatigue, impact, tear resistance	
27			Hardness and abrasion resistance.	
CO: 1				
LO: Understand analysis and testing of polymers by various chemical and instrumental methods like XRD, NMR, ESR etc.				
28	4	Inorganic Polymers	Types of organic & inorganic polymers	B.N. 1, 4, 6, 7,8
29			Scope of inorganic polymers	
30			Properties and general survey of inorganic polymers	
31			Homo and hetero atomic polymers	
32			Polymers based on boron-borazines	
33			Boranes and carboranes	
34			Polymers based on Silicon	
35			Synthesis, properties and structure of polymetalloxanes	
36			Synthesis, properties and structure of polymetallosiloxanes, silazanes.	
CO: 3, 4				
LO: To explain importance of inorganic polymers and their applications.				
37	5	Structure , Properties and	Synthesis, properties and structure of Polymers based on Phosphorous-Phosphazenes	B.N. 1,2,3,4, 7,8

38	Application of Polymers	Synthesis, properties and structure of Polymers based on Polyphosphates	
39		Polymers based on Sulphur-Tetrasulphur tetranitride	
40		Applications of Phosphorous-Phosphazenes polymers	
41		Applications of polymers Polyphosphates & Sulphur-Tetrasulphur tetranitride	
42		Co-ordination polymers & their applications	
43		Definition of Metal chelate polymers & types.	
44		Synthesis of metal chelate polymers	
45		Properties of metal chelate polymers	
CO: 2, 3			
LO: Understand polymer base on S, P & Si and metal chelate polymers.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Polymer chemistry, Malcolm P. Stevens.
2. Inorganic polymers, Alka L Gupta.
3. Polymer Science, V R Gowariker, N V Viswanathan & Jayadev Sreedhar.
4. Inorganic Chemistry, J.E. Huheey, Harper Row.
5. Developments in Inorganic polymer Chemistry, M.F. Lappert and G.J. Leigh.
6. Inorganic polymers- N.H. Ray.
7. Inorganic polymers, Graham and Stone.
8. Inorganic Rings and Cages : D.A. Armitage.
9. Textbook of Polymers Science, F.W. Billmeyer Jr. Wiley.
10. Contemporary Polymer Chemistry, H.R. Alcock and F.W. Lambe, Prentice Hall.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment

Subject: Polymer			
M.Sc. Chemistry III Sem			
Goal : Students able to understand various types of polymerization reactions, mechanism and types of organic and inorganic polymers. Topic include Polymerization in homogeneous and heterogeneous systems, Polydispersity and molecular weight distribution, Chemical analysis of polymers, scope of Inorganic Polymers and Polymers based on P, S, Si, polymetallosiloxanes and metalloxanes.			
Objective: Students gain knowledge of polymerization, testing and chemical analysis of polymers, scope of inorganic polymers and characterization of various types of polymers.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of polymers, types , sources, molecular weight concept, polymerization reactions, characterization and properties of polymers and concept of inorganic polymers.	% Students having the basic concept polymers, measurement of molecular weight, characterization by various spectroscopic and chromatographic techniques and synthesis and scope of inorganic polymers.	% Students having understanding about inorganic and organic polymers and their applications in industries.	% Students Need More Efforts for understanding uses, synthesis and analysis of polymers.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Practical	Session: Jul- Dec
Class	M.Sc. – Chemistry III Sem	

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge and instrumental techniques of Chemistry.

II: Examination: The semester practical examination carrying 100 marks will have one section of Inorganic chemistry of 33 marks, second section Organic chemistry 33 marks and third section of 34 marks.

III: Course Outcomes (CO):

- CO1 Will acquire the understanding of laboratory methodologies and skill for the synthesis, purification and characterization of organic/inorganic compounds of moderate complexity, containing multiple functional groups, with some knowledge of considerations of reactivity.
- CO2 Carry out quantitative and qualitative analysis of organic/inorganic substances, and use the selected instrumental analysis techniques for the analysis.
- CO3 To be able to run experimental techniques, procedures with safe laboratory practices.
- CO4 To gain ability of taking observation, make conclusion, perform calculation by processing of raw data, reporting of result and maintenance of notebook using proper record-keeping procedures.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
CO1	3	3	3	2	2	3	2	3
CO2	3	3	3	3	3	3	2	3
CO3	3	3	3			3	3	3
CO4	3	3	2			3	3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-6		Practical Organic Chemistry	Multi step synthesis of organic compounds	
7-12			Quantitative estimation	
CO:				
LO: Understand synthesis of organic compounds by multistep and their estimation by titrimetric methods & analysis of water parameters.				
13-19		Practical Inorganic chemistry	Quantitative determination of a three component mixture	
20-24			Chromatography separation & Determination of R _f Values	
CO:				
LO: To understand quantitative determination of three component mixture (Cu ⁺² , Ni ⁺² , Zn ⁺² , Ag ⁺ , Ni ⁺² & Mg ⁺²) by volumetrically and gravimetrically, separations of various metallic ions, indicators and pigments by thin layer, paper and column chromatography.				
25-26		Practical Physical chemistry	Spectroscopy	
27-28			Spectrophotometry / Colorimetry	
29-30			Chemical Kinetics	
31-32			Electronics	
33-34			Conductometry	
35-36			pH metry	
CO:				
LO: Understand various spectroscopic techniques, NMR, UV, IR etc fir interpretation of compounds, determination of concentration, study of chemical kinetics, experiment based on electronics, conductometry & study of dissociation constant.				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Subject	Application of Spectroscopy- II	Code (MCH): 511	Session: Jan- Jun
Class	M.Sc. – Chemistry IV Sem		

I: Objective of course: Student will gained knowledge of different branches of spectroscopy like Electronic, Vibration, NMR, Carbon -13 NMR Spectroscopy & Mass spectroscopy & their applications

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes:

- CO-I Use of spectroscopic terminology and concepts
- CO-II Selection of most effective spectroscopic technique for a given task.
- CO-III To analyze the experimental data to retrieve information about chemical and biological structures
- CO-IV Explain the UV-Visb., Raman, IR, NMR and Mass techniques, how it works and what information can be retrieved.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	2	3	3	2	3	2
CO 2	3	2	3	3	3	3	2	2
CO 3	3	3	3	3	3	3	3	3
CO 4	3	3	3	3	2	3	3	3

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1: Application of Spectroscopy				
1	1	Ultra violet and visible spectroscopy	General Consideration, Various electronic transitions,	B.N. 1, 3, 4
2			Beer Lambert law	
3			Effect of solvent on electronic transitions, ultraviolet bands for carbonyl compounds	
4			ultraviolet bands for unsaturated carbonyl compounds, dienes,	
5			ultraviolet bands for conjugated polyenes,	
6			ultraviolet bands for conjugated polyenes,	
7			Fieser Woodward rules for conjugated dienes	
8			Fieser Woodward rules for conjugated carbonyl compounds,	
9			ultraviolet spectra of aromatic compounds. Steric effect in biphenyls.	
10			Presentation and problem solution	
CO 1, IV				
LO 1: The effect of solvent, steric factor and conjugation on UV- Visb. spectra of organic compounds/inorganic complexes.				
11	2	Infrared Spectroscopy	Characteristic vibrational frequencies of alkanes, alkenes, alkynes,	B.N. 1, 3, 4
12			Characteristic vibrational frequencies of ethers, phenols and amines.	
13			Detailed study of vibrational frequencies of ketones, aldehydes, esters, amides, acids, anhydrides,	
14			Detailed study of vibrational frequencies of amides, acids, anhydrides	
15			Detailed study of vibrational frequencies of lactones, lactams and conjugated carbonyl compounds	
16			Effect of hydrogen bonding and solvent effect on vibrational frequencies,	
17			overtones, combination bands and fermi resonance.	
18			Presentation and Problem Solutions	
CO I, IV				
LO : Effect of resonance, hydrogen bonding, solvent and bonding of ambidentate ligands on IR				

and Raman spectra.				
19	3	Nuclear Magnetic Resonance of paramagnetic substances in solution	The contact and Pseudo contact shifts	B.N. 11, 14, 15
20			The contact and Pseudo contact shifts Continue	
21			Factors affecting nuclear relaxation	
22			Applications of NMR for biochemical systems	
23			Applications of NMR for biochemical systems	
24			NMR of metal nuclide with emphasis on ¹⁹⁵ Pt	
25			NMR of metal nuclide ¹¹⁹ Sn	
26			Presentation and problem solutions	
CO I, III, IV				
LO: Basic definitions, terms and factors that affect the H ¹ NMR spectra of organic Compounds.				
27	4	Carbon-13 NMR Spectroscopy	General considerations C-13 NMR Spectroscopy	B.N. 1, 2, 14
28			Chemical shift (aliphatic olefinic , alkyne aromatic, heteroaromatic and carbonyl carbon	
29			Chemical shift (Aromatic, heteroaromatic and carbonyl carbon	
30			coupling constants	
31			Two dimension NMR spectroscopy-COSY	
32			NOESY technique	
33			DEPT technique	
34			HMBC techniques	
35			HMQC techniques and problem solutions	
CO I, II, IV				
LO : Theory and application of C ¹³ NMR spectroscopy of organic Compounds and advanced techniques applied to NMR Spectroscopy				
36	5	Mass Spectrometry	Introduction ion production E1, C1 FD, ESI and FAB,	B.N. 1, 3, 4
37			Introduction ion production E1, C1 FD, ESI and FAB continue	
38			Factors affecting fragmentation, ion analysis, ion abundance	
39			Mass spectral fragmentation of organic compounds,	
40			Common functional groups, molecular ion peak,	

41			Metastable peak. Me Lafferty rearrangement.	
42			Me Lafferty rearrangement.	
43			Nitrogen rule. High resolution mass spectrometry.	
44			Structure elucidation of simple molecules by solution of combine problems of using UV – Visible, IR, NMR and mass spectra.	
45			Combine problems solution of using UV – Visible, IR, NMR and mass spectra.	
CO I, IV				
LO: Basic theory, factor that governed the fragmentation of organic compounds and position of peak of mass spectra and problem solution of by spectroscopy.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

20. Introduction to NMR spectroscopy, R.J. Abraham, J. Fisher and P. Loftus, Wiley.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Application of Spectroscopy			
M.Sc. Chemistry IV Sem			
Goal: Students applied the knowledge spectroscopic techniques in the identification and characterization of various organic compounds. Topic includes calculations of positions of UV Bands in organic Compounds, fingerprinting by IR, Fragmentation pattern of organic compounds and their interpretation by mass spectroscopy, application of NMR spectroscopy for biochemical systems and metal nuclide ^{195}Pt , ^{119}Sn , advance technique: COSY, NOESY, DEPT, HMBC. Applied to C-13 NMR Spectroscopy.			
Objective of course: Student able to understand material science problem, theory behind conducting property of material, calculation of magnetic moment, reaction in solid state and their use for future devices.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the good knowledge of various types of spectroscopic techniques such as NMR, Mass, IR and their uses in interpretation of various types of organic compounds.	% Students having the basic concept of spectroscopic techniques and their applications.	% Students having understanding about spectroscopy and its role in different branches of chemistry.	% Students Need More Efforts for understanding basic of spectroscopy through various examples.

IX: Scheme of internal marks

CO 3	2	2	3		2	3	3	
CO 4	3	2	3				2	

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1: Solid State Chemistry				
CO 1, II				
LO 1: General principles, experimental procedures and kinetics of solid state reaction				
1	1	Solid State Reactions	General principle of Solid State Reactions	B.N. 1, 2
2			Principle of Solid State Reactions continue	
3			experimental procedure of Solid State Reactions	
4			Co-precipitation as a precursory to solid state reactions	
5			Kinetics of solid state reactions	
6			Kinetics of solid state reactions	
7			Kinetics of solid state reactions	
8			Presentations	
CO I, II				
LO : Different type of crystal defects and their thermodynamics.				
9	2	Crystal Defects and Non-Stoichiometry	Perfect and imperfect crystals	B.N. 1,2
10			Intrinsic and extrinsic defects-point defects	
11			Line defects,	
12			Plane defects	
13			Vacancies in Schottky and Frenkel defects	
14			Thermodynamics of Schottky defect formation,	
15			Thermodynamics of Frenkel defect formation,	
16			colour centres, non-stoichiometry and defects.	
	CO I, III			
	LO: Electronic Properties and Band theory of metal, insulators and semiconductor, doping in semiconductors, p-n junctions, super conductors, magnetic moment and temperature effect.			
17	3	Electronic Properties and Band Theory	Metal, insulators and semiconductors	B.N. 1, 2
18			Electronic structure of solids, band theory,	
19			Band structure of metals, insulators	
20			Band structure of semiconductors, Intrinsic and extrinsic semiconductors,	
21			Doping semiconductors, p-n junctions, super conductors.	

22			Optical properties-Application of optical microscopy.	
23			Application of electron microscopy	
24			Classification of materials on the basis of Magnetic Properties, effect of temperature on magnetism	
25			Calculation of magnetic moment	
26			mechanism of ferromagnetic ordering super exchange	
27			mechanism of anti ferromagnetic ordering super exchange	
28			presentations	
CO I, II, III				
LO : Electrically conductivity of organic solids, their charge transfer properties, organic metals, new superconductors.				
29			Electrically conducting solids.	
30			Electrically conducting solids continue	
31			Organic charge transfer complex	
32			Organic charge transfer complex	
33			Organic metals	
34			New superconductors	
35			New superconductors	
36			Presentations	
CO I, IV				
LO: Theory of Liquid crystal, their type and scope in display units				
37			Nematic liquid crystals	
38			Smectic liquid crystals	
39			Ferroelectric liquid crystals	
40			Antiferroelectric liquid crystals	
41			Theories of LC	
42			Theories of LC	
43			Liquid crystal display	
44			Liquid crystal display	
45			New materials as liquid crystal	

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Bio-chemistry	Code (MCH): 513	Session: Jan- Jun
Class	M.Sc. – Chemistry IV Sem		

I: Objective of course: Course provides integral knowledge of biochemical reactions and role of essential elements for plants and animals.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes:

CO-I	Describe the molecular & functional organization of a cell and it's components.
CO-II	To give fundamentals of enzymes, their clinical applications and adverse effects of irregular enzymatic activity.
CO-III	Molecular concepts of body defense and applications to new medicine development.
CO-IV	To in learning about pharmacology and medicinal chemistry

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	2			2		2	
CO 2	3	3	2					
CO 3	3	3	2		3		3	
CO 4	3	3	3		3		3	

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1: Bio-Chemistry				
CO 1				
LO 1: Will learn biologically important metals, bioenergetics and ATP cycle, storage & transport of molecular oxygen.				
1	1	Metal Ions in Biological Systems	Bulk and trace metals for biological system : Na, K, Mg, Ca, Fe, Cu, Zn, Co	B.No.1,2,3
2			K+/Na+ pump.	
3		Bioenergetics and ATP Cycle.	DNA polymerisation, glucose storage	
4			Metal complexes in transmission of energy;	
5		Transport and Storage of Dioxygen	chlorophyll's, photosystem I and photosystem II in cleavage of water.	
6			Heam proteins and oxygen uptake structure and	
7			Function of haemoglobin's, myoglobin, haemocyanms and hemerythrin, model synthetic complexes of iron, cobalt and copper.	
8			Function of haemocyanms and hemerythrin, model synthetic complexes of iron, cobalt and copper.	
CO				
LO: Electron transport and nitrogen fixation process, metal and protein involved in the process.				
9	2	Electron Transfer in Biology	Structure and function of metal of protein in electron transport prpcesses	1,2,3
10			Structure and function of metal of protein in electron transport prpcesses	
11			Cytochrome's and ion sulphur protein, synthetic models	
12			Cytochrome's and ion sulphur protein, synthetic models	
13		Nitrogen fixation	Biological nitrogen fixation and its mechanism,	
14			Nitrogenase, Chemical of nitrogen fixation	
15			Presentations	
	CO			

	LO: Theory and kinetics of enzymes action, its mechanism of action and knowledge of various enzyme catalyzed reactions.				
16	3	Enzymes	Introduction and historical perspective, chemical and biological catalysis, remarkable properties of enzymes like catalytic power, specificity and regulation.	1,2,3	
17			Nomenclature and classification, extraction and purification of Enzymes.		
18			Fischer's lock and key mechanism		
19			Koshland's induced fit hypothesis, concept and identification of active site by the use of inhibitors, affinity labeling and enzyme modification by site-directed mutagenesis.		
20			Enzyme kinetics, Michael's-Menton and Lineweaver Burk plots, reversible and irreversible inhibition.		
21			Mechanism of Enzyme Action		Transition-state theory, orientation and Steric effect,
22		Acid-base Catalysis, covalent catalysis, strain or distortion.			
23		Examples of some typical enzyme Mechanisms for chemotrypsin, ribonuclease, lysozyme and carboxypeptidase.			
24		Kinds of Reactions Catalysed by Enzymes	Nucleophilic displacement on a phosphorus atom, multiple displacement reactions and the coupling of ATP cleavage to endergonic processes.		
25			Transfer of sulphate, addition and elimination reactions, enolic intermediates in Isomerisations reactions,		
26			β -Cleavage and condensation, some isomerization and rearrangement reactions.		
27			Enzyme catalyzed carboxylation and decarboxylation.		
CO					
LO : Knowledge of structure and biological functions of different of co-enzyme, mechanism of action, a brief survey of some supra-molecules having enzyme capabilities and clinical uses of enzyme and coenzymes.					
28	4	Co-Enzyme	Cofactors as derived from vitamins,	1,2,3	

		Chemistry	coenzymes, prosthetic groups, apoenzymes.	
29			Structure, biological functions and reaction mechanism of coenzyme A, thiamine pyrophosphate, pyridoxal phosphate,	
30			Structure, biological functions and reaction mechanism of NAD ⁺ , NADP ⁺ ,	
31			Structure, biological functions of FMN, FAD, lipoic acid, vitamin B12	
32		Enzyme Models	Host-guest chemistry, chiral recognition and catalysis, molecular recognition, molecular asymmetry and prochirality biometric chemistry	
33			crown ether, cryptates. Cyclodextrins,	
34			cyclodextrin-based enzyme models, Calixarenes, ionospheres, micelles synthetic enzymes or synzymes	
35		Biotechnological Applications of Enzymes	Large-scale production and purification of enzymes, techniques and methods of immobilization of enzymes,	
36			Effect of immobilization enzyme activity. Application of immobilized enzymes, use of enzymes in food and drink industry-	
37			Use of enzymes in brewing and cheese-making, syrups from corn starch, enzymes as targets for drug design.	
38			Clinical uses of enzymes, enzyme therapy, enzymes and recombinant DNA Technology.	
CO				
LO: Structure of cell and its constituent, energetic of cell transportation, interaction of biopolymers with cell and its thermodynamics.				
39		Biological cell and its constituent	Biological cell, structure and function of protein, enzyme, DNA in living system	
40			Biological cell, structure and function of RNA. Helix coils transition.	
41	5		Standard free energy change in biochemical reaction, exergonic, endergonic	B.No.1,2,3,4
42		Bioenergetics	Hydrolysis of ATP, Synthesis of ATP from ADP	

43		Biopolymer interactions	Forces involved in biopolymer interaction. Electrostatic charge and molecular expansion, hydrophobic forces, dispersion force interactions.	
44			Multiple equilibrium and various type of binding processes in biological systems. Hydrogen ion titration curves.	
45		Cell membrane and transport of ions	Structure and function of cell membrane, ion transport through cell membrane Irreversible thermodynamic treatment of membrane transport, Nerve conduction.	

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.

5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: BioChemistry			
M.Sc. Chemistry I Sem			
Goal: Students able to understand various biochemical reactions proceed by electron transfer and enzymes. Topic include Bulk and trace metals with special reference to Na, K, Mg, Ca, Fe, Cu, Zn, Co, and K ⁺ /Na ⁺ pump, Transport and Storage of Dioxygen, Biological nitrogen fixation, and its mechanism, nitrogenase, Chemical nitrogen fixation, enzymatic reactions, Enzyme catalyzed carboxylation and decarboxylation and mechanism.			
Objective. Course provides integral knowledge of biochemical reactions and role of essential elements for plants and animals.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the deaf knowledge of various reactions taking place in animals and palnts and role of enzymes in biochemical reactions their mechanism, chemistry of coenzyme, various types of enzyme models, synthesis of enzymes and nitrogen fixation.	% Students having basic concept of biochemistry role of enzymes and knowledge of enzyme catalyzed reactions.	% Students having understanding of role of essential elements in biochemical reactions and types of catalyst.	% Students need more efforts to understand complex biochemical reactions with suitable examples.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Subject	Analytical Chemistry	Code (MCH): 516	Session: Jan- Jun
Class	M.Sc. – Chemistry IV Sem		

I: Objective of course: Student able to assess and select suitable analytical method for analysis has knowledge of sources of interferences/ errors, ability to select alternative methods for analysis.

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic.

III: Course Outcomes:

CO-I	Able to assess and select suitable analytical method for analysis, have knowledge of sources of interferences/ errors, ability to select alternative methods for analysis.
CO-II	Be familiar with the calculations of analytical chemistry, perform statistical evaluation of results and make scientific reports in scientific manner.
CO-III	Able to understand the working principle of different analytical techniques and recognize their advantages and limitations. Able to measure the metals, proteins, medicinal and non-medicinal drugs in various samples
CO-IV	Able to work as a team member in collaboration with other fields such as biology, medicine, and environmental research.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	3	3	3	2	3	2
CO 2	3	3		3	3	2	2	2
CO 3	3	3	2	2	3	3	3	3
CO 4	3	3	3		3	3	3	3

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1: Analytical Chemistry				
CO 1, II, III				
LO 1: Will learnt about different type of traditional and modern analytical method, their advantages and disadvantages, laboratory practices and methods of reporting analytical data and evaluation of error.				
1	1	Errors and Evaluation	Role of analytical chemistry Classification of analytical methods classical and instrumental.	B.No. 1, 2, 3
2			Types of instrumental analysis. Selecting an analytical method.	
3			Neatness and cleanliness. laboratory operations and practices. Analytical balance. Techniques of weighing, errors. Volumetric glassware cleaning	
4			and calibration of glassware. Sample Volumetric glassware cleaning and Calibration of glassware.	
5			Sample preparation-dissolution and decompositions.	
6			Selecting and handling or reagents. Laboratory notebooks. Safety in the analytical laboratory	
7			Gravimetric techniques.	
8			Definition of terms in mean and median. Precision-standard Deviation, relative standard deviation.	
9			Accuracy-absolute error, relative error. Types of error in experimental data determinate (systematic), indeterminate (or random) and gross.	
10			Sources of error and the effects upon the analytical results. Methods for reporting analytical data.	
11			Statistical evaluation of data-indeterminate errors. The uses of statistics.	
CO 1, IV				
LO : About food ingredients, common adulterant's of foods and their determination by chromatography and other techniques.				
12	2	Food analysis	Analysis of moisture, ash, crude protein, fat crude fiber,	B.No. 1, 2,
13			Analysis of carbohydrates, calcium, potassium,	
14			Analysis of sodium and phosphate. Common adulterants in food,	

15			Contamination of foods stuffs. Microscopic examination of foods for adulterants.	3
16			Pesticide analysis in food products.	
17			Extraction and purification of sample. HPLC.	
18			Gas chromatography for organophosphates.	
19			Thin-layer chromatography for identification of chlorinated pesticides in food products.	
20			Thin-layer chromatography for identification of chlorinated pesticides in food products.	
CO I, II, IV				
LO: Source and effect of water pollution, parameter of water analysis and their determination, pollution law and standards.				
21	3	Analysis of Water Pollution	Origin of Waste water, types, water pollutants and their effects.	B. No. 1, 2, 6
22			Sources of water pollution domestic, industrial, agricultural soil and radioactive wastes as sources of pollution	
23			Objectives of analysis-parameter for analysis-color, turbidity, total solids, conductivity,	
24			acidity, alkalinity, hardness, chloride, sulphate fluoride, silica, phosphates and different forms of nitrogen,	
25			Heavy metal pollution-public health significance of cadmium, chromium, copper, lead,	
26			Heavy metal pollution: zinc, manganese, mercury and arsenic	
27			General survey of instrumental technique for the analysis of heavy metals in aqueous systems. Measurements of DO	
28			BOD and COD.	
29			Pesticides as water pollutants and analysis. Water pollution laws and standards.	
CO I, II, IV				
LO : Analysis parameter of soil, fuel, body fluids and drug.				
30	4	Analysis of soil, Fuel, Body Fluids and Drugs	Analysis of Soil, moisture, pH	B.No. 1, 2, 3, 6
31			Analysis of total nitrogen, phosphorus,	
32			Analysis of silica, lime, magnesium,	
33			Analysis of manganese, sulphur and alkali salts.	
34			Fuel analysis : liquid and gas. Ultimate and proximate analysis, Liquid fuels-flash point,	

35			Heating values-grading of coal.	
36			octane number and carbon residue, aniline point,	
37			Gaseous fuels-produced gas and water gas-calorific value.	
CO I, III, IV				
LO: Blood composition, assay of its constituents by chemical and radiological methods, and drug analysis of narcotics and dangerous drugs.				
38	5	Clinical Chemistry	Composition of blood-collection and preservation of samples.	B.N. 1, 2, 4
39			Clinical analysis of Serum electrolytes, blood glucose,	
40			Clinical analysis of blood urea, nitrogen, uric acid,	
41			Clinical analysis of albumin, globulins, barbiturates,	
42			Analysis of uric acid and alkaline phosphates.	
43			Principles of radio immunoassay (RIA) and applications.	
44			The blood gas analysis trace elements in the body Drug analysis of Narcotics and dangerous drug.	
45			Classification of drugs.Screening of drugs by gas and thin-layer chromatography and spectrophotometric measurements.	

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Medicinal Chemistry	Code (MCH): 518	Session: Jan- Jun
Class	M.Sc. – Chemistry IV Sem		

I: Objective of course: Provide knowledge of common therapeutic agents and their synthesis pharmacological action, toxicology and application of drug.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes:

CO-I	Gain knowledge of general structural features of therapeutic agents.
CO-II	Knowledge of structural influences on pharmacological action/ toxicology/ therapeutics.
CO-III	Describe and perform the synthesis of selected drugs by different synthetic routes.
CO-IV	Able to describe the mechanism of action, use and mode of application of drugs

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3			2		3	3
CO 2	2	2	2		3		3	2
CO 3	3	3			3		3	3
CO 4	3	3			3		3	3

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1: Medicinal Chemistry				
CO 1, II				
LO 1: Have knowledge of SAR, different approaches of drug design, QSAR-Free-Wilson analysis and Hansch analysis.				
1	1	Structure and activity	Relationship between chemical structure and biological activity (SAR)	B.N. 1, 2
2			SAR	
3			Receptor Site Theory	
4			Approaches to drug design.	
5			Approaches to drug design.	
6			Introduction to combinatorial synthesis in drug discovery.	
7			Factors affecting bioactivity. QSAR-Free-Wilson analysis,	
8			Wilson analysis,	
9			Hansch analysis	
10			Hansch analysis	
11			Relationship Wilson and Hansch analysis.	
CO I, II				
LO : Different type of antibiotics, their classification and use for common causes.				
12	2	Pharmacodynamics	Introduction to Pharmacodynamics,	B.N. 1, 2, 8
13			Elementary treatment of enzymes stimulation	
14			Elementary treatment of enzymes stimulation	
15			Enzyme inhibition, sulfonamides,	
16			Membrane active drugs, drug metabolism,	
17			Xenobiotics	
18			Biotransformation,	
19			Biotransformation,	
20			Significance of drug metabolism in medicinal chemistry.	
CO I, III, IV				
LO: Knowledge of commonly used antimalarial and antifungal and their SAR.				
21	3	Antibiotics and antibacterials	General consideration about Antibiotics and antibacterials	B.N. 1, 2, 8
22			Antibiotic β -Lactam type - Penicillins,	

23			Cephalosporins	
24			Antitubercular – Streptomycin,	
25			Broad spectrum antibiotics	
26			Broad spectrum antibiotics – Tetracyclines	
27			Tetracyclines	
28			Anticancer - Dactinomycin (Actinomycin D)	
CO I, III, IV				
LO : Knowledge of pharmacodynamics , metabolism, xenobiotics, and biotransformation of drugs.				
29			Introduction to antifungals, polyenes,	
30			Antibacterial – Ciprofloxacin,	
31			Antibacterial -Norfloxacin,	
32			Introduction to Antiviral – Acyclovir	
33	4	Antifungal, Antiviral, Antimalarials	Antimalarials : Chemotherapy of malaria. SAR	B. N. 1, 2, 8
34			Antimalarials -Chloroquine, Chloroguanide	
35			Antimalarials - Chloroguanide	
36			Antimalarials -Mefloquine	
CO I, III, IV				
LO: Knowledge of commonly used non-steroidal anti-inflammatory drugs, Antihistaminic and antiasthmatic agents.				
37		Non-steroidal Anti-inflammatory Drugs	General Consideration to Non-steroidal Anti-inflammatory Drugs	
38			Diclofenac Sodium,	
39			Ibuprofen	
40	5	Netopam Antihistaminic and antiasthmatic agents	Introduction to Netopam Antihistaminic and antiasthmatic agents	B.N. 1, 2, 8
41			Terfenadine,	
42			Cinnarizine	
43			Salbutamol	
44			Beclomethasone dipropionate	
45			Presentations	

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lesson Plan

Subject	Practical	Session: Jan- Jun
Class	M.Sc. – Chemistry IV Sem	

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge and instrumental techniques of Chemistry.

II: Examination: The semester practical examination carrying 100 marks will have one section of Inorganic chemistry of 33 marks, second section Organic chemistry 33 marks and third section is Physical Chemistry carry 34 marks.

III: Course Outcomes (CO):

- CO1 Will acquire the understanding of laboratory methodologies and skill for the synthesis, purification and characterization of organic/inorganic compounds of moderate complexity, containing multiple functional groups, with some knowledge of considerations of reactivity.
- CO2 Carry out quantitative and qualitative analysis of organic/inorganic substances, and use the selected instrumental analysis techniques for the analysis.
- CO3 To be able to run experimental techniques, procedures with safe laboratory practices.
- CO4 To gain ability of taking observation, make conclusion, perform calculation by processing of raw data, reporting of result and maintenance of notebook using proper record-keeping procedures.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8

CO2	3	3	3	3	3	3	2	3
CO3	3	3	3			3	3	3
CO4	3	3	2			3	3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-4		Practical Organic Chemistry	Synthesis of Organic compounds	
5-8			Spectrophotometric Estimation or Isolation	
9-12			Identification of Organic Compounds using spectral data	
CO: 1,3				
LO: Gain the ability to synthesis organic components, isolation of organic components and application of spectroscopic principles.				
13-19		Practical Inorganic chemistry	Inorganic Preparations	
20-21			Ion-Exchange Chromatography	
22-23			Spectrophotometric Determination/ Spectroscopic identification of recovered spectra like IR, NMR, ESR, & Mass	
23-24			Flame Photometric Determination	
CO: 2, 3				
LO: Gain the ability to synthesis inorganic components, separation using chromatography, and application of spectroscopic principles.				
25-27		Practical Physical chemistry	Spectroscopy	
28-30			Polarography/Electronics	
31-33			Chemical Kinetics	
34-36			Thermodynamics	
CO: 1 & 3				
LO: Able to study application of principles of electrochemical, chemical kinetics and thermodynamics and spectroscopic in chemical reactions and interactions.				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

IPS ACADEMY ,INDORE
Department of Chemistry
M.Sc. Pharmaceutical Chemistry

Programme Outcome

PO-1	M.Sc. Pharmaceutical Chemistry is one of the core requirements of job profile in chemical and pharmaceutical sectors for the analysis and development of new drugs.
PO-2	Able to develop functional knowledge, Laboratory technique to design, formulation and characterization of different inorganic and organic molecule by spectroscopic tools like NMR, IR etc in pharmaceutical analysis.
PO-3	Gain knowledge of physical property of drugs viz. flow property, coarse dispersion , thermodynamic, diffusion, therapeutical analysis will be useful in ensuring the pharmaceutical analysis
PO-4	Able to apply mathematical methods physical parameter computational tool designing and synthesis and functional application of new drugs.
PO-5	Student gain knowledge of specific physical chemical properties, reaction mechanism of inorganic , organic , bioorganic molecules and natural herbs
PO-6	Student able to learn potential use of analytical technique, medicinal chemistry, natural products, toxicological effect in drug designing.
PO-7	Medicinal, natural products& Polymer Science, integral part of curriculum that opens doors in major sections viz. QA, QC, production, R & D in Chemical and Pharmaceutical Industries.
PO-8	Able to understand the knowledge of basic component, fundamental and application of biological systems, enzyme kinetics and synthesis and properties of inorganic and organic pharmaceutical substance.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Principles of Inorganic Pharmaceutical Chemistry-I Code MPC-101 Session: Jul-Dec
Class: M.Sc. Pharmaceutical Chemistry- I Sem.

I: Objective of course: Students develop the ability understand theories, mechanism of Bonding, Metal-Ligand coordination, stability of Complexes, Substitution reaction in various complexes Able to exemplified various drugs useful for systematic effect. Mechanism & reaction Bioinorganic Chemistry

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics.

