5. Late submissions will not be accepted in any case.

VIII Rubric for Internal Assessment			
Subject: Atomic and Molecular Physics			
M.Sc. III Sem			
Goal: Students develop the ability to understand the behavior of molecules with their different spectra. And gain the knowledge about spectroscopic techniques and instrumentation.			
Objective: the students with the basic concept of atom and molecular structures. Study of types of molecules and their different spectra and techniques and instrumentation.			
12-15 Marks	8-11 Marks	6-8 Marks	1-5 Marks
Students	Students	Students	Students
Outstanding	Good	average	poor
% Students having the basic concept of spectroscopy the behavior of molecules with their different spectra. And gain the knowledge about spectroscopic techniques and instrumentation	% Students having the basic concept of spectroscopy the behavior of molecules with their different spectra. And gain the knowledge about spectroscopic techniques and instrumentation	% Students having the basic concept of spectroscopy the behavior of molecules with their different spectra. And gain the knowledge about spectroscopic techniques and instrumentation	% Students having the basic concept of spectroscopy the behavior of molecules with their different spectra. And gain the knowledge about spectroscopic techniques and instrumentation

IX: Scheme of internal marks

Internal Assessment			Total 100	Final Internal Marks Out of 15
Presentation/ Viva Out of 50	Class Test Out of 50	Assignment Out of 50		

Department of Physics, IPS ACADEMY, INDORE**Lesson Plan****Subject: ATOMIC AND MOLECULAR PHYSICS****Session: Jul-Dec 2018****Class: M.Sc. Physics II Sem**

I: Objective of course: The objective of this course is to make clear the students with the basic concept of atom and molecular structures. Study of types of molecules and their different spectra and techniques and instrumentation.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 85 and exam scheme as per DAVV university..

III: Course Outcomes (CO):

- CO1 Understanding of the quantum states of the one electron atom and methods of molecular quantum mechanics
- CO2 Types of molecules and rotational spectra of diatomic molecule with their energy level and intensity of rotational lines
- CO3 Vibrational energy of diatomic molecules with energy levels and spectrum. IR spectrometer
- CO4 Introduction of different types of molecular spectroscopy

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3				2		2	
CO 2	2	3	2		3	2		
CO 3		3	3		2	3		
CO 4		3	3	2		3	3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
-------------	----------	--------	-----------	-----------

PART-I				
1	1	UNIT 1	Quantum states of one electron atom. Atomic orbital.	B. No.1
2			Hydrogen spectrum, Pauli's principle, Spectra of alkali elements,	B. No.1
3			Spin orbit interaction and line, Structure of alkali Spectra	B. No.1
4			Methods of molecular quantum mechanics, Thomas Fermi statistical model,	B. No.1
5			Two electron system. Interaction energy in L-S and J- J coupling,	B. No.1
6			hyperfine structure (qualitative),	B. No.1
7			Line Mechanisms (general ideas).	B. No.1
8			Practical Assignments	
9			Viva Voce	
CO: 1				
LO: Understand about hydrogen spectrum different types of coupling and method of molecular quantum mechanics				
10	2	UNIT2	Types of molecules, Diatomic linear. Symmetric top,	B. No.1&2
11			Asymmetric top and spherical top molecules	B. No.1&2
12			Trial Balance-Practical Questions	B. No.1&2
13			Rotational spectra of diatomic molecules as a rigid rotator	B. No.1&2
14			Energy level and Spectra of non - rigid rotator,	B. No.1&2
15			Intensity of rotational lines	B. No.1&2
16			Numericals related Rotational Vibrational Spectra	
17			Viva Voce	
CO 2, CO3				
LO: Diatomic linear, symmetric top asymmetric top and spherical top molecule and their spectra.				
18	3	UNIT3	Vibrational energy of diatomic molecule,	B. No.1&2
19			diatomic molecule as a simple harmonic oscillator	B. No.1&2
20			Energy levels and Spectrum , morse potential energy curve	B. No.1&2

21			Molecules as vibrating rotator	B. No.1&2
22			Vibration spectrum of diatomic molecule PQR branches	B. No.1&2
23			IR spectrometer(qualitative)	B. No.1&2
24			Practical assignment	
25			Viva Voce	

CO2, CO3

LO: Energy levels and spectrum of diatomic molecules Morse potential energy curve, vibrating rotators and IR Spectrometers

26	4	Unit 4	Introduction to ultraviolet and visible spectroscopy	B. No.1&2&3
27			Introduction to infra- red spectroscopy	B. No.1&2&3
28			Pure rotational Spectra.	B. No.1&2&3
29			Pure vibrational spectra	B. No.1&2&3
30			Instrumentation of Raman Spectroscopy.	B. No.1&2&3
31			Idea and Concept about Raman spectroscopy	B. No.1&2&3
32			Photo electron spectroscopy	B. No.1&2&3
33			Elementary idea about photo acoustic spectroscopy	B. No.1&2&3
34			Mossbauer spectroscopy(principle)	B. No.1&2&3
35			Viva Voce	

CO3,CO4

LO: Ultra Violet Visible and infra red and Raman spectroscopy with elementary knowledge of Mossbauer Spectroscopy

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- B. No.1: Atomic and Molecular Physics: Rajkumar
 B. No.2: Spectra of diatomic Molecules: Herzberg
 B. No.3: Mossbauer Spectroscopy :M.R Bhide

Unit no.	Lecture no.	Topics	Sub Topic	Reference
Electronic Devices				
CO: 1				
LO: Identify the major properties of different types of FET's and high frequency special types of diode				

1	1	Transistors and microwave devices	Basic knowledge of semiconductors and diodes	
	2		Construction, Characteristic and working of PN-Junction diode	B.N.1 & B8
	3		Construction, Characteristic and working of BJT	B.N.2 & B.N.6
	4		Construction, Characteristic and working of N and P channel FET	B.N.5
	5		Construction, Characteristic and working of D type and E type MOSFET	B.N.5
	6		Construction, Characteristic and working of MESFET	B.N.5
	7		Construction, Characteristic and working of Gunn Diode and their applications	B.N.5
	8		Two valley model of Gunn diode	B.N.5
	9		Construction, Characteristic and working of TUNNEL DIODE and their applications	B.N.5
	10		Transfer Electron devices (TED)	B.N.5
	11		avalanche transits time devices (Impatt diodes)	B.N.5
	12		microwave devices and their applications	B.N.5
	13		Hands on training of transistors and FET	
CO: 1				
LO: The properties and characteristic curves of photonic devices.				
2	14	Photonic devices	Elementary and basic knowledge about photonic devices	B.N.1
	15		Radiative and Non-Radiative transitions and optical absorption	B.N.2 & B.N.7
	16		bulk and thin film photo conductive devices (LDR) diode	B.N.1
	17		Photo detectors, solar cell (open circuit voltage and short circuit current, fill factor)	B.N.7
	18		LED (high frequency limit, effect of surface and indirect recombination current, operation of LED)	B.N.5
	19		semi-conductors diode lasers (conditions for population inversion in active region)	B.N.2
	20		light confinement factor	B.N.2
	21		Optical Gain And Threshold Current For Lasing	B.N.2
	22		Numerical Questions	B.N.2
CO: 3				
LO: All cocept of memory and storage devices.				

3	23	Memory devices, Hybrid memories and storage devices	Basic idea and concepts about memory, hybrid memory and storage devices	B.N.4		
	24		read only memory (ROM) and random access memory (RAM)	B.N.4		
	25		types of ROM: PROM,EPROM,EEPROM and EAPROM	B.N.4		
	26		static and dynamic RAMs, characteristic of SRAM and DRAM	B.N.4		
	27		Hybrid Memories: CMOS And NMOS Memories	B.N.4		
	28		Nonvolatile RAM Ferro-Electric Memories, Charge Coupled Devices (CCD)	B.N.4		
	29		Geometry And Organization Of Magnetic (FDD And HDD)	B.N.4		
	30		Optical (CD-ROM, CD-R, CD-R/W, DVD) Storage Devices	B.N.4		
CO: 3						
LO: different phenomenon of elctro magneto and acousto optics properties and sensors.						
4	31	Electro Magneto and Acousto – optics theory	Electro Optic Kerr Effect And Their Application	B.N.1		
	32		Magneto Optic Kerr Effect And Their Application	B.N.1		
	33		Acousto Optic Effect And Their Application And Material Properties	B.N.1		
	34		Piezoelectric	B.N.1		
	35		Electrostrictive And Magnetostrictive Effects	B.N.1		
	36		Important Materials For These Properties And Their Applications In Sensors And Actuator Devices	B.N.1		
	37		Resonators And Filter	B.N.1		
	38		High Frequency Piezoelectric Devices-Surface	B.N.1		
	39		Acoustic Wave Devices	B.N.1		
	40		Viva Vose	B.N.1		
			Power Point Presentations			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VIII Rubric for Internal Assessment		
Subject:Electronic Devices		
M.Sc. I Sem		
Goal : Students develop the ability to understand the basic concepts of transistors, special type high frequency diodes, photonic devices, and their working with memory and storage devices. They shall also understand the deferent types of electro-magneto & acusto optic effect.		
Objective: Students gain understanding the working and function of different types of electronic devices.		
10-15 Marks	5-10 Marks	0-5Marks
Students	Students	Students
Outstanding	Average	Need improvement
% Students having the basic concept of transistors, special type high frequency diodes. photonic devices, and their working with memory and storage devices. They shall also understand the deferent types of electro-magneto & acusto optic effect	% Students having the basic concept of the electronic devices but need to improve	% Students having less understanding about electronic devices.

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva Out of 50	Class test Out of 50	Assignment Out of 50		

Physics Department ,ISLE,IPS ACADEMY ,INDORE (MP)

Lesson Plan

Subject: Microprocessor and Microcontroller

Session: January to June

Class: M.Sc–IVSem

I: Objective of course: The objective of this course is to acquaint the students with the basic concepts of how the computer works and how microcontroller can be used in Physics Laboratory

II : Examination-The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is of 85 marks. There will be five questions, each question with internal choice, and all five questions are compulsory

III: Course Outcome(CO)

CO1 : Microprocessor architecture and its important components .

CO 2 : Difference between Microprossor and Microcontroller.and advantages of Microcontroller .

CO 3: Instruction set ,addressing modes and programming principles.

CO 4 : Timer ,Counter,and Ports. Interfacig with external devices

IV: PO-CO Mapping: High-3, Medium-2, Low-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	-			3	1	2

2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Microprocessor and Microcontroller			
M.Sc. VI Sem			
Goal : Students develop the ability to understand the fundamental of working of CPU and Microcontroller.			
Objective: The objective of this course is to accustom the students with the working of digital machines like computer and processors.			
12-15 Marks	8-11 Marks	05-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students develop the ability to design interfacing circuits and write assembly programs.	Students develop the ability understand and analyse given assembly program and interfacing circuits	Students develop the ability to understand the simple theories	% Students Need More Effort to understand the subject rather than cram it.