III: Course Outcomes (CO):

- CO1 Develop criteria to predict structure, bonding of molecules and various conductors.
- CO2 Acquire cognitive knowledge of properties and reaction mechanism of inorganic complexes.
- CO3 Able to determine the basic component of Bioinorganic drugs
- CO4 Student will learn the fundamentals and applications of biological systems.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 3		2		2	3			2
CO 4	2				3			3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Bonding in Inorganic Compound	Chemical forces, Hydrogen bonding	B.N.1,2,3,4
2			Hydrates & Clatharates on Dipole	
3			Dipole dipole Interaction, VSEPR Theory	
4			Molecular Orbital Theory	
5			Valence band theory for conductor	
6			Molecular theory for Conductors	
7			Valence band & molecular theory for Insulator	
8			Semiconductor Extrinsic & Intrinsic	
9			Semiconductor Extrinsic & Intrinsic	
CO: 1				
LO: Knowledge of various bonding theories for Conductors, Insulator & Semi conductors and Chemical forces acting on it				
10	2	Metal Ligand Bonding	Crystal Field Theory	B.N.,1,2,3,4
11			Limitation of CFT	
12			Molecular Orbital Theory LCAO Principles	
13			Molecular Orbital Theory Octahedral Complexes	
14			Molecular Orbital Theory Tetrahedral Complexes	
15			Molecular Orbital Theory Square Planer Complexes	
16			Pi Bonding	
17			Bent Theory	
18			Energetics of Hybridisation	
19			Examples of MOT	

CO: 2				
LO: Develop the knowledge of various theories of Coordination complexes and their quantitative treatment				
20	3	Reaction mechanism of Transition Metal Complexes	Reactivity of Metal Complexes , Inert & Labile Complexes	B.N.1,2,3,4
21			Acid Hydrolysis & Base Hydrolysis	
22			Substitution Reaction in square planar complexes	
23			Trans effect	
24			Redox reaction	
25			Electron Transfer reaction	
26			Outer Sphere Reaction	
27			Marcus Hush Reaction	
CO:1 & 2				
LO: Understand the concept of reactivity ,reaction mechanism factors affecting the process.				
28	4	Cationic & Anionic Component	Component of Inorganic drugs useful for Systematic Effect	B.N.8,7
29			Component of Inorganic drugs useful for Systematic Effect	
30			Complexing Agent and Chelating Agent used in Therapy	
31			Complexing Agent and Chelating Agent used in Therapy	
32			Gases and Vapours: Oxygen Anesthetic Stimulus	
33			Gases and Vapours: Oxygen Respiratory Stimulus	
34			Dental Product	
35			Dentifrices	
36			Anti Caries Agents	
CO: 3				
LO: Acquire the knowledge of Inorganic drugs, complexing agents, Dentifrices				
38	5	Bioinorganic Chemistry	Metal Porphyrin	B.N.5,6,7
39			Bio Chemistry of Iron Heme	
40			Non Heme Protein	

41		Haemoglobin & Myoglobin	
42		Nitrogen Fixation in Bacterial Nitrogenase System	
43		Essential & Trace Element	
44		Essential & Trace Element	
45		Electron Transport System	
CO: 3 &4			
LO: Enlighten the importance and function of Bioinorganic molecules			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Advanced Inorganic Chemistry , F. A Cotton And Wilkinson, John Wiley
2. Inorganic Chemistry, J.E. Huheey, Harpes & Row
3. Chemistry of Elemnets , N.N. Greenwood and a Earnshow, Pergamon
4. Inorganic Chemistry, A.B. P. Lever Elsevier.
5. Comprehensive Coordination Chemistry F.A Cotton & G. Wilkinson
6. BioChemistry, Lehninger
7. Bioinorganic Chemistry, Chatwal Anand
8. Inorganic Chemistry, J.D. Lee

VII: Notes:

1. There will be individual assignment, presentations and group assignments
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Principles of Inorganic Pharmaceutical Chemistry-I			
M.Sc. Pharmaceutical Chemistry, Sem -I			
Goal : Students develop the ability understand theories , mechanism of Bonding , Metal Ligand coordination, stability of Complexes, Substitution reaction in various complexes Able to exemplifies various drugs useful for systematic effect. Mechanism & reaction Bioinorganic Chemistry			
Objective: Student gain understanding of Drug related inorganic component. Structure & bonding in Metal Ligand compound. Mechanism of Inorganic compound			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students

Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Bioinorganic chemistry & Reaction Mechanism, structure & Bonding of Coordination compound.	% Students having the basic concept of Bioinorganic chemistry & Reaction Mechanism, structure & Bonding of Coordination compound.	% Students having understanding about Bioinorganic chemistry & Reaction Mechanism.	% Students Need More Efforts to understand bonding and reaction mechanism

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Subject: Principles of Organic Pharmaceutical Chemistry-I Code (MPC): 102

Session: Jul-Dec

Class: M.Sc – Pharmaceutical Chemistry I Sem

I: Objective of course: The objective of organic pharmaceutical chemistry is to understand stereoisomerism in organic compounds and also understand the role of reagents in organic synthesis, reaction mechanism, orientation and stability/ reactivity of organic compounds

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes (CO):

- | | |
|-----|--|
| CO1 | Recall and understand structure, aromaticity, name and the types of isomerism of the organic compound |
| CO2 | Recall and understand the reaction mechanism, orientation and stability/ reactivity of organic compounds. |
| CO3 | To understand the various methods of preparation and acquire knowledge about reagents and chemical reactions of some aliphatic and alicyclic compounds |
| CO4 | Know about the synthesis, reaction mechanism, stereochemistry and application of various organic synthesis. |

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3						
CO 2	3	3			3			
CO 3	3	2		3	2			3
CO 4	3	2		3	3			

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Stereochemistry and conformational analysis	Concept of chirality, recognition of symmetry elements and chiral structure.	B.N. 1,2 ,3&11
2			R-S nomenclature, distereoisomerism in acyclic and cyclic systems.	
3			Optical activity without asymmetric carbon atom. Geometrical isomerism of olefin and oximes.	
4			E-Z Nomenclature, backmann Transformation, Analysis of simple cyclic and acyclic system.	
5			Crown ether complexes and cryptands	
6			Inclusion compound, catenanes and rotaxanes.	
CO: 1				
LO: Knowledge about stereochemistry, isomerism and conformational analysis of various organic compound.				
1	2	Mechanism of organic reaction	Types of mechanism, method of determining , reaction mechanism	B.N. 1,2 ,3&11
3			Aliphatic nucleophilic substitution SN1, SN2, ,neighbouring group mechanism.	
4			Type of reaction, thermodynamic and kinetic requirement , potential energy diagrams.	
5			Hydrolysis of ester, E1 and E2 mechanism, Hoffmann and Satyzeff Elimination.	
6			Structure, formation and example of participation in chemical reaction of reaction intermediate Carbanion ion.	
7.			Structure, formation and example of participation in chemical react Structure, formation and example of participation in chemical reaction of reaction intermediate Carbonium ion.	
8			Structure, formation and example of participation in chemical reaction of reaction intermediate Nitrenes and carbenes	
9.			Structure, formation and example of participation in chemical reaction of reaction intermediate Arynes and free radicals.	
CO: 4				

LO:The reactivity and stability of an organic molecule based on structure, including the formation of various reaction intermediates				
1	3	Aromaticity concept	Huckle rule and its limitation	B.N.1,2 , 3&11
2			Benezoid and non-benenoid compounds	
3			Concept of Cyclopentadienyl anion	
4			Concept of Tropylium cation	
5			Concept of Azulene nad annulenes	
6			Structur e and method of Heteroannulenes	
7			Concept of fullerenes	
8			Detail study of Non aromaticity	
9			Concept of anti aromaticity.	
CO: 2				
The study of various benzenoid and non- benzenoid compounds with their aromaticity concept				
1	4	Synthesis application , mechanism and stereochemistry of the Reaction Mechanism	Structure and application of pinacol and pinacolne rearrangements	B.N.1 , 2,10&11
2			Benzilic acid rearrangements	
3			Backmann Rearrangements	
4			Hoffmann-curtius reaction	
5			Lossen and Schmidt Rearrangement	
6			Clasien Reaarangement	
7			Application and uses of all the organic reaction .	
CO: 1,2				
LO: Learn about various name reaction like pinacol-pinacolone rearrangements, Beckmann rearrangements etc with their mechanism and stereochemistry..				
1	5	Synthesis application , mechanism and stereochemistry of the Reaction Mechanism	Synthesis of Birch reduction	
2			Synthesis and stereochemistry of Mannich reaction	
3			Meermein Pondorf Verley reduction	
4			Oppeneur oxidation	

5		Synthesis and stereochemistry of ozonolysis	
6		Synthesis and stereochemistry of Hydrogenation	
7		Diels-Alder reaction	
8		Synthesis of Wittig reaction	B.N.1, 2, & 8
9		Synthesis and application of Reformatski reaction	
		ASSIGNMENT ; Mechanism of various organic reaction	
CO: 4			
LO: Know about synthetic application, mechanism of the organic reaction like Mannich reaction, Pinner reaction, Wittig and Reformatski reaction and many more...			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Mechanism of organic reaction, Jagdamba Singh, Pragati Prakashan
2. Advance Organic chemistry, F.A Carey and R.J. Sunders, Plenum
3. Advance Organic chemistry reaction, Mechanism and structure, Jerry March, John Wiley
4. Structure and Mechanism in organic chemistry, C.K. Ingold, Cornell University
5. Organic chemistry, R.T. Morrison and R.N. Boyd, Prentice Hall
6. Modern organic reaction, H.O. House, Benjamin
7. Principle of organic Synthesis, R.O.C. Norman and J.M. Coxon, Blackie Academic & Professional.
8. Reaction mechanism in organic chemistry, S.M. Mukherji and S.P. Singh, Macmillan.
9. Stereochemistry of organic compounds, D. Nasipuri, New Age International
10. Stereochemistry of organic compounds, P.S. Kalsi, of organic compounds
11. A guide Book to mechanism in organic chemistry, Peter Sykes, Longman

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.

5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: PRINCIPLES OF PHARMACEUTICAL ORGANIC CHEMISTRY-I			
M.Sc. Pharmaceutical Chemistry I Sem			
Goal : Students develop the ability to prepare and analyze the structure ,properties, composition, reactions ,and preparation of carbon containing compounds and their various reaction mechanism and stereo chemical aspect.			
Objective: The objective of organic pharmaceutical chemistry is to understand stereoisomerism in organic compounds and also understand the role of reagents in organic synthesis ,reaction mechanism, orientation and stability/ reactivity of organic compounds.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students

Subject: (MPC-101) Principles of Physical Pharmacy-I Code:- MPC-103 Session: Jul-Dec
Class: M.Sc. Principles of Physical pharmacy- I Sem.

I: Objective of course: Students develop the ability to understand the concept , methods, Pharmacological Application of Physical Parameters to determine the physical properties of drugs viz. Thermodynamics, polymer and their molecular weight determination method, coarse dispersion. Able to understand prodrug and various routes of administration.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics.

III: Course Outcomes (CO):

- CO1 This course deals with the fundamental concepts of Thermodynamics and Kinetics.
- CO2 Helps in understanding the adsorption in Liquid and solid interfaces.
- CO3 Helps in understanding the different theories of rate reaction.
- CO4 Conceptual knowledge of diffusion and dissolution.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
		3	3	3	2			
		3	3	3

		3	3	3			3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Thermodynamics	First and second law of Thermodynamics	B.N.1,2,3,4
2			Free energy functions, and applications	
3			Thermodynamics of phase equilibria	
4			Thermal analysis of Crystals and liquid crystals	
5			Supramolecules, Inclusion molecules	
6			Thermodynamic treatment of stability constant	
9			DSC of crystals	
CO: 1				
LO: Fundamental knowledge of laws of Thermodynamics and thermochemistry.				
10	2	Kinetics	Rates and order of simple and complex reactions	B.N.,1,2,3,4
11			Influence of temperature and other factors on reaction rates , Theories of reates	
12			Effect of solvent, and Ion strength, Acid base catalysis, Enzyme catalysis	
13			Decomposition of medical agents	
14			Photodregadation, Kinetics in the solid state	
15			Solid dosage forms	
16			Accelerated stability analysis	
17				
CO: 2				
LO: Rate and order of different simple and complex reactions, Acid, base and enzyme catalysis.				
18	3	Diffusion and dissolution	Steady state diffusion, Procedures and apparatus	B.N.1,2,3,4
19			Dissolution and drug release	
20			Drugs in polymer matrices	
21			Thermodynamics of diffusion	
22			Ficks second law	

23			Diffusion and Ecology	
24			Principles in biological system	
25			Diffusion layer control	
CO:1 & 2				
LO: Concepts of diffusion and dissolution, drugs in polymer matrices.				
26	4	Interfacial Phenomenon	Liquid interfaces, Adsorption at liquid inetrfaces	B.N.8,7
27			Adsorption at solid interfaces	
28			Application of surface active agents	
29			Electric properties of Interfaces	
30			Colloides, Introduction and types	
31			Electric properties of collides	
32			Optical properties of collides	
33			Solublization,Addendum	
34			Thermodynamics of Micellization	
CO: 3				
LO: Basics of solid and liquid interfaces phenomenon, different types of colloidal systems				
35	5	Micromeritics	Particle size and size distribution	B.N.5,6,7
36			Methods for determining particle size	
37			Particle shape, surface area	
38			Methods for determining pore size	
39			Derived properties of powders	
40			Particle shape	
41			Surface area	
42-45			Assignment and presentation	
CO: 3 &4				
LO: Knowledge of methods of determining particle size and shape and surface area.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lesson Plan

Subject: Mathematics and Statistics for Pharmaceutical Chemistry, Code (MPC): 105 (a)

Session: Jul-Dec

Class: M.Sc. Pharmaceutical Chemistry I Sem

I: Objective of course:

The aim of this course is to develop learning and understanding skills in students for the basic elements of mathematics. So students will be able to apply its application in their core subjects.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional questions carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

CO1: The emphasis of the unit is on developing the skill of applying existing mathematical problems to chemical problems.

CO2: Basic mathematical methods for solving chemical theory and modeling problems.

CO3: Determine the uncertainty in derived quantities and manipulate them to convert between units.

CO4: To provide a broad foundation of mathematics that stresses scientific reasoning and analytical problem solving perspective.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1				3				
CO 2				3			3	
CO 3				3				
CO 4			3	3		3	2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Matrix algebra	Vectors, scalar and vector product	B.N. 1,2
2			Dot and cross product	
3			Triple and fourth product	
4			Problems on above topics	
5			Gradient , divergence curl	
6			Matrix algebra	
7			Definitions and operations on matrix	
8			transpose of matrix	
9			Adjoint of matrix	
10			Inverse and its problems.	
CO: 1				
LO1: Student will understand about the importance of elementary Vector algebra and Matrix Algebra in which vector addition, subtraction, vector product of three and four vectors, gradient divergence curl. As well as knowledge about Matrix addition, multiplication, inverse, adjoint and transpose. .				
11	2	Differential calculus	Functions, continuity and differentiability.	B.N. 1,2
12			Rules for differentiation	
13			Application of differentiation	
14			Problems on differentiation	
15			Maxima and minima	
16			Practice problems	
17			Bohr’s radius	
18			Maxwell’s distribution	
19			Practice problems	
CO: 2				
LO2: Students will get knowledge of elementary Differential calculus in which he learns about functions, continuity and differentiability, rules for differentiation. Application of differential calculus including Maxima and minima to calculate Bohr's radius and Maxwell's distribution.				
20	3	Integral calculus	Basic rules of integration	B.N. 1,2
21			Integration by parts	
22			Partial fraction and substitution	
23			Reduction formula	
24			Application of integral calculus	

25			Functions of several variables	
26			Partial differentiation	
27			Continuous transformation	
28			Practice problems.	
CO: 4				
LO3: Students will also learn Integral Calculus in which basic rules, integration by parts, partial fractions and substitution. Reduction formula, applications of integral calculus. Student should know about functions of several variables, partial differentiation.				
29	4	Elementary Statistics	Organising & Displaying Data variables	B.N. 1,2
30			Univariant and bivariant data	
31			Random variables	
32			Summarising data and variation	
33			Mean mode median	
34			Mean deviation, variance ,standard deviation	
35			Coefficient of variation	
36			And their solutions	
37			Practice problems	
CO: 4				
LO4: Students will also able to know about Variant data , Mean mode median, Mean deviation & standard deviation				
38	5	Permutation and Combination	Permutation and combination	B.N. 1,2
39			Definition & Rules of Probablity	
40			Binomial & Normal Distribution	
41			Regression & Correlation	
42			Simple Linear Regression	
43			Model Correlation Coefficient	
44			Examples on above topics.	
45			Miscellaneous examples	
CO: 3				
LO5: Develop the skills to apply basic of Permutation and combinations, probability and Regression & Corelation				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Books as Text and Reference:

1. The chemistry mathematics book, E. Steiner, oxford university.
2. Mathematics for chemistry, Bhupendra singh, pragati edition.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Mathematics for Chemist			
M.Sc. I Sem.			
Goal: To provide a broad foundation of mathematics that stresses scientific reasoning and analytical problem solving perspective			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
12-15Marks	8-12 Marks	04-08Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of subject thoroughly. Can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education.	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15

Lesson Plan

Subject: Biology for Pharmaceutical Chemistry**Code (MPC): 105 (b)****Session: Jul-Dec****Class: M.Sc. – Pharmaceutical Chemistry I Sem**

I: Objective of course: The objective of this course is to acquaint the students with the biological concept of Carbohydrates, Lipids, Amino acids and nucleic acid.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes (CO):

- CO1 Knowledge of multiple disciplines of biology and chemistry including cell biology, genetics and bio chemistry.
- CO2 To understand fundamental biochemical principles such as structure, function of molecular metabolic pathway and regulation of biological process.
- CO3 Awareness of major issues at the fore front of the discipline.
- CO4 Implement theoretical protocol and adapt them to plan and carry out simple investigation.

4			Overview and functions	
5			Overview of metabolic process, catabolism and Anabolism	
6			Introduction to ATP, the biological energy currency	
7			Origin of life and Theories.	
8			Introduction to biomolecules	
9				
10			presentation	
CO: 1,3				
LO: Understand the knowledge of cellular component and functions				
11	2	Carbohydrates	Conformation of Monosaccharide's	B.N.1&2
12			Structure and function of important derivatives of monosaccharide's	
13			Structure and function of Disaccharides	
14			Structure and function of Polysaccharides	
15			Cellulose and chitine	
16			Storage Polysaccharides, Starch and glycogen	
17			Structure and biological functions of glucosaminoglycanes of mucopolysaccharides	
18		Carbohydrates of glycoprotein's and glycolipids.		
19			Roll of sugars in biological recognition, blood group substances and ascorbic acids.	
CO: 4				
LO: Understand the different classes of Carbohydrate , mono, di and polysaccharides				
20	3	Lipids	Fatty acids, essential fatty acids	B.N.2
21			Structure and function of triacylglycerols	

22			Glycerophospholipids, Sphingolipids	B.N.2
23			Cholesterol, bile acids, prostaglandins	
24			Composition and functions of lipoproteins, Role in atherosclerosis, properties of lipids	
25			Aggregates Micelles, bilayers, liposomes, and their possible biological functions	
26			Biological membranes, fluid mosaic model of membrane structure	
27			Lipid metabolism, beta oxidation of Fatty acids	
CO: 1,3				
LO: Enlighten structure, biosynthesis, molecular modeling of proteins.				
28	4	Amino acids, Peptides and proteins	Chemical and enzymatic hydrolysis of proteins to peptides	B.N.1
29			Amino acids sequencing	
30			Secondary structure of Proteins	
31			Alpha helix, beta sheets and super secondary structures	
32			Triple helix structure of collagen	
33			Tertiary structure of protein folding and domain structures	
34			Quaternary structures	
35			Metabolic degradation and biosynthesis of amino acids, Sequence determination, Chemistry of Oxytocin and TRH Hormones	
CO: 2, 3				
LO: Study the structure of phospholipids and tri glycerides, Comparison between different types of Fats and the functions.				
36	5	Nucleic acids	Purines and pyrimidines, bases of nucleic acids	B.N. 1,2 &4
37			Structure of DNA and RNA	
38			Double helix model of DNA	
39			Forces responsible for holding DNA	
40			Chemical and Enzymatic hydrolysis of nucleic acid	
41			Chemical bases of Heredity	

42			Replication of DNA	
43			Transcription, Translation and Genetic code	
44			Chemical synthesis of mono and trinucleosides	
45			Presentation	
CO: 3				
LO: Describe the basic structure of nucleic acid and compare the structure of DNA and RNA.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Principle of biochemistry, A.L. Lehninger
2. Biochemistry, L. Stryer
3. Biochemistry, Voet and Voet
4. outlines of biochemistry, E.E. Conn and P.K. Stumpf

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Biology for Chemists			
M.Sc Chemistry I Sem			
Goal : Students will develop the ability to understand the structure, functions of Carbohydrate, Lipids, in different physiological process. The structure of RNA and DNA will be explained.			
Objective: The objective of this course is to acquaint the students with the biological concept of Carbohydrates, Lipids, Amino acids and nucleic acid.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

Structure of prokaryotic and eukaryotic cells, Introduction to biomolecules, Storage Polysaccharides, Starch and glycogen, Overview of metabolic process, catabolism and Anabolism	Composition and functions of lipoproteins, Roll in atherosclerosis, properties of lipids, Structure and function of Disaccharides,	Composition and functions of lipoproteins, Roll in atherosclerosis, properties of lipids.	Chemical bases of Heredity, Transcription, Translation and Genetic code, Metabolic degradation and biosynthesis of amino acids, Sequence determination, Chemistry of Oxytocin and TRH Hormones
--	--	---	--

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Lab Course -I

Session: Jul-Dec

Class: M.Sc. Pharmaceutical Chemistry- I Sem.

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge of organic and pharmaceutical preparation, Extraction and chromatography.

II: Examination: The semester practical examination carrying 50 marks will contain 36 marks for practical 6 marks for Diary and 8 marks for Viva.

III: Course Outcomes (CO):

- CO1 To study the organic reactions for synthesis of compounds.
- CO2 To study the preparation methods of pharmaceutical products
- CO3 To perform chromatographic separation
- CO4 To Extract components of pharmaceutical importance from different samples

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3					3		3
CO 2	2					3		
CO 3						2	3	
CO 4						3		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-3	I	Preparations	Organic preparations of anthraquinone, p-amino phenol, 2,4-Di- nitrophenyl hydrazine, phenyl urea, PICRIC ACID, p-Bromo Acetanilide, Dibenzalacetone	
4-6			Pharmaceutical Preparations of Aluminim Acateta Ear Drop, Ammoniated Camphor Ointment, Electrolyte Maintenance IV Fluid, Salycilic Acid compound dusting powder, sodium chloride and dextrose powder, Strong Iodine Solution, Zinc Sulpheta Eye/ Ear Drop Effervescent Granules	
CO 1, 2				
LO: To prepare different organic and pharmaceutical compounds				
7-8	II	Extraction	Isolation of Caffeine and Casein,	
9-10			Isolation of Glucose and Cystine	
CO 3				
LO: To isolate caffine, casein, glucose and cystine				
11	III	Chromatography	Seperation of ortha na dpara nitroankline by TLC	
12			Separation of Dyes by TLC	
CO 4				
LO: To perform chromatographic separation of ortho-papa nitroaniline and dyes by TLC				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.
5. Practical Pharmaceutical Chemistry I& II, A.H. Backett, CBS Publisher and Distributors.
6. Examination of water and wastewater, American Public Health Association (APHA), Washington, 1999.
7. Principles of Pharmaceutical Organic Chemistry, R.R. Nadenla, New Age International Publishers
8. Practical Pharmacognosy, Rakesh Gupta, Macmillon Publ.
9. Hand book of Organic analysis H. Clark, Aqward Arnold.

Lesson Plan

Subject: Lab Course -II

Session: Jul-Dec

Class: M.Sc. Pharmaceutical Chemistry- I Sem.

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge of Qualitative Analysis. Identification Drugs, Volumetric Assay.

II: Examination: The semester practical examination carrying 50 marks will contain 36 marks for practical 6 marks for Diary and 8 marks for Viva.

III: Course Outcomes (CO):

- | | |
|-----|---|
| CO1 | This Lab course will teach the different methods of limit tests of chloride, sulphate and different heavy metals. |
| CO2 | To gain the ability to identify the different drugs like- Paracetamol, Ibuprofen, Aspirin etc.. |
| CO3 | This lab course will teach the volumetric estimation of sodium bicarbonate benzoic acid and different other organic components. |
| CO4 | Student will learn the safe laboratory practices for performing different organic experiments. |

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3		3				3	2
CO 2	3		2				3	2
CO 3	3		3				3	2
CO 4	3				3		3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-2	I	Qualitative Analysis	Limit Test of Chloride, Sulphate and Lead	
3-4			Limit Test of Arsenic and heavy Metals	
CO 1, 4				
LO: Understanding the preparation, qualitative and quantitative estimation of Inorganic and organic complexes.				
5-6	II	Identification of Drugs	Identification of Drugs Paracetamol, Ibuprofen, Metranidazole, Pyrazinamide	
7-8			Identification of Drugs Aspirin, Chloroquine, Phosphate	
CO 2, 4				
LO: To understand the purity of different drugs, how to determine their properties.				
9-10	III	Volumetric Assay	Volumetric Assay Sodium bicarbonate, Citric acid	
11-12			Volumetric Assay benzoic acid, borax, zinc sulphate	
CO 3,4				
LO : Different safety practices of the laboratory				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Subject: Principles of Inorganic Pharmaceutical Chemistry-II Code : MPC-201 Session: Jan- Jun
Class: M.Sc. Pharmaceutical Chemistry- II Sem.

I: Objective of course: Students develop the ability understand theories, mechanism of inorganic drugs useful for systematic effect. Mechanism & reaction Bioinorganic Chemistry.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics

III: Course Outcomes (CO):

- CO1 This course deals with the synthesis, properties and uses of Inorganic pharmaceutical substances.
- CO2 Helps in understanding the role of calcium and iron as pharmaceutical agents in body.
- CO3 To gain knowledge of fundamental concepts of absorbents and adsorbents.
- CO4 Helps in understanding the methods of removing impurity and different test of impurity.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1					2		3	3
CO 2					3		3	3
CO 3			2		3		3	3
CO 4	3		3		3		3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Impurities pharmaceutical substances	Sources of impurities, in pharma chemicals	B.N.1,2,3,4
2			Effect of impurities	
3			Permissible impurities in pharma substances	
4			Methods used to purify inorganic substanes	
5			Tests to purity	
6			Limit test of Chloride, Sulphate, Arsenic, Iron	
8			Limit test of Lead	
CO: 1& 3				
LO:Fundamental knowledge of sources of impurity, their effects and different test to remove impurities.				
9	2	Synthesis, Properties, and uses of inorganic compounds	Topical Drugs	B.N.1,2,3,4
10			Dusting Powders	
11			Antacids,	
12			Digestants	
13			Emetics	
14			Lubricants	
15			Expectorants	
16			Antitussives	
17			Adsorbents	
CO: 2 &3				
LO:Helps in understanding the Synthesis, properties of topical drugs, gastro-intestinal drugs and their uses.				
18	3	Radiopharmaceuti	Basic properties, Production,	B.N.5

19		cals	Stability, used in pharmacy	
20			Medicinal preparations of diagnostics	
21			Quality control	
22			Clinical applications of Radio isotopes	
23			Therapeutic agents	
24			Therapeutic agents applications of Radio isotopes	
25			Radio isotopes	
26			Quality control	
27			Medical preparations	

CO:2 & 3**LO:**Students will learn the basic properties of radiopharmaceuticals, medicinal applications of radio isotopes.

28	4	Calcium and Iron compounds as pharma agents	Role of Calcium in Body,	B.N.6,7
29			Preparation, properties and uses of calcium acetate	
30			Uses of calcium carbonate, calcium chloride, calcium gluconate, calcium hydroxideCalcium hydroxide	
31			Importance of Iron in Human in Human body	
32			Deficiency disorder of Iron	
33			Preparation, properties, and uses of ferric ammonium citrate	
34			Ferrous gluconate, Ferrous succinate	
35			Deficiency Disorder of Calcium	
36			Class Assignment	

CO:3 & 4**LO:**Helps in understanding the role of calcium, their deficiency disorder and different functions of iron in human body.

37	5	Pharmaceutical aids	Absorbents and adsorbents	B.N.5,6
38			Antioxidants and preservatives	
39			Excipients, Suspending Agents	
40			Filter Aids	
41			Colourants	
42			Tonicity adjusting agents	

43		Colouring and sweetening adjusting agents	
44		Ointment Suppository Bases	
45		Diluents, Binders, Disintegrating agents, and Lubricants	
CO:3 &4			
LO: Difference between absorbents and adsorbents, role of antioxidants and preservatives.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Advanced Inorganic Chemistry , F. A Cotton And Wilkinson, John Wiley
2. Inorganic Chemistry, J.E. Huheey, Harpes& Row

Lesson Plan

Subject: Principle of Organic pharmaceutical Chemistry

Code : MPC 202

Session: Jan- Jun

Class: M.Sc –Pharmaceutical Chemistry II Sem

I: Objective of course: The objective of organic pharmaceutical chemistry is to understand synthesis of heterocyclic compounds and also understand the drug metabolism in the body and study of various physio-chemical factor affecting the biological action in the body and also the study of drug receptor and metabolism.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, and utility of concern topic.

III: Course Outcomes (CO):

- CO1 Understand some named reactions and synthetic procedures of drugs containing five, six member and fused heterocyclic
- CO2 Understand basic aspects of organic chemistry, mechanism, stereochemistry and synthetic applications of various named reactions
- CO3 To understand the various physio-chemical properties of drugs on the bases of chemical and therapeutical analysis and drug metabolism.
- CO4 Know and recall the fundamental principle of organic chemistry that includes chemical bonding, nomenclature, stereochemistry, structural isomerism and various reaction mechanisms.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1					3	3	3	3
CO 2					3	3	2	3
CO 3			3			2	3	3
CO 4					3	3	2	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	a) Classification of the drugs :- b) Drug receptors	Classification of the drugs on the basis of chemical structure.	B.N. 1,2 ,3&10
2			Classification of the drugs on the basis of therapeutic action.	
3			Classifications of drug receptor.	
4			Structure and nature of drug receptor.	
5			Study of various receptor theories.	
6			Mechanism of various drug receptor	
7			Mechanism and application of drug receptor.	
CO: 3				
LO:Knowledge about the classification and properties of drug and drug receptors.				
1	2	a)Physico - Chemical properties in relation to Biological Action: b)Drug metabolism	Factor affecting Drug absorption and distribution	B.N. 1,2 ,3&10
3			Factor affecting drug metabolism and elimination.	
4			Study of properties like ionization and partition coefficients.	
5			Study of properties like Acid base properties and hydrogen bonding.	
6			To study the stereo chemical aspect of the drug absorption.	
7.			Metabolic changes of Drugs in the body.	
8			Factor affecting metabolism	
9.			Pathway of metabolism.	
CO: 2,3				
LOTo study the physio-chemical properties and the metabolism of various drug inside the body.				
1	3	Reagents in Organic synthesis	Preparation and uses of complex metal hydride	B.N.1,2 &11
2			Lithium aluminum hydride, gilmen’s reagents,	
3			Lithium disopropylamide, and osmium tetra oxide..	
4			Dicyclohexylcarbodiisoamide, 1-3 lithiane	
5			Phase transfer catalysis, Wilkinson’s catalyst	

6		Raney nickel and lead tetra acetate.
7		Periodic Acid and Diazomethane
8		Ozone and their application

CO: 2

LO : Learn about various name reaction like Wilkinson's catalyst, phase transfer catalyst, Gilman's reaction, Raney Nickel etc with their synthesis and mechanism.

1	4	Heterocyclic Compounds	Synthesis and chemical properties of heterocyclic compound	B.N. 5 &7
2			Chemical properties of heterocyclic compound	
3			Application and biological significance of heterocyclic compound	
4			Study of mono heteroatom system: indole and quinoline	
5			Study of mono heteroatom system: Isoquinoline	
6			Study of multi heteroatom system: Diazole and Pyrazole	
7			Study of mono heteroatom system: Imidazole and oxazole	

CO: 1

LO: Recognize the synthesis, reactivity, chemical properties and application of heterocyclic compounds.

1	5	Addition to carbon Hetero Multiple Bonds	Mechanism of metal hydride reduction of saturate and unsaturated carbonyl compound.	B.N.1 , 2,&8
2			Mechanism of metal hydride reduction of Acid ester, nitrile	
3			Organozinc and organolithium reagents to carbonyl and unsaturated carbonyl compounds	
4			addition to Grignard reagents	
5			Mechanism of condensation Reaction involving Enolate like Mannich Reaction	
6			Mechanism of condensation Reaction involving Enolate like Benzoin and Perkin reaction	
7			Mechanism of condensation Reaction involving Enolate like Stobbes reaction	
8			Mechanism of condensation Reaction involving Enolate like Aldol and Knoevenagel reaction	
9			Claisen reaction and mechanism	

10			Hydrolysis of amides		Hyc
11			Hydrolysis of ester		
12			Ammonolysis of ester		
13			Study Application and stereochemical aspect		
			ASSIGNMENT ; Mechanism of nucleophilic substitution reaction		
CO: 4					
LO: Detail analysis of addition to carbon hetero multiple bond in the various name reaction aldol, claisen, knovenagel ,perkin, stobbes reaction also addition to Grignard reaction.					

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

Lesson Plan

Subject: Principles of Physical Pharmacy-II Code: MPC-203
Class: M.Sc. Pharmaceutical Chemistry- II Sem.

Session: Jan- Jun

I: Objective of course: Students develop the ability to understand the concept, methods, Pharmacological Application of Physical Parameters to determine the physical properties of drugs viz. Thermodynamics, polymer and their molecular weight determination method, Rheology, coarse dispersion. Able to understand prodrug and various routes of administration

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics

III: Course Outcomes (CO):

- CO1 Illustrate flow properties and coarse dispersion properties of drugs.
- CO2 Acquire knowledge of various drug carrier and route of drug administration.
- CO3 Able to determine the basic component of drug administration physical properties of drug..
- CO4 Employ various thermodynamic factors and its relevancy with polymer solution.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3		3			
CO 2					2			
CO 3					3		3	
CO 4			3		3		3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Rheology	Introduction	B.N.1,2,3,4
2			Newtonian System	
3			Non-Newtonian System	
4			Thixotropy	
5			Determination of Rheological properties	
6			Viscoelasticity	
7			Pscychorheology	
8			Application of Rheology in pharmacy	
CO: 1 & 3				
LO: Describe the matter properties & viscosity with Newtonian flow systems and non-Newtonian flow systems				
9	2	Coarse Dispersion	Suspension & their interfacial properties	B.N.1,2,3,4
10			Theories of Emulsification ,Formulation of suspension emulsion	
11			Physical stability & Preservation of Emulsions	
12			Rheologic property of Emulsions Microemulsions	
13			Rheologic property of Emulsions Microemulsions	
14			Semisolids	
15			Drugs Kinetics in Coarse dispersion medium	
16			Drugs Kinetics in Coarse dispersion medium	
17			Drug diffusion in coarse diffusion system	
CO: 2 &3				
LO: Differentiate and analyze disperse system in different pharmaceutical preparation and their stability				
18	3	Drug Product	Pro drug liposomes	B.N.5

19		Design	Monolithic & Reservoir devices	
20			Microcapsules	
21			Nano capsules & Nano particles	
22			Routes of administration	
23			Ocular & Nasal Administration	
24			Buccal & Pulmonary Administration	
26			Gastrointestinal Administration	
27			Trans dermal Administration	

CO:2 & 3

LO: Apply the core theoretical knowledge of pro drug and drug carrier and various routes of administration.