IX: Scheme of internal marks

Internal Assessment			Total 150	Final Internal Marks Out of 15
Presentation/viva out of 50	CCE out of 50	Assignment out of 50		

Program Outcomes

M.Sc. Mathematics

PO 1: Knowledge to understand the various texts of the mathematics such as Functional Analysis, Abstract Algebra, Real Analysis, Complex Analysis, Operations Research and Numerical Analysis and Integral Transforms etc. Develop mathematical ability in students to solve various types of subjective and practical problems.

PO 2: Provide detail knowledge and skill in different areas of Mathematics for their future and develop the intensive logical and analytical approach to solve real problems of pure and applied sciences.

PO 3: Motivate and prepare for research in different field of mathematics so they can apply their knowledge in the various branches of Mathematical Sciences like Analysis, Geometry, Algebra, Topology etc.

PO 4: Develop skill to take up challenges in the emerging areas of Industry and Business by using mathematical models and solve the real life problems by application of various technique by applied subjects of mathematics.

PO 5: With intensive theoretical and practical knowledge the students will be able to develop the confidence for self-education and ability for lifelong learning in the field of mathematical.

PO 6: Provide the basic knowledge of Information Technology such as C, C++, DBMS etc. so that they become technological strong in computational based research work.

PO 7: Develop the foundation for further studies of national level examinations such as NET, GATE and CSIR etc.

PO 8: Apply the various Mathematical Techniques to solve real problems of Society with the knowledge of the subject.

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION (ISLE), INDORE**Lesson Plan****Subject: Advanced Abstract Algebra-I****Session: Jul-Dec****Class: M.Sc. - I Sem**

I: Objective of course: The course gives the student a good mathematical maturity and enables to build mathematical thinking and skill. The main objective of this course is to encourage students to develop a working knowledge of the central ideas of Field Theory like field extensions, splitting field and Galois theory.

II: Examination: The examination scheme for theory examination of Mathematics subject is as follows:- The Semester examination carrying 85 marks. The Semester exam question paper contains 5 Questions with internal choice. The faculty member will award CCE marks based on Mid semester Test, Pre university Test, Presentation, Assignment and Class performance. The CCE marks of each paper is of 15 marks.

III: Course Outcomes (CO):

CO1 make the students learn about Eisenstein's irreducibility criterion which is quite helpful in the study of solvability of a polynomial.

CO2 Explain and discuss Extension fields and Roots of polynomials.

CO3 Students will justify statements with rigorous mathematical arguments through abstract algebra.

CO4 Introduce the students to advanced ideas such as Polynomial rings, Field theory, Algebraic closures, splitting fields and Galois theory.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Advanced Abstract Algebra-I			
M.Sc. I Sem			
Goal : The goal of this course is to introduce the study of abstract algebra and for students to gain an understanding and appreciation of the elegance, utility and mathematical importance of several algebraic structures; specifically Normal ,Subnormal series, Galois theory etc.			
Objective: This sequence provides an introduction to modern algebra. The sequence exposes students to Normal ,Subnormal series, Galois theory etc.

IX: Scheme of internal marks

Internal Assessment		Class Participation		Total 60	Final Internal Marks Out of 15
MST (20)	PUT (20)	Presentation (10)	Assignment (10)		

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Real Analysis Paper II**
Dec**Session: Jul-****Class: M.Sc. First sem****I: Objective of course:**

Real Analysis is a course that develops this basic material in a systematic and rigorous manner in the context of real-valued functions of a real variable. The course will develop a deeper and more rigorous understanding of Analysis including defining terms and proving theorems about functions, sequences, series, limits, continuity, derivatives, the Riemann integrals, and sequences of functions.

II: Examination:

The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO1: Learn to prove various theorems about Riemann sums and Riemann integrals and emphasize the proofs' development. Analyze and evaluate Riemann-Stieltjes Integral and Its Properties, Sequences and Series of Functions.

CO2: Apply and verify Uniform convergence and its Continuity, Integration, differentiation.

CO3: Investigate and relate Some Special Functions like Power series, The Exponential and Logarithmic Functions, The Trigonometric Functions.

CO4: Skills to calculate the results of Functions of several variables. Can construct rigorous mathematical proofs of The Inverse function theorem, The Implicit function theorem Derivatives of higher order.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2	3	1	2		3	
CO 2	3	3	3	1	3		3	
CO 3	3		3	1			3	
CO 4	3		3	1			3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	The Riemann-Stieltjes Integral	Definition and Existence of Integral	B.N. 1,2
2			Theorems related to above topic	B.N. 1,2
3			Theorems related to above topic	B.N. 1,2
4			Properties of the integral	B.N. 1,2
5			Theorems on above topic	B.N. 1,2
6			Differentiation of the integral	B.N. 1,2
7			Integration of Integral	B.N. 1,2
8			Theorems on above topic	B.N. 1,2
9			Fundamental theorem of calculus	B.N. 1,2
10			Theorem on integration by parts.	B.N. 1,2
CO: 1				
LO1: .Can describes fundamental properties of the real numbers that lead to the formal development of real analysis; and able to understand Definition and Existence of Riemann-Stieltjes Integral and Its Properties, Integration and differentiation, The fundamental theorem of Calculus, integration by parts.				
11	2	The Riemann-Stieltjes Integral, Sequences and Series of Functions	Integration of vector-valued functions	B.N. 1,2
12			Definition and theorem	B.N. 1,2
13			Rectifiable curves	B.N. 1,2
14			Definition and theorem	B.N. 1,2
15			Discussion of main problems	B.N. 1,2
16			Definition and examples	B.N. 1,2
17			Uniform convergence	B.N. 1,2
18			Definition and theorem	B.N. 1,2
19			Uniform convergence and Continuity	B.N. 1,2
CO: 1,2				
LO2: Students will able to find Integration of vector-valued functions, Rectifiable curves. Sequences and Series of Functions: Uniform convergence, Uniform convergence and Continuity.				
20	3	Sequences and Series of Functions	Uniform Convergence and Integration	B.N. 1,2
21			Definition and theorem	B.N. 1,2
22			Uniform convergence and differentiation	B.N. 1,2
23			Theorems on above topic	B.N. 1,2
24			Equicontinuous Families of Functions	B.N. 1,2
25			Theorems and examples	B.N. 1,2
26			Stone-Weierstrass theorem	B.N. 1,2
27			Definition and examples	B.N. 1,2
28			Theorems and examples	B.N. 1,2
CO: 2				
LO3: Determine and implement best practice to Uniform Convergence and Integration, uniform convergence and differentiation, Equicontinuous Families of Functions, Stone-Weierstrass theorem.				
29	4	Some Special	Power series	B.N. 1,2

30		Functions, Functions of several variables	Theorems and corollary	B.N. 1,2
31			The Exponential and Logarithmic Functions	B.N. 1,2
32			The Trigonometric Functions	B.N. 1,2
33			Theorems on above topics	B.N. 1,2
34			The Algebraic Completeness of the complex field	B.N. 1,2
35			Linear transformations	B.N. 1,2
36			Definition and examples	B.N. 1,2
37			Theorems on above topic	B.N. 1,2

CO: 3

LO4: appreciate how abstract ideas and rigorous methods in mathematical analysis can be applied to Some Special Functions: Power series, The Exponential and Logarithmic Functions, The Trigonometric Functions, The Algebraic Completeness of the complex field, Functions of several variables: linear transformations.

38	5	Functions of several variables	Differentiation: Preliminaries	B.N. 1,2
39			Definition, theorems and examples	B.N. 1,2
40			Chain rule, Partial derivatives	B.N. 1,2
41			Theorems and corollary	B.N. 1,2
42			The Contraction Principle	B.N. 1,2
43			The Inverse function theorem,	B.N. 1,2
44			The Implicit function theorem Derivatives of higher order.	B.N. 1,2
45			Differentiation of integrals.	B.N. 1,2

CO: 4

LO5: demonstrate an understanding of Functions of several variables: Differentiation, Chain rule, Partial derivatives, The Contraction Principle, The Inverse function theorem, The Implicit function theorem Derivatives of higher order, differentiation of integral.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Books as Text and Reference:

1. Walter Rudin, Principles of Mathematical Analysis, McGraw Hill.
2. T.M. Apostol, Mathematical Analysis Narosa.
3. H.L. Royden, Real Analysis, Macmillan (Indian Edition)

VII: Notes:

1. There will be individual assignment, presentations and group assignments.

2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Real Analysis			
M.Sc. I Sem.			
Goal: Develop the foundation for further studies of national level examinations such as NET, GATE and CSIR etc. Develop skill to take up challenges in the emerging areas of Industry and Business by using mathematical models and solve the real life problems by application of various techniques by applied subjects of mathematics.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.

Lesson Plan

Subject: Topology-I

Session: Jul - Dec

Class: M.Sc. - I Semester

I: Objective of course: The course gives the student a good mathematical maturity and enables to build mathematical thinking and skill. The main objective of this course is to encourage students to develop knowledge of Topology .

II: Examination:

III: Course Outcomes (CO):

CO 1: Recognize sets and properties of sets , different sets and operations on sets , finite and Infinite sets, countable and uncountable sets. Understand well ordered sets and contour's Theorem.

CO 2: Understand about topological spaces, Bases, order topology, product topology.

CO 3: Students will understand closed sets, interior, exterior and neighborhood of a set. Connected spaces and path connectedness.

CO 4: Recognize first and second countable spaces , separable spaces and Housdroff space.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Complex Analysis-I, Paper IV****Session: Jul-Dec****Class: M.Sc. First sem****I: Objective of course:**

This course is aimed to provide an introduction to the theories when the real numbers are replaced by the complex numbers in the definition of the derivative of a function. These functions, usually known as holomorphic functions, have numerous applications in areas such as engineering, physics, differential equations and number theory to name just a few.

II: Examination:

The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO 1: Introduction to the holomorphic functions and their most important basic properties. The concepts of Complex numbers, functions, limits and differentiability, Cauchy-Riemann relations introduced to learn.

CO 2: Able to learn about the applications of Complex integration and Integration is along paths in the complex plane. The central result of this spectacularly beautiful part of mathematics is Cauchy's Theorem guaranteeing that certain integrals along closed paths are zero.

CO 3: Interpret and solve a variety of power series like Taylor and Laurent with complex functions are presented. Understand application of Rouch's Theorem and Schwarz' Lemma.