28	4	Polymer Science	Pharmaceutical Application of polymer	B.N.7,8
29			Pharmaceutical Application of polymer	
30			Molecular weight determination- concept	
31			Molecular weight determination- method	
32			Viscosity method	
33			Conformation of Dissolved linear Macromolecules	
34			Thickening agent	
35			Polymer solution preparation	
36			Polymer Solution-Solvent	

CO:3 & 4

LO: Explain concept of Molecular weight determination method of polymers and application of polymer solution in Pharmaceutical sector.

37	5	Thermodynamics of Polymer Solution	Thermodynamics of Polymer Solution	B.N.6,7,8
38			Phase separation	
39			Gel formation	
40			Coacervation and Microencapsulation	
41			Polymer in solid state	
42			Mechanical properties	
43			Cohesive force & Crystallinity	

44		Tacticity & Morphology	
45		Thermodynamics of Fusion	
CO: 3 &4			
LO: Explain the theoretical aspects of thermodynamics, properties and its application in pharmaceutical industries			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Physical Chemistry , Gurdeep Raj
2. Physical Chemistry, P.W. Atkins
3. Physical Chemistry G. M. Barrow, Mc Grow Publication
4. Physical Chemistry Gurtu & Gurtu
5. Pharmaceutical Physical Chemistry Gurdeep Chatwal
6. Thermodynamics , Glasston
7. Polymers, Bilimeyer
8. Polymer, S. Gwarikar

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Principle of Physical PharmacyII			
M.Sc Pharma Chem Sem-II			
Goal : Students develop the ability to understand the concept , methods, Pharmacological Application of Physical Parameters to determine the physical properties of drugs viz. Thermodynamics, polymer and their molecular weight determination method, Rheology, coarse dispersion. Able to under stand prodrug and various routes of administration			
Objective: Students gain understanding of the physical parameter of drugs and their application.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

% Students having the basic concept of Rheology, and Coarse dispersion and understanding of thermodynamics of polymer solution.	% Students having the basic concept of Rheology, and Coarse dispersion and understanding of thermodynamics of polymer solution	% Students having understanding about various routes of drug administration.	% Students Need More Efforts for Solution and Basic Concept of Thermodynamics, pro drug & flow of solution

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

Subject: Pharmaceutical analysis-II Code : MPC-204

Session: Jan- Jun

Class: M.Sc. Pharmaceutical Chemistry- II Sem.

Objective of course: Description of the theory and combine concepts of techniques and applications of Chromatographic Method, Solvent Extraction, Titrimetric and Gravimetry, Nephelometry and Turbidimetry.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics

III: Course Outcomes (CO):

- CO1 To understand different types of Chromatographic technique
- CO2 To study Solvent Extraction methods
- CO3 To understand the titrimetry and gravimetry methods of analysis
- CO4 To study Nephelometry and Turbidimetry method of analysis

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1		3			3		3
CO 2	3		3			3		3
CO 3	2		3		3	3		
CO 4	3	3	3			3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Chromatographic method	Principles ,Techniques of TLC	B.N 9
2				
3			Application of thin layer chromatography , column chromatography	
4				
5			Column chromatography	
6			Gas liquid chromatography in pharmaceutical analysis	
CO: 1				
LO: To study Thin layer Chromatography, Column Chromatography and Gas Liquid Chromatography				

1	2	Chromatographic method	Introduction to Chromatographic technique	B.N 1
2			High performance liquid chromatography	
3			Types of Detectors , Sources	
4			Application of HPLC	
5			Ion exchange chromatography	
6			Size exclusion or gel chromatography	
CO: 1				
LO: To study HPLC, Ion Exchange chromatography and Exclusion Chromatography				

1	3	Solvent Extraction	Solvent extraction ,principle of solid liquid extraction	B.N. 10
2			principle of liquid liquid extraction	
3			Distribution law, factor favouring solvent extraction	
4			Sequence of extraction process	
5			Extraction techniques , batch extraction ,stripping extraction ,continuous extraction	
6			Soxlet extraction importance of liquid liquid extraction	
CO: 2				
LO:. To understand principle, types and application of Solvent Extraction				

1	4	Titrimetry & Gravimetry	Determination of dissolved oxygen (DO)	B.N.1
2			Biological oxygen demand	
3			Chemical oxygen demand	
4			Arsenic ,cadmium ,lead by titremetric and gravimetric methods ,	
5			Calcium and magnesium mercury by tritemetric and gravimetric methods	
CO: 3				
LO: To study titrimetry method of analysis for COD, DO and BOD and gravimetric method of analysis for As, Cd, Pb, Hg, Ca and Mg				

1	5	Naphelometry and turbidimetry	Types of Naphelometry and turbidimetry	B.N.2
2			Instrumentation	
3			Single and double beam ,Factors affecting measurements	
4			Applications of Nephelometry and turbidimetry	
CO: 4				
LO: To understand principle, instrumentation and applications of Naphelometry and Turbidimetry method of analysis				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Chemical application of group theory, F.A. Cotton and Wilkinson , John Wiley
2. C.K Banwell
3. Modern spectroscopy J.M. Hollas , John viley
4. Applied electron spectroscopy for chemical analysis D.H. Windawi
5. NMR,NQR,EPR and Mossbauer spectroscopy in inorganic chemistry.R.V Parrish,Ellies Harwood
6. Physical method in chemistry R.S. Drago Saunders College

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Pharmaceutical Analysis			
M.Sc. Pharmaceutical Chemistry II Sem			
<u>GOAL</u> :-Broad and detailed overview of state of various analytical techniques.			
Objectives :-Description of the theory and combine concepts of techniques and applications of Chromatographic Method, Solvent Extraction, Titrimetric and Gravimetry, Namphlometry and Turbidimetry.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Chromatographic Method, Solvent Extraction, Titrimetric and Gravimetry, Namphlometry and Turbidimetry.	% Students having the basic concept of Chromatographic Method, Solvent Extraction.	% Students having understanding about Application and technique of Chromatography	% Students Need More Efforts to understand the Basic Concept of Chromatography & quantitative estimation.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Computer for Pharmaceutical Chemistry**Code (MPC): 205****Session: Jan-Jun****Class: M.Sc. Pharmaceutical Chemistry II Sem**

I: Objective of course: The objective of this course includes the knowledge of basic computing concept , security measure and ability to use popular soft ware application to produce documents, spread sheets , presentation and also to manage file & folder and retrieving data.

II: Examination: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic

III: Course Outcomes (CO): `

- CO1 Gain knowledge to design & developed principles in the construction of software system of varying complexity.
- CO2 Knowledge to use current techniques, skills & tools necessary for computing practicals
- CO3 Use of Microsoft office program to create personal academic document according to industry & professional standard.
- CO4 To knowledge of computer science to the identification, analysis & solution of chemistry problems

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1								
CO 2				3				
CO 3							3	
CO 4							3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction to Computer & Computing	Basic Structure & functioning of computer with a PC as Example	B.No. 1,2,3
2			Memory Input Output device	
3			Secondary storage Computer language	
			Operating System -DOS	
4			Introduction to UNIX &Windows	
5			Principle of Programming Algorithm	
6			Principle of Flow Chart	
CO: 1				
LO: To learn basic principle of using windows operating system				
7	2	Computer Programming FORT AN/C/BAS IC	Introduction to Fortan	B.No.1,2,3
8			Element of Computer Language	
9			Constants & Variable	
10			Operation & Symbol Expression	
11			Arithmetic Assignment statement, Input & Output	
12			Termination & Branching Statement –IF or GO	
13			Double precision & Subscripted variable	
14			Dimension variable	
15			DO statement FUNCTION AND SUB ROUTINE	
16			COMMON and DATA Statement	
CO: 1,2				
LO: Apply fundamental programming concepts & evaluation of various operations in C..				
17	3	Programming in Pharmaceutical Chemistry	Developing of small computer code using C Language	B.No.2,3
18			Formula in Chemistry – Vander waal Equation	
19			Formula in Chemistry-Chemical Kinetics, Determination of Rate Constant	
20			Formula in Chemistry- Radio Active Decay(Half & Average rate	
21			Determination of Molarity Normality of Solution	
22			Evaluation of Electro negativity of atom	
23			Experimental determation of moleculer weight & Lattice Energy	
24			Calculate percentage of Element of Organic	

			Compound using data		
25			Representation of molecule in term of Elementary structural features-Bond Length & Bond Angle		
CO: 1,2					
LO: To developed small computer program based on physical chemistry with the help of FORTAN language					
26	4	Use of Computer programmes	Operation of PC data processing	B.No.1,2,3	
27			Running of standard programme & package- MS Word		
28			Running of standard programme & package- MS Excel		
29			Chart formation & calculation		
30			Plotting X Y plot & calculation		
31			Simpson’s Numerical Integration method		
32			Computer programming for Chemistry Lab Experiments		
33			Computer programming for Chemistry Lab Experiments		
34			Computer programming for Chemistry Lab Experiments		
CO: 1,3					
LO: Gain knowledge of computer program with special emphasis on MS word & MS Excel					
35	5	Internet	Application of Internet for Chemistry with search engine	B.N.1,3	
36			PDF- Concept & Application		
37			PDF- Concept & Application		
38			JPG- Concept & Application		
39			RTF- Concept & Application		
40			Bitmap- Concept & Application		
41			Web camera		
42			Scanning		
43			OMR		
44			Practicals on programming Language		
45			Practicals on programming Language		

CO: 4**LO:** Develop skills of internet protocol and enlightening various types of files.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Fundamental of Computers –V.Raja Raman
2. Computer in Chemistry –K.V. Raman
3. Computer programming in FORTRAN IV-V RajaRaman

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment

Subject: Computer for Pharmaceutical Chemistry

M.Sc Pharmaceutical Chemistry II Sem

Goal : Students develop the ability to understand ,fundamentals , theories, application of basic computer principle, Operating system, different languages, maintaining documentations, files & folder and have practical application.

Objective: The objective of this course includes the knowledge of basic computing concept , security measure and ability to use popular soft ware application to produce documents, spread sheets , presentation and also to manage file & folder and retrieving data

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
____ Students	____ Students	____ Students	____ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept computing concept, language Internet thoroughly	% Students having the basic concept of computational theoretical concept require to understand and to know its practical utility.	% Students having understanding Languages properly and require to apply	% Students Need More Efforts for Computer Programming & Internet

IX: Scheme of internal marks

Class Participation				Internal Assessment		Total 100	Final Internal Marks Out of 15

Lesson Plan

Subject: Lab Course -I
Class: M.Sc. Pharmaceutical Chemistry- II Sem.

Session: January-June

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge of volumetric assay, gravimetric assay and chromatography.

II: Examination: The semester practical examination carrying 50 marks will contain 36 marks for practical 6 marks for Diary and 8 marks for Viva.

III: Course Outcomes (CO):

- CO1 To study the assay of different components
- CO2 To understand the chromatographic separations of components
- CO3 To study volumetric and gravimetric study of components.
- CO4 Estimate the purity of different component.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3			3	3	
CO 2			2			3	2	
CO 3			2			3	2	
CO 4			2			3	3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-4	I	Volumetric assay	Volumetric assay of Ampicilline, aspirin, aluminium hydroxide	
5-8			Volumetric assay of Magnesium Sulphate, Lithium Carbonate	
CO 1 , 3, 4				
LO : To understand and perform Volumetric assay of components				
To study and perform Gravimetric assay of Sodium Sulphate	II	Gravimetric assay	Gravimetric assay of Sodium Sulphate by BaSO ₄ precipitation method	
CO 1 , 3, 4				
LO To study and perform Gravimetric assay of Sodium Sulphate				
10	III	Chromatography	Separation of Paracetamol and Ibuprofen By TLC	
11			Separation of Vitamins by TLC	
12			Separation of A-amino acid by Paper Chromatography	
CO 2, 4				
LO To study and perform chromatographic separations				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

CO 4			2		2		3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	I	Quantitative Analysis	Conductometric analysis of chlorides in drugs	
2			Determination of COD of Water	
3-4			Estimation of Phenols using bromated solution/ or Acetylation method	
CO 1, 3, 4				
LO: To study quantitative analysis of different pharmaceutical component				
5	II	Physical Pharmacy	Determination of heat of Ionization of Acetic Acid	
6			Investigate the auto catalytic reaction between KMnO ₄ and Oxalic Acid	
7			Investigate the adsorption of oxalic acid by activated charcoal and test validity of Freundlich and Lanmuir Isotherms	
8			To construct phase diagram for the three component system	
CO 1, 3, 4				
LO: To study different physical parameters of pharmaceutical importance.				
9	III	Physical Parameters of Tablets	Study of Hardness of tablet	
10			Study of Friability of tablet	
11			Disintegration of Coated and Uncoated tablets and Capsule	
12			Dissolution of Coated and Uncoated tablets and Capsule	
CO 2, 3, 4				
LO To study different physical parameters of tablets.

Subject: Medicinal Chemistry, Code : MPC-301 Session: July-December

Class: M.Sc. Pharma. Chemistry, Sem. III

I: Objective of course:

This course is designed to develop and understanding of synthesis and therapeutics application of compounds under non steroidal anti-inflammatory drugs, Local and General Anesthetics, antihypertensive drugs, diuretics anti-histaminics anti malarials' anti tubercular agents

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes:

- | | |
|--------|---|
| CO-I | To understand synthesis and therapeutic application of drug compounds |
| CO-II | To study structure, SAR and side effects of drug compounds |
| CO-III | Understand the different class and category of drugs. |
| CO-IV | Study of mode of action of different drug compounds. |

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2			3	3	3	3	
CO 2	3		3	3	3	3		
CO 3	1					3	3	
CO 4	1					3		

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1				
1	1	Non Steroidal Anti-Inflammatory drugs (NSAIDs)	Classification of NSAIDs	B.No. 1
2			SAR of Heterocyclic Analogus, Aryl Propionic acid analogues	
3			SAR of Salicylic Acid Analogues.	
4			Synthesis, Mode of Action, Therapeutic uses and Adeverse effects of Indomethacin, Tolemetin Sodium, Ibuprofen, Naproxen, Aspirin, Paracetamol and phenyl butazone	
5				
6				
7				
8				
9				
10				
CO 1, 2, 3, 4				
LO : To understand classification, SAR, synthesis mode of action, therapeutic use and adverse effects of Non Steroidal Anti-inflammatory drugs (NSAIDs)				
11	2	a. Local Anesthetics b. General Anesthetics	Introduction and Classification of Local Anesthetics	B.No. 2,3
12			SAR and Mechanism of Local Anesthetics	
13			Theories of Local Anestheiscs	
14			Synthesis, Mode of Action and Adverse effects of Benzocaine, Procaine, Lignocaine, Dibucaine amd Dipерidon	
15			Introduction and Classification of General Anesthetics	
16			Theories of General Anestheiscs	
17			Synthesis, Uses and Adverse effects of cyclopropane, halothane, nitrous oxide, chloroform, thiopental sodium, tribromoethanol	
18				
19				
CO 1, 2, 3, 4				
LO: To study classification, SAR, synthesis mode of action, therapeutic use and adverse effects of local and general anesthetics				
20	3	a. Antihypertensive drugs b. Diuretics	Introduction to hypertension, types and causes	B.No. 3,4
21			Classification of antihypertensives.	
22			Synthesis, therapeutic uses, adverse effects of Metraminol, Naphazoline, Hexamethonium bromide, methyl dopa, rauwolfia	
23				
24				
25			Classification of diuretics	
26			SAR of Mercurials, Thiazides, Xanthines,	

27			Mechanism of action of Mercurials, Carbonic anhydrase inhibitors. Thiazides and Loop diuretics	
28			Synthesis mode of action, therapeutic uses and adverse effects of Mersaly, Ethacrynic acid, Furosemide, Spiromolactone, Chlorthiazide, Acetazolamide	
29				
CO 1, 2, 3, 4				
LO : To understand classification, SAR, synthesis mode of action, therapeutic use and adverse effects of antihypertensive drugs and diuretics				
30			Introduction and classification of anti histamines	
31			SAR of Amino Alkylethers and ethylenediamines. Mode of Action of H ₁ and H ₂ Receptor Antagonis	
32			Syntheis Therepeutic uses and adeverse effects of Dihenylhdramine HCl, Tripeleennamine HCL, Promethanzine HCl, Chlorcuclizine HCl and Zntazoline HCl	
33				
34	4	a. Anti-Histaminics b. Antimalarials c. Anti Tubercular Agents	Etiology of Malarian dan classification of anti-malarials.	B.No 1,2
35			SAR of 4-aminoquinolines and 8-aminoquinolines	
36			Synthesis, MOA, Therapeutic use and adverse effects of chloraquine, amodiaquinine HCl, Primaquine phosphate, Proguanil HCl, Trimethoprim.	
37			Introduction to anti tubercular agents Ethambutal, isonicotinic acid, rifgmpacin, streptomycin	
CO 1, 2, 3, 4				
LO: To study classification, SAR, synthesis mode of action, therapeutic use and adverse effects of anti-histaminics, antimalarials, anti tubercular agents.				
38-40			Synthesis Uses and side effects of Sulfanilamide, Sulfapyridine, sulfadiazine, SAR of Sulphanilamide	
41	5	a. Antimetabolites b. Antineoplastic Agents	Introduction to cancer and antineoplastic drugs	B.No. 5,6
42			Role of alkylation agents in treatment of cancer	
43-45			Uses Properties and Side effects of Mustard drugs, Mechloroethamic, Cyslophosphamide. Melphalon Uracil	
CO1, 2, 3, 4				
LO: To understand classification, SAR, synthesis mode of action, therapeutic use and adverse				

effects of antimetabolites and antineoplastic agents.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: Chemistry of Natural Products Code : MPC-302 Session: July-December

Class: M.Sc. Pharma. Chemistry, Sem. III

I: Objective of course:

This course is designed to develop an basic understanding of chemistry of natural products and their importance in Pharmaceutical Chemistry.

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes:

CO-I	Understand the classification, nomenclature and occurrence of different Natural Products
CO-II	Study the structure and isolation of natural products.
CO-III	To understand the physiological action of natural products.
CO-IV	Study of biosynthesis of natural products.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1					2	3	3	
CO 2					3	3	3	
CO 3					2	3		
CO 4					3	3	3	

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1				
1	1	Terpenoids and Carotenoids	Classification, nomenclature and occurrence of Terpenoids	B.No.1, 2
2			Isolation and general methods of structure determination of Terpenoids	
3			Isoprene rule with examples	
4-10			Structure determination, stereochemistry, biosynthesis and synthesis of Citral, Geraniol, α -Terpeneol, Menthol, Farnesol, Zingiberene, Santonin, Phytol, Abietic Acid, and β -Carotene	
CO 1, 2, 3 ,4				
LO : To understand classification, nomenclature, occurrence, isolation, structure and biosynthesis of Terepenoids and Carotenoids.				
11	2	Alkaloids	Definition, nomenclature and physiological action of alkaloids	B.No.1, 3
12			Occurrence, isolation, general methods of structure elucidation of alkaloids.	
13			Degradation of alkaloids	
14			Classification of alkaloids based on nitrogen heterocyclic ring	
15			Role of alkaloids in plants	
16-19			Structure, stereochemistry , synthesis and biosynthesis of the Ephedrine, (+)-Nicotine, Atropine, Quinine and Morphine	
CO 1, 2, 3 ,4				
LO: To understand classification, nomenclature, physiological action, occurrence, isolation, structure and biosynthesis of Alkaloids.				
20	3	Steroids	Occurrence, nomenclature and basic skeleton of Steroids	B.No.1, 4
21			Diel's hydrocarbon and stereochemistry of Steroids	
22-28			Isolation, structure determination and synthesis of cholesterol, bile acids, androsterone, testosterone, Estrone, Progesterone, Aldosterone,	
29			Biosynthesis of Steroids	
CO 1, 2, 3 ,4				
LO : To study occurrence, nomenclature, isolation, structure and biosynthesis of Steroids				
30-31			Occurrence Nomenclature and general methods of structure determination of Plant Pigments	

32-34	4	Plant Pigments	Isolation and synthesis of Apigenin, Luteolin, Quercetin, Myrcetin, Quercetin 3 glucoside, Vitexin, Diadzein, Aureusin, Cyanidin 7 arabinoside, Cyanidin, Hirsutidin,	
35-36			Biosynthesis of flavonoids; Acetate pathway and Shikimic acid pathway	
37			Structure and synthesis of Haemoglobin and Chlorophyll	
CO 1, 2, 3 ,4				
LO: To study occurrence, nomenclature, isolation, structure and biosynthesis of plant pigments and prophyryns				
38- 39	5	a. Prostaglandins b. Pyrethroids and Rotenones	Occurrence, nomenclature and classification of Prostaglandins	B.No.1, 3, 4
40			Biogenesis and physiological effects of Prostaglandins	
41- 42			Synthesis of PGE2 and PGF 2a	
43-45			Synthesis and reactions of Pyrethroids and Rotenones.	
CO1, 2, 3 ,4				
LO: To understand classification, nomenclature, physiological action, occurrence, isolation, structure and biosynthesis of prostaglandins and pyrethroids and Rotenones.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

2. Pharmacology and Pharmacotherapeutics, R.S. Satoskar N. Rege, S.D. Bhandarkar, Popular Prakashan
3. Elementary Pharmacology & Toxicology, R. D. Budhiraja, Popular Prakashan
4. Essentials of Medical Pharmacology, K.D. Tripathi, Jaypee Brothers Medical Publishers (P) Ltd

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Chemistry of Natural Products			
M.Sc. Pharmaceutical Chemistry III Sem			
Goal: Develop basic understanding of natural products like terpenoids and carotenoids, alkaloids, steroids, plant pigments prophyrins prostaglandins and pyrethroids and rotenones			
Objective of course: This course is designed to develop an basic understanding of chemistry of natural products and their importance in Pharmaceutical Chemistry.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the knowledge of Terpenoids and carotenoids, alkaloids, steroids, plant pigments prostaglandind and pyrethroids and rotenones	% Students having the knowledge of Terpenoids and carotenoids, alkaloids, steroids, plant pigments prostaglandind and	% Students having the knowledge of Terpenoids and carotenoids, alkaloids, steroids,	% Students having the knowledge of Terpenoids and carotenoids.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Subject: Toxicology**Code : MPC-303****Session: July-December****Class: M.Sc. Pharma. Chemistry, Sem. III****I: Objective of course:**

The course deals with the basic knowledge of Toxicology, drug dependence, Poisoning .

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes:

- CO-I Understand the basic concept of toxicology and poisoning
 CO-II Study the classification and mode of action of different types of drugs and poison
 CO-III Understand the treatment for different types of poisoning
 CO-IV To study the interaction among different drugs and physiological state

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1						3		
CO 2			2			3		
CO 3			3			3		
CO 4			2			3		

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1				
1	1	Introduction to toxicology	Definition and types of toxicity	
2			Basic Principles of Toxicology	
3			Carcinogenicity	
4			Mutagenicity	
5			Teratogenicity	
6			Acute, Sub-acute and chronic toxicity	
7-10			Preclinical evaluation of drugs	
CO 1				
LO : Study the basic concepts of toxicology and preclinical evaluation of drugs.				
11	2	Drug Dependence	Definition of drug dependence and introduction to drug of abuse	
12			Classification of drugs of abuse	
13			Drug addiction	
14			Physical dependence	
15			Psychological dependence	
16-19			Mechanism of tolerance and dependence	
CO 2.3				
LO: Understand the concept of drug dependence types and drug addiction.				
20	3	Poisoning	Introduction and classification of poisoning	
21-23			Factors modifying the action of poison	
24			Types of Poisoning	
25-29			General treatment and management of Poisoning	
CO 3				
LO : To study the basic concept of poison and poisoning and its treatment.				
30-31	4	Detailed treatment of Poisoning of the following substance	Detailed treatment of Poisoning of As, Hg, Pd, Zn, Cyanide and heavy metals	
32-33			Detailed treatment of Poisoning of Opium, Morphine and LSD	
34-35			Detailed treatment of Poisoning of Alcohol and Barbiturates	
36			Detailed treatment of Poisoning of Salicylates and Paracetamol	
37			Detailed treatment of Poisoning of Digitalis, Nicotine and Cocaine	
CO 4				
LO: To study the treatment for different types of poisoning of different types poison and drugs.				
38				

39	5	a. Environmental Pollution b. Drugs & Pregnancy c. Drug Interaction	Types of environmental pollution,	
40			Methods of Control of Pollution	
41			Introduction to drugs and pregnancy	
42			Drug-drug interaction during pregnancy	
43			Teratogenic Drugs, drugs Contraindicated in pregnancy	
44			Definition of drug interaction, factors predisposing to drug interaction	
45			Classification and mechanism of drugs interaction, adverse drug interaction	
CO 4				
LO: To study the basics of Environmental Pollution, drugs and pregnancy and drug interaction.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Pharmacology, S. K. Bhattacharya, P. Sen, A. Ray, Reed Elsevier India Pvt.Ltd

DEPARTMENT OF CHEMISTRY
Lesson Plan

Subject: Pharmaceutical Biotechnology Code : MPC-304 Session: July-December

Class: M.Sc. Pharma. Chemistry, Sem. III

I: Objective of course: The course deals with the basics of biotechnology and their applications in pharmaceuticals. The elementary idea of immunology, Vaccinology, Genetics, recombinant DNA Technology and Gene Therapy

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes:

CO-I	Understand the basics concepts of Pharmaceutical Biotechnology
CO-II	To study the usage of Vaccine and Genetics in therapeutics
CO-III	Understand the basics and applications of Recombinant DNA technology in pharmaceutical
CO-IV	To study the method of treatment of disease by Gene Therapy

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3							3
CO 2					2			3
CO 3					3			3
CO 4								3

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1				
1	1	Basics of Immunology	Introduction to Immunity and Immunology	B.no. 1,2,3
2			Cells and tissue and Immune System	
3-4			Characteristics and types of antigens	
5-6			Structure and types of antibodies	
7-9			Antigen –Antibody reactions and its application	
10			Hypersensitivity	
CO 1,				
LO : Study the immune system of body, classification and structure of antibodies and antigen-antibody interaction.				
11	2	Vaccinology	Introduction to Vaccines and vaccinology	B.no. 1,2,3
12			Conventional vaccines	
13			Modern Vaccine Technologies	
14-15			Genetically improved live vaccine	
16-17			Genetically improved subunit vaccine	
18-19			Pharmaceutical Considerations	
CO 1, 2				
LO: Understand the different types of vaccine and application of vaccine in enhancing immunity.				
20	3	Genetics	Structure and function of DNA	B.no. 1,2,3
21			DNA Replication & Repair	
22-23			Expression of Genetic Information	
24			Structure and Function of RNA	
25			Trancscription	
26			Genetic Code	
27			Translation	
28- 29			Post Translation modification	
CO 1, 2				
LO : To study the basic genetic materials RNA and DNA, structure, function, transcription, translation of genetic material.				
30-32	4	Recombinant DNA Technology	Gene cloning, restriction enzymes, vectors, genomic libraries, polymerase chain reaction.	B.no. 1,2,3
33-36			Methodology for production of biopharmaceutical by recombinant DNA Technology; Hormones, Interferons, t-Plasminogen Activator,	
37			Monoclonal Antibodies amd Hybridoma	

			Technology	
CO 1, 3				
LO: Understand the basics concepts Recombinant DNA technology in pharmaceutical.				
38	5	Gene Therapy	Introduction and potential target disease for gene therapy	B.no. 1,2,3
39-40			Gene transfer methods	
41			Molecular principles of drug targeting	
42-43			Drug Delivery system in gene therapy	
44-45			Clinical studies in Gene therapy	
CO 1, 4				
LO: Understand the study of Gene therapy, different types of potential target disease gene therapy.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

DEPARTMENT OF CHEMISTRY
Lesson Plan

Course: M.Sc. Pharma. Chemistry, Sem. III; Code : MPC-305 Session: July-December

Subject: Pharmacognosy

I: Objective of course: The course is designed to take up the basics of pharmacognosy, natural source of drugs, isolation of phyto-constituents and herbs.

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes:

- CO-I To understand the basics of medicinal drugs obtained from plants or other natural sources.
- CO-II To study the therapeutic significance of natural herbs and drugs.
- CO-III To understand the structure, properties and isolation method of natural compounds
- CO-IV To study the various aspects of phyto-constituents of therapeutic importance

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1					3	1	1	3
CO 2					3	1	1	2
CO 3					3	1	1	
CO 4					3	1	1	3

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
Part 1				
1	1	a. Cultivation b. Plant Growth Hormone c Pest	Cultivation of medicinal plants	B,No. 1, 2
2			Factors affecting cultivation	
3			Collection of parts of medicinal plants	
4			Harvesting	
5			Drying	
6-7			Plant growth Hormones	
8-10			Pest and Pest Control methods	
CO 1				
LO : To study the various factors affecting the cultivation, Growth Hormones and Pests in plants.				
11	2	Natural Source of Drugs:	Natural Source of Drugs	B,No. 1, 4
12			Drugs from higher plants and microbes	
13			Drugs from animals and marine organisms	
14			Classification of drug from Natural Origin	
15			Morphological Classification	
16			Taxonomical Classification	
17			Pharmacological classification	
18-19			Chemical Classification	
CO 1, 2				
LO: To understand the different natural sources of drug and their chemical classification.				
20-21	3	Phyto-constituents of Therapeutic Significance	Introduction to phyto-constituents of therapeutic significance	B,No. 1, 3
22-23			General methods of extraction, isolation, identification and characterization of carbohydrate	
24-25			General methods of extraction, isolation, identification and characterization of glycoside	
26-27			General methods of extraction, isolation, identification and characterization of phenolic compounds	
28			General methods of extraction, isolation, identification and characterization of steroids	
29			General methods of extraction, isolation, identification and characterization of alkaloids	
CO 1, 2, 3				
LO : To study the characterization, identification, extraction and isolation methods of phyto-constituents of therapeutic significance.				
30-31	4	Isolation of Phyto-	Isolation of Morphine	

32		constituents	Isolation of Quinine	B,No. 1, 5
33			Isolation of Glycosides	
34			Isolation of Methanol	
35			Isolation of Thymol	
36			Isolation of digitalis	
37			Isolation of diosgenin	
CO 3, 4				
LO: To study the isolation methods of phyto-constituents.				
38-40	5	a. Herbs b. Tissue Culture	Herbs as Health Foods and as Cosmetics	B,No. 1, 5
41-43			Introduction of tissue culture	
44-45			Scope of tissue culture in production of Phyto-Pharmaceuticals	
CO 1, 2, 3, 4				
LO: Understand the concept of herbs as health food and as cosmetics and basics of tissue culture.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Pharmacognosy, Gokhale, Kokatem, Nirali Prakashan

Lesson Plan

Subject: Lab Course -I
Class: M.Sc. Pharmaceutical Chemistry- III Sem.

Session: July -December

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge of titrimetric method Spectrophotometric determination, Chromatographic and Ion Exchange Methods.

II: Examination: The semester practical examination carrying 50 marks will contain 36 marks for practical 6 marks for Diary and 8 marks for Viva.

III: Course Outcomes (CO):

- CO1 To study titrimetric method
- CO2 To understand the spectroscopic techniques to study the organic compounds
- CO3 Understand the concept of chromatographic separation.
- CO4 To study the concept of ion exchange method

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3			3	3	
CO 2		3	3			2	3	
CO 3	2		3			2	3	
CO 4			3			3	3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	I	Titrimetric Method	Determination of Solubility of Benzoic acid in Water at Different temperature	
2			Estimation of Ascorbic Acid Tablets	
3			Estimation of available chlorine in Bleaching Powder	
4			Estimation of available oxygen in Hydrogen Peroxide	
CO 1				
LO : To study solubility of compounds and estimation of compounds in products through titrimetric method.				
5	II	Spectrophotometric determination	Determination of Maximum Absorbance and molar excitation coefficient	
6			Determination of Paracetamol and Ibuprofen	
7			Determination of phosphate concentration in a soft drink	
8			UV study of Amino Acids, Proteins, Carbohydrates, Cholesterol, Ascorbic acid, aspirin, caffeine	
CO 2				
LO: To understand the spectroscopic techniques for studying different compounds.				
9	III	Chromatography and Ion Exchange Method	Separation of sugar in different samples by Paper Chromatography	
10			Separation of Nickel, manganese, Cobalt, and Zinc by chromatography	
11			Separation of Zn-Mg, Cd-Zn, Anthracene-Picric acid, by chromatography	
12			Separate and Estimate Mg(II) and Zn(III) by Ion Exchange Method.	
CO 3,4				
LO To study the concept of paper, column and thin layer chromatography and ion exchange methods.				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogel's textbook of quantitative analysis J. Basset, R.C. denney

3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

Subject: Lab Course -II
Class: M.Sc. Pharmaceutical Chemistry- III Sem.

Session: July-December

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge of Optical Method of Analysis, Flame Photometric Determination, Extraction.

II: Examination: The semester practical examination carrying 50 marks will contain 36 marks for practical 6 marks for Diary and 8 marks for Viva.

III: Course Outcomes (CO):

- CO1 To study optical method of analysis.
- CO2 To understand the flame photometric method.
- CO3 To study the operation and uses instruments.
- CO4 To study the extraction methods for compounds from natural sources

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		3				3	3	
CO 2		3				3	3	
CO 3		2				3	3	
CO 4						3	3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	I	Optical Method of Analysis	Molar refractivity of Methyl acetate, Ethyl acetate, N-Hexane and CCl ₄	
2			Influence of Solvent on Optical Rotation of Camphor	
3			Polarometric determination of the percent of two optical active substance in the given solution	
4			Optical Rotation of Pharmaceutical Substances	
LO: To study optical active compounds by polarimeter and determine molar refractivity and optical rotation.				
5-6	II	Flame Photometric determination	Sodium and Potassium in a given mixture by Flame Photometer	
LO To understand the flame photometric method for sodium and potassium.				
7	III	Extraction	Quinine from Cinchona	
8			Papain from papaya	
9			Menthol oil from peppermint leaves	
10			Eucalyptus oil from Eucalyptus leaves	
LO: To study the extraction methods for Quinine form chincona, papain from papaya, menthol oil form peppermint leaves and eucalyptus oil from eucalyptus leaves				

VI: Book References:

1. Advanced Practical physical chemistry R.C. das, and B.Behera
2. Vogels textbook of quantitative analysis J. Basset, R.C. denney
3. Findley Practical physical chemistry, B.P. Levitt, Longmann
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Course: M.S. Pharma. Chemistry, Sem. IV Code (MCH): 401

Session: January-June

Subject: Advanced Medicinal Chemistry

I: Objective of course:

The course provide knowledge of new drug delivery system, Pharmacodynamics, mode of action and Side Effects, biological evaluation and recent advances of drugs.