CO 4: Describe bilinear transformation and conformal mappings between various plane regions.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 4	3	2	3	2	2		3	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Complex numbers and Analytic function	Complex numbers.	B.N. 1,2
2			Geometrical representation	B.N. 1,2
3			Complex conjugate, Modulus and argument,	B.N. 1,2
4			Properties of modulus, Properties of arguments	B.N. 1,2
5			Inequalities of modulus	B.N. 1,2
6			Cauchy's inequality, Demoiver's theorem	B.N. 1,2
7			Limit and continuity, Continuous function	B.N. 1,2
8			Uniform continuity, Analytic function,	B.N. 1,2
9			Cauchy's Riemann equations.Necessary and sufficient condition for f (z) to be analytic.	B.N. 1,2
10			Conjugate functions, Harmonic functions.	B.N. 1,2
CO: 1				
LO 1: Explain the fundamental concepts of complex analysis and their role in modern mathematics and applied contexts, and able to understand Analytic function, Cauchy's Riemann equations [Necessary and sufficient condition for f(z) to be analytic], Conjugate functions, Harmonic functions.				
11	2	Complex Integration	Complex integration.	B.N. 1,2
12			Some facts about Integration along a contour C	B.N. 1,2
13			Examples on Complex integration	B.N. 1,2
14			Cauchy's fundamental theorem.	B.N. 1,2
15			Cauchy –Goursat theorem.	B.N. 1,2
16			Cauchy integral formula.	B.N. 1,2
17			First order derivatives	B.N. 1,2
18			Higher order derivatives	B.N. 1,2
19			Extension of the Cauchy's theorem to multiply connected regions.	B.N. 1,2
20			Problems on Cauchy's integral.	B.N. 1,2
CO: 2				
LO 2: Demonstrate accurate and efficient use of complex analysis techniques to Complex integration, Cauchy's fundamental theorem, Cauchy–Goursat theorem, Cauchy integral formula, higher order derivatives, extension of the Cauchy's theorem to multiply connected regions.				
21	3	Complex Integration	Morera's theorem.	B.N. 1,2
22			Cauchy's inequality.	B.N. 1,2
23			Liouville's theorem.	B.N. 1,2
24			Corollary and Lemma on above topics.	B.N. 1,2
25			the fundamental theorem of algebra.	B.N. 1,2

26			Application of fundamental theorem.	B.N. 1,2
27			Taylor's theorem.	B.N. 1,2
28			Problems based on Taylor's theorem.	B.N. 1,2

CO: 3

LO 3: Develop the skills to understand Morera's theorem, Cauchy's inequality, Liouville's theorem, the fundamental theorem of algebra, Taylor's theorem and its Problems.

29	4	Complex Integration	The Maximum modulus principal.	B.N. 1,2
30			Schwartz lemma.	B.N. 1,2
31			Corollary and Lemma on above topics	B.N. 1,2
32			Laurent series.	B.N. 1,2
33			Problems based on Laurent's series.	B.N. 1,2
34			Uniqueness of Laurent expansion.	B.N. 1,2

CO: 3

LO4: Demonstration capacity through analyzing, proving and explaining concepts to the Maximum modulus principal, Schwartz lemma, Laurent series, problems based on it, Uniqueness of Laurent expansion.

35	5	Bilinear Transformation and Conformal Mapping	Bilinear Transformation.	B.N. 1,2
36			Fixed points, Critical points.	B.N. 1,2
37			Problems on above topics.	B.N. 1,2
38			Cross Ratio and its theorem.	B.N. 1,2
39			Normal form of a Bilinear Transformation.	B.N. 1,2
40			Problems on Bilinear Transformation.	B.N. 1,2
41			Mapping by Elementary Transformation (Transition, Rotation)	B.N. 1,2
42			Mapping by Elementary Transformation (Magnification, Rotation, Magnification, Inversion)	B.N. 1,2
43			Conformal mapping and its examples.	B.N. 1,2
44			Necessary and sufficient condition for conformal mapping.	B.N. 1,2
45			Miscellaneous topics.	B.N. 1,2

CO: 4

LO5: Understanding of the theory of Bilinear Transformation, Fixed points, Critical points, cross Ratio, normal form of a Bilinear Transformation, Problems on Bilinear Transformation, Mapping by Elementary Transformation, Necessary and sufficient condition for conformal mapping.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment

Subject: **C programming I**

MSC I Sem

Goal : The **study** c programming language focuses on the use of different data types size of data types use of function conditional statement control statement and use of different operators Use of enumeration use of type processor directives.

Objective: To aware with the Basic programming c language where we used the structured programming..

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of c programming use of constant, variable, keywords, data-type Size of data types	% Students having the basic concept of c programming arithmetic operator ,logical operator ,relational operator, conditional expression input output function.	% Students having understanding about c programming with different loop.	% Students Need More Efforts for c programming

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 15
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY (ISLE), INDORE**Lesson Plan****Subject: Advanced Abstract Algebra -II****Session: Jul-Dec****Class:M.Sc. - II Sem**

I: Objective of course: The course gives the student a good mathematical maturity and enables to build mathematical thinking and skill. The main objective of this course is to encourage students to develop a working knowledge of the central ideas of modules, finitely generated modules, Noetherian & Artinian modules.

II: Examination: The examination scheme for theory examination of Mathematics subject is as follows:- The Semester examination carrying 85 marks. The Semester exam question paper contains 5 Questions with internal choice. The faculty member will award CCE marks based on Mid semester Test, Pre university Test, Presentation, Assignment and Class performance. The CCE marks of each paper is of 15 marks.

III: Course Outcomes (CO):

CO1 : Students will see and understand the connection and transition between previously studied mathematics and more advanced mathematics. The students will actively participate in the transition of important concepts in advanced abstract mathematics.

CO2 Demonstrate capacity for mathematical reasoning through analyzing, Proving and explaining concepts from advanced algebra.

CO3 Understand the concepts of Modules, Noetherian Artinian modules, Nilpotent Transformations and the Algebra of Linear Transformation etc.

CO4 Generalized Jordan form Understand the concepts of Decomposition theorem, Uniqueness of the decomposition over any field and Rational canonical form etc.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

VIII Rubric for Internal Assessment			
Subject: Advanced Abstract Algebra-II			
M.Sc. II Sem			
Goal : The goal of this course is to introduce the study of abstract algebra and for students to gain an understanding and appreciation of the elegance, utility and mathematical importance of several algebraic structures; specifically Modules, submodules etc.			
Objective: This sequence provides an introduction to modern algebra. The sequence exposes students to Modules, submodules etc.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Advanced Abstract Algebra further to develop understanding problems of Mathematics and solve .	% Students having the basic concept of Advanced Abstract Algebra and further to develop understanding problems of Mathematics.	% Students having understanding about mathematical functions.	% Students Need More Efforts for Solution and Basic Concept of subject

IX: Scheme of internal marks

Internal Assessment		Class Participation		Total 60	Final Internal Marks Out of 15
MST (20)	PUT (20)	Presentation (10)	Assignment (10)		

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Lebesgue Measure & Integration, Paper II****Session: Jan-Jun****Class: M.Sc. Second sem****I: Objective of course:**

The aim of this course is to learn the basic elements of Measure Theory, with related discussions on applications. Measure theory provides a foundation for many branches of mathematics.

II: Examination:

The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO1: Application of measure theory is a part of the basic curriculum; develop Revision of basic tools, including in particular the concept of countable/uncountable sets.

CO2: Learn to apply and verify Abstract measure theory - σ -algebras, measurable sets, Lebesgue measure and its properties.

CO3: Able to learn about the applications of Functions of Bounded Variation, Investigate and relate The L^p -spaces, The Holder and Minkowski Inequalities.

CO4: Analyze and evaluate Convergence and Completeness and learn to treat various theorems like Riesz-Fischer, Riesz Representation.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Lebesgue Measure.	F_σ, G_δ sets, Borel sets.	B.N. 1,3,4
2			Introduction to Lebesgue Outer Measure,	B.N. 1,3,4
3			Proposition and lemma	B.N. 1,3,4
4			Measurable sets and Lebesgue Measure,	B.N. 1,3,4
5			Proposition and lemma	B.N. 1,3,4
6			Theorems on Lebesgue Measure,	B.N. 1,3,4
7			Non-Measurable sets.	B.N. 1,3,4
8			Proposition and lemma	B.N. 1,3,4
CO: 1				
LO1: Students will able to find F_σ, G_δ sets, Introduction to Lebesgue Outer Measure, Measurable sets and Lebesgue Measure, Non-Measurable sets.				
9	2	Lebesgue Measure and Lebesgue Integral	Measurable Functions.	B.N. 1,3,4
10			Egoroff's theorem.	B.N. 1,3,4
11			Lusin's theorem.	B.N. 1,3,4
12			Little-wood's Three Principles.	B.N. 1,3,4
13			A non-Borel Measurable Set.	B.N. 1,3,4
14			Proposition and lemma on above topics	B.N. 1,3,4
15			The Riemann Integral.	B.N. 1,3,4
16			The Lebesgue Integral of a Bounded Function over a set of Finite Measure.	B.N. 1,3,4
17			Proposition and lemma on above topics.	B.N. 1,3,4
CO: 2				
LO2: Develop the skills to understand Measurable Functions, Egoroff 'theorem, Lusin's theorem, Little-wood's Three Principles, A non-Borel Measurable Set. The Lebesgue Integral of a Bounded Function over a set of Finite Measure.				
18	3	Lebesgue Integral and Differentiation	The Integral of a Non-Negative Function.	B.N. 1,3,4
19			Fatou's lemma	B.N. 1,3,4
20			Monotone convergence theorem	B.N. 1,3,4
21			Propositions and corollary	B.N. 1,3,4
22			The General Lebesgue Integral	B.N. 1,3,4
23			.Lebesgue convergence theorem	B.N. 1,3,4
24			Convergence in Measure.	B.N. 1,3,4
25			Differentiation of Monotone Functions,	B.N. 1,3,4
26			Vitali's lemma	B.N. 1,3,4
27			The Four Derivatives.	B.N. 1,3,4

CO: 2

LO3: Understanding of the theory on the basis of examples of application on The Integral of a Non-Negative Function, The General Lebesgue Integral, Convergence in Measure, Differentiation of Monotone Functions, The Four Derivatives.

28	4	Differentiation and Integration, Spaces.	Functions of Bounded Variation.	
29			Lemma, theorems and corollary	B.N. 1,3,4
30			Differentiation of an Integral.	B.N. 1,3,4
31			Lemma and theorems	B.N. 1,3,4
32			Absolute Continuity.	B.N. 1,3,4
33			Convex Functions.	B.N. 1,3,4
34			Jensen Inequality.	B.N. 1,3,4
35			Lemma and theorems	B.N. 1,3,4
36			The L^p -spaces.	B.N. 1,3,4
37			The Holder and Minkowski Inequalities.	B.N. 1,3,4

CO: 3

LO4: Determine and implement best practice to Functions of Bounded Variation, Differentiation of an Integral, Absolute Continuity, Convex Functions, Jensen's Inequality. The L^p -spaces, The Holder and Minkowski Inequalities.