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic.

III: Course Outcomes:

- CO-I To understand the chemistry of drugs with respect to their pharmacological activity and kinetics of enzyme mechanisms and inhibition.
- CO-II To understand mechanism of membrane active drugs in human body, significance of drug metabolism & newer drug delivery system.
- CO-III To understand function of antibiotics and antibacterial drugs such as Penicillin, Cephalosporins, Antitubercular Streptomycin, Anticancer drugs, Antihyperlipidemic and Antialzheimer drugs.
- CO-IV Understand mode of action of various class of drugs such as Anticoagulants, Antiplatelets, Immunosuppressant, Antiprotozoal NSAIDS and their recent advances In research.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	2		2	2	2	3	3
CO 2	2	2		2	3	2	3	2
CO 3	2	2			3	2	2	
CO 4	2	2			3	2	2	

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
1	1	Drug Delivery and Enzyme inhibition	Theoretical of drug delivery systems	B.No. 1, 2, 3, 5,7
2			drug delivery systems Continue	
3			Concept of prodrug	
4			Dendrimer	
5			Polymers as drug carrier	
6			Enzyme inhibition	
7			Rational design based on inhibition kinetics	
8			Type of rational drug design	
9			Affinity labeling agents	
10			Presentation	
CO 1, II				
LO 1: To understand function newer drug system, enzyme inhibition and affinity-labeling agents.				
11	2	Pharmacodynamics	Introduction to Pharmacodynamics	B.No. 1, 2, 3, 5, 7
12			Elementary treatment of enzymes stimulation	
13			enzyme inhibition	
14			Sulfonamides	
15			Membrane active drug	
16			Drug metabolism	
17			Xenobiotics	
18			Biotransformation	
19			Significance of drug metabolism in medicinal chemistry	
CO: I, II				
LO : To understand the drug metabolic pathways, adverse effect and therapeutic value of drugs and their significance in medicinal chemistry.				
20	3	Antibiotics and Antibacterials	Antibiotics: Introduction and Classification	B.No. 1, 2, 3, 5,9
21			Antibiotic classification continue	
22			B-lactam type Antibiotic: Penicilins	
23			Pencilin continue	
24			Cephalosporins	
25			Cephalosporins Continue	
26			Antitubercular antibiotic- streptomycin	
27			Streptomycin Continue	
28			Anticancer antibiotic– Dactinomycin	
29			Dactinomycin continue	
30			Presentation	
CO: I, III				
LO: To understand mode of action of different types of drugs such as antibiotics and antibacterial drugs on human body.				
31	4	Classification, mode of action and Side Effects,	Anticoagulants	B.No. 1,
32			Anti platelet drugs	

33		biological evaluation and recent advances of drugs- I	Immunosuppressants	2, 3, 4, 9
34			Antiviral	
35			Anti HIV	
36			Antiprotozoal	
37			NSAIDS	
38			Presentation	
CO: I, II, III				
LO : To understand SAR, side effects and biological evaluation of anticoagulants, Antiplatelets, Immunosuppressant drugs.				
39	5	Classification, mode of action and Side Effects, biological evaluation and recent advances of drugs- II	Antihyperlipidemic drugs	B.No. 1, 2, 3, 4, 5,9
40			Antihyperlipidemic drugs Continue	
41			Antispasmodics	
42			Anti ulcer drugs	
43			Antiparkinsonian	
44			Antialzheimer drugs	
45			Presentation	
CO: I, IV				
LO: To explain classification and the SAR of some important category of drugs and their recent advances in research.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Medicinal Chemistry, Alka L Gpta, A Pragti Edition.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.

4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Advanced Medicinal Chemistry			
M.Sc. Pharmaceutical Chemistry IV Sem			
Goal: To provide knowledge of new drug delivery system, Pharmacodynamics, mode of action and Side Effects, biological evaluation and recent advances of drugs.			
Objective of course: To aware the student from newer drug delivery system, drug metabolic pathways, mode of action, SAR, therapeutic value of different class of drugs such as Antibiotics, Antibacterials, Anticoagulants, Antiplatelets, Immunosuppressant drugs, Antihyperlipidemic, Antispasmodics, Antiparkinsonian and Antialzheimer drugs .			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the knowledge of newer drug delivery system, drug metabolic pathways, mode of action, SAR, therapeutic value of different class of drugs.	% Students having the knowledge of newer drug delivery system, drug metabolic pathways, therapeutic value of different class of drugs	% Students having the knowledge of newer drug delivery system, therapeutic value of different class of drugs	% Students Need More Efforts for basic knowledge of pharmacology of different class of drugs

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

Lesson Plan**Subject: Drug Design (MPC-402)****Session: Jan-June****Class: M.Sc. Pharmaceutical Chemistry- IV Sem.**

I: Objective of course: The main focus of the Drug design is to understand molecular modeling through software, study of QSAR, various approaches, and conversion of 2D structure in 3D form and to use structure-based and non-linear classification methods in drug design.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics.

III: Course Outcomes (CO):

- CO1 Understand Molecular modeling and software aided drug design and relationships between molecular structure and biological activity of synthetic drugs.
- CO2 The students should be acquainted with theoretical and practical knowledge of molecular modeling tools and techniques for drug design and future developments in the drug design.
- CO3 Understand awareness of rational drug design, based on three-dimensional (3D) structures and physicochemical properties of drugs and role of QSAR in drug design.
- CO4 Understand role of molecular modeling in 3D-QSAR, CoMFA and related methods and conversion of 2D structure in 3D form.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3			3	2	3		
CO 2	3					3		
CO 3	3			3		3		
CO 4	3			3		3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Introduction to Drug design and Discovery	Definition of Drug Design & Scope.	B.N.2,3
2			Historical perspective of Drugs and Lead compounds	B.N.2,3
3			Software based drug design and scope	B.N.1,2
4			Lead optimization	B.N.2,3
5			Role of cell biology	B.N.2,3
6			Definition of Genomics as source of drug design	B.N.2,3
7			Scope and Future developments of drug design	B.N.2,4
CO:2				
LO: Understanding the common concepts of computer aided drug design techniques and the modification of chemical structures to develop new drug molecules & future development.				
8	2	Three Dimensional aided Drug design	Definition of three dimensional drug design	B.N.1, 2,
9			Role of software in drug design	B.N.1, 2
10			Process to derive 3D Structure of drug	B.N.2,3
11			Drug design by software.	B.N.2,4
12			Methods of optimization of identified compounds	B.N.2,3
13			Structure Aided drug design	B.N.2,3
CO:1				
LO: The student will be able to interpret and practice the fundamental concepts of Molecular Modeling and Computer-aided Drug Design.				
14	3	Computer aided Drug design	Computer based Pharmacophoric approaches.	B.N.2,3
15			Ligand based design	B.N.2,4
16			Role of pharmacophore concept in drug design	B.N.2,3
17			Pharmacophore elements and their representation	B.N.2,4
18			Active conformation and types	B.N.2,3
19			Molecular superimposition	B.N.1,2
20			Definition of Receptor and receptor excluded & Rec. essential volume	B.N.1,3
21			Salvation effects	B.N.2,3
22			3D Pharmacophore models and uses.	B.N.2,3

CO: 3

LO: Explain pharmacophore approaches, active conformation, receptor excluded and essential volumes and 3D pharmacophore models.

23	4	QSAR & Related Approaches	Definition of QSAR and scope in drug design	B.N.1,4
24			Fundamental of QSAR	B.N.2,4
25			Biological data of drugs	B.N.1,4
26			Hansch analysis and other approaches	B.N.1,3
27			Physicochemical properties and their types	B.N.1,3
28			Statistical methods of QSAR	B.N.1,2
29			Applications of Hansch and other approaches	B.N.1,2
30			3D QSAR approaches	B.N.1,3

CO: 3

LO: Explain pharmacophore approaches, active conformation, receptor excluded and essential volumes and 3D pharmacophore models.

31	5	Molecular modeling	Definition of 3D Coordinates	B.N.1,3
32			Approaches in molecular modeling such as Sketch approach	B.N.1,2
33			2D Structure of drugs	B.N.1,2
34			Conversion of 2D in 3D form	B.N.1,2
35			Definition of Force field and geometry optimization	B.N.2,3
36			Energy minimizing procedure	B.N.2,4
37			Quantum mechanical methods	B.N.2,4
38			Conformational analysis of drug	B.N.1,2
39			Pharmacophore identification of drugs.	B.N.2,3
40			Molecular modeling in 3D QSAR	B.N.1,4
41			CoMFA method	

CO: 4.

LO: To understand 3D structures of drug and their designing software and optimization of identified compounds.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lesson Plan

Course: M.Sc. Pharma. Chemistry, Sem. IV Code (MCH): 403 Session: Jan-June

Subject: Modern Analytical Techniques

I: Objective of course: Enable students to understand and apply the theoretical aspects of IR, NMR, Chromatography, X-ray crystallography, auto radiography, immunoassay, cytometry and different thermal method for the determination of different bulk drugs and their formulation.

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding, utility of concern topic.

III: Course Outcomes:

CO-I	Able to assess and select suitable analytical method for analysis, ability to select alternative methods for analysis
CO-II	Be familiar with the calculations of analytical chemistry, perform statistical evaluation of results and make scientific reports in scientific manner.
CO-III	Able to understand the working principle of different analytical techniques and recognize their advantages and limitations.
CO-IV	Able to do collaborative work in the fields of biology, medicine and environment.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	3		3	3	2	
CO 2	3	3	3	3	2	3	3	
CO 3	3		2			3		
CO 4					3	3	3	

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
1	1	Spectroscopy	Theory of IR	B.No. 1, 2, 3, 5
2			Instrumentation of IR and FT-IR Instruments	
3			Application of IR in Structure elucidation	
4			Structure elucidation by IR	
5			Theory of NMR	
6			Instrumentation of NMR Spectrophotometer, Origin of spectra	
7			Chemical shift of C ¹³ NMR	
8			Spin-spin coupling	
9			Structure elucidation by NMR	
10			Structure elucidation by C ¹³ NMR	
CO 1, II, III				
LO 1: Will learnt about IR, FT-IR, NMR, C ¹³ NMR techniques, interpretation of their spectra and uses.				
11	2	Mass Spectroscopy	Theory of Mass Spectroscopy	B.No. 1, 2, 3, 7, 9
12			Instrumentation of Mass Spectrometer	
13			Analysis of sodium and phosphate. Common adulterants in food,	
14			Fragmentation pattern of Compounds	
15			McLafferty rearrangement	
16			Fragmentation of Aldehyde, Ketone, Amides	
17			Structure determination by mass spectrometry	
18			Application of GC-Mass technique	
19	Application of HPLC-Mass technique			
CO: I, II, III				
LO : Will learnt theory, interpretation and application of Mass spectrometry with GC and HPLC technique.				
20	3	X-Ray Crystallography	Theory Florescence Spectroscopy	B. No. 7, 8, 9
21			Instrumentation of Florescence spectrometer	
22			Application of Florescence Spectroscopy	
23			Miller Indices, Braggs Law, Crystal system	
24			Bragg's method X-ray structure determination	
25			Procedure of X-ray structure determination	
26			Application of X-ray Crystallography	
27			Ultra centrifugation theory	
28			Technique and application of	

			Ultracentrifugation	
29			Liquid Scintillation: Theory, Instrumentation and Application	
30			Auto Radiography: Theory, Instrumentation and application	
CO: I, II, IV				
LO: Will learnt theory, instrumentation and application of Fluorescence, X-ray crystallography, Ultra centrifugation, Liquid Scintillation spectrometry and Auto radiography.				
31	4	Immunoassay Technique	Theory of immunoassay	B.No.10
32			Principal of Immunoassay	
33			Procedure of Enzymatic Immunoassay	
34			Application of Enzymatic immunoassay	
35			Theory of Radio Immunoassay	
36			Methodology of Radioimmunoassay	
37			Application of Radioimmunoassay	
CO II, III, IV				
LO : Will learnt theory, methodology and applications of Radioimmunoassay and Enzymatic techniques of Immunoassay.				
38	5	Thermal Methods	Principle, Technique and application of TG	B.N. 11, 12
39			Principle, Technique and application of DSC	
40			Principle, Technique and application of DTA	
41			Principle, Technique and application of Scanning electron Microscopy	
42			Principle, Technique and application of Transmission electron microscopy	
43			Principal of cytometry	
44			Technique and application of cytometry	
45			Technique and application of Flow cytometry	
CO: III, IV				
LO: Student will learnt principal, method and application of different thermal analysis, scanning and transmission electron microscopy and cytometry.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: Biopharmaceutics and Pharmacokinetics (MPC-404)

Session: Jan-June

Class: M.Sc. Pharmaceutical Chemistry- IV Sem.

I: Objective of course: Biopharmaceutics and pharmacokinetics is a cross-disciplinary course. It is a main specialized course of pharmacy and pharmaceuticals. Along the way, students will gain an understanding of the principles of the absorption, distribution, metabolism and elimination or excretion (ADME) of a drug, and how these apply to the optimum utilization of a drug in a patient. The course is designed for you to gain the knowledge and skills to apply biopharmaceutics and pharmacokinetics principles in pharmaceutical care.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having five optional questions carrying 17 marks each. These questions would require the candidate to have complete knowledge, understanding and utility of concern topics.

III: Course Outcomes (CO):

- CO1 Aim of the course is to help students grasp the basic theories and basic skills of biopharmaceutics and pharmacokinetics and plasma drug concentration measurement.
- CO2 Understand types of compartment models through mathematical and their roles in estimation, curve fittings and regression procedure and role in drug design.
- CO3 Understand the concepts of rate and order of processes, different pharmacokinetic processes occurred in the body as absorption, distribution, metabolism and excretion.
- CO4 Understand drug bioavailability and bioequivalence as related to drug product safety and methods of determination of bioavailability using blood level and urinary excretion data & physical properties of drug.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 1			3	2	2	3		3
CO 2	2		2		3	3		
CO 3	3					3		3
CO 4						3		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Biopharmaceutics and Gastrointestinal of drugs	Definition and passage of drugs across biological barrier.	B.N.1,2
2			Gastrointestinal absorption mechanism of drugs.	B.N.1,3
3			Factors which affects the drug absorption.	B.N.1,2
4			pH partition hypothesis, Dietary factors	B.N.1,2,3
5			Physicochemical factors of drugs.	B.N.1,2
6			Invitro and Invivo methods of gastrointestinal absorption.	B.N.1,2
7			Plasma and tissue protein binding	B.N.1, 2
8		Drug deposition and Excretion	Routes of drug excretion and Renal excretion	B.N.1, 2
9	Factors affecting renal excretion of drug		B.N.1, 2	
10	Biliary and salivary of drug excretion		B.N.1,2	
11	Pathway of drug metabolism and metabolism enzyme		B.N.1,2	
12			Inhibition and stimulation of drug metabolism	B.N.1, 2
CO:2				
LO: To understand the use of raw data and derive the pharmacokinetic models and parameters the best describe the process of drug absorption, distribution, metabolism and elimination.				
13	2	Pharmacokinetics	Definition of pharmacokinetics and absorption of drug	B.N.1,2
14			Drug distribution in body.	B.N.1,2
15			Metabolism and excretion of drug	B.N.1,2
16			Fluid compartment & types	B.N.1,2,3
17			Circulatory system	B.N.1,2
18			Protein binding & mechanism	B.N.1,2
19			Plasma drug concentration	B.N.1,2
CO:1, 3				
LO: To understand the significance of plasma drug concentrations, compartment models and kinetics				

parameters.				
20	3	Compartment Models	Definition & types of compartment models	B.N.1,2
21			Alaika information criterion	B.N.1,2
22			One and two compartment model	B.N.1,2
23			Wagner Nelson and Loo Riegelman methods	B.N.1,2
24			Estimation of absorption constant	B.N.1,2
25			Curve fittings	B.N.1,2,3
26			Regression procedure	B.N.1,2
27			Area under blood level curves	B.N.1,2
28			Model selection method	B.N.1,2
29			Criteria and pathway of compartment models	B.N.1,2,3

CO: 2

LO: To understand the recent pharmacokinetic models and its advantages and limitations compared to classical compartmental models.

30	4	Clinical Pharmacokinetics	Definition of Urinary excretion and computation of pharmacokinetics parameters	B.N.1,2
31			Haepetic clearance	B.N.1,2,3
32			Biliary excretion	B.N.1,2
33			Excretion ration & dosage reigemen adjustment	B.N.1,2
34			Dosage reigemen adjustment in patient with and without renal failure.	B.N.1,2,3
35			Drug interaction and significance	B.N.1,2,3
36			Combination theory of drugs.	B.N.1,2
37			Pharmacokinetics parameters from urine data	B.N.1,2,3

CO: 3

LO: To understand clinical pharmacokinetics and their significance, drug interactions – Adjustment of dose.

38	5	Bioavailability and Bioequivalence	Definition and scope of bioavailability & Bioequivalence	B.N.1,2
39			Federal requirement method	B.N.1,2,3
40			Methods of determination of bioavailability using blood level and urinary excretion data	B.N.1,2
41			Design and evaluations and bioavailability assessment	B.N.1,2,3

CO- 4-

LO: To understand bioavailability, bioequivalence concepts & assessments, design, regulation & methods of determination of bioavailability.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Bio Pharmaceutics & Pharmacokinetics			
M.Sc. Pharmaceutical Chemistry, IV Sem			
Goal : Students develop the ability to understand how drugs can be utilized optimally in the treatment of disease-through design and development of new and better therapeutic moieties, new dosage forms and appropriate dosage regimens, it also helps to understand gastrointestinal absorption of drugs, distribution of drugs, protein binding of drugs, biotransformation, prodrugs, excretion of drugs, pharmacokinetics and various compartment models.			
Objective: Students will understand distribution of drugs in the body, their mathematical models, rate of reaction and excretion of drugs in the body and mechanism of distribution, absorption, bioavailability and bioequivalence of drugs.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%Students having the basic concept of mechanism of excretion, absorption and distribution of drugs in the body and importance of Bioavailability and bioequivalence.	% Students gained knowledge of various compartmental models used in drug distribution in the body and their role.	% Students having understanding about the scope of biopharmaceutics and pharmacokinetics in the of drugs.	% Students Need More Efforts for Solution and Basic Concept of Various models used in biopharmaceutics and kinetics.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY
Lesson Plan

Course: M.S. Pharma. Chemistry, Sem. IV Code (MCH): 405

Session: January-June

Subject: Pharmacology

I: Objective of course:

This course is designed to develop an basic understanding of pharmacological aspect such as pharmacokinetics, pharmacodynamics of drugs. It involved drugs acting on CNS, Gastrointestinal tract, Hematopoietic system, Autacoids and Psychic disease. In each category of drugs, their classification, mode of action, clinical effects and side effects, emphasized.

II: Examination: I: The faculty member will give internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have one section of long answer type. Each section having 5 optional question carrying 17 marks each. These questions would require the candidates to have complete knowledge, understanding ,utility of concern topic.

III: Course Outcomes:

- CO-I Gain knowledge of scope of pharmacology and signify routes of drug administration.
- CO-II To gain knowledge of a range of drugs used in medicine and discuss their mechanisms of action.
- CO-III To gain knowledge of path & physiology of CNS, Psychopharmacology, Gastrointestinal, Hematopoietic system, Autacoids and other biological system
- CO-IV To gain knowledge of clinical applications, side effects and toxicities of drugs used in medicine

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2			3			3	1
CO 2	2		3	2	3		3	3
CO 3	3							3
CO 4	3			2		3		3

V. Session Plan:

Lecture No.	Unit	Topic	Sub Topic	Ref.
1	1	General Pharmacology Pathophysiology and treatment of CNS Disease	Different type of Dosage form & routes of administration	B.No. 1, 2, 3, 5
2			Tolerance and dependence of ADMe Drugs	
3			Pathophysiology of CNS disease	
4			Neuro transmission in CNS	
5			Cholinergic transmission pathway	
6			Dopaminergic transmission pathway	
7			Serotonergic transmission pathway	
8			Noradrengenic transmission pathway	
9			General Anesthesia	
10			General Anesthetics Continue	
CO 1, II, III, IV				
LO 1: Student learnt various dosage form of drugs, their route of administration, ADME characteristic and treatment and pharmacology of CNS Disease.				
11	2	Psychopharmacological Agent	General introduction of Psychopharmacological Agent, General Characteristics	B.No. 1, 2, 3, 4
12			General Introduction continue	
13			Antipsychotics agent	
14			Antipsychotics agent continue	
15			Antidepressants agent	
16			Antidepressants agent continue	
17			Antimaniacs agent	
18			Antimaniacs agent continue	
19			Hallucinogens agent	
CO: II, III, IV				
LO : Student gain knowledge of drugs of class Antipsychotic, Antidepressant, Antimaniacs, Hallucinogens ..				
20	3	Drug Acting on Gastrointestinal Tract	Pharmacological Characteristic of Gastrointestinal tract	B.No. 1, 2, 3, 4, 5
21			Characteristic of drugs acting on Gastrointestinal tract	
22			Anta acids	
23			Anta acids continue	
24			Anti ulcer drugs	
25			Anti ulcer drugs continue	
26			Laxatives	
27			Anti-Diarrheal Drugs	
28			Emetics	
29			Anti- emetics	
CO: II, III, IV				
LO: Student gain knowledge of Anta acids, Anti-ulcer, Anti-diarrheal, Emetics and Anti-emetics				
30	4	Drug acting on the	Characteristic of drugs acting on	

		Hematopoietic system	Hematopoietic System	B.No. 1, 2, 3, 4
31			Hematinics	
32			Anti -Coagulants	
33			Anti –Coagulants continue	
34			Vitamine K	
35			Hemostatic agent	
36			Fibrinolytic and anti platelet Drugs	
37			Blood and plasma volume Expander	
CO: II, III, IV				
LO : Student gain knowledge of Hematinics, Anti-coagulants, Blood-plasma volume expanders and anti-platelet drugs.				
38	5	Autocoids	Characteristic of Autocoid system	B.No. 1, 2, 3, 4, 6
39			Characteristics of Antihistamines	
40			Histamine 5-HT and their antagonist	
41			Euiconosoids, Prostaglandins	
42			Leukotrienes	
43			Thromboxane	
44			Non steroidal anti-inflammatory Agents	
45			Opiod Analgesics, Antipyretics	
CO: II, III, IV				
LO: Student gain knowledge of Antihistamines and their antagonist, Prostaglandins, Thromboxane, Anti –inflammatory Agent and Opiod Analgesics				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Pharmacology			
M.Sc. Pharmaceutical Chemistry IV Sem			
Goal: Develop basic understanding of pharmacology, such as the pharmacokinetics and pharmacodynamics of drugs a. It highlights the pharmacology of different class of drugs.			
Objective of course: Course highlights the pharmacology of drugs acting on CNS, Gastrointestinal tract, Hematopoietic system, Autacoids, Psychic disease. With each classification of drugs covered, their mode of action, their clinical effects and side effects emphasized.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the knowledge of dosage, route of administration, mechanism of action, receptors, adverse effect, drug interaction, contradiction and therapeutic uses of drugs of different target	% Students having the knowledge of dosage, route of administration, mechanism of action, receptors, therapeutic uses of drugs of different target	% Students having the knowledge of dosage, route of administration, therapeutic uses of drugs of different target	% Students Need More Efforts for basic knowledge of pharmacology of different class of drugs

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject	Lab course-II	Session: Jan- June
Class	M.Sc. – Pharmaceutical Chemistry IV Sem	

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge and instrumental techniques of Chemistry.

II: Examination: The semester practical examination carrying 50 marks will have instrumental analysis, synthesis and biological evaluation of drugs.

III: Course Outcomes (CO):

CO-1	Will acquire the understanding of laboratory methodologies and skill for the synthesis, purification and characterization of organic/inorganic compounds of moderate complexity
CO-2	To gain ability of taking observation, make conclusion, perform calculation by processing of raw data, reporting of result and maintenance of notebook using proper record-keeping procedures.
CO-3	To provide knowledge of general technique used for analysis of samples of pharmaceutical interest.
CO-4	To develop skill for testing effectiveness of drugs on animals i.e. pharmacological experiment

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3				3	
CO 2		3					3	
CO 3			3				3	
CO 4			2		1		2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-4		Instrumental Analysis	Analysis on Nephelometer, Conductometer pH-meter and Karl Fisher titrator	1,4
CO: 1,2,3				
LO: Student will learn analysis of total dissolved solid, conductometric titration of acid-base, pH of buffers, and moisture analysis.				
1-4		Synthesis	Organic and In-organic multi step preparation	1,2
CO: 1,2, 3				
LO: Student will learn multi step synthesis of inorganic complexes and organic compounds.				
1-4		Pharmacological Experiments	Study of central muscle relaxants, hypnotic and analgesic activity using Rotarod Apparatus	2,3
CO: 1, 2 & 4				
LO: Student will learn testing of Hypnotic activity of sedatives and analgesic activity of opiod drugs on animals.				

VI: Book References:

1. Practical Pharmaceutical Chemistry I& II, A.H. Backett, CBS Publisher and Distributors.
2. Principles of Pharmaceutical Organic Chemistry, R.R. Nadenla, New Age International Publishers
3. Practical Pharmacognosy, Raakesh Gupta, Macmillon Publ.
4. Hand book of Organic analysis H. Clark, Aqward Arnold.

Subject	Lab course-II	Session: Jan- June
Class	M.Sc. – Pharmaceutical Chemistry IV Sem	

I: Objective of course: The objective of this course is to acquaint the students with the Practical knowledge of various pharmaceuticals and cosmetics, water analysis and extraction techniques.

II: Examination: The semester practical examination carrying 50 marks will have Extraction of metal ions, water analysis and preparation of pharmaceutical and cosmetics.

III: Course Outcomes (CO):

CO-1	Understand specialized knowledge of the techniques and applications relating specifically to pharmaceutical analysis.
CO-2	To understand synthesis of various pharmaceutical and cosmetics and their uses in daily life.
CO-3	To study different parameters in analysis of water and their application in industries.
CO-4	To understand extraction of metals by solvent extraction and other techniques.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3			3	3	
CO 2		3	2			3	2	
CO 3		3	2			2	2	
CO 4							3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1-4		Solvent Extraction	Preparation of standard solutions of metal ions, sample solutions, Estimation of Mg (II) and Fe (III) ions and titrations.	1&2
CO: 1,4				
LO: To understand separation of metal ions from the solution by different techniques such as solvent extraction.				
1-4		Water Analysis	Determination of conductivity, pH, acidity, alkalinity, total dissolve solids in water samples.	1&2
CO: 1,3				
LO: To understand parameters such as conductivity, pH, acidity, alkalinity, total dissolve solids in water samples and their applicability in industries.				
1-4		Pharmaceutical and Cosmetic preparations	Preparation of Camphor Liniment, After shave lotion, Shampoo, Compact Powder, Cleansing Cream, Iodex, Benzyl Benzoate Emulsion and Tooth Paste.	1,4,5
CO: 1, 2				
LO: To understand preparation of various compounds such as Camphor liniment, compact powder, Cleansing cream, Iodex etc.				

VI: Book References:

1. Practical Pharmaceutical Chemistry I& II, A.H. Backett, CBS Publisher and Distributors.
2. Examination of water and wastewater, American Public Health Association (APHA), Washington, 1999.

Subject: Project Work

Session: Jan -Jun

Class: M.Sc. Pharma Chemistry Sem IV

I: Objective of course: The objective of this course is to acquaint the students with the Practical exposure to work environment and documentation..

II: Examination: The semester Project work of 60 hrs examination carrying 100 marks. 50 Marks are to be allotted by the Industry/ organization at which student has performed Project work and 50 marks are to be allotted on the basis of Presentation /Viva Voce by External and Internal Examiner.

III: Course Outcomes (CO):`

- CO1 Student will be able to gain in hand training of various instruments, analytical techniques and documentation procedure.
- CO2 Students is able to prepare report of the analysis and experiment performed
- CO3 To be able to run experimental techniques, procedures with safe laboratory practices.
- CO4 Student will explore to the industrial and organizational environment

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
CO1	3					2	3	
CO2		3				3	3	
CO3	2						3	
CO4		3					3

Lesson Plan

Subject: Organic Chemistry

Session: Jul-Jun

Class: B.Sc. I year (Chemistry, Biotechnology, Computer Science)

I: Objective of course: Main objective of this course is to acquaint students with basic concept of Organic compounds, preparations and properties.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 28 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 18 marks will contain 5 optional long answer questions three questions of 4 marks each and two questions of 3 three marks each.

III: Course Outcomes (CO):

- CO1 Understanding basic concepts of Organic Chemistry
- CO2 Able to assign IUPAC nomenclature to the organic compounds
- CO3 Understanding of preparation and properties of different chemical compounds.
- CO4 Understanding of arrangement of groups in Organic compounds and their orientations.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3				3		
CO 2	1	2			2	2		
CO 3	2	2	3	2				
CO 4	2				3	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Structure and Bonding	Hybridization	B.No. 1 & 2
2.			Bond length, Bond angles and energy	
3.			Localized and delocalized chemical bond inclusion compounds	
4.			Clatherates	
5.			Charge transfer complexes	
6.			Resonance, hyper conjugation, inductive effects	
7.			Electromeric, mesmeric and steric effect.	
8.		Mechanism of Organic Reactions	Types of bond fission	
9.			Types of reagents- electrophile and nucleophile	
10.			Types of organic reactions	
11.			Reaction intermediates	
12.				
13.				
14.			Methods of determination of reaction mechanism	
15.				
CO 1, 2				
LO:Able to understand structure, bonding of organic compounds along with understanding of their chemical reactions and intermediates.				
16.	2	Alkanes	IUPAC Nomenclature of Alkanes	B.No.3 B.No. 4
17.			Classification and Isomerism	
18.			Method of formation (Wurtz Reaction, Kolbe Reaction, Corey-House Reaction and decarboxylation)	
19.				
20.				
21.			Physical Properties of Alkanes	
22.			Chemical Properties of Alkanes	
23.				
24.			Mechanism of free radical halogenations in alkanes	

25.		Cycloalkanes	IUPAC Nomenclature of Cyclo Alkanes	
26.			Method of formation of Cyclo alkanes	
27.				
28.			Chemical Properties of Alkanes	
29.			Baeyer Strain Theory	
30.			Conformation of cycloalkane, banana bond structure	
CO 1, 2, 3				
LO Able to understand Nomenclature, preparation properties of Alkanes and Cycloalkanes				
31.	3	Alkenes	IUPAC Nomenclature of Alkenes	B.No. 4 & 5
32.				
33.			Method of formation of Alkenes	
34.				
35.			Physical Properties and relative stability of Alkenes	
36.				
37.			Chemical Properties of Alkenes, Markownikoff's rule	
38.				
39.				
40.				
41.			Industrial applications of ethylene and propene	
42.			Method of formation, conformation and chemical reactions of Cycloalkanes	
43.				
44.		Dienes	Introductions of Dienes	
45.	Allenes, butadiene, 1.2 and 1.4 addition , Diels-Alder Reaction			
CO 2, 3				
LO Able to understand Nomenclature, preparation properties of Alkenes, Cycloalkenes and dienes				
46.	4	Alkynes	IUPAC Nomenclature of Alkynes	B.No. 2 & 5
47.			Structure and Bonding in Alkynes	
48.				
49.			Methods of formation	
50.				
51.			Chemical Reactions,	
52.				
53.				
54.		Alkyl Halides	IUPAC Nomenclature of Alkyl Halides	
55.			Classification of Alkyl Halides	

56.			Method of formation of Alkyl Halides	
57.				
58.			Chemical Properties of Alkyl Halides	
59.				
60.			Poly halogen compounds, preparation and properties of Chloroform and Carbon Tetrachloride	
CO 2, 3				
LO Able to understand Nomenclature, preparation properties of Alkynes and alkyl halides.				
61.			Concept of Isomerism	
62.			Optical Isomerism, elements of symmetry	
63.			Molecular chirality, enantiomers, stereo genic center	
64.			Optical activity and properties of enantiomers	
65.			Chiral and achiral molecules	
66.			diastereoisomers	
67.				
68.	5	Stereochemistry of organic compounds	Threo and erythro diastereoisomers	B.No. 2 &4
69.			Resolution of enantiomers, inversion retention and racemization	
70.			Relative and absolute configuration	
71.			Sequence rule	
72.			D-L and R-S system nomenclature	
73.			Geometrical isomerisms	
74.			E-Z system of nomenclature	
75.			Geometric isomerism in oximes and alicyclic compounds	
76.			Crystallization	
77.			Sublimation	
78.		Practical	Detection of elements	
79.			Identification of Functional group	
CO 1, 4				
LO Able to understand stereochemistry of organic compounds and different types of configuration of organic compounds.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: Physical Chemistry**Session: Jul-Dec 2018****Class: B.Sc. I year (Chemistry, Biotechnology, Computer Science)**

I: Objective of course: The objective of this course is to acquaint the students with basic concepts of Physical Chemistry, mathematical concepts, physical states of matter physical and chemical changes due to reactions.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 29 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 19 marks will contain 5 optional long answer questions four questions of 4 marks each and one question of 3 three marks.

III: Course Outcomes (CO):

- CO1 Understanding basic concepts of Physical Chemistry
- CO2 Able to make mathematical calculations for derivations, theorems, and chemical reactions and nuclear reactions.
- CO3 Understands the basics of different physical states viz. solid, liquid and gaseous
- CO4 Understands different physical changes occur due to chemical reaction.

V:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2	2	3			
CO 2	3	2	2					
CO 3	2	2		1	2	2		
CO 4	2	1	2	2	2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Mathematical Concepts	Logarithm relations,	B.No.1 & 2
2.			Use of log and anti log tables	
3.			Curves sketching; liner and straight	
4.			Differentiation of functions	
5.			Multiplication and divisions in Differentiation	
6.			Maxima and minima and partial Differentiation	
7.			Integration of some functions	
8.			Factorials and Probability	
9.		Gaseous states and Molecular Velocities.	Critical phenomenon : PV isotherm and ideal gas	
10.			Endrew’s experiment	
11.			Vander Wall’s equation	
12.			Root mean square, average and most probable velocities	
13.			Maxwell’s distribution of molecular velocities	
14.			Collision numbers	
15.			Mean free path and collision diameters	
CO 1, 2, 3, 4				
LO Able to make mathematical calculations by applying different concepts probability, log and understand basic concepts of gaseous states.				
16.	2	Liquid State	Intermolecular forces and structure if liquids	B.No.1 B.NO4
17.			Liquid Crystals	
18.			Differences between solid and liquid crystals	
19.			Classification and structure of nematic and cholestric phases.	
20.			Thermograph and seven segment cell	
21.		Solid State	Definition of space lattice, Unit cells	
22.			Law of constancy of interfacial angles	
23.			Law of rationality of indices	
24.				
25.				

26.			Laws of symmetry	
27.			Symmetry elements in crystals, Ionic solid structures	
28.				
29.			Radius ratio rule and coordination number	
30.			Limitation of radius ratio rule and lattice defects	
CO 1, 3, 4				
LO Able to understand the basic concepts of solid and liquid states.				
31.	3	Chemical Kinetics	Chemical kinetic and its scope	B.No.2 B.NO1
32.			Rate of a reaction	
33.				
34.			Factors affecting rate of a reaction	
35.				
36.			Dependence of rate of reaction on concentration	
37.				
38.			Zero order, I Order, II Order and Pseudo Order Reactions and its mathematical characteristics	
39.				
40.				
41.			Half life and mean life of a reaction	
42.			Study of chemical kinetics by polarimeter and spectrophotometer	
43.			Effect of temperature on rate of reaction	
44.			Arrhenius equation, concept of activation energy	
45.			Simple collision theory and transition state theory	
CO 1, 4				
LO Able to understand the basics of rate of a reaction and factors affecting reaction rate.				
46.	4	Radioactivity and Nuclear Chemistry	Introduction and Classification of Radioactivity	B.No2 B.NO3
47.				
48.				
49.			Radioactive Radiations: detection and measurements	
50.				
51.				
52.			Theories of radioactivity	
53.			Group displacement law	
54.			Radioactive disintegration	
55.			Nuclear Reactions	
56.			Nuclear fissions and fusions	
57.			Half Life Period	
58.			Isotopes, isobars and isomers	

59.			Applications of radioactivity	
60.				
CO 1, 4				
LO Able to Understand basic concepts of Nuclear Reactions and Radioactivity				
61.	5	Chemical Equilibrium	Law of Mass Action	B.No.1 B.NO4
62.			Equilibrium constants	
63.			Le chatelier’s Principles	
64.		Colloidal Solutions	Classification of Colloidal Solutions	
65.			Lyophilic and lyophobic colloids	
66.			Properties of Colloidal Solutions	
67.				
68.				
69.			coagulation	
70.			Hardy-Schulze Rule	
71.			Gold numbers	
72.				
73.				
74.				
75.			Application of colloids	
76.	Practical	Determination of melting point		
77.		Determination of boiling point		
78.		Weight and preparation of solutions		
79.		Determination of surface tension		
80.		Determination of viscosity		
CO 1, 4				
Able to Understand basic concepts of Nuclear Reactions and Radioactivity				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

CO 3	2	2		1	2	2		
CO 4	2	1	2	2	2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Atomic Structure	De-Broglie matter wave theory	B.No. 4
2.			Heisenberg uncertainty Principle	
3.			Schrodinger wave equation	
4.			Quantum numbers; radial and angular wave functions	
5.			Shape of s, p, d, f orbitals	
6.			Aufbau Rule, Pauli exclusion principle and Hund's multiplicity rule	
7.			Electronic configuration of the elements, effective nuclear charge	
8.		Periodic properties	Atomic and ionic radii	
9.			Ionization energy	
10.			Electron affinity	
11.			Definition and methods of determination of Electro negativity	
12.			Electro negativity Trends in periodic table	
13.			Applications of Electro negativity in explaining the chemical behavior	
14.			Problems based on Atomic structure	
15.			Problems based on Periodic properties	
CO 1, 2, 3				
LO :Able to understand structure of Atom and periodic properties of an element				
Chemical Bonding Part I				
16.	2	Chemical Bonding	Introduction to different types of bonds	B.No. 2
17.			Covalent Bonds, Valence Bond Theory	
18.			Limitations of VBT	
19.			Characteristics of Covalent Bonds	
20.			Hybridization and its types	
21.			Shapes of different inorganic molecules	
22.			VSEPR Theory to NH ₃ , H ₂ O, SF ₄ ,	
23.			VSEPR Theory to ClF ₃ and H ₂ O	
24.			Molecular Orbital Theory	
25.			Homonuclear and Heteronuclear (CO and NO)	

26.			Homonuclear and Heteronuclear (CO and NO)			
27.			Multicenter bonding in electron deficient molecules			
28.			Bond strength and Bond Energy			
29.			Problems related VSEPR theory			
30.			Problems related to bond energy			
CO1, 2, 3						
LO Learns about covalent bonding in chemical species by Valence bond theory and VSEPR theory						
Chemical Bonding Part II & Chemistry of non-metals						
31.	3	Chemical Bonding	Ionic solids	B.No.3		
32.			Structure of Ionic Solids			
33.			Radius ratio effect and coordination number			
34.			Limitations of radius ratio rule			
35.			Lattice defects, semiconductors, lattice energy and Born-Haber cycle			
36.			Solvation energy and solubility			
37.			Polarizing power, Fajan’s Rule Metallic bond-fre electron,			
38.			Valence Bond Theory			
39.			Weak Interactions: Hydrogen Bonding and Vander Walls forces			
40.		Chemistry of Nobel Gases	Periodic properties of Nobel Gases			
41.			Periodic properties of Nobel Gases			
42.			Chemical Properties of Nobel gases			
43.			Chemistry of Xenon			
44.			Structure and bonding in Xenon compounds			
45.			Problems related to Xenon compounds			
CO 1, 2, 3						
LO Learns about bonding in chemical species by Ionic Solids and weak interactions alongwith understanding of Nobel Gases						
s and p block elements						
46.	4	s-Block Elements	Introduction of s-block elements	B.No. 1		
47.			Comparative study of Li and Mg			
48.			Diagonal Relationship			
49.			Introduction of hydrides, solvation and complexation tendencies			
50.			Functions of s-block elements in bio system			
51.			Introduction to Alkyls and Aryls			
52.			Periodic Properties of s-block elements			
53.			Chemistry of s-block elements			
54.		p-Block Elements	Periodic Properties of p-block elements			

55.			Chemistry of p-block elements	
56.			Comparative study of Be and Al	
57.			Comparative study of group 13-17 electrons	
58.			Hydrides of p-block elements	
59.			Oxides of p-block elements	
60.			Oxy acids and halides of of p-block elements	
1 ,2 ,3 ,				
LO Understands the basic knowledge of s-block elements and group 13-17 p-block elements				
p block elements				
61.	5	p-Block elements	Hydrides of Boron	B.No. 2
62.			Diborane and Higher Boranes	
63.			Borazine	
64.			Borohydrides	
65.			Fullerenes, Flurocarbons	
66.			Structure and principle of Silicates	
67.			Tetrasulphur and tetranitride	
68.			Basic properties of halogens	
69.			Interhalogen compounds	
70.			Poly halides	
71.			Chemical Properties and structure of Compounds of p-block elements	
72.				
73.				
74.				
75.				
76	Practical	Inorganic Mixture Analysis		
77		Inorganic Mixture Analysis		
78		Paper chromatography		
CO 1, 2, 3 ,4				
LO Understands the preparation and properties of inorganic compounds like hydrides of boron , fluorocarbons, silicates and halogens				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- 1 Inorganic chemistry-J D Lee John Wiley
- 2 Inorganic chemistry- F.A.Cotton and Wilkinson , John Wiley
3. Inorganic chemistry- Huheey, Harper Collins pub.USA
4. Unified chemistry M.M. Tandon

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Inorganic Chemistry			
B.S c. I Year			
Goal : Students develop the ability to understand the basic principles of Inorganic chemistry ,nature and behavior of different elements.			
Objective: The objective of this course is to acquaint the students with the basic concept of Inorganic chemistry, properties and, behavior of elements, and understanding the reactivity and bonding of inorganic compounds			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Inorganic chemistry, properties and, behavior of elements, and understanding the reactivity and bonding of inorganic compounds	% Students having the basic concept basic concept of Inorganic chemistry, properties and, behavior of elements, and understanding the reactivity and bonding of inorganic compounds	% Students having understanding of Inorganic Chemistry.	% Students Need More Efforts for understanding concepts of Inorganic Chemistry

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 5
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, DEPARTMENT OF CHEMISTRY, INDORE**Lesson Plan****Subject: Inorganic Chemistry****Session: Jul-Jun****Class: B.Sc. - II Yr (Chemistry, Biotechnology, Computer Science)**

I: Objective of course: The objective of this course is to acquaint the students with the concept of transition complexes, Lanthanides and actinides and principle of acid-base.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 28 marks will have two sections A and B. Section A worth 2.5 marks will have 5 multiple choice questions. Section B carrying 7.5 marks will contain four optional short type questions. Section C carries 14 marks in which a candidate is required to attempt any three. Practical examination contains 50 marks

III: Course Outcomes (CO):

- CO1 Understanding of nature of different bonds and molecular orbital theory.
- CO2 Explanation of periodic table and periodic properties of atoms.
- CO3 Explanation of coordination compounds, naming them and isomerism.
- CO4 Course deals with theory of the determination of the electronic structure of d- metal complexes and their properties.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2		3	2		
CO 2	2	2	2	2	2	2		
CO 3	2	2				3		
CO 4	2		2	2	2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Chemistry of Elements of First Transition series	Characteristic properties of d block elements	B.N.1 &2
2			Properties of the first Transition series	
3			The binary compounds such as carbides	
4			Oxides and sulphides	
5			Complexes stability and Oxidation states	
6			Calculation of coordination number	
7			Explanation of Geometry	
8			Examples of different Transition metal complexes	
9			Examples of different binary compounds	
10			Geometry of different metal complexes	
11			Chemistry of Carbide	
12			Reactions of Sulphides	
13			Reactions of different metal complexes	
14			Presentation	
15			presentation	
CO: 1,3				
LO:Understanding of nature and characteristics of covalent bond and their effect on stereochemistry.				
16	2	Chemistry of elements of second and third Transition series	Chemistry of second transition series	B.N.1&2
17			General Characteristics	
18			Comparative treatment with their 3d analogs with ionic radii	
19			Oxidation States	
20			Magnetic properties	
21			Magnetic Behavior	
22			Spectral properties	
23			Stereochemistry	
24			Chemistry of Third transition series	
25			Examples of Stereochemistry	
26			Examples of Magnetic complexes	
27			Comparative treatment of different transition metals	
28			Chemistry of Transition metal complexes	
29			Important reactions of transition metal	

30			Presentation	
31			Presentation	
CO: 4				
LO: Understanding of chemical Properties of second transition series				
32	3	Co-ordination compounds	Werner’s co-ordination theory	B.N.2
33			Experimental verification of the theory	
34			Concept of Effective atomic number	
35			Nomenclature of coordination compounds	
36			Introduction to Chelates	
37			Isomerism in coordination compounds	
38			Valence bond theory of Transition metal complexes	
39			Use of redox potential data	
40			Analysis of redox cycle	
41			Redox stability in water	
42			Frost latimer diagram	
43			pourbaix diagram	
44			Different redox reagents	
45			Principle involved in the extraction of elements	
46			Extraction of elements	
47			Presentation	
CO: 1,3				
LO: Comparative study of elements with respect to electronic configuration and oxidation states.				

48	4	Chemistry of Lanthanide elements	Electronic structure	B.N.1&3
49			Oxidation states	
50			Ionic radii	
51			Lanthanide contraction	
52			Complex formation	
53			Occurrence and isolation of lanthanide compounds	
54			Chemistry of Actinides	
55			General features and chemistry of actinides	
56			Chemistry of separation of Np, Pu and Am from U	
57			Similarities in later actinides	
58			Similarities in later Lanthanides	
59			Reactions of Lanthanides	
60			Reactions of Lanthanides	
61			Examples of Lanthanides and actinides	
62			Presentation	
63			Presentation	

CO: 2, 3**LO:** Isolation of Lanthanide compounds and reactions of compounds.

64	5	Acid and bases	Arrhenius	B.N. 3
65			Bronsted- Lowry	
66			The Lux flood	
67			Solvent system	
68			Lewis concept of acids and bases	
69			Physical properties of a solvent	
70			Types of solvents	
71			Their characteristics	
72			Reactions in non aqueous solvents	
73			Liquid ammonia and liquid SO ₂	
74			presentation	

75			Presentation	
76			Analysis of mixture containing five radicals	
77			Acid Base Titration	
78		Practical	Redox Titration	
79			Complex metric Titration	
CO: 3				
LO: Students will learn the Acid Base concept and assignment of electronic transition.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Advanced Inorganic chemistry, F.A. Cotton and Wilkinson
2. Inorganic chemistry, J.E. Huheey, and Row.
3. Unified Chemistry M.M. Tandon
4. Inorganic Electronic Spectroscopy, A.B.P. Lever
5. Magnetiochemistry R. I. Carlin
6. Comprehensive coordination chemistry, Wilkinson

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Inorganic chemistry			
B.Sc. II year			
Goal: Students develop the ability to prepare and analyze the properties of periodic elements and the chemistry of different inorganic complexes will be explained			
Objective: The objective of this course is to acquaint the students with the concept of transition complexes , Lanthanides and actinides and principle of acid-base.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Physical Chemistry**Session: Jul-Jun****Class: B.Sc - II Yrs (Chemistry, Biotechnology, Computer Science)**

I: Objective of course: The objective of this course is to acquaint the students with the fundamental theory, , utility & application of Thermodynamics, Electrochemistry, Phase equilibrium and surface chemistry.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The Yearly examination carrying 29 marks .The theory paper will have three sections A, B and C.. Section A worth 2.5 marks will have 5 multiple choice questions. Section B carrying 7.5 marks will contain five optional short answer type question each of 2.5 marks. Section C carrying 19 marks will contain five optional long answer type question 4 questions carries 4 marks each and 1 question is of 3 marks. Practical Examination contains 50 marks .

III: Course Outcomes (CO):

CO1	Understand and applying fundamental concept of Thermodynamics , Surface & Electrochemistry to atoms and molecules
CO2	Enlightens the utility of adsorption, catalysis, EMF, Carnot engine, electrolysis in Lab experiments.
CO3	Analysis and interrelation of thermodynamic and electrochemical forms of energy
CO4	Study potentiometric cell and able to calculate EMF of the cell.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3						
CO 2	2	3	3	3	3	2		
CO 3	1	1	2	2				
CO 4	1	2	3	3	2	3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.		Phase Equilibriun	Basic concept: Thermodynamics, First law	
2.			Second law & need of second law	
3.			Carnot Cycle and its efficiency and Carnot Theorem	
4.			Thermodynamic scale of Temperature	
5.			Entropy: Concept & state function	
6.			Entropy as a function of Temp & Pressure & Volume	
7.			Classius Inequality	
8.			Entropy as criteria of Spontaneity	
9.			Entropy change for ideal gases	
10.			Nernst heat theorem	
11.			Gibbs and Helmholtz function	
12.			A & G as a criteria for thermodynamic equilibrium	
13.			Hess's law of heat summation and it application	
14.			Standard Enthalpy of formation & Neutralization	
15.			A & G as criteria for Thermodynamics and equilibrium & spontaneity	
16.			& Residual Entropy	
17.				
CO: 1,3				
LO: Employee Erying & Collision theories to solve and derive rate of reaction for various molecules				
1.	2	Solid Solutions	Concept of Phase, component degree of freedom	B.N1&.2
2.			Thermodynamic derivation of Gibb's phase rule	
3.			One component system: Water & Carbon dioxide.	
4.			Two component system: Bi-Cd system	
5.			Two component system: Pb-Ag system	
6.			Desilverisation of lead	
7.			Zn –Mg System –Congurent Melting point	
8.			NaCl-water & CuSO ₄ –H ₂ O-Incongruent Melting point	
9.			Zn –Mg System –Congurent Melting point	
10.			Freezing mixture:Acetone dry ice	
11.	Liquid –Liquid Mixtures	Ideal Liquid solutions & Raoults law		
12.		Henry's law		
13.		Non ideal solutions : HCl- H ₂ O system		

14.			Non ideal solutions : Ethanol- H ₂ O system
15.		Partially Miscible Liquids	Phenol water system & Triethyl amine water system
16.			Nicotine – water system , steam distillation
17.			Nernst and application distribution law

CO: 2, 3**LO:** Abstract the knowledge of Adsorption, surfactant, Micelle and test the validity of various isotherm

1.		3	Electro Chemistry- I	Electron Transport	B.N.1&2
2.				Conductivity of ions in metal & electrolyte	
3.				Measurement of Equivalent conductance	
4.				Effect of dilution on conductivity	
5.				Migration of ions	
6.				Kohlrausch law	
7.				Arrhenius theory of electrolytic dissociation	
8.				Limitation of Arrhenius theory	
9.				Weak & Strong Electrolyte	
10.				Ostwald's dilution law	
11.				Theory of strong electrolyte	
12.				DHO theory and equation	
13.				Transport number	
14.				Determination of Transport Number-Hittorf method	
15.				Determination of Transport Number- Moving Boundary Method.	

CO: 1 & 3**LO:** Acquire knowledge of Polymerization and determination of Molecular weight of polymers

1.		4	Electrochemistry - II	Electrode Reaction ,Nernst Equation	B.N.2
2.				Derivation of cell EMF and single electrode	
3.				Standard hydrogen Electrode	
4.				Reference Electrode & Standard Electrode reaction	
5.				Electrochemical Series & its significance	
6.				Electrolytic & Galvanic Cell	

7.			Reversible & Irreversible Cells
8.			Conventional Representation of Electro chemical cell
9.			Concentration cell with and without transport
10.			Liquid junction potential
11.			Application of concentration cell
12.			Solubility & Solubility product
13.			Potentiometric titration
14.			Determination of pH using hydrogen , quinhydrone electrode
15.			Buffers ,Hender Hazel Equation
16.			Mechanism of Buffer action
17.			Assignment on practical utility of Electrodes

CO: 1,2

LO: Develop fundamentals of Entropy production and validate Phenomenological equation for Irreversible process.

1.	5	Surface Chemistry	Adsorption	B.N.1
2.			Adsorption & Absorption	
3.			Types of Adsorption	
4.			Adsorption of gases and liquids in solid adsorbent	
5.			Freundlich and Langmuir Isotherm	
6.			Surface Area & its determination	
7.			Catalysis: Concept & its Characteristic	
8.			Classification of catalysis	
9.			Application of Catalysis	
10.			Miscellaneous examples	
11.			Surface and its practical examples	

12.		Assignment- Based on applications of adsorption & Catalysis	
13.		Practical	Determination of transition temperature
14.			Determination of enthalpy of neutralization
15.			Verification of Beer's Lambert Law
16.			Study of Phase Diagram of two component system
CO: 4			
LO: Enlighten the knowledge of Polar graph, Over potential, Semiconductor, half wave potential and mathematical derivation of their study			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Physical Chemistry –Puri, Sharma and Pathania, Vikas Publications, New Delhi
2. Physical Chemistry – G. M Barrow. International Student Edition, McGraw Hills
3. Physical Chemistry –R A Albert, Wiley Eastern Ltd.
4. Physical Chemistry through Problems – S.K. Dogra and S Dogra Wiley Eastern Ltd.
5. Physical Chemistry –Gurdeep Raj
6. Modern Electrochemistry Volume I & II- O.M. Bockris & A.K.N. Reddy Planum.
7. Thermodynamics - Glasston

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Physical Chemistry			
B.Sc II Year			
Goal : Students develop the ability to understand fundamental concept.uses,interrelation with other forms of Energy application of Thermodynamics, Electrochemistry, Phase equilibrium and surface chemistry Topics include an overview of Thermodynamic properties-Internal Energy, Entropy, Gibb's free energy, Nernst equation , Electrode cell reaction , Adsorption Catalysis, Phase Equilibrium with reference to Solid-solid, solid Liquid, Liquid- liquid equilibrium.			
Objective: The objective of this course is to acquaint the students with the fundamental theory, , utility & application of Thermodynamics, Electrochemistry, Phase equilibrium and surface chemistry			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students

Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Thermo Chemistry, Electrochemistry and further to develop understanding of practical applications utility of it.	% Students having the basic concept of phase equilibrium, surface chemistry, and understanding of adsorption can interpret its example.	% Students having understanding about heat and electricity transfer..	% Students Need More Efforts for Solution and Basic Concept of Electrochemistry and Thermodynamics

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 5
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Organic Chemistry**Session: Jul-Jun****Class: B.Sc - II Yrs (Chemistry, Biotechnology, Computer Science)**

I: Objective of course: The objective of this course is to acquaint the students with the fundamental Aspects, physical, Chemical properties and name reactions of Alcohols, Phenols, Carboxylic Acids , Ethers, Aldehydes & Ketones, and amines and gain basic idea about spectroscopic tools.

II: Examination: The faculty member will give internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The Yearly examination carrying 28 marks .The theory paper will have three sections A, B and C.. Section A carry 5 multiple choice questions with 2.5 marks each. Section B carrying 7.5 marks will contain five optional short answer type questions. Section C carrying 18 marks will contain five optional long answer type question 3 questions carries 4 marks each and 2 question is of 3 marks. Practical examination contain 50 marks

III: Course Outcomes (CO):

- CO1 Learns the fundamental reaction mechanisms.
- CO2 Gains the potential about different spectroscopic techniques.
- CO3 Study of composition, structure, properties and reactions of various organic compounds
- CO4 Predict the most common reaction mechanism in Organic reactions.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3		2	2	2		
CO 2	3		2	3	3	2		
CO 3	2		2	2	2			
CO 4	2	3	3		2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Electromagnetic spectrum :Absorption spectra	Introduction -UV-Visible spectroscopy	
2			Absorption laws ,Molar absorptivity	B.N.1
3			Presentation and analysis of UV spectra	
4			Types of electronic transition	
5			Effect of conjugation ,concept of chromophore auxochromes	
6			Absorption shifts	B.N.2
7			UVspectra of conjugated dienes and derivatives	
8			IR absorption spectroscopy ;Introduction	
9			Molecular vibrations ,Hookes law	
10			Selection rules ,intensity and position of IR bands	
11			Measurement of IR spectrum ,finger print region	
12			Characteristic Absorption of various functional group	
13			Interpretation of IR spectra of simple organic Molecule	
CO: 1,3				
LO: Learns the importance of IR and UV spectroscopy and applications.				
				B.N.1 &2
14	2	Alcohol	Classification & Nomenclature of Monohydric Alcohol	
15			Method of formation of Monohydric Alcohol	
16			Chemical Reaction: Reduction of Aldehydes, Esters	
17			Chemical Reaction: Reduction of Ketones &Carboxylic Acid	
18			Hydrogen bonding	
19			Acidic Nature & Chemical Reaction	
20				
21			Chemical reaction of Vicinal Glycol- Pinacol – Pinacolone rearrangement	
22			Trihydric Alcohol: Nomenclature ,Methods of Preparation	
23			Chemical Reaction of Glycerol	

24			Nomenclature Structure & Bonding	
25			Preparation of Phenol	
26			Physical Properties & Acidic Character	
27			Comparison of Acidic Strength of Alcohol & Phenol	
28			Resonance stabilisation of Phenoxide ions	
29			Chemical Reactions of Phenol- Aromatic Electrophilic Substitution	
30			Acylation * & Carboxylation	
31			Mechanism of Fries rearrangement	
32			Claisen Rearrangement	
33			Gattermanns Synthesis	
34			Hauben Hoesche Reaction & Lederer Manasse reaction	
35			Reiman Teiman Reaction	
CO: 2, 3				
LO: To recognize the IUPAC system, the physical properties and chemical reactions of alcohols and phenols.				
35			Nomenclature & Structure of Carbonyl group	
36			Synthesis of Aldehyde & Ketones	
37			Synthesis of Aldehydes from Acyl Chloride	
38			Synthesis of Aldehydes & Ketones from 1,3 dithianes	
39			Synthesis of Ketones from Nitriles & Carboxylic Acid	
40			Nucleophilic Addition-Aldol Reaction	
41			Nucleophilic Addition-Perkin & Knoevenagel Reaction	
42			Condensation with Ammonia & its derivatives	
43			Wittig & Mannich Reaction	
44			Oxidation of Aldehyde	
45			Baeyer Villiger Oxidation of Aldehyde	
46			Cannizzaro Reaction MPV	
47			Clemmensen's Wolff Kishner Reduction	
48			Reduction Reactions	
49			Halogenation	
50			Introduction to alpha, Beta unsaturated Aldehyde & Ketones	
CO: 1 & 3				
LO: Learns the importance of chemical reactions of and their mechanism of aldehydes and ketones.				
51	4	Carboxylic Acid	Nomenclature, Structure, Bonding physical Properties	B.N.2

52			Acidic Nature	
53			Effects of substituent on Acid strength	B.N.2
54			Preparation of Carboxylic Hell Volhard Zelinsky Reaction	
55			Synthesis of acid chloride ,esters, amides	
56			Reduction of carboxylic acids, mechanism of decarboxylation	B.N.6
57			Methods of formation & Chemical reaction of Halo acids, Hydroxyl Acids	
58			Methods of formation & Chemical reaction of Maleic, Tartaric & Citric acid	
59			Methods of formation & Chemical reaction of dicarboxylic acids	
60			Methods of formation & Chemical reaction of unsaturated monocarboxylic acids	
61		Ether	Nomenclature of Ethers & Methods of their formation , Physical & Chemical Properties	
62			Autooxidation , Ziesels Methods	

CO: 1,2

LO: Recognise the general structure, mechanism, relative reactivity of carboxylic acid and ether with their derivatives.

63	5	Organic Compounds of Nitrogen	Preparation of Nitroalkanes & Nitro Arenes	B.N.1
64			Chemicals Reactions & Mechanisms	
65			Chemicals Reactions & Mechanisms	
66			Halonitroarenes : Reactivity , structure, Nomenclature of Amines	
67			Physical Properties : Stereochemistry of Amiones	
68			Separation of Primary, Secondary & Tertiary Amines	
69			Basicity of Amines	
70			Phase Transfer Catalyst	
71			Preparation of Alkyl & Aryl Amines	
72			Amination of Aldehydic & Ketonic compounds	

73			Gabriel phthalamde Reaction and other name reactions	
74			Reactions of Amines	
75			Electrophillic Aromatic Substitution in Amines	
76			Synthetic transformation of Aryl Diazonoium salts Azocoupling	
77		Practical	Functional group analysis of organic compounds and preparation of derivatives	
78			Functional group analysis of organic compounds and preparation of derivatives	
79			Functional group analysis of organic compounds and preparation of derivatives	
80			TLC and Paper Chromatography of green leaf pigments	
81			TLC and Paper Chromatography of dyes	
CO: 4				
LO: Study of preparation and properties of organic compounds containing nitrogen compounds and its derivatives and various name reactions,				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Advanced organic chemistry, P.S. Kalsi
2. Organic Spectroscopy, Y.R. Sharma
3. Unified Chemistry M.M. N. Tandon

Lesson Plan

Subject: Chemistry**Session: Jul-Dec****Class: B.Sc. V Semester (Chemistry, Biotechnology, Computer Science)**

I: Objective of course: The objective of this course is to acquaint the students with concepts of important organic compounds of nitrogen, carbohydrates, Spectroscopy, Photochemical reactions, Bioinorganic chemistry, Acid and Bases, Analytical Chemistry and Inorganic polymers.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 85 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 18 marks will contain 5 optional long answer questions three questions of 4 marks each and two questions of 3 three marks .Practical examination contains 50 marks.

III: Course Outcomes (CO):

- CO1 Understand preparation and properties of different types of organic compounds
- CO2 Understand effect of interaction of radiations in reaction and components.
- CO3 Understand effect concepts of Bioinorganic chemistry & Analytical Chemistry
- CO4 Understand effect concept of Acid-Base and Inorganic Chemistry

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Organic Compounds of Nitrogen	Introduction, IUPAC Nomenclature and Classification	B.No. 2 &3
2.			Preparation of Nitroalkanes and Nitroarenes	
3.			Chemical & Physical Properties of Nitroalkanes and Nitroarenes	
4.			Halonitroarenes Nomenclature, structure and activity	
5.			Introduction, IUPAC Nomenclature and Classification of amines	
6.			Chemical & Physical Properties of amines	
7.			Structural features and separation of different types of amine	
8.			Amine as phase transfer catalyst	
9.			Name Reactions of Amines	
CO 1, 3				
LO : Study of preparation and properties of organic compound containing Nitrogen and its Derivatives and various name reaction.				
10.	2	Carbohydrates	Classification and nomenclature of carbohydrates	B.No. 2 &5
11.			Mechanism of osazone formation	
12.			Chain lengthening and chain shortening of aldose	
13.			Configuration of monosaccharide	
14.			Formation of glycosides, ethers and esters	
15.			Ring size of monosaccharide, cyclic glucose and mutarotation	
16.			Structure of ribose and deoxyribose	
17.			Glycosidic linkages in di and poly saccharides	
18.			Reducing and Non reducing sugars	
CO 1,3				
LO Able to understand the classification, nomenclature, reactions and properties of Carbohydrates.				
19.	3	Photochemistry	Electromagnetic radiation and range of different spectrum	B.No. 18
20.			Radiation and Energy, wavelength frequency	

21.		UV Spectroscopy	Interaction of radiation with matter	
22.			Difference between thermal and photochemical process	
23.			Laws of photochemistry and Jablonski Diagram	
24.			Electronic Excitation in organic molecule	
25.			Instrumentation of UV Spectroscopy	
26.			Woodward Fischer Rule for determining lamda max of different compounds	
27.				
CO 2				
LO Understanding of different aspects of Photochemistry and principle, instrumentation and application of UV in Structure elucidation.				
28.	4	Bioinorganic Chemistry	Essential and trace elements in Biological Process	B.No. 14
29.			Introduction and role of metalloporphyrins, haemoglobin and myoglobin	
30.				
31.				
32.			Biological role of alkali and alkaline earth metals	
33.			Role of metal in Biological process	
34.				
35.				
36.			Oxygen uptake proteins, cytochrome and ferredoxins.	
CO 3				
LO Understanding of functions and importance of different bio-inorganic compounds and important biological process.				
37.	5	Hard and Soft Acid and bases	Classification and acids and bases as soft and hard	B.No. 13 &14
38.			Pearson HSAB concept	
39.			Application of HSAB concept , Symbiosis	
40.		Analytical Chemistry	Introduction, classification and minimization of Errors	
41.			Precision and accuracy	
42.			Gravimetric Estimation of Barium and Copper	
43.		Inorganic Polymers	Introduction, characteristics classification and application of inorganic polymers	
44.			Structure and nature of bonding in Silicones and triphosphonitrilic chlorides.	
45.		Practical	Analysis of inorganic mixture containing five radicals	
46.			Analysis of inorganic mixture containing five	
47.				

		radicals
48.		Analysis of inorganic mixture containing five radicals
49.		Barium as barium sulphate
50.		Acetylation
51.		Benzoylation
52.		meta-Dinitrobenzene
53.		Picric acid
CO 4		
LO Able to understand the basic concepts of HSAB principle, different aspects of analytical chemistry and Inorganic polymers.		

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.

2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Chemistry			
B.Sc. V Semester			
Goal : Students will broaden and deeper their understanding of theories concepts and models to enhance their success as scientist and educators. Student will also have the ability to produce analyze and interpret meaningful chemical data and draw sound conclusions.			
Objective: The objective of this course is to acquaint the students with concepts of important organic compounds of nitrogen, carbohydrates, Spectroscopy, Photochemical reactions, Bioinorganic chemistry, Acid and Bases, Analytical Chemistry and Inorganic polymers.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of organic compounds of nitrogen, carbohydrates, Spectroscopy, Photochemical reactions, Bioinorganic chemistry, Acid and Bases, Analytical Chemistry and Inorganic polymers.	% Students having the basic concept of organic compounds of nitrogen, carbohydrates, Acid and Bases, Analytical Chemistry and Inorganic polymers.	% Students having understanding about basic principles of chemistry.	% Students Need More Efforts for understanding basic principles of chemistry.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Chemistry**Session: Jan-Jun****Class: B.Sc – VI Semester (Chemistry, Biotechnology, Computer Science)**

I: Objective of course: The objective of this course is to acquaint the students with concepts of important biomolecules, organometallic compounds,, transition metal complexes, advance spectroscopical techniques, adsorption, catalysis and water analysis.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 marks will have three sections A, B and C. Section A worth 15 marks will have 15 multiple choices questions. Section B carrying 20 marks will contain five optional short answer type questions each of 04 marks. The Section C carrying 50 marks will contain 5 optional long answer questions of 10 marks each.

III: Course Outcomes (CO):

- CO1 Understanding of structure, properties and importance of Bio molecules
- CO2 Able to elucidate structure of a compound using spectroscopic data
- CO3 Understanding of different properties of transition metal complexes
- CO4 Able to understand concept of organo metallic compounds

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2			3	3		
CO 2			2	3	3	2		
CO 3	3	2			3			
CO 4	1					2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Amino Acid Nucleic Acid and Elementary ideas of Fats, Oils and detergents	Classification, structure and stereochemistry of amino acid.	B.N.20
2			General method of preparation and properties of amino acid, acid base behavior and isoelectric point.	
3			Introduction to peptide linkage and group analysis and classification	
4			Properties and structure of proteins (primary, secondary and tertiary)	
5			Introduction and constituents of nucleic acids	
6			Ribo nucleoside and ribonucleotide in details.	
7			Double helix structure(DNA)	
8			Introduction to natural oil, edible and industrial oils of vegetable origin.	
9			Common fatty acids and glycerides	
10			Hydrogenation of unsaturated oil,Saponification value	
11			Iodine value and acid value	
CO: 1				
Lo : Able to understand classification, structure and properties of Amino Acids, Proteins, Nucleic Acids, Fat, oil and detergents.				
1	2	Organometallic Chemistry and Organometallic Compound	Synthesis, structure and bonding in metal carbonyl complexes.	B.N.13
3			Metal olefins complex sand metal alkynes complexes	
4			Oxidative addition reactions and its application.	
5			Organomagnesium compound --method of preparation and structure and its application	
6			Organolithium compound --method of preparation and structure and its application	

7.			Grinard Reagents--method of preparation and structure and its application	
CO :3, 4				
LO ; Able to understand synthesis, structure, properties and bonding of different organometallic compounds.				
1	3	<ul style="list-style-type: none">Properties of transition metal complexes.Electronic Spectra of transition metal complexesWater analysis	Magnetic Moment(spin only and with L-S coupling)	B.N.13
2			Orbital contribution magnetic moment.	
3			Spectroscopic ground state and excited states	
4			Types of electronic transitions, selection rule for d-d transitions.	
5			Orgel energy diagram for d ¹ to d ⁹ states	
6			Orgel energy diagram for d ¹ to d ⁹ states	
7			Hardness of water, Type of hardness	
8			Acidity and alkanity, BOD (biological oxygen demand)	
9			COD(chemical oxygen demand) and DO (dissolved oxygen)	
CO: 2				
LO: Able to understand magnetic properties and Electronic spectra of Transition Metal Complex, including water analysis techniques.				
1	4	Infrared spectroscopy and Raman Spectroscopy	Statement of the Born-oppenheimer approximation	B.N.18
2			Rotational spectrum of diatomic molecules	
3			Energy levels of rigid rotor, section rule and intensity of absorption bands.	
4			Maxwell-boltzmann distribution and population of energy levels	
5			Energy levels of simple harmonic oscillators, Selection rules.	
6			Pure vibrational spectrum, intensity and qualitative relation of force constant	
7			Bond energies and degree of freedom	
8			Modes of vibration, vibrational frequencies of different functional groups.	

9			Concept of polarizability in detail	
10			Pure rotational and pure vibrational spectra of diatomic molecule.	
11			Selection rule of roman spectra and its application.	
CO: 1,2				
LO: Able to understand principle and application of IR and Raman Spectroscopy.				
1	5	NMR spectroscopy and Surface phenomenon and catalysis	Principle and instrumentation of NMR active molecules	B.N.18
2			Chemical Shift	
3			Spin- spin coupling	
4			Spectrum of ethanol and ethanal	
5			Adsorption of gases and liquid on solid adsorbent.	
6			Freundlich and Langmuir adsorption isotherm	
7			Determination of surface area	
8			Characteristics and mechanism of heterogeneous catalysis	
9		Practical	Binary mixture analysis containing two solids: Separation, identification and preparation of derivatives.	
10			Study of Job’s Method	
11			Mole-ratio method	
12			Effluent Analysis	
13			Water analysis	
14			Determination of Hardness of Water	
CO: 2				
LO: Able to understand principle and application of IR and Raman Spectroscopy.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lesson Plan

Subject: Organic Chemistry

Session: Jul-Jun

Class: B.Sc. I year (Chemistry, Biotechnology, Life Science)

I: Objective of course: Main objective of this course is to acquaint students with basic concept of Organic compounds, preparations and properties.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 28 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 18 marks will contain 5 optional long answer questions three questions of 4 marks each and two questions of 3 three marks each.

III: Course Outcomes (CO):

- CO1 Understanding basic concepts of Organic Chemistry
- CO2 Able to assign IUPAC nomenclature to the organic compounds
- CO3 Understanding of preparation and properties of different chemical compounds.
- CO4 Understanding of arrangement of groups in Organic compounds and their orientations.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3				3		
CO 2	1	2			2	2		
CO 3	2	2	3	2				
CO 4	2				3	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Structure and Bonding	Hybridization	B.No. 1 & 2
2.			Bond length, Bond angles and energy	
3.			Localized and delocalized chemical bond inclusion compounds	
4.			Clatherates	
5.			Charge transfer complexes	
6.			Resonance, hyper conjugation, inductive effects	
7.			Electromeric, mesmeric and steric effect.	
8.		Mechanism of Organic Reactions	Types of bond fission	
9.			Types of reagents- electrophile and nucleophile	
10.			Types of organic reactions	
11.			Reaction intermediates	
12.				
13.				
14.			Methods of determination of reaction mechanism	
15.				
CO 1, 2				
LO:Able to understand structure, bonding of organic compounds along with understanding of their chemical reactions and intermediates.				
16.	2	Alkanes	IUPAC Nomenclature of Alkanes	B.No.3 B.No. 4
17.			Classification and Isomerism	
18.			Method of formation (Wurtz Reaction, Kolbe Reaction, Corey-House Reaction and decarboxylation)	
19.				
20.				
21.			Physical Properties of Alkanes	
22.			Chemical Properties of Alkanes	
23.				
24.			Mechanism of free radical halogenations in alkanes	

25.		Cycloalkanes	IUPAC Nomenclature of Cyclo Alkanes	
26.			Method of formation of Cyclo alkanes	
27.				
28.			Chemical Properties of Alkanes	
29.			Baeyer Strain Theory	
30.			Conformation of cycloalkane, banana bond structure	
CO 1, 2, 3				
LO Able to understand Nomenclature, preparation properties of Alkanes and Cycloalkanes				
31.	3	Alkenes	IUPAC Nomenclature of Alkenes	B.No. 4 & 5
32.				
33.			Method of formation of Alkenes	
34.				
35.			Physical Properties and relative stability of Alkenes	
36.				
37.			Chemical Properties of Alkenes, Markownikoff's rule	
38.				
39.				
40.				
41.			Industrial applications of ethylene and propene	
42.			Method of formation, conformation and chemical reactions of Cycloalkanes	
43.				
44.		Dienes	Introductions of Dienes	
45.	Allenes, butadiene, 1.2 and 1.4 addition , Diels-Alder Reaction			
CO 2, 3				
LO Able to understand Nomenclature, preparation properties of Alkenes, Cycloalkenes and dienes				
46.	4	Alkynes	IUPAC Nomenclature of Alkynes	B.No. 2 & 5
47.			Structure and Bonding in Alkynes	
48.				
49.			Methods of formation	
50.				
51.			Chemical Reactions,	
52.				
53.				
54.		Alkyl Halides	IUPAC Nomenclature of Alkyl Halides	
55.			Classification of Alkyl Halides	

56.			Method of formation of Alkyl Halides	
57.				
58.			Chemical Properties of Alkyl Halides	
59.				
60.			Poly halogen compounds, preparation and properties of Chloroform and Carbon Tetrachloride	
CO 2, 3				
LO Able to understand Nomenclature, preparation properties of Alkynes and alkyl halides.				
61.			Concept of Isomerism	
62.			Optical Isomerism, elements of symmetry	
63.			Molecular chirality, enantiomers, stereo genic center	
64.			Optical activity and properties of enantiomers	
65.			Chiral and achiral molecules	
66.			diastereoisomers	
67.				
68.	5	Stereochemistry of organic compounds	Threo and erythro diastereoisomers	B.No. 2 &4
69.			Resolution of enantiomers, inversion retention and racemization	
70.			Relative and absolute configuration	
71.			Sequence rule	
72.			D-L and R-S system nomenclature	
73.			Geometrical isomerisms	
74.			E-Z system of nomenclature	
75.			Geometric isomerism in oximes and alicyclic compounds	
76.			Crystallization	
77.		Practical	Sublimation	
78.			Detection of elements	
79.			Identification of Functional group	
CO 1, 4				
LO Able to understand stereochemistry of organic compounds and different types of configuration of organic compounds.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: Physical Chemistry**Session: Jul-Dec 2018****Class: B.Sc. I year (Chemistry, Biotechnology, Life Science)**

I: Objective of course: The objective of this course is to acquaint the students with basic concepts of Physical Chemistry, mathematical concepts, physical states of matter physical and chemical changes due to reactions.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 29 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 19 marks will contain 5 optional long answer questions four questions of 4 marks each and one question of 3 three marks.

III: Course Outcomes (CO):

- CO1 Understanding basic concepts of Physical Chemistry
- CO2 Able to make mathematical calculations for derivations, theorems, and chemical reactions and nuclear reactions.
- CO3 Understands the basics of different physical states viz. solid, liquid and gaseous
- CO4 Understands different physical changes occur due to chemical reaction.

V:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Mathematical Concepts	Logarithm relations,	B.No.1 & 2
2.			Use of log and anti log tables	
3.			Curves sketching; liner and straight	
4.			Differentiation of functions	
5.			Multiplication and divisions in Differentiation	
6.			Maxima and minima and partial Differentiation	
7.			Integration of some functions	
8.			Factorials and Probability	
9.		Gaseous states and Molecular Velocities.	Critical phenomenon : PV isotherm and ideal gas	
10.			Endrew’s experiment	
11.			Vander Wall’s equation	
12.			Root mean square, average and most probable velocities	
13.			Maxwell’s distribution of molecular velocities	
14.			Collision numbers	
15.			Mean free path and collision diameters	
CO 1, 2, 3, 4				
LO Able to make mathematical calculations by applying different concepts probability, log and understand basic concepts of gaseous states.				
16.	2	Liquid State	Intermolecular forces and structure if liquids	B.No.1 B.NO4
17.			Liquid Crystals	
18.			Differences between solid and liquid crystals	
19.			Classification and structure of nematic and cholestric phases.	
20.			Thermograph and seven segment cell	
21.		Solid State	Definition of space lattice, Unit cells	
22.			Law of constancy of interfacial angles	
23.			Law of rationality of indices	
24.				
25.				

26.			Laws of symmetry	
27.			Symmetry elements in crystals, Ionic solid structures	
28.				
29.			Radius ratio rule and coordination number	
30.			Limitation of radius ratio rule and lattice defects	
CO 1, 3, 4				
LO Able to understand the basic concepts of solid and liquid states.				
31.	3	Chemical Kinetics	Chemical kinetic and its scope	B.No.2 B.NO1
32.			Rate of a reaction	
33.				
34.			Factors affecting rate of a reaction	
35.				
36.			Dependence of rate of reaction on concentration	
37.				
38.			Zero order, I Order, II Order and Pseudo Order Reactions and its mathematical characteristics	
39.				
40.				
41.			Half life and mean life of a reaction	
42.			Study of chemical kinetics by polarimeter and spectrophotometer	
43.			Effect of temperature on rate of reaction	
44.			Arrhenius equation, concept of activation energy	
45.	Simple collision theory and transition state theory			
CO 1, 4				
LO Able to understand the basics of rate of a reaction and factors affecting reaction rate.				
46.	4	Radioactivity and Nuclear Chemistry	Introduction and Classification of Radioactivity	B.No2 B.NO3
47.				
48.				
49.			Radioactive Radiations: detection and measurements	
50.				
51.				
52.			Theories of radioactivity	
53.			Group displacement law	
54.			Radioactive disintegration	
55.			Nuclear Reactions	
56.			Nuclear fissions and fusions	
57.			Half Life Period	
58.			Isotopes, isobars and isomers	

59.			Applications of radioactivity	
60.				
CO 1, 4				
LO Able to Understand basic concepts of Nuclear Reactions and Radioactivity				
61.	5	Chemical Equilibrium	Law of Mass Action	B.No.1 B.NO4
62.			Equilibrium constants	
63.			Le chatelier’s Principles	
64.		Colloidal Solutions	Classification of Colloidal Solutions	
65.			Lyophilic and lyophobic colloids	
66.			Properties of Colloidal Solutions	
67.				
68.				
69.			coagulation	
70.			Hardy-Schulze Rule	
71.			Gold numbers	
72.				
73.				
74.				
75.			Application of colloids	
76.	Practical	Determination of melting point		
77.		Determination of boiling point		
78.		Weight and preparation of solutions		
79.		Determination of surface tension		
80.		Determination of viscosity		
CO 1, 4				
Able to Understand basic concepts of Nuclear Reactions and Radioactivity				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Physical Chemistry			
B.Sc. I Year			
Goal : Students develop the ability perform mathematical calculations for different concepts,, can perform various study of solid, liquid and gases molecules, chemical reactions.			
Objective: The objective of this course is to acquaint the students with basic concepts of Physical Chemistry, mathematical concepts, physical states of the matter physical and chemical changes due to reactions.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept Physical Chemistry, mathematical concepts, physical states of the matter physical and chemical changes due to reactions.	% Students having the basic concept Physical Chemistry, physical states of the matter physical and chemical changes due to reactions.	% Students having understanding of physical chemistry	% Students Need More Efforts for Solution and Basic Concept of Physical Chemistry

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 5
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Inorganic Chemistry**Session: Jul-Dec 2018****Class: B.Sc. I year (Chemistry, Biotechnology, Life Science)**

I: Objective of the course: The objective of this course is to acquaint the students with the basic concept of Inorganic chemistry, properties, behavior of elements, understanding the reactivity and bonding of inorganic compounds

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 28 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 18 marks will contain 5 optional long answer questions three questions of 4 marks each and two questions of 3 three marks each.

III: Course Outcomes (CO):

- CO1 Understanding basic concepts of Inorganic Chemistry
- CO2 Understanding of properties and nature of elements
- CO3 Able to understand the behavior of elements
- CO4 Understanding the reactivity and bonding in inorganic compounds.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2	2	3			
CO 2	3	2	2					
CO 3	2	2		1	2	2		
CO 4	2	1	2	2	2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Atomic Structure	De-Broglie matter wave theory	B.No. 4
2.			Heisenberg uncertainty Principle	
3.			Schrodinger wave equation	
4.			Quantum numbers; radial and angular wave functions	
5.			Shape of s, p, d, f orbitals	
6.			Aufbau Rule, Pauli exclusion principle and Hund's multiplicity rule	
7.			Electronic configuration of the elements, effective nuclear charge	
8.		Periodic properties	Atomic and ionic radii	
9.			Ionization energy	
10.			Electron affinity	
11.			Definition and methods of determination of Electro negativity	
12.			Electro negativity Trends in periodic table	
13.			Applications of Electro negativity in explaining the chemical behavior	
14.			Problems based on Atomic structure	
15.			Problems based on Periodic properties	
CO 1, 2, 3				
LO :Able to understand structure of Atom and periodic properties of an element				
Chemical Bonding Part I				
16.	2	Chemical Bonding	Introduction to different types of bonds	B.No. 2
17.			Covalent Bonds, Valence Bond Theory	
18.			Limitations of VBT	
19.			Characteristics of Covalent Bonds	
20.			Hybridization and its types	
21.			Shapes of different inorganic molecules	
22.			VSEPR Theory to NH ₃ , H ₂ O, SF ₄ ,	
23.			VSEPR Theory to ClF ₃ and H ₂ O	
24.			Molecular Orbital Theory	
25.			Homonuclear and Heteronuclear (CO and NO)	

26.			Homonuclear and Heteronuclear (CO and NO)			
27.			Multicenter bonding in electron deficient molecules			
28.			Bond strength and Bond Energy			
29.			Problems related VSEPR theory			
30.			Problems related to bond energy			
CO1, 2, 3						
LO Learns about covalent bonding in chemical species by Valence bond theory and VSEPR theory						
Chemical Bonding Part II & Chemistry of non-metals						
31.	3	Chemical Bonding	Ionic solids	B.No.3		
32.			Structure of Ionic Solids			
33.			Radius ratio effect and coordination number			
34.			Limitations of radius ratio rule			
35.			Lattice defects, semiconductors, lattice energy and Born-Haber cycle			
36.			Solvation energy and solubility			
37.			Polarizing power, Fajan’s Rule Metallic bond-fre electron,			
38.			Valence Bond Theory			
39.			Weak Interactions: Hydrogen Bonding and Vander Walls forces			
40.		Chemistry of Nobel Gases	Periodic properties of Nobel Gases			
41.			Periodic properties of Nobel Gases			
42.			Chemical Properties of Nobel gases			
43.			Chemistry of Xenon			
44.			Structure and bonding in Xenon compounds			
45.			Problems related to Xenon compounds			
CO 1, 2, 3						
LO Learns about bonding in chemical species by Ionic Solids and weak interactions alongwith understanding of Nobel Gases						
s and p block elements						
46.	4	s-Block Elements	Introduction of s-block elements	B.No. 1		
47.			Comparative study of Li and Mg			
48.			Diagonal Relationship			
49.			Introduction of hydrides, solvation and complexation tendencies			
50.			Functions of s-block elements in bio system			
51.			Introduction to Alkyls and Aryls			
52.			Periodic Properties of s-block elements			
53.			Chemistry of s-block elements			
54.		p-Block Elements	Periodic Properties of p-block elements			

55.			Chemistry of p-block elements	
56.			Comparative study of Be and Al	
57.			Comparative study of group 13-17 electrons	
58.			Hydrides of p-block elements	
59.			Oxides of p-block elements	
60.			Oxy acids and halides of of p-block elements	
1 ,2 ,3 ,				
LO Understands the basic knowledge of s-block elements and group 13-17 p-block elements				
p block elements				
61.	5	p-Block elements	Hydrides of Boron	B.No. 2
62.			Diborane and Higher Boranes	
63.			Borazine	
64.			Borohydrides	
65.			Fullerenes, Flurocarbons	
66.			Structure and principle of Silicates	
67.			Tetrasulphur and tetranitride	
68.			Basic properties of halogens	
69.			Interhalogen compounds	
70.			Poly halides	
71.			Chemical Properties and structure of Compounds of p-block elements	
72.				
73.				
74.				
75.				
76	Practical	Inorganic Mixture Analysis		
77		Inorganic Mixture Analysis		
78		Paper chromatography		
CO 1, 2, 3 ,4				
LO Understands the preparation and properties of inorganic compounds like hydrides of boron , fluorocarbons, silicates and halogens				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- 1 Inorganic chemistry-J D Lee John Wiley
- 2 Inorganic chemistry- F.A.Cotton and Wilkinson , John Wiley
3. Inorganic chemistry- Huheey, Harper Collins pub.USA
4. Unified chemistry M.M. Tandon

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Inorganic Chemistry			
B.S c. I Year			
Goal : Students develop the ability to understand the basic principles of Inorganic chemistry ,nature and behavior of different elements.			
Objective: The objective of this course is to acquaint the students with the basic concept of Inorganic chemistry, properties and, behavior of elements, and understanding the reactivity and bonding of inorganic compounds			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Inorganic chemistry, properties and, behavior of elements, and understanding the reactivity and bonding of inorganic compounds	% Students having the basic concept basic concept of Inorganic chemistry, properties and, behavior of elements, and understanding the reactivity and bonding of inorganic compounds	% Students having understanding of Inorganic Chemistry.	% Students Need More Efforts for understanding concepts of Inorganic Chemistry

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 5
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, DEPARTMENT OF CHEMISTRY, INDORE**Lesson Plan****Subject: Inorganic Chemistry****Session: Jul-Jun****Class: B.Sc. - II Yr (Chemistry, Biotechnology, Life Science)**

I: Objective of course: The objective of this course is to acquaint the students with the concept of transition complexes, Lanthanides and actinides and principle of acid-base.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 28 marks will have two sections A and B. Section A worth 2.5 marks will have 5 multiple choice questions. Section B carrying 7.5 marks will contain four optional short type questions. Section C carries 14 marks in which a candidate is required to attempt any three. Practical examination contains 50 marks

III: Course Outcomes (CO):

- CO1 Understanding of nature of different bonds and molecular orbital theory.
- CO2 Explanation of periodic table and periodic properties of atoms.
- CO3 Explanation of coordination compounds, naming them and isomerism.
- CO4 Course deals with theory of the determination of the electronic structure of d- metal complexes and their properties.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2		3	2		
CO 2	2	2	2	2	2	2		
CO 3	2	2				3		
CO 4	2		2	2	2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Chemistry of Elements of First Transition series	Characteristic properties of d block elements	B.N.1 &2
2			Properties of the first Transition series	
3			The binary compounds such as carbides	
4			Oxides and sulphides	
5			Complexes stability and Oxidation states	
6			Calculation of coordination number	
7			Explanation of Geometry	
8			Examples of different Transition metal complexes	
9			Examples of different binary compounds	
10			Geometry of different metal complexes	
11			Chemistry of Carbide	
12			Reactions of Sulphides	
13			Reactions of different metal complexes	
14			Presentation	
15			presentation	
CO: 1,3				
LO:Understanding of nature and characteristics of covalent bond and their effect on stereochemistry.				
16	2	Chemistry of elements of second and third Transition series	Chemistry of second transition series	B.N.1&2
17			General Characteristics	
18			Comparative treatment with their 3d analogs with ionic radii	
19			Oxidation States	
20			Magnetic properties	
21			Magnetic Behavior	
22			Spectral properties	
23			Stereochemistry	
24			Chemistry of Third transition series	
25			Examples of Stereochemistry	
26			Examples of Magnetic complexes	
27			Comparative treatment of different transition metals	
28			Chemistry of Transition metal complexes	
29			Important reactions of transition metal	

30			Presentation				
31			Presentation				
CO: 4							
LO: Understanding of chemical Properties of second transition series							
32	3	Co-ordination compounds	Werner’s co-ordination theory	B.N.2			
33			Experimental verification of the theory				
34			Concept of Effective atomic number				
35			Nomenclature of coordination compounds				
36			Introduction to Chelates				
37			Isomerism in coordination compounds				
38			Valence bond theory of Transition metal complexes				
39			Use of redox potential data				
40			Analysis of redox cycle				
41			Redox stability in water				
42			Frost latimer diagram				
43			pourbaix diagram				
44			Different redox reagents				
45			Principle involved in the extraction of elements				
46			Extraction of elements				
47			Presentation				
CO: 1,3							
LO: Comparative study of elements with respect to electronic configuration and oxidation states.							

48	4	Chemistry of Lanthanide elements	Electronic structure	B.N.1&3
49			Oxidation states	
50			Ionic radii	
51			Lanthanide contraction	
52			Complex formation	
53			Occurrence and isolation of lanthanide compounds	
54			Chemistry of Actinides	
55			General features and chemistry of actinides	
56			Chemistry of separation of Np, Pu and Am from U	
57			Similarities in later actinides	
58			Similarities in later Lanthanides	
59			Reactions of Lanthanides	
60			Reactions of Lanthanides	
61			Examples of Lanthanides and actinides	
62			Presentation	
63			Presentation	

CO: 2, 3**LO:** Isolation of Lanthanide compounds and reactions of compounds.

64	5	Acid and bases	Arrhenius	B.N. 3
65			Bronsted- Lowry	
66			The Lux flood	
67			Solvent system	
68			Lewis concept of acids and bases	
69			Physical properties of a solvent	
70			Types of solvents	
71			Their characteristics	
72			Reactions in non aqueous solvents	
73			Liquid ammonia and liquid SO ₂	
74			presentation	

75			Presentation	
76			Analysis of mixture containing five radicals	
77			Acid Base Titration	
78		Practical	Redox Titration	
79			Complex metric Titration	
CO: 3				
LO: Students will learn the Acid Base concept and assignment of electronic transition.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Advanced Inorganic chemistry, F.A. Cotton and Wilkinson
2. Inorganic chemistry, J.E. Huheey, and Row.
3. Unified Chemistry M.M. Tandon
4. Inorganic Electronic Spectroscopy, A.B.P. Lever
5. Magnetiochemistry R. I. Carlin
6. Comprehensive coordination chemistry, Wilkinson

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Inorganic chemistry			
B.Sc. II year			
Goal: Students develop the ability to prepare and analyze the properties of periodic elements and the chemistry of different inorganic complexes will be explained			
Objective: The objective of this course is to acquaint the students with the concept of transition complexes , Lanthanides and actinides and principle of acid-base.

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Physical Chemistry**Session: Jul-Jun****Class: B.Sc - II Yrs (Chemistry, Biotechnology, Life Science)**

I: Objective of course: The objective of this course is to acquaint the students with the fundamental theory, utility & application of Thermodynamics, Electrochemistry, Phase equilibrium and surface chemistry.

II: Examination: The faculty member will award internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The Yearly examination carrying 29 marks .The theory paper will have three sections A, B and C.. Section A worth 2.5 marks will have 5 multiple choice questions. Section B carrying 7.5 marks will contain five optional short answer type question each of 2.5 marks. Section C carrying 19 marks will contain five optional long answer type question 4 questions carries 4 marks each and 1 question is of 3 marks. Practical Examination contains 50 marks .

III: Course Outcomes (CO):

CO1	Understand and applying fundamental concept of Thermodynamics , Surface & Electrochemistry to atoms and molecules
CO2	Enlightens the utility of adsorption, catalysis, EMF, Carnot engine, electrolysis in Lab experiments.
CO3	Analysis and interrelation of thermodynamic and electrochemical forms of energy
CO4	Study potentiometric cell and able to calculate EMF of the cell.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3						
CO 2	2	3	3	3	3	2		
CO 3	1	1	2	2				
CO 4	1	2	3	3	2	3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.		Phase Equilibriun	Basic concept: Thermodynamics, First law	
2.			Second law & need of second law	
3.			Carnot Cycle and its efficiency and Carnot Theorem	
4.			Thermodynamic scale of Temperature	
5.			Entropy: Concept & state function	
6.			Entropy as a function of Temp & Pressure & Volume	
7.			Classius Inequality	
8.			Entropy as criteria of Spontaneity	
9.			Entropy change for ideal gases	
10.			Nernst heat theorem	
11.			Gibbs and Helmholtz function	
12.			A & G as a criteria for thermodynamic equilibrium	
13.			Hess's law of heat summation and it application	
14.			Standard Enthalpy of formation & Neutralization	
15.			A & G as criteria for Thermodynamics and equilibrium & spontaneity	
16.			& Residual Entropy	
17.				
CO: 1,3				
LO: Employee Erying & Collision theories to solve and derive rate of reaction for various molecules				
1.	2	Solid Solutions	Concept of Phase, component degree of freedom	B.N1&.2
2.			Thermodynamic derivation of Gibb's phase rule	
3.			One component system: Water & Carbon dioxide.	
4.			Two component system: Bi-Cd system	
5.			Two component system: Pb-Ag system	
6.			Desilverisation of lead	
7.			Zn –Mg System –Congurent Melting point	
8.			NaCl-water & CuSO ₄ –H ₂ O-Incongruent Melting point	
9.			Zn –Mg System –Congurent Melting point	
10.			Freezing mixture:Acetone dry ice	
11.	Liquid –Liquid Mixtures	Ideal Liquid solutions & Raoults law		
12.		Henry's law		
13.		Non ideal solutions : HCl- H ₂ O system		

14.			Non ideal solutions : Ethanol- H ₂ O system
15.		Partially Miscible Liquids	Phenol water system & Triethyl amine water system
16.			Nicotine – water system , steam distillation
17.			Nernst and application distribution law

CO: 2, 3**LO:** Abstract the knowledge of Adsorption, surfactant, Micelle and test the validity of various isotherm

1.		3	Electro Chemistry-I	Electron Transport	B.N.1&2
2.				Conductivity of ions in metal & electrolyte	
3.				Measurement of Equivalent conductance	
4.				Effect of dilution on conductivity	
5.				Migration of ions	
6.				Kohlrausch law	
7.				Arrhenius theory of electrolytic dissociation	
8.				Limitation of Arrhenius theory	
9.				Weak & Strong Electrolyte	
10.				Ostwald's dilution law	
11.				Theory of strong electrolyte	
12.				DHO theory and equation	
13.				Transport number	
14.				Determination of Transport Number-Hittorf method	
15.				Determination of Transport Number- Moving Boundary Method.	

CO: 1 & 3**LO:** Acquire knowledge of Polymerization and determination of Molecular weight of polymers

1.		4	Electrochemistry - II	Electrode Reaction ,Nernst Equation	B.N.2
2.				Derivation of cell EMF and single electrode	
3.				Standard hydrogen Electrode	
4.				Reference Electrode & Standard Electrode reaction	
5.				Electrochemical Series & its significance	
6.				Electrolytic & Galvanic Cell	

7.			Reversible & Irreversible Cells
8.			Conventional Representation of Electro chemical cell
9.			Concentration cell with and without transport
10.			Liquid junction potential
11.			Application of concentration cell
12.			Solubility & Solubility product
13.			Potentiometric titration
14.			Determination of pH using hydrogen , quinhydrone electrode
15.			Buffers ,Hender Hazel Equation
16.			Mechanism of Buffer action
17.			Assignment on practical utility of Electrodes

CO: 1,2

LO: Develop fundamentals of Entropy production and validate Phenomenological equation for Irreversible process.

1.	5	Surface Chemistry	Adsorption	B.N.1
2.			Adsorption & Absorption	
3.			Types of Adsorption	
4.			Adsorption of gases and liquids in solid adsorbent	
5.			Freundlich and Langmuir Isotherm	
6.			Surface Area & its determination	
7.			Catalysis: Concept & its Characteristic	
8.			Classification of catalysis	
9.			Application of Catalysis	
10.			Miscellaneous examples	
11.			Surface and its practical examples	

12.		Assignment- Based on applications of adsorption & Catalysis		
13.		Practical	Determination of transition temperature	
14.			Determination of enthalpy of neutralization	
15.			Verification of Beer's Lambert Law	
16.			Study of Phase Diagram of two component system	
CO: 4				
LO: Enlighten the knowledge of Polar graph, Over potential, Semiconductor, half wave potential and mathematical derivation of their study				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Physical Chemistry –Puri, Sharma and Pathania, Vikas Publications, New Delhi
2. Physical Chemistry – G. M Barrow. International Student Edition, McGraw Hills
3. Physical Chemistry –R A Albert, Wiley Eastern Ltd.
4. Physical Chemistry through Problems – S.K. Dogra and S Dogra Wiley Eastern Ltd.
5. Physical Chemistry –Gurdeep Raj
6. Modern Electrochemistry Volume I & II- O.M. Bockris & A.K.N. Reddy Planum.
7. Thermodynamics - Glasston

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and application aspects of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Physical Chemistry			
B.Sc II Year			
Goal : Students develop the ability to understand fundamental concept.uses,interrelation with other forms of Energy application of Thermodynamics, Electrochemistry, Phase equilibrium and surface chemistry Topics include an overview of Thermodynamic properties-Internal Energy, Entropy, Gibb's free energy, Nernst equation , Electrode cell reaction , Adsorption Catalysis, Phase Equilibrium with reference to Solid-solid, solid Liquid, Liquid- liquid equilibrium.			
Objective: The objective of this course is to acquaint the students with the fundamental theory, , utility & application of Thermodynamics, Electrochemistry, Phase equilibrium and surface chemistry			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students

Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Thermo Chemistry, Electrochemistry and further to develop understanding of practical applications utility of it.	% Students having the basic concept of phase equilibrium, surface chemistry, and understanding of adsorption can interpret its example.	% Students having understanding about heat and electricity transfer..	% Students Need More Efforts for Solution and Basic Concept of Electrochemistry and Thermodynamics

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 5
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Organic Chemistry**Session: Jul-Jun****Class: B.Sc - II Yrs (Chemistry, Biotechnology, Life Science)**

I: Objective of course: The objective of this course is to acquaint the students with the fundamental Aspects, physical, Chemical properties and name reactions of Alcohols, Phenols, Carboxylic Acids , Ethers, Aldehydes & Ketones, and amines and gain basic idea about spectroscopic tools.

II: Examination: The faculty member will give internal marks out of 5 and the bifurcation is mention in the scheme of internal marks. The Yearly examination carrying 28 marks .The theory paper will have three sections A, B and C.. Section A carry 5 multiple choice questions with 2.5 marks each. Section B carrying 7.5 marks will contain five optional short answer type questions. Section C carrying 18 marks will contain five optional long answer type question 3 questions carries 4 marks each and 2 question is of 3 marks. Practical examination contain 50 marks

III: Course Outcomes (CO):

- CO1 Learns the fundamental reaction mechanisms.
- CO2 Gains the potential about different spectroscopic techniques.
- CO3 Study of composition, structure, properties and reactions of various organic compounds
- CO4 Predict the most common reaction mechanism in Organic reactions.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3		2	2	2		
CO 2	3		2	3	3	2		
CO 3	2		2	2	2			
CO 4	2	3	3		2	2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Electromagnetic spectrum :Absorption spectra	Introduction -UV-Visible spectroscopy	
2			Absorption laws ,Molar absorptivity	B.N.1
3			Presentation and analysis of UV spectra	
4			Types of electronic transition	
5			Effect of conjugation ,concept of chromophore auxochromes	
6			Absorption shifts	B.N.2
7			UVspectra of conjugated dienes and derivatives	
8			IR absorption spectroscopy ;Introduction	
9			Molecular vibrations ,Hookes law	
10			Selection rules ,intensity and position of IR bands	
11			Measurement of IR spectrum ,finger print region	
12			Characteristic Absorption of various functional group	
13			Interpretation of IR spectra of simple organic Molecule	
CO: 1,3				
LO: Learns the importance of IR and UV spectroscopy and applications.				
				B.N.1 &2
14	2	Alcohol	Classification & Nomenclature of Monohydric Alcohol	
15			Method of formation of Monohydric Alcohol	
16			Chemical Reaction: Reduction of Aldehydes, Esters	
17			Chemical Reaction: Reduction of Ketones &Carboxylic Acid	
18			Hydrogen bonding	
19			Acidic Nature & Chemical Reaction	
20				
21			Chemical reaction of Vicinal Glycol- Pinacol – Pinacolone rearrangement	
22			Trihydric Alcohol: Nomenclature ,Methods of Preparation	
23			Chemical Reaction of Glycerol	

24			Nomenclature Structure & Bonding	
25			Preparation of Phenol	
26			Physical Properties & Acidic Character	
27			Comparison of Acidic Strength of Alcohol & Phenol	
28			Resonance stabilisation of Phenoxide ions	
29			Chemical Reactions of Phenol- Aromatic Electrophilic Substitution	
30			Acylation * & Carboxylation	
31			Mechanism of Fries rearrangement	
32			Claisen Rearrangement	
33			Gattermanns Synthesis	
34			Hauben Hoesche Reaction & Lederer Manasse reaction	
35			Reiman Teiman Reaction	
CO: 2, 3				
LO: To recognize the IUPAC system, the physical properties and chemical reactions of alcohols and phenols.				
35			Nomenclature & Structure of Carbonyl group	
36			Synthesis of Aldehyde & Ketones	
37			Synthesis of Aldehydes from Acyl Chloride	
38			Synthesis of Aldehydes & Ketones from 1,3 dithianes	
39			Synthesis of Ketones from Nitriles & Carboxylic Acid	
40			Nucleophilic Addition-Aldol Reaction	
41			Nucleophilic Addition-Perkin & Knoevenagel Reaction	
42			Condensation with Ammonia & its derivatives	
43			Wittig & Mannich Reaction	
44			Oxidation of Aldehyde	
45			Baeyer Villiger Oxidation of Aldehyde	
46			Cannizzaro Reaction MPV	
47			Clemmensen's Wolff Kishner Reduction	
48			Reduction Reactions	
49			Halogenation	
50			Introduction to alpha, Beta unsaturated Aldehyde & Ketones	
CO: 1 & 3				
LO: Learns the importance of chemical reactions of and their mechanism of aldehydes and ketones.				
51	4	Carboxylic Acid	Nomenclature, Structure, Bonding physical Properties	B.N.2

52			Acidic Nature	
53			Effects of substituent on Acid strength	B.N.2
54			Preparation of Carboxylic Hell Volhard Zelinsky Reaction	
55			Synthesis of acid chloride ,esters, amides	
56			Reduction of carboxylic acids, mechanism of decarboxylation	B.N.6
57			Methods of formation & Chemical reaction of Halo acids, Hydroxyl Acids	
58			Methods of formation & Chemical reaction of Maleic, Tartaric & Citric acid	
59			Methods of formation & Chemical reaction of dicarboxylic acids	
60			Methods of formation & Chemical reaction of unsaturated monocarboxylic acids	
61		Ether	Nomenclature of Ethers & Methods of their formation , Physical & Chemical Properties	
62			Autooxidation , Ziesels Methods	

CO: 1,2

LO: Recognise the general structure, mechanism, relative reactivity of carboxylic acid and ether with their derivatives.