38	5	The Classical Banach Spaces	Convergence and Completeness.	B.N. 1,3,4
39			Definition and proposition	B.N. 1,3,4
40			Riesz-Fischer Theorem,	B.N. 1,3,4
41			Approximation in L^p ,	B.N. 1,3,4
42			Lemma, definition and proposition.	B.N. 1,3,4
43			Bounded Linear Functionals on the L^p -spaces ,	B.N. 1,3,4
44			Lemma, definition and proposition.	B.N. 1,3,4
45			Riesz Representation Theorem.	B.N. 1,3,4

CO: 4

LO5: Student can recognize Convergence and Completeness, understand the proof of Riesz-Fischer Theorem, Approximation in L^p , Bounded Linear Functional on the L^p -spaces , Riesz Representation Theorem

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Books as Text and Reference:

1. H.L. Royden, Real Analysis Third Edition, PHI.

11			Practice problems and related theorems.	B.N. 1,2,4
12			Cauchy's Residue theorem.	B.N. 1,2,4
13			Problems based on Residue.	B.N. 1,2,4
14			Practice problems.	B.N. 1,2,4
15			Integration Round the circle.	B.N. 1,2,4
16			Practice problems.	B.N. 1,2,4
17			Evaluation of the integral $\int_0^{2\pi} f(cos\theta, Sin\theta)d\theta$.	B.N. 1,2,4
18			Practice problems.	B.N. 1,2,4
19			Related theorem.	B.N. 1,2,4
CO: 2				
LO 2: Effective use of mathematical skills to solve the Residues, Computation of Residue at a finite pole, use the residue theorem to evaluate a contour integral, Integration Round the circle, Evaluation of the integral $\int_0^{2\pi} f(Cos\theta, Sin\theta)d\theta$.				
20	3	Calculus of Residues.	Jordan's inequality, Jordan's lemma.	B.N. 1,2,4
21			Evaluation of improper real integrals of the type $\int_{-\infty}^{\infty} f(z)dz$.	B.N. 1,2,4
22			Practice problems.	B.N. 1,2,4
23			Evaluation of integrals $\int_{-\infty}^{\infty} f(z)dz$ when poles of f (z) lie on real axis.	B.N. 1,2,4
24			Practice problems.	B.N. 1,2,4

25		Integrals of the type $\int_0^\infty x^{\alpha-1} f(x) dx$, $\int_0^\infty \frac{\log x dx}{g(x)}$	B.N. 1,2,4
26		Practice problems.	B.N. 1,2,4
27		Evaluation of integrals involving Quadrant, Sector and Rectangular contours.	B.N. 1,2,4
28		Miscellaneous examples	B.N. 1,2,4

CO: 3

LO 3: Can apply the methods of complex analysis to evaluate definite integrals and infinite series to improper real integrals of the type $\int_{-\infty}^\infty f(z) dz$, $\int_{-\infty}^\infty f(z) dz$ when poles of $f(z)$ lie on real axis, $\int_0^\infty x^{\alpha-1} f(x) dx$, $\int_0^\infty \frac{\log x dx}{g(x)}$ involving Quadrant, Sector and Rectangular contours.

29	4	Gamma Function and Riemann Zeta Function	Gamma function, Infinite product,	B.N. 1,2,4
30			Properties of gamma functions,	B.N. 1,2,4
31			Legendre's duplication formula,	B.N. 1,2,4
32			Riemann Zeta function,	B.N. 1,2,4
33			Riemann functional equation,	B.N. 1,2,4
34			Relation between gamma and Zeta functions,	B.N. 1,2,4
35			Weierstrass factorization theorem.	B.N. 1,2,4

CO: 4

LO 4: Understanding of the basic concepts of Gamma function and its Properties, Legendre's duplication formula, Riemann Zeta function and its functional equation, relation between gamma and Zeta functions, Weierstrass factorization theorem.

36	5	Analytic Continuation and Harmonic function	Analytic Continuation.	B.N. 1,2,4
37			Uniqueness of direct analytic Continuation.	B.N. 1,2,4
38			Uniqueness of analytic Continuation along a curve.	B.N. 1,2,4
39			Schwartz reflection principle.	B.N. 1,2,4
40			Miscellaneous theorems	B.N. 1,2,4
41			Harmonic function.	B.N. 1,2,4
42			Mean value theorem.	B.N. 1,2,4
43			Poisson kernel.	B.N. 1,2,4
44			Problem based on analytic Continuation.	B.N. 1,2,4
45			Miscellaneous examples	B.N. 1,2,4

CO: 4

LO5: Students understand the proof and solve the problems of Analytic Continuation, Uniqueness of direct analytic Continuation also along a curve, Schwartz reflection principle, Harmonic function, Mean value theorem, Poisson kernel, Problem based on analytic Continuation.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on

any of the topic related to the subject.

VI: Books as Text and Reference:

1. J.B. Convey, Functions of one complex variable, Springer – verlag
2. Complex Analysis – Dr. Brijendra singh, Dr. Varsha Karanjogkar, Dr. R.S. Chandel, Golden Valley Publications Agra.
3. S. Ponnuswamy, Foundations of complex analysis, Narosa Publishing House.
4. L.V. Ahlfors, Complex analysis, McGraw Hill

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Complex Analysis-II			
M.Sc. II Sem			
Goal: Develop the foundation for further studies of national level examinations such as NET, GATE and CSIR etc. Develop skill to take up challenges in the emerging areas of Industry and Business by using mathematical models and solve the real life problems by application of various techniques by applied subjects of mathematics.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
12-15Marks	8-12 Marks	04-08Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of subject thoroughly. Can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education.	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks

Class Participation		Internal Assessment		Total 60	Final Internal Marks Out of 15
Presentation Out of 10	Assignment Out of 10	MST Out of 20	PUT Out of 20		

IPS ACADEMY, INDORE**Lesson Plan****Subject: Programming in C-II****Session:-Dec-June****Class: MSC-II Sem****I: Objective of course:** To aware with the programming language c where we used the structured programming.