63	5	Organic Compounds of Nitrogen	Preparation of Nitroalkanes & Nitro Arenes	B.N.1
64			Chemicals Reactions & Mechanisms	
65			Chemicals Reactions & Mechanisms	
66			Halonitroarenes : Reactivity , structure, Nomenclature of Amines	
67			Physical Properties : Stereochemistry of Amiones	
68			Separation of Primary, Secondary & Tertiary Amines	
69			Basicity of Amines	
70			Phase Transfer Catalyst	
71			Preparation of Alkyl & Aryl Amines	
72			Amination of Aldehydic & Ketonic compounds	

73			Gabriel phthalamde Reaction and other name reactions	
74			Reactions of Amines	
75			Electrophillic Aromatic Substitution in Amines	
76			Synthetic transformation of Aryl Diazonoium salts Azocoupling	
77		Practical	Functional group analysis of organic compounds and preparation of derivatives	
78			Functional group analysis of organic compounds and preparation of derivatives	
79			Functional group analysis of organic compounds and preparation of derivatives	
80			TLC and Paper Chromatography of green leaf pigments	
81			TLC and Paper Chromatography of dyes	
CO: 4				
LO: Study of preparation and properties of organic compounds containing nitrogen compounds and its derivatives and various name reactions,				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Advanced organic chemistry, P.S. Kalsi
2. Organic Spectroscopy, Y.R. Sharma
3. Unified Chemistry M.M. N. Tandon
4. Stereochemistry of organic compounds, D.Nasipuri, New age International
5. Principle of organic Synthesis, R.O.C Norman And J.M COxon, Blackie Academic & Professional.
- 6.. Reaction mechanism in organic chemistry, S.M. Mukherji and S.p.singh, Macmillan.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.

6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Organic chemistry			
B.Sc. II year			
Goal: Students will develop the ability to prepare and analyze organic compounds. The course will teach the concept of UV-Vis IR, and interpretation of structure of organic compounds. The Structural elucidation of compounds will be explained. The reaction mechanism of name reactions will be explained.			
Objective: The objective of this course is to acquaint the students with the fundamental Aspects, physical, Chemical properties and name reactions of Alcohols, Phenols, Carboxylic Acids, Ethers, Aldehydes & Ketones, and amines. and gain basic idea about spectroscopic tools.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Introduction -UV-Visible spectroscopy, Absorption laws, Molar absorptivity, Selection rules, intensity and position of IR bands, UV spectra of conjugated dienes and derivatives	Baeyer Villiger Oxidation of Aldehyde, Phase Transfer Catalyst, Synthesis of acid chloride, esters, amides	Halonitroarenes : Reactivity, structure, Nomenclature of Amines, Autooxidation, Ziesels Methods	Gabriel phthalimide Reaction and other name reactions, Physical Properties : Stereochemistry of Amines

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 5
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INDORE
DEPARTMENT OF CHEMISTRY

Lesson Plan

Subject: Chemistry**Session: Jul-Dec****Class: B.Sc. V Semester (Chemistry, Biotechnology, Life Science)**

I: Objective of course: The objective of this course is to acquaint the students with concepts of important organic compounds of nitrogen, carbohydrates, Spectroscopy, Photochemical reactions, Bioinorganic chemistry, Acid and Bases, Analytical Chemistry and Inorganic polymers.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 85 marks will have three sections A, B and C. Section A worth 2.5 marks will have 5 multiple choices questions. Section B carrying 7.5 marks will contain five optional short answer type questions each of 2.5 marks. The Section C carrying 18 marks will contain 5 optional long answer questions three questions of 4 marks each and two questions of 3 three marks .Practical examination contains 50 marks.

III: Course Outcomes (CO):

- CO1 Understand preparation and properties of different types of organic compounds
- CO2 Understand effect of interaction of radiations in reaction and components.
- CO3 Understand effect concepts of Bioinorganic chemistry & Analytical Chemistry
- CO4 Understand effect concept of Acid-Base and Inorganic Chemistry

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3			3				
CO 2	3	2	2	2	2	2		
CO 3	2	2		1	3	3		
CO 4	2			2	2			

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1.	1	Organic Compounds of Nitrogen	Introduction, IUPAC Nomenclature and Classification	B.No. 2 &3
2.			Preparation of Nitroalkanes and Nitroarenes	
3.			Chemical & Physical Properties of Nitroalkanes and Nitroarenes	
4.			Halonitroarenes Nomenclature, structure and activity	
5.			Introduction, IUPAC Nomenclature and Classification of amines	
6.			Chemical & Physical Properties of amines	
7.			Structural features and separation of different types of amine	
8.			Amine as phase transfer catalyst	
9.			Name Reactions of Amines	
CO 1, 3				
LO : Study of preparation and properties of organic compound containing Nitrogen and its Derivatives and various name reaction.				
10.	2	Carbohydrates	Classification and nomenclature of carbohydrates	B.No. 2 &5
11.			Mechanism of osazone formation	
12.			Chain lengthening and chain shortening of aldose	
13.			Configuration of monosaccharide	
14.			Formation of glycosides, ethers and esters	
15.			Ring size of monosaccharide, cyclic glucose and mutarotation	
16.			Structure of ribose and deoxyribose	
17.			Glycosidic linkages in di and poly saccharides	
18.			Reducing and Non reducing sugars	
CO 1,3				
LO Able to understand the classification, nomenclature, reactions and properties of Carbohydrates.				
19.	3	Photochemistry	Electromagnetic radiation and range of different spectrum	B.No. 18
20.			Radiation and Energy, wavelength frequency	

21.		UV Spectroscopy	Interaction of radiation with matter	
22.			Difference between thermal and photochemical process	
23.			Laws of photochemistry and Jablonski Diagram	
24.			Electronic Excitation in organic molecule	
25.			Instrumentation of UV Spectroscopy	
26.			Woodward Fischer Rule for determining lamda max of different compounds	
27.				
CO 2				
LO Understanding of different aspects of Photochemistry and principle, instrumentation and application of UV in Structure elucidation.				
28.	4	Bioinorganic Chemistry	Essential and trace elements in Biological Process	B.No. 14
29.			Introduction and role of metalloporphyrins, haemoglobin and myoglobin	
30.				
31.				
32.			Biological role of alkali and alkaline earth metals	
33.			Role of metal in Biological process	
34.				
35.				
36.			Oxygen uptake proteins, cytochrome and ferredoxins.	
CO 3				
LO Understanding of functions and importance of different bio-inorganic compounds and important biological process.				
37.	5	Hard and Soft Acid and bases	Classification and acids and bases as soft and hard	B.No. 13 &14
38.			Pearson HSAB concept	
39.			Application of HSAB concept , Symbiosis	
40.		Analytical Chemistry	Introduction, classification and minimization of Errors	
41.			Precision and accuracy	
42.			Gravimetric Estimation of Barium and Copper	
43.		Inorganic Polymers	Introduction, characteristics classification and application of inorganic polymers	
44.			Structure and nature of bonding in Silicones and triphosphonitrilic chlorides.	
45.				
46.		Practical	Analysis of inorganic mixture containing five radicals	
47.	Analysis of inorganic mixture containing five			

		radicals
48.		Analysis of inorganic mixture containing five radicals
49.		Barium as barium sulphate
50.		Acetylation
51.		Benzoylation
52.		meta-Dinitrobenzene
53.		Picric acid
CO 4		
LO Able to understand the basic concepts of HSAB principle, different aspects of analytical chemistry and Inorganic polymers.		

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

CO 4	1					2		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Amino Acid Nucleic Acid and Elementary ideas of Fats, Oils and detergents	Classification, structure and stereochemistry of amino acid.	B.N.20
2			General method of preparation and properties of amino acid, acid base behavior and isoelectric point.	
3			Introduction to peptide linkage and group analysis and classification	
4			Properties and structure of proteins (primary, secondary and tertiary)	
5			Introduction and constituents of nucleic acids	
6			Ribo nucleoside and ribonucleotide in details.	
7			Double helix structure(DNA)	
8			Introduction to natural oil, edible and industrial oils of vegetable origin.	
9			Common fatty acids and glycerides	
10			Hydrogenation of unsaturated oil,Saponification value	
11			Iodine value and acid value	
CO: 1				
Lo : Able to understand classification, structure and properties of Amino Acids, Proteins, Nucleic Acids, Fat, oil and detergents.				
1	2	Organometallic Chemistry and Organometallic Compound	Synthesis, structure and bonding in metal carbonyl complexes.	B.N.13
3			Metal olefins complex sand metal alkynes complexes	
4			Oxidative addition reactions and its application.	
5			Organomagnesium compound --method of preparation and structure and its application	
6			Organolithium compound --method of preparation and structure and its application	

7.			Grinard Reagents--method of preparation and structure and its application	
CO :3, 4				
LO ; Able to understand synthesis, structure, properties and bonding of different organometallic compounds.				
1	3	<ul style="list-style-type: none">Properties of transition metal complexes.Electronic Spectra of transition metal complexesWater analysis	Magnetic Moment(spin only and with L-S coupling)	B.N.13
2			Orbital contribution magnetic moment.	
3			Spectroscopic ground state and excited states	
4			Types of electronic transitions, selection rule for d-d transitions.	
5			Orgel energy diagram for d ¹ to d ⁹ states	
6			Orgel energy diagram for d ¹ to d ⁹ states	
7			Hardness of water, Type of hardness	
8			Acidity and alkanity, BOD (biological oxygen demand)	
9			COD(chemical oxygen demand) and DO (dissolved oxygen)	
CO: 2				
LO: Able to understand magnetic properties and Electronic spectra of Transition Metal Complex, including water analysis techniques.				
1	4	Infrared spectroscopy and Raman Spectroscopy	Statement of the Born-oppenheimer approximation	B.N.18
2			Rotational spectrum of diatomic molecules	
3			Energy levels of rigid rotor, section rule and intensity of absorption bands.	
4			Maxwell-boltzmann distribution and population of energy levels	
5			Energy levels of simple harmonic oscillators, Selection rules.	
6			Pure vibrational spectrum, intensity and qualitative relation of force constant	
7			Bond energies and degree of freedom	
8			Modes of vibration, vibrational frequencies of different functional groups.	

9			Concept of polarizability in detail	
10			Pure rotational and pure vibrational spectra of diatomic molecule.	
11			Selection rule of roman spectra and its application.	
CO: 1,2				
LO: Able to understand principle and application of IR and Raman Spectroscopy.				
1	5	NMR spectroscopy and Surface phenomenon and catalysis	Principle and instrumentation of NMR active molecules	B.N.18
2			Chemical Shift	
3			Spin- spin coupling	
4			Spectrum of ethanol and ethanal	
5			Adsorption of gases and liquid on solid adsorbent.	
6			Freundlich and Langmuir adsorption isotherm	
7			Determination of surface area	
8			Characteristics and mechanism of heterogeneous catalysis	
9		Practical	Binary mixture analysis containing two solids: Separation, identification and preparation of derivatives.	
10			Study of Job’s Method	
11			Mole-ratio method	
12			Effluent Analysis	
13			Water analysis	
14			Determination of Hardness of Water	
CO: 2				
LO: Able to understand principle and application of IR and Raman Spectroscopy.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Question & Answer Session Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

- **Program Outcome for the M.Sc. (Physics) Degree**

1. Develop human resources with specialization in theoretical and experimental techniques for their career growth in industry and academia.
2. Understanding the nature in its classical and quantum domain.
3. Develop the concepts in solid state physics and applying in material science research.
4. Skill for extensive use of mathematical techniques in the understanding of concepts in Nuclear Physics, Electrodynamics, Plasma. Laser, Microcontroller and Microprocessor & their use in the related technologies.
5. Extensive skill development in designing and fabrication of electronic kits & design of innovative laboratory experiments.
6. Develop software skills like assembly language, PCB designing, computer programming and origin.
7. Develop aptitude for research and continuous learning process to adopt the changing environment and social requirements.
8. Inculcate the logical reasoning ability and leadership quality & imbibe the moral, social and ethical values to practice high standards in professional life.

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Condense Matter Physics****Session: Jul-Dec****Class: M.Sc.(Physics) - III Sem**

I: Objective of course: The objective of this course is to acquaint the students with the basic concept of solid state Physics, different crystal structures, reciprocal lattice, elastic constants, lattice vibrations and

II: Examination: faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory.

III: Course Outcomes (CO):

- CO1 Bravais lattice and crystal structure.
- CO2 Crystal diffraction of X-Ray.
- CO3 Elastic properties of solids, lattice vibrations and phonons.
- CO4 Thermal properties and band theory of solids.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 3		2	3	3	3	1		
CO 4		1	3	2			3	1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1			Introduction to crystal structure	B.N. 1, B.N. 4
2			Bravais lattice	B.N.- 4
3			Bravais lattice in 2D and 3D	B.N.4,B. N.10
4			Simple crystal structure	B.N. 4

5	I	Crystal Structure	Hexagonal close packed structure	B.N. 4
6			Diamond structure	B.N. 4
7			zinc blende structure,	B.N. 4
8			chloride structure,	B.N. 4
9			Cesium chloride structure.	B.N. 4
CO:1				
LO: Basic concepts of unit cell, lattice, simple, face center and body centered crystal structure.				
1	II	Crystal diffraction by X-Ray	Reciprocal lattice..	B.N. 4 & 9
2			Reciprocal lattice of bcc	B.N. 4
3			Reciprocal lattice of FCC	B.N. 4
4			Relation between crystal lattice axes and crystal reciprocal lattice axes	B.N. 4
5			Bragg diffraction	B.N. 9 &10
6			Bragg diffraction	B.N. 9 &10
7			Condition in term of reciprocal lattice vector.	B.N. 9 &10
8			Brillouin zones.	B.N. 9 &10
9			Related numerical	B.N. 9 &10
CO:2				
LO 2: Reciprocal lattice, Bragg’s diffraction and its condition in reciprocal lattice vector.				
1	III	Elastic properties of solids	Basic concept of Stress and strain	B.N. 9
2			Stress and strain components	B.N. 9
3			elastic compliance and stiffness constants	B.N. 9
4			elastic energy density	B.N. 9
5			reduction of number of elastic constants	B.N. 9
6			elastic stiffness constants for isotropic body,	B.N. 9
7			elastic constant for cubic isotropic bodies	B.N. 9
8			elastic waves, waves in (100) direction	B.N. 9
9			Experimental determination of elastic constants.	B.N. 9
CO3				
LO3: Tenser quantities like stress and strain, elastic constants and elastic waves.				
1	IV	Lattice vibration	Basics of lattice vibrations	B.N. 4 & 9
2			Lattice dynamic of a mono atomic liner lattice	B.N. 4
3			Lattice dynamic of a diatomic liner lattice	B.N. 4
4			Lattice vibrational spectrum.	B.N. 4
5			The concept of phonons	B.N. 9 &10

		and phonons	momentum of phonons	
6			Elastic & Inelastic scattering	B.N. 9 & 10
7			Inelastic scattering of photons by phonons	B.N. 9 & 10
8			Inelastic scattering of neutrons by phonons.	B.N. 9 & 10
9			Inelastic Inelastic scattering of X-Ray	B.N. 9 & 10
CO4				
LO4:Lattice vibrational spectra and inelastic scattering by phonons.				
1			Anharmonicity & classification of solids	B. N. 9 & 10
2			thermal expansion	B. N. 9 & 10
3			thermal conductivity	B. N. 9 & 10
4			equation of state of solids	B. N. 9 & 10
5			Gruneisen constant	B. N. 9 & 10
6			Band theory & cyclotron	B. N. 9 & 10
7			Concepts of effective mass.	B. N. 9 & 10
8			Fermi surfaces, anomalous skin effect,	B. N. 9
9			De Hass van alphen effect, resonance, magneto resistance.	B.N. 9
CO5				
LO5: Concepts of effective mass, Fermi surface and thermal properties of solids.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

Students develop the ability to understand the crystal structure	Students develop the ability understand the different Crystals and their properties	Students develop the ability understand the theory of stress, strain , phonons and thermal conductivity.	% Students Need More Effort to understand reciprocal lattice, lattice vibrations.

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva out of 50	CCE out of 50	Assignment out of 50		

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Condense Matter Physics-II****Session: Jul-Dec****Class: M.Sc.(Physics) - IV Sem**

I: Objective of course: The objective of this course is to acquaint the students with the basic concept of superconductivity, magnetism, imperfection in crystals, thin film and nanotechnology.

II: Examination: faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory.

III: Course Outcomes (CO):

CO1 Concept of superconductivity and BCS theory.

CO2 Study of magnetic material and spin waves.

CO3 Defects in crystal structures.

CO4 Understanding of thin films and nano materials.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1			3			1	2	
CO 2	2	1	3	3	3			
CO 3		3	3		2	3		
CO 4		3	3	2		2	3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	I	Superconductivity	Concept of super conducting state	B.N.8 & 9
2			persistent current, critical temperature	B.N.8 & 9
3			messiner effect	B.N.8 & 9
4			thermodynamics of the super conducting transiting	B.N.8 & 9
5			London equation and penetration depth, coherence length,	B.N.8 & 9
6			B.C.S. theory of superconductivity	B.N.8 & 9
7			Type I and Type II superconductors	B.N.8 & 9
8			AC and DC Josephson effects	B.N.8 & 9
9			Josephson Tunneling	B. N.1 & 9
CO:1				
LO1: Basic concepts of super conductivity B.C.S theory and AC and DC tunneling.				
1	II	Magnetism	Basics of magnetism	B. N.1& 3
2			Weiss theory of ferromagnetic	B. N.1& 3
3			Heisenberg model and molecular field theory	B. N.1& 3
4			Domain and wall energy	B. N.1& 3
5			Spin waves mangnons	B. N.1& 3
6			Curie weiss law for susceptibility,	B. N.1& 3
7			Types of magnetic materials	B. N. 1 & 8
8			Ferri and ferromagnetic.	B. N.1& 3
9			Related tutorial	B. N.1& 3
CO:2				
LO2 : Detail study of ferromagnetic material and spin waves.				
1	III	Imperfection in Crystals	Imperfection in atomic packing & point defects	B. N. 7 & 8
2			Interstitial Schottky defects	B. N. 7 & 8
3			frenkel defects, lattice vacancies	B. N. 7 & 8
4			colour centres, F centres, F' centres,	B. N. 7 & 8
5			coagulation of F centres, production of colour centres and V centres	B. N. 7 & 8
6			explanation of experimental facts, line defects, edge and screw dislocation	B. N. 7 & 8
7			mechanism of plastic deformation in solids, stress and strain fields of screw and edge dislocation,	B. N. 7 & 8
8			elastic energy of dislocation, slip	B. N. 7 & 8

			and plastic deformation, shear strength of single crystal	
9			burgers vector stress fields around dislocation	B. N. 7 & 8
CO3				
LO3: Different defects in crystal slip and plastic deformation				
1	IV	Thin films	Study of surface topography by multiple beam interferometer	B.N. 2 & 4
2			conditions for accurate determination of step height and film thickness (Fizeau fringes)	B.N. 2 & 4
3			Electrical conductivity of thin films	B. N. 5 & 6
4			Hall- coefficient quantum size effect in thin film	B. N. 5 & 6
5			Preparation of thin film	B. N. 6
6			Synthesis by different physical vapour deposition system.	B. N. 6
7			Different deposition techniques	B. N. 6
8			Chemical method.	B. N. 6
9			Discussion	
CO4				
LO 4 : Synthesis and properties of thin films.				
1	V	Nanostructures	Definition and properties of nano structured material	B. N. 10
2			different method of preparation and characterization of nano materials,	B. N. 10
3			plasma enhanced chemical vapour deposition	B. N. 10
4			electro deposition	B. N. 10
5			Structure of single wall carbon nano tubes	B. N. 10
6			classification, chiral vector C_n , Translational vector T , Symmetry vector R	B. N. 10
7			Unit Cell, Brillouin Zone	B. N. 10
8			Electronic, mechanical, thermal properties.	B. N. 10
9			Phonon properties	B. N. 10
CO5				
LO5: Synthesis of nano structured material and carbon nano tubes.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Kittel: Solid State Physics
2. Tolansky: Multiple Beam Interferometer.
3. Huang: Theoretical Solid State Physics
4. Heavens: Thin films
5. Thomas: Multiple Electron microscopy
6. Chopra: Physics of thin films.
7. Weertmon and weertman: Elementary Dislocation theory.
8. S. O. Pillai :Solid State Physics
9. S. L. Kakani: Solid State Physics
- 10 . Nanostructures & Nanomaterials

VII. Notes

1. There will be individual assignment and viva.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Quantum Mechanics-I			
M.Sc. I Sem			
Goal : Students develop the ability to understand the fundamental of solid state physics			
Objective: The objective of this course is to acquaint the students with the basic concept of superconductivity, magnetism, imperfection in crystals, thin film and nanotechnology.			
12-15 Marks	8-11 Marks	05-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students develop the ability to understand the principles of solid state physics.	Students develop the ability understand the different phenomenon of physics in day to day life	Students develop the ability understand the simple theories	% Students Need More Effort to understand the theory of thin film & nanotechnology.

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva out of 50	CCE out of 50	Assignment out of 50		

IPS ACADEMY, DEPARTMENT OF PHYSICS, INDORE**Lesson Plan****Subject: Mathematical Physics****Session: Aug-Dec****Class: M.Sc. (Physics) I semester**

I: Objective of course: The objective of this course is to acquaint the students with the basic concepts of special function, transforms Green function and complex variables

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will have total 5 optional questions. Each question carries 17 marks.

III: Course Outcomes (CO):

- CO1 To developed skills of special function and orthogonal curvilinear coordinate system.
- CO2 To inculcate basics of Fourier and Laplace transformation with application to solve differential equations.
- CO3 To inculcate basics of Greens function and its application to solve non-homogeneous equations.
- CO4 To developed concepts of Complex variables with emphasis on evacuation integrals using residue theorem

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2		1	3		1	
CO 2	3	1		2	1		2	
CO 3	1	2		3			1	
CO 4		2	1			1		

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	SECOND	Integral transforms,	Integral transforms, theory of Fourier transform	B.R.1
2			Sine,cosine Fourier transform and fourier transforms of derivative	B.R.1
3			Convolution theorem, discussion on its use in modern communication theory	B.R.1
4			Some problems on Fourier transform	B.R.1
5			3-dimensional Fourier transform, discussion on relationship between coordinates and momentum space	B.R.1
6			Persrel relation, Fourier transform of Gaussian function and step function	B.R.1
7			Solution of damped harmonic oscillator using Fourier transform Laplace transform and L.T. of some simple function.	B.R.1
8			Inverse L.T. inverse L.T. table problem of L.T. partial fraction method	B.R.1
9			Solution of Harmonic oscillator and damped H.O. equations of motion using L.T.	B.R.1
10			Complex numbers, complex variables and complex function, real and imaginary parts	B.R.1
11			Vector representation of complex quantities, principal value, analytical function, Cauchy-reiman condition	B.R.1
CO1				
LO1 Special function with emphasis on Legendre, Bessel, Hermite, Laguerre and their properties, also about orthogonal curve, linear coordinates and related problems.				
12	FIRST	Differential Equation	Series solution, method for solving 2 nd order differential equation solution of Bessel's equation	B.R.2
13			Bessel's function of fires and second kind orthogonality properties and normalization.	B.R.2
14			Generating function of Bessel's function and recurrence relation.	B.R.2
15			Series solution of Legendre equation Legendre polynomial, orthonormalization	B.R.2

16	FIRST	Differential Equation	Generating function and recursion relation of Legendre and Associate Legendre polynomials	B.R.2
17			Series solution of Hermite equation Hermite polynomial, orthogonal and normalization of hermite polynomial	B.R.2
18			Generating function hermite polynomial and recursion relation	B.R.2
19			Series solution of laguere equation and Laguerre polynomial	B.R.2
20			Normalization and orthogonality of Laguerre polynomial	B.R.2
21			Generating function and recursion relation of laguerre polynomials	B.R.2
22			Curvilinear coordinate system and special cases of Cartesian cylindrical and spherical coordinate	B.R.2
22			Some problem on curvilinear coordinate system	B.R.2
CO2				
LO2 Fourier and Laplace transform and their application in physical problems and communication systems. To solve of differential equation using Fourier and Laplace transformation and of damped harmonic oscillator problem.				
17	THIRD	Green's Theorem	Non-homogeneous boundary value problems and green's function for one dimension problems	B.R.3
18			Eigen function expansion of Green's function and fourier transform method	B.R.3
19			Green function method for quantum mechanical scattering problem	B.R.3
20			Green function method for electrostatic boundary value problems	B.R.3
21			solution of Poisson's equation	B.R.3
CO3				
LO3 Complex variable theory with the knowledge of solving integrals and related topics especially using residue theorem. Taylor and Laurent expansion and mapping				
28	FOURTH	Complex	Simply connected region, Multi connected region and Some Problem on analytic funtion	B.R.4
29			Cauchy integral theorem, Cauchy integral formula some problems	B.R.2
30			Series expansion of complex function Taylor series some problem	B.R.2

31	FOURTH	Complex Variable	Laurent's expansion	B.R.2
32			Problems on Cauchy integral formula	B.R.2
33			Problems on Taylor and Laurent series	B.R.2
34			Singularities and their classification some examples of poles and branch point	B.R.2
35			Some problem of determine singularities and region of convergence	B.R.2
36			residues, calculation of residues, residues theorem	B.R.2
37			special type of definite solution using residue theorem	B.R.2
38			Solution of $I = \int_0^{2\pi} F(\cos \theta, \sin \theta) d\theta$ and solve problems	B.R.2
39			Solution of $I = \int_{-\infty}^{\infty} \{\cos mx \sin mx\} f(x)dx$ and related problems	B.R.2
CO4				
L04	Solving nonhomogeneous and Integral equation using green's function with applicationin quantum scattering theory and electrodynamics.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1.	Approximation method for bound states	Revision of Quantum mechanics of sem I and introduction of different approximation methods	B.No.1, 4
2			Time independent Perturbation theory of non-degenerate levels	
3			Application to perturbation of Anharmonic Oscillator	
4			Application to normal helium atom	
5			Application to quadratic stark effect in hydrogen	
6			Time independent Perturbation theory of degenerate levels	
7			Application to linear stark effect in hydrogen	
8			Variation method	
9			Application to ground state helium atom	
10			W K B Approximation method	
11			Continued- W K B Approximation method	
12			Connection formulae	
13			Potential barrier with applications to theory of alpha decay.	
CO1				
LO1. LO1: Time independent perturbation theory for degenerate and non-degenerate case with its applications to anharmonic oscillator, helium atom and H_2 atom and detail study of WKB approximation				
14	2	Time dependent perturbation theory	Time dependent Perturbation theory of non-degenerate levels	B.No.1, 4
15			Transition probability for constant perturbation	
16			Transition probability for harmonic perturbation	
17			Adiabatic approximation and Transition probability	
18			Sudden approximation and Transition probability	
19			Elementary theory of interaction of a quantum system with electromagnetic radiation	
20			Charged particle in electromagnetic field and transition probability	
21			Einstein's A and B coefficient and transition probability	
CO2				
LO2: Calculation of transition probabilities using time dependent perturbation theory, adiabatic and sudden approximation methods				
22	3	Scattering theory	Basic concepts of Scattering	B.No. 2, 3
23			Laboratory and center of mass system	
24			Scattering amplitude	

25			Partial waves analysis (Phase shift)	
26			Continued - Partial waves analysis	
27			Born Approximation	
28			Continued- Born Approximation	
29			Scattering by perfectly rigid sphere	
30			Scattering by complex potential	
31			scattering by spherically symmetric potential	
32			Identical particles with spin	
33			Pauli's spin matrices.	
CO3				
LO3: Scattering amplitude calculation by Partial wave analysis and Born approximation and its application to rigid sphere and complex potential.				
34		Relativistic Quantum Mechanics	Klein- Gordon equation	B.No.1, 3
35			Interpretation of Klein- Gordon equation - Probability density	
36			Continued - Current density, short comings of Klein-Gordon equation	
37			Charged particle in electromagnetic field and Klein-Gordon equation	
38			Klein- Gordon equation and Hydrogen atom,	
39			Dirac.s relativistic equation for a free particle	
40			Dirac's Matrices	
41			Solution of free particle Dirac Relativistic equation	
42			Negative energy states	
43			Dirac.s relativistic equation in electromagnetic field	
44			Interpretation for hydrogen atom	
45			Hyperfine splitting	
CO4				
LO4 Calculation of transition probabilities for relativistic Klien-Gorden and Dirac's equation and application to H_2 atom				

VI: Book References:

Lesson Plan

Subject: Classical Mechanics

Session: Jul-Dec

Class: M.Sc - I Sem

I: Objective of course: The objective of this course is to acquaint the students with the basic concepts of Classical Mechanics. How Mechanics has developed in the process of understanding the motion of planets from the time of Newton and Galileo. Later understanding work motion and energy and formulation of Lagrangian and Hamilton.

II : Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory

III: Course Outcome(CO)

CO1 Mechanics and its span . Newton and Lagrange's mechanics.Hamilton's principle.

CO2 Coordinate transformation. Hamilton Jacobi Equation.Principle of Least Action

CO3 Small oscillations.Coriolis force.Inertia tensor.

CO4 Relativistic Mechnics..Invariance of the laws of Physics.

IV: PO-CO Mapping: High-3, Medium-2, Low-1

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
CO 1	3	3	-	-	3	2	-	2
CO 2	3	3	-	-	3	-	-	2
CO 3	3	3	-	-	3	2	-	2
CO 4	-	3	-	-	3	-	-	2

V: Session Plan:

Lecture No	Unit No	Topic	Sub topic	Reference
1	1		How this branch of physics began. Placatory motion.Aristotle and Copernicus views.	B.No.1,2

2			Newton's laws of motion. Sequential development of three laws. And then their mathematical formulation	
3			Rigid body .Centre of mass.	
4			Isolated systems. Conservation of energy and linear momentum. Elastic and in elastic collision. Conservation of angular momentum	
5			Constraints and degrees of freedom. Minimum coordinates	
6			Holonomic , Nonholonomic Rheonomic ,scleronomous constraints .their examples.	
7	1	Principle of virtual work. D'Alembert's principle in generalized coordinates	2 nd law to virtual work and its logic D'Alembert's Principle. D'Alembert's Principle in generalized coordinates.	
8	1	The Lagrange's equation from D'Alembert's principle.	The Lagrangian function $L=T-V$ LHS of D'Alembert's equation changed to function	
9			RHS of D'Alembert's equation changed to function of T and hence derivation of Lagrange's equations	
10	1	Configuration space. Hamilton's principle ,deduction from D'Alembert's principle.	Difference between configuration space and phase space.Hamiltons principle and Hamiltons principle function	
11			Deriving Hamiltons principle from D'Alembert's Principle	
12	1	Generalized momenta and Lagrangian formulation of conservation theorem.	Concept of generalized momenta as conjugate of generalized coordinate Cyclic coordinate.conservations of linear momentum	
13			Conservation of angular momentum and energy	
14	1	Two body central force problem	Central force definition.changing L of two bodies from r_1, r_2 to r R system	

15		Reduction to the equivalent one body problem. The equation of motion and first integrals.	Reduced mass and relative motion .conservation of angular momentum and Kepler's second law.First integral	
16		The differential equation of the orbit.	Equation of the orbit ,The conic eccentricity. Circle and ellipse as a special case	
CO1				
LO1: Understanding motion and role of force.conservative and dissipative forces.Importance of energy in understanding motion.Degrees of freedom and minimum coordinates.Lagrange's equation replacing Newton's equations of motion.Equation of orbit.				
17	2	The equations of canonical transformation	Statement of Hamilton's canonical equations of motion. Advantage of shifting the origin. Canonical transformation	Book 2,3
18	2	generating function	Generating function of 1 st and 2 nd kind. Equations of canonical transformation.	
19	2	The Hamilton Jacobi equation.	To prove that the equation of motion takes a simple form as Hamilton Jacobi equation, if F_2 is the Hamilton's principle function	
20	2	Action angle variables.	Definition of action in mechanics. The method of action angle variables to deal with periodic motion and find the frequency without complete solution of the problem	
21	2	Poisson's bracket. simple algebraic properties of Poisson's.	Poisson's bracket definition. Algebraic properties of Poisson's bracket.	
22		The equation of motion in Poisson's bracket's notation.	Hamilton's canonical equations in Poisson bracket notation and fundamental Poisson bracket	
23		Poisson's theorem	Jacobi identity and Poisson's theorem	
24	2	Principle of least action.	δ & Δ variation Principle of least action and its proof	
25	2	The Kepler's problem. Inverse central	Defining Kepler's laws and solving them starting from Hamilton Jacobi equation	
26		force field.	Equation of the orbit	

27		Rutherford's scattering.	Expression for differential scattering cross section impact parameter	
28			α particles scattering from gold foil. Rutherford scattering formula and nuclear atom model	
CO2: Coordinate transformation. Hamilton Jacobi Equation. Principle of Least Action				
LO2: Hamilton Jacobi equation. Criteria for correct path, the Hamilton's Principle.. Planetary Motion.				
29	3	Theory of small oscillations. Equation of motion.	Simple harmonic motion. Stable equilibrium. Proof that small oscillation is a SHM.	Book 2 , 4
30	3	Application to coupled pendulum	Spring coupled masses. Normal modes and normal frequencies	
31			General motion	
32	3	Two simple pendulums coupled by a spring	Normal mode and normal frequencies. General motion	
33	3	linear bistable molecule.	Translation and two oscillatory modes Normal mode and normal frequencies. General motion	
34	3	general motion	General theory of small oscillations	
35	3	Rotating coordinate system. Acceleration in rotating frame. Coriolis force	Earth is a rotating frame ie accelerated frame Fictitious force. Centrifugal and Coriolis force	
36	3	it's terrestrial and astronomical applications.	Foucault's pendulum. Displacement of the body under free fall	
37	3	Elementary treatment of Eulerian coordinates and transformation matrices.	Changing orientation by three rotations .Transformation matrix Application in telescope	
38	3	Angular momentum , inertia tensor.	Moment of inertia about all axis passing through CG. Angular momentum , inertia tensor	
39	3	Euler's equations of	Effect of rotating frame on rotational motion . Euler's equations of motion	

		motion for a rigid body. Torque free motion for a rigid body.	for a rigid body. Torque free motion for a rigid body.	
CO:3 Small oscillations.Coriolis force.Inertia tensor.				
LO:3: Oscillatory motion in nature.Centrifugal and coriolis force.Inertia of rotational motion.				
40	4	Symmetries of space and time.	Lorentz transformation equations Rest mass and proper time. Definition 4-scalar and 4- vector	Book 2,3,4
41		Invariance under Galilean transformation. Covariant 4-dimensional formulation.	Displacement 4-vector.velocity Momentum .acceleration 4-vector and Lorentz invariants	
42	4	4-momentum and 4-force.	Momentum4-force.Force 4-momentum and 4-force.lorentzs invariants	
43	4	Relativistic mechanics. Covariant Lagrangian	Lagrangian and Hamiltonian will not be the same in relativistic mechanics. formulation of covariant lagrangian Formulation of covariant lagrangian	
44	4	covariant Hamiltonian	Formulation of covariant Hamiltonian	
45	4	examples	examples	
CO:4 Relativistic Mechnics..Invariance of the laws of Physics.				
LO:4 Nature of space and time when velocity approaches the velocity of light.Four space and its geometry.4-vectors and invariance of the laws of physics.

CO 4	2	3						1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic Principles of Laser:	Introduction to Laser	B.N.2
2			spontaneous and stimulated emission	B.N.2
3			Einstein coefficients	B.N.2
4			Idea of light amplification	B.N.1
5			Maxwell's equations	
6			Population inversion	
7			laser pumping schemes for two and three level system	
8			threshold condition for laser oscillation	
9			Numerical	
CO: Understanding of basic concept of laser mechanism				
LO1: Population inversion and threshold condition for laser				
12	2	Properties of Laser Beams and Resonators	Temporal coherence	B.N.1
13			spatial coherence	B.N.2
14			directionality and monochromatic of laser beam	
15			resonators	
16			vibrational mode of resonators	
17			laser amplification	
18			open resonator	
CO: Understanding of properties of laser beam and resonator				
LO2 :Temporal coherence, special coherence, models of resonator and amplification process				
21	3	Types of Laser	Solid state lasers	B.N.2
22			Ruby Laser	B.N.2
23			Nd- Yag Laser	B.N.2
24			Semiconductor laser	
25			Gas laser i.e. Carbon dioxide Laser	

26			He- Ne Laser	
27			Basic idea about liquid laser	
28			Dye laser and chemical laser	
29			HCl and HF lasers	
CO3 : Getting knowledge of types of laser and application of lasers				
LO3 : Solid state laser, gas laser, dye laser, etc				
30			Holography and its principles	B.N.5
31			theory of holograms	B.N.5
32			reconstruction of image	B.N.5
33			characteristics Holographs	B.N.5
34			Application of lasers in chemistry and optics laser in Industry	B.N.5
35			laser belding	B.N.5
36			Holedrilling	B.N.5
CO4 : Basic idea about non linear optics				
LO4 : Holography, laser drilling, laser cutting and laser application in medicine.				
Second and third harmonic generation phase matching and optical mixing				

VI: Book References:

1. Laser- Syelto
2. Optical electronics- Yarive
3. Laser Spectra Scopy- Demtroder
4. Laser Spectroscopy and Instrumentation Demotroder
5. Non Linear Optics by B.B. Loud

VII: Notes:

1. There will be individual assignment, presentations /viva.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Quantum Mechanics-I			
M.Sc. I Sem			
Goal : Students develop the ability to understand the fundamental of laser physics			
Objective: The objective of this course is to accustom the students with the fundamentals of laser physics with its applications. Students will be able to understand concepts of non linear optics.			
12-15 Marks	8-11 Marks	05-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students develop the ability to solve problems based on threshold condition of laser	Students develop the ability understand the different types of laser	Students develop the ability understand the simple theories	% Students Need More Effort to understand harmonic generations in non linear optics

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva out of 50	CCE out of 50	Assignment out of 50		

Lesson Plan**Subject: Nuclear Physics****Session: Jul-Dec****Class: M.Sc. Physics III Sem**

I: Objective of course: The objective of this course is to make clear the students with the basic Properties of Nucleus, Nuclear force and their properties, Beta decay and selection rule for beta decay and particle physics. Students will get the knowledge about Charge accelerator and different type of conservation laws in elementary particles.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 and exam scheme as per davv university.

III: Course Outcomes (CO):

- CO1 Understanding of the nuclear Interaction and nuclear reactions and elementary particles.
- CO2 Understanding of the working of different charged particle accelerations
- CO3 Be able to gain knowledge about various nuclear models and nuclear Quadra pole moment
- CO4 Acquire knowledge about nuclear decay processes and their outcomes. Have a wide understanding regarding beta and gamma decay.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2		2	3	2		1

CO 3	3	2	3		1	3		
CO 4	1	2	3	2		1	2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
PART-I				
1	1	Nuclear and Particle Physics	Nuclear forces	B. No.1&2
2			exchange and tensor forces	B. No.1&2
3			meson theory of nuclear forces	B. No.1&2
4			Low- energy n-p scattering	B. No.1&2
5			Spin dependence of n-p forces.	B. No.1&2
6			Direct and compound	B. No.1&2
7			nuclear reaction mechanism,	B. No.1&2
CO: 1				
LO: Understand the nuclear interactions, nuclear forces and their properties. And also understand the direct and compound nuclear reaction				
8	2	Accelerators of charged particles:	Study of cyclotron, phase stability	B. No.1-4
9			frequency modulated cyclotron	B. No.1-4
10			synchorocyclotron)	B. No.1-4
11			magnetic induction accelerator(Betatron)	B. No.1-4
12			Electron synchrotron and.	B. No.1-4
13			linear accelerator (Linac)	B. No.1-4
CO 2, CO3				
LO: Learn the principle; working and use of different type of charged particles accelerators such linear and cyclic accelerators with their phase stability				
14	3	Nuclear models	Liquid drop model	B. No.1-7
15			Bohr- wheeler’s theory of nuclear fission	B. No.1-7
16			shell model	B. No.1-7
17			spin orbit interaction, magic number	B. No.1-7
18			spin and angular momenta of nuclear ground state	B. No.1-7
19			nuclear quadrupole moment	B. No.1-7
CO2, CO3				

LO: Learn about the nuclear liquid drop models, Shell model. Also understand the Nuclear Spin and angular momentum

20	4	Nuclear decay and elementary particles	β Decay, general features of β ray spectrum,	B. No.1-7
21			Basic theory of Beta Decay	B. No.1-7
22			Fermi theory of β decay basics	B. No.1-7
23			Fermi theory of β decay	B. No.1-7
24			selection rules	B. No.1-7
25			parity in β decay	B. No.1-7
26			multipole radiation	B. No.1-7
27			internal conversion	B. No.1-7
28			nuclear isomerism	B. No.1-7

CO3,CO4

LO Learn about the decay process of nucleus. Study of Beta decay by Fermi Theory and selection rules for the beta decay.

29	5	Elementary particles	Different type of Interaction in elementary particles	B. No.1&2
30			Classification of elementary particles	B. No.1&2
31			fundamental interaction	B. No.1&2
32			parameters of elementary particles	B. No.1&2
33			Symmetry	B. No.1&2
34			conservation laws	B. No.1&2
35			symmetry schemes of elementary particles SU(3)	B. No.1&2
36			Some Doubts	B. No.1&2
37			Numerical regarding Nuclear size and shape	B. No.1&2

CO4

LO: Understand the classification of elementary particles and fundamental interactions, symmetry and conservation laws for elementary particles

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- B. No.1: Atomic and Nuclear physics: S.N.Ghoshal
- B. No.2: Nuclear and Particle Physics: D.C. Tayal
- B. No.3: Nuclear Physics: R.C. Sharma

Lesson Plan

Subject: Statistical Mechanics

Session: January to June

Class: M.Sc –II Sem

I: Objective of course: The objective of this course is to acquaint the students with the basic concepts of Statistical Mechanics .

II : Examination-The faculty member will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory

III: Course Outcome(CO)

Co 1: Macro and Micro states. Different types of ensembles. Liouville's theorem. Partition function

Co2 :Maxwell –Boltzman, Fermi –Dirac and Bose –Einstein's systems and their statistics.

Co3: Statistics of real systems .Ising Model.

Co4: Fluctuations and their explanation in statistical systems

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
CO1	2	3			3		3	2
CO2	2	3			3		3	2
CO3	2	3			3		3	2
CO4	2	3			3		3	2

V: Session Plan:

Lecture No	Unit No	Topic	Sub Topic	Reference
1	1	Macro and Micro states. Different types of ensembles. Liouville's theorem.	Introduction. Conditions for statistical Mechanics. Principle of statistical Mechanics	Book 1,2
2			Contact between statistics and thermodynamics $S = k \log \Omega$.	
3			Prove Relations $k = \frac{1}{\beta T}$, $\eta = \frac{P}{KT}$, $\xi = -\frac{\mu}{KT}$, $\frac{\partial S}{\partial E} = \frac{1}{T}$, $\frac{\partial S}{\partial V} = \frac{P}{T}$, $\frac{\partial S}{\partial N} = -\frac{\mu}{T}$	
4			Classical ideal gascntd	

5		Partition function	Classical ideal gas completed	
6			Derivation of various gas relations from statistical mechanics	
7			Change in entropy, Gibbs paradox and its explanation	
8			Types of ensemble.Ensemble averages. Density distribution function	
9			Liouville's theorem in canonical ensemble	
10			Liouville's theorem is the equation of continuity of density of states.	
11			To find thenumber of phase cells for one dimensional harmonic oscillators.	
12			To derive Maxwell Boltzmann distribution Law...CNTD	
13			To derive Maxwell Boltzmann distribution Law, completed	
14			Partition Function. Thermodynamics Relation $A = -KT \log Z$	
15			Energy fluctuation in canonical ensemble	
16			Energy and density fluctuation in grand canonical ensemble	
CO:1				
LO:Mechanics of systems having large number of independent particles.Types of ensembles of such systems and their mechanics.Distribution of energy and partition function.				
17	2	Maxwell – Boltzman, Fermi – Dirac and Bose – Einsteins systems and their statistics	Difference between Bose Einstein's(BE) , Fermi Dirac (FD) and Maxwell Boltzmann (MB)Statistics.	Book 1,2,3
18			BE distribution function	
19			BE Distribution Law	
20			Ideal Bose gas and Bose Einstein's condensation...cntd	
21			Ideal Bose gas and Bose Einstein's condensation...completed	
22			FD distribution function	
23			FDDistribution Law	
24			Ideal Fermi gas and its properties at o ⁰ K like zero point energy, pressure etc....cntd	
25			Ideal Fermi gas and its properties at o ⁰ K like zero point energy, pressure etccompleted	
26			Boltz transport equation	
CO:2				
LO:Quantum systems.Systems of half of odd inetegral spin particles and energy at absolute zero.Systems of particles having integral spin and super conductivity. Bose condensation.				
27	3	Statistics of real systems	Difference between ideal system and real system .Inclusion of potential energy in the expression foe Hamiltonian	Book2,4
28		.Ising	Cluster expansion.	

29		Model.	Virial equation of state and virial coefficient.	
30			Ferro and Para magnetism, phase transition and critical temperature	
31			Ising model and meaning of ising model	
32			Mean field theory ising model to explain Ferro and Para magnetism ...cntd	
33			Mean field theory ising model to explain Ferro and Para magnetism ...completed	
34			Expression for T_c	
35			Exact solution of one dimensional ising model....cntd	
36			Exact solution of one dimensional ising model....completed ,and this can also not explain T_c	
CO:3				
LO:Understanding para and ferro magnetism and phase transition.Critical temperature.				
37	4	Fluctuations and their explanation in statistical systems	Thermodynamic variables fluctuate	Book2,3
38			Defining fluctuations, mean ms,rms and formulae	
39			Fluctuation in pressure	
40			Fluctuation in volume	
41			Fluctuation in enthalpy	
42			Langevin's theory of Brownian motion	
43			Fluctuation dissipation Theorem	
44			Fokker Planck Equation	
45			Onsager reciprocity relations	
CO:4				
LO:Fluctuations in properties of statistical systems.

V: Session Plan:

Lecture No.	Unit No.	Topic	Subtopic	Reference Books
1	1	Number systems and their arithmetics.	Binary, Octal, Decimal, and hexadecimal number systems	Book 2,3
2			conversion between decimal to other number systems	
3			conversion between other number systems to binary	
4			Boolean arithmetic ,addition and	

			subtraction.		
5			Boolean arithmetic multiplication and division.		
6			signed and unsigned binary numbers		
7			1's complement representation of –ve numbers		
8			2's complement representation of –ve numbers		
9			Numerical problems		
CO 1:					
LO: Preparing base to understand working of computer and its language.Arithmetic of binary numbers.					
10	2	Boolean algebra.Gates and switches. K-Map	BCD, Gray, ASCII, EBCDIC codes and their use	Book1, 2,	
11			DeMorgan's theorem.		
12			Gates: OR, AND, NOT GATESfrom switches .their logic and symbol.		
13			NOR, OR, NAND, XOR, XNOR ,gates their logic and symbol		
14			laws and theorems of Boolean algebra		
15			Boolean identities		
16			SOP and POS form of implementing a truth table		
17			K-Map for 3 and 4 variables		
18			Designing half and full adder table with K Map		
CO 2:					
LO:Basic building blocks used to design logic circuits.switches and Gates. Electronic switches. Use of K-Map for designing circuits.					
19	3	Circuits used in computers.Flip-Flops, registers	4 to 1 Multiplexer and 1 to 4DE multiplexer circuit and their use truth table and diagram using gates	Book1, 2,3	
20			encoder, decoder circuit and their use truth table and diagram using gates		
21			parity checker and generator their use diagram using XOR, XNOR gates		
22			Flip- Flops: R-S, D flip-flop. D Flip- Flop as a memory element.		
23			J-k flip flop and race around condition.		
24			J-k Master slave Flip- Flop and getting rid of race around condition		
25			4-bit parallel register		
26			Left shift register.		
27			right shift register.		
CO 3:					

LO:Flop-Flops as memory element.Their use in other circuits as-adder, subtractor,registers

Lesson Plan

Subject Electro Dynamics and Plasma Physics

Session July-Dec

Class: M.Sc. – I Sem

I: Objective of course: The objective of this course is to accustom the students with the fundamentals of electrodynamics and use of Maxwell's equations. Concept of fourth state of matter is introduced with its experimental study.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory.

III: Course Outcomes (CO):

After the completion of the course students will have knowledge of

1. Understand and apply the laws of electromagnetism and Maxwell's equations in different forms in different media also the concept of gauge transformation.
2. Get knowledge of field of accelerated charged particles and review of four vectors and Lorentz transformation
3. Understand the origin of plasma, conditions of plasma formation and properties of plasma
4. Study domain of magneto hydrodynamics and plasma physics and their experimental study

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	2	1			1	
CO 2	2	3		1				
CO 3	1	3						
CO 4	2	3						1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Introduction to Elctrostatic potential	Review of Basics of electrostatics and megnetostatics (electric field, gauss.s law)	B.N.2
2			Laplaces and Poisson equation	B.N.2
3			Methods of Images	B.N.2
4			Biot- Sawart law, Ampere law	B.N.1
5			Maxwell's equations	B.N.1
6			scalar and vector potentials	B.N.1
7			gauge transformation, Lorentz guage, Coulomb Guage	B.N.1
8			Solution of Maxwell equations in conducting media radiations by moving charges	B.N.1
9			retarded potentials	B.N.1
10			Lienard Wiechrt potentials	B.N.1
11			fields of charged particles in uniform motion, fields of arbitrarily moving particle.	B.N.1
CO: Understand and apply the laws of electromagnetism and Maxwell's equations in different forms in different media also the concept of gauge transformation				
LO: advanced problems based on classical electrodynamics using Maxwell's equation				
12	2	Concept of Langrangian and Hamiltonian	Fields of accelerated charged particies at low velocity and high velocity	B.N.1
13			Angular distribution of power radiated	B.N.3
14			Review of four vector and Lorentz transformation in 4- dimensional spaces	B.N.3
15			Invariance of electric charge, relativistic transformation properties of E and H fields	B.N.3
16			Electromagnetic fields tensor in 4- dimensional Maxwell equation,	B.N.3
17			Four vector current and potential and their invariance under Lorentz transformation	B.N.3
18			covariance of electrodynamics. Langragian and Hamiltonian for a relativistic charged particle in External EM field	B.N.3
19			motion of charged particles in electromagnetic fields	B.N.3

uniform and nonuniform E and B fields.

20		uniform and nonuniform E and B fields.		
CO : Get knowledge of field of accelerated charged particles and review of four vectors and Lorentz transformation				
LO: Four vector concept and Lorentz transformation.				
21	3	Intoduction to Fourth state of Matter	Elementary concept of occurrence of plasma	B.N.2
22			Gaseous and solid state plasma	B.N.2
23			Production of gaseous and solid state plasma	B.N.2
24			Plasma parameters	B.N.2
25			Plasma confinement pinch effect instability in a pinched plasma column. Electrical neutrality in plasma	B.N.2
26			Dabve screening distance	B.N.2
27			Plasma oscillations	B.N.2
28			Numericals based on plasma oscillation	B.N.2
29			Transverse oscillations and longitudinal oscillations.	B.N.2
CO: Understand the origin of plasma, conditions of plasma formation and properties of plasma				
LO: concept and properties of plasma				
30	4	Magnetodynamics of Plasma	Domain of Magnetohydrodynamics	B.N.1
31			plasma Physics Magnetohydrodynamic equations	B.N.1
32			magnetic hydro-static pressure hydrodynamic waves	B.N.1
33			Magneto-sonic and Alfven waves	B.N.1
34			particle orbits and drift motion in a plasmas	B.N.1
35			Experimental study of plasma	B.N.1
36			The theory of single and double probes	B.N.1
CO4: Study domain of magneto hydrodynamics and plasma physics and their experimental study				
LO: Experimental studies of magneto hydrodynamics				

VI: Book References:

Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students develop the ability to solve electro dynamic problems	Students develop the ability understand the Maxwell's equations and its application	Students develop the ability understand the simple theories	% Students Need More Effort to understand four vector and Lorentz transformation in 4-dimensional spaces

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva out of 50	CCE out of 50	Assignment out of 50		

IPS ACADEMY, DEPARTMENT OF PHYSICS, INDORE**Lesson Plan****Subject: (Numerical techniques Based on C++)****Session: Feb -May****Class: M.Sc. Physics IV semester**

I: Objective of course: The objective of this course is to acquaint the students with the basic Knowledge of programming in C++, Root finding methods, Solution of linear system, Curve fitting, Interpolation and Numerical integration

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will have total 5 optional questions. Each question carries 17 marks.

III: Course Outcomes (CO):

- CO1 To develop Knowledge of C++ language using different data type such as integer, float etc and understanding the basic knowledge of operators, control structures, logical expression etc.
- CO2 It helps to understand the different modules like loops, functions, array, etc
- CO3 Understand the linear system of matrix using different methods like Gauss elimination, Jacobi Gauss Siedel and gets a wide knowledge of numerical methods in computational physics that can be used to solve many problems which does not have any analytic solution.
- CO4 Applying C++ knowledge to understand interdisciplinary problem/concepts

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2		2	3	1	3	1	1
CO 2	1		3	3	2	3	1	
CO 3	3		3	3		1	3	
CO 4	3		2	3	1	2	2	

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction of syllabus & units	-
2	FIRST	Programming in C++ language	Numeric type	B.R.1
3			Expression	B.R.1
4			Input and output conditions	B.R.1
5			Logical expressions	B.R.1
6			Selection control structure	B.R.1
7			C++ program problem solving	B.R.1
8			C++ program problem solving	B.R.1
CO1				
LO 1: Learn Basic of C++ including operators and selection control structures				
9	SECOND	Loops, Function and Array	for loop, its syntax, flow chart and related problems	B.R.1
10			while loop, its syntax, flow chart and related problems	B.R.1
11			do-while loop, its syntax, flow chart and related problems	B.R.1
12			user defined and library functions, Call by value, call by reference	B.R.1
13			Category of functions with its program	B.R.1
14			Numeric and character array	B.R.1
15			Programs related to array	B.R.1
16			General programs that uses loops, function and array	B.R.1
CO2				
LO 2: Understand loops, function and Arrays used in C++				

17	THIRD	Root finding methods	Elements of error analysis	B.R.5
18			Related problems of Error analysis	B.R.5
19			Bisection method and its numericals	B.R.5
20			C++ program for finding roots by bisection method	B.R.5
21			False Position or Regula Falsi Method and its numericals	B.R.5
22			C++ program for finding roots by False Position or Regula Falsi Method	B.R.5
23			Newton Raphson method and its numericals	B.R.5
24			C++ program for finding roots by Newton Raphson method	B.R.5
CO1,2, 4				
LO 3: Learn various types of root find methods using C++				
25	FOURTH	Solution of linear system	Gauss Elimination method	B.R.5
26			Numerical related to Gauss Elimination method	B.R.5
27			C++ program to find solution of linear system by Gauss Elimination method	B.R.5
28			Jacobi iteration	B.R.5
29			Numerical related to Jacobi iteration	B.R.5
30			C++ program to find solution of linear system by Jacobi iteration	B.R.5
31			Gauss Siedel method and its related numerical	B.R.5
32			C++ program to find solution of linear system by Gauss Siedel method	B.R.5
CO1,2,3,4				
LO 4: Learn Solution of Linear system of equation by successive iterations methods using C++				

33	FIFTH	Curve fitting, Interpolation and Polynomial approximation & Numerical integration	Least Squares Line fitting , its numerical and C++ program for Least Squares Line fitting	B.R.5
34			Lagrange interpolation and its numerical	B.R.5
35			C++ program for Lagrange interpolation	B.R.5
36			Newton Interpolation and its numerical	B.R.5
37			C++ program for Newton Interpolation	B.R.5
38			Newton-cotes integration, Trapezoidal Rule and Simpson’s Rule.	B.R.5
39			Numerical related to Newton-cotes integration, Trapezoidal Rule and Simpson’s Rule	B.R.5
40			C++ program for Newton-cotes integration, Trapezoidal Rule and Simpson’s Rule	B.R.5
CO1,2,3,4				
LO 5: Understand Curve fitting, Interpolation and Various numerical Integration methods with C++				

VI: Book References:

1. Programming with C++, Schaum's Outline Series: J. Hubbard
2. Object oriented programming in Turbo C++: Robert Lafore
3. Teach yourself C++ in 21 days: Jesse Liberty
4. Numerical methods for mathematical, science and engineering by J. H. Mathews
5. Computer Oriented Numerical methods by V. Rajaraman
6. First course in numerical analysis : A Ralston

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
3. The result of each tests/assignment will be declared within one week
4. Late submissions will not be accepted in any case
5. Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Paper III (Numerical techniques based on C++)			
M.Sc. (Physics) IV sem			
Goal : Students develop the ability to understand Numerical different method for determination of roots, curve fitting, linear solutions and numerical integration using C++ language			
Objective: The objective of this course is to acquaint the students with the basic Knowledge of programming in C++, Root finding methods, Solution of linear system, Curve fitting, Interpolation and Numerical integration.			
14,15 Marks	9-13 Marks	5-8 Marks	0-4 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of programming in C++, Root finding methods, Solution of linear system, Curve fitting, Interpolation and Numerical integration with their Programs	% Students having the basic concept of programming in C++, Root finding methods, Solution of linear system, Curve fitting, Interpolation and Numerical integration	% Students having understanding about programming in C++, Root finding methods, Solution of linear system	% Students Need More Effort to understand the related topics

IX: Scheme of internal marks

Presentation /Viva	Assignment	Class Test	Total 150	Final Internal Marks Out of 15
50 marks	50 marks	50 marks		

Lesson Plan

Subject: Quantum Mechanics - I

Session July-Dec

Class: M.Sc. – I Sem

I: Objective of course: The objective of this course is to accustom the students with the fundamentals of quantum mechanics based on Schrodinger method, Heisenberg method and operator method along with basic concepts of angular momentum.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory.

III: Course Outcomes (CO):

After the completion of the course students will have knowledge of

1. Understanding the basic concepts of quantum mechanics, mathematical tool Schrödinger equation and its application to one dimensional problems.
2. Heisenberg formulation of quantum mechanics.
3. Solution of time independent Schrodinger equation in 3-D problems
4. Angular momentum and its addition and Representation theory.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	3		1		2	2
CO 2	3	3	2		2		1	2
CO 3	3	3	2		2		2	2
CO 4	3	3	2		2		1	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1.	Properties of wave function and 1-D problems	Need of Quantum Mechanics	B.No. 4
2			Wave packet, Group, Phase and particle velocity and their relations	
3			Properties of wave function	
4			Equation of Continuity	
5			Commutation relations with examples	
6			Ehrenfest theorem	
7			Basic postulates of quantum mechanics	
8			Theorems on eigen value and hermitian matrices	
9			Infinite potential well	
10			Finite potential well	
11			Continued- Finite potential well	
12			Potential step	
13			Rectangular Potential barrier	
14			Continued- Rectangular Potential barrier	
15			Tunneling effect and alpha decay	
CO1				
LO1: Wave function and its properties, operators, expectation values and solution of time independent Schrödinger equation for potential well, potential step and potential barrier.				
16	2	Dirac's notations and matrix operator method	Vector space, Hilbert space and Dirac's notation	B.No. 1, 2
17			Matrix notation, Unitary transformation	
18			Heisenberg uncertainty Principle & its derivation	
19			Probability density, position in momentum representation	
20			Momentum in momentum representation	
21			Linear harmonic oscillator by operator method	
22			Matrix elements of a , a^\dagger , aa^\dagger , $a^\dagger a$	
23			Linear harmonic oscillator by matrix method	
24			Matrix elements of x and p	
25			Schwartz inequality	
CO2				
LO2: Concepts of linear vector space, matrix formulation of quantum mechanics in Dirac's representations. Theory of unitary transformation and operator formulation of harmonic oscillator.				
26	3	Time independent 3-Dimensional problems	Linear harmonic oscillator by Schrodinger method	B.No. 1,3
27			Continued-Linear harmonic oscillator	
28			Hydrogen method- angular part	
29			Hydrogen method- radial part	
30			Application to atomic and molecular spectra	

31			Square well potential	
32			Application to deuteron problem	
CO3				
LO3: Solution of harmonic oscillator, square well potential and H_2 atom by Schrödinger method and their applications.				
33	4	Angular momentum and its addition	Angular momentum in quantum mechanics and Commutation relations of angular momentum	B.No. 1,4
34			Continued- Commutation relations	
35			Angular momentum in spherical coordinates	
36			Continued- Angular momentum in spherical coordinates	
37			Eigen value of L^2 and L_z	
38			Matrix elemrnts of J_+ , J_- , J_x	
39			Matrix elemrnts of J_y , J_z , J	
40			Wave function and operators in momentum representation	
41			Spin angular momentum	
42			Pauli spin matrices	
43			Addition of angular momentum - CG coefficient	
44			Properties of CG coefficient	
45			Computation of CG coefficient	
CO4				
LO4 Commutation relation, eigen values and eigen function of L^2 and L_z , addition of angular momentum using CG coefficient along with co-ordinate and momentum representation of the wave function and operators.				

VI: Book References:

1. Quantum Mechanics, G.Aruldas, Prentice –Hall of India
2. Quantum Mechanics, Ajoy Ghatak and S.Lokanathan, Macmilan
3. Quantum Mechanics- Theory and problems, S.L.Kakani and H.M.Chandalla
4. Quantum Mechanics, K.K.Chopra and G.C. Agarwal, Krishna Prakashan Media

VII: Notes:

1. There will be individual assignment, presentations /viva.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Quantum Mechanics-I			
M.Sc. I Sem			
Goal : Students develop the ability to understand the fundamental of quantum mechanics			
Objective: The objective of this course is to accustom the students with the fundamentals of quantum mechanics based on Schrodinger method, Heisenberg method and operator method along with basic concepts of angular momentum.			
12-15 Marks	8-11 Marks	05-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students develop the ability to solve quantum mechanical problems	Students develop the ability understand the different approximation methods	Students develop the ability understand the simple theories	% Students Need More Effort to understand approximation methods, scattering theory and relativistic quantum theory

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva out of 50	CCE out of 50	Assignment out of 50		

Department of Physics, IPS ACADEMY, INDORE**Lesson Plan****Subject: ATOMIC AND MOLECULAR PHYSICS****Session: Jul-Dec 2018****Class: M.Sc. Physics III Sem**

I: Objective of course: The objective of this course is to make clear the students with the basic concept of atom and molecular structures. Study of types of molecules and their different spectra and techniques and instrumentation.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 and exam scheme as per DAVV university.

III: Course Outcomes (CO):

CO1 Understanding of the principle and application of NMR spectrum.

CO2 Understanding of alkaline spectra of diatomic molecules and Mossbauer spectroscopy.

CO3 Be able to apply the principle of Raman spectroscopy and its application in the different field of science and technology.

CO4 to become familiar with different resonance spectroscopic techniques and its applications.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3				2		2	
CO 2	2	3	2		3	2		
CO 3		3	3		2	3		
CO 4		3	3	2		3	3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
PART-I				
1	1	UNIT 1	Concept of Nuclear Magnetic resonance spectroscopy	B. No.1
2			Interaction between nuclear spin and magnetic field	B. No.1
3			Interaction between nuclear spin and magnetic field	B. No.1
4			Population of energy level	B. No.1
5			Relaxation Processes	B. No.1
6			spin-spin interaction and spin-spin coupling between two and more nuclei (Qualitative)	B. No.1
7			spin-spin interaction and spin-spin coupling between two and more nuclei (Qualitative)	B. No.1
CO: 1				
LO: Concept and application of NMR				
8	2	UNIT2	Franck Condon principles	B. No.1&2
9			Franck Condon principles	B. No.1&2
10			dissociation and pre- dissociation, dissociation energy	B. No.1&2
11			Born-Oppenheimer-approximation	B. No.1&2
12			Born-Oppenheimer-approximation	B. No.1&2
13			vibrational coarse structure of electronic spectra (bands progression and sequence)	B. No.1&2
CO 2, CO3				
LO1. LO Electron spectra of diatomic molecules				
14	3	UNIT3	Raman Effect, Quantum Theory Of Raman Effect, , ,	B. No.1&2
15			Molecular Polarisibility In Raman Effect,	B. No.1&2

16			Vibrational Raman Spectra Of Diatomic Molecules	B. No.1&2
17			vibration-rotation Raman spectra of diatomic molecules	B. No.1&2
18			application of Raman Spectroscopy in the structure determination	B. No.1&2
19			application of infrared spectroscopy in the structure determination	B. No.1&2

CO2, CO3**LO:** Basic and advance concept and uses of Raman Spectra

20	4	Unit 4	Elementary idea about Mossbauer Effect, , , , (,	B. No.1&2&3
21			principles of Mossbauer spectroscopy	B. No.1&2&3
22			recoil less emission of gamma emission	B. No.1&2&3
23			line width and resonance absorption	B. No.1&2&3
24			application of mossbaur spectroscopy	B. No.1&2&3
25			application of mossbaur spectroscopy	B. No.1&2&3
26			Isomer shift	B. No.1&2&3
27			Quadra pole splitting magnetic field effect)	B. No.1&2&3
28			Viva Voce	B. No.1&2&3

CO3,CO4**LO:** Concept and application of Mossbauer Spectroscopy

29	5	Unit 5	Electron Spin Resonance Spectroscopy	B. No.1&2&3
30			Elementary idea about spectroscopy	B. No.1&2&3
31			Principle of ESR	B. No.1&2&3
32			ESR spectrometer	B. No.1&2&3
33			Splitting of Electron Energy Level by magnetic Field	B. No.1&2&3

34			G Values	B. No.1&2&3
35			Simple Experimental of ESR	B. No.1&2&3
36			ESR Spectra of Free radicals	B. No.1&2&3
37			An Isotropic System	B. No.1&2&3
CO4, CO2				
LO: Idea about ESR and EPR spectroscopy				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- B. No.1: Atomic and Molecular Physics: Rajkumar
- B. No.2: Spectra of diatomic Molecules: Herzberg
- B. No.3: Mossbauer Spectroscopy :M.R Bhide
- B. No.4: Modern Spectroscopy J.M. Hollons.
- B. No.5:NMR and Chemistry: J. W. Akitt
- B. No. 6: Principle and applications of ESR Spectroscopy: A. Lund Masaru Shiotani Shigetaka Shimada

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