II: Examination: The internal examination will carry 15% marks i.e. 15 marks. The theory examination will be of 50% marks i.e. 50 marks. The practical examination will be of 35% marks i.e. 35 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- CO1 The course is designed in advanced part to provide complete knowledge of C language. Students will be able to develop logics which will help them to create programs, applications in C.
- CO2 Develops the use of the C programming language to implement various algorithms and use of array in different areas with single and multidimensional.
- CO3 Understand basic Structure of the C-PROGRAMMING, declaration and usage of use of structure and functions, Array of structure, pointer and structure, Unions.
- CO4 Understanding a defensive programming concept. Ability to handle possible errors during program execution.

IX: Scheme of internal marks

Internal Assessment		Class Participation		Total 60	Final Internal Marks Out of 15
MST (20)	PUT (20)	Presentation (10)	Assignment (10)		

Lesson Plan**Subject: Advanced Numerical Analysis -I****Session: Jul-Dec****Class: M.Sc. III**

I: Objective of course: To provide conceptual understanding of various numerical methods, in particular, with reference to numerical solution of Linear, Quadratic and higher order and linear equations and system of linear equations, interpolation, numerical differentiation and integration and numerical solution of ordinary differential equations. Important theorems and different formulae for various numerical methods to be covered with an aim of helping the students to understand the fundamentals, concepts and practical use of these methods.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO 1: To understand the basic problem of Interpolation with different types and its effect on any numerical computations and also analysis the efficiency of any numerical algorithms.

CO 2 : To understand about Approximation , Orthogonalization process and their solution with computational technique.

CO 3 : Student are able to familiarize about different numerical techniques of Numerical differentiation and their accuracy.

CO 4 : To understand and solve some engineering problem of real life using Numerical methods techniques based on interpolation and Numerical differentiation .

CO 5: To explains different types of errors which gets involved and propagates during numerical computations.

Lesson Plan

Subject: Operations Research I

Session: Jul-Dec

Class: M.Sc. I Semester

I: Objective of course: The main objective of operation research is to provide better quantitative and qualitative information's for making decision. The objective of the course to learn linear optimization problems involving both continuous and integer variable, because these are used in a vast range of real situations. It will present techniques for optimization and the theory behind them, but will also show how to use these techniques on real problems, for example, minimizing cost, maximizing production capacity, or minimizing risk.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO 1 : To develop and formulate Optimization models of real life problems and business oriented problems with their applications for decision Making . (Linear Programming Problem)

CO 2 : To learn some optimization techniques to find the optimal solution of optimization problems like Linear Programming Problems etc...

CO 3 : To understand the Simplex method to find an optimal solution for the standard linear programming problem and the corresponding dual problem.

CO 4 : To learn about mathematical techniques that will help them to understand and analyse managerial problems in industry so that resources (Man, machines, money etc.) may be utilized more effectively in optimal manner.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
01	Unit I	Operations Research – Introduction. Linear Programming Problems : Mathematical Formulation, Graphical Solution Method.	Operations Research : Introduction and Definition ,Origin and Development of OR, Nature and Features of OR, Scientific Method in OR: Judgment Phase , Research Phase, Action Phase. OR and Decision Making : Overview with examples.	BN - 01
02			Modeling in OR, Classification of Models , Examples, Advantage and Disadvantages of Models, General Solution Method of OR models : Analytic, Numerical and Monte- Carlo Method.	BN - 01
03			Methodology of Operations Research : Phases, Applications of Operations Research, Uses and Limitations of Operations Research.	BN - 01
04			Linear Programming Problems : Introduction, Mathematical Formulation of LPP, Formulation by giving different examples. Examples.	BN - 01
05			LPP Formulation : Production Mix problem, Blending Problems, Advertisement Problems, Marketing Problem, Examples.	BN - 01
06			LPP Formulation : Capital Budgeting Problem, Media Problem, Investment Problem, etc. Examples.	BN - 01
07			Solution of LPP by Graphical method: Procedure of graphical method to solve LPP with Examples.	BN - 01
08			Solution of LPP by Graphical method: More Complicated Problems and Examples.	BN - 01
09			Some special cases in Graphical Method and solution of various types of Examples.	BN - 01
CO 4:				
LO1 : To understand about Introduction, Origin and Development of Operations Research, Nature and Features of Operations Research, Models in Operations Research, General Solution Methods for Operations Research, Phases of Operations Research, Uses and Limitations of Operations, Linear Programming Problems : Introduction Mathematical Formulation, Graphical Solution Method.				
10	Unit II	General Linear	General Linear Programming Problem: Definitions, Feasible Solution, Solution, Optimum Solution, Mathematical Formulations, Surplus and	BN - 01

		Programming Problem, Theory of Simplex method	Slack Variables, Canonical and Standard Form of LPP. Examples.	
11			More Examples based on Standard and Canonical Form.	BN - 01
12			Solution of LPP by Simplex Method, Definitions : Basic Concept, Basic Solution, Degenerate Solution, Examples on basic solutions.	BN - 01
13			Fundamental Properties of Solution . Theorems on solution : Reduction of a feasible in a basic feasible solution, Extreme point Correspondance.	BN - 01
14			Fundamental Theorem of Linear Programming, Replacement of a vector, Net evaluation, Improved Basic Feasible Solution. Unbounded Solution, Conditions of Optimality,	BN - 01
15			Computational Procedure of Simplex Method and Solution of Examples by Simplex Method	BN - 01
16			Solution of some more Examples by Simplex Method	BN - 01
17			Solutions of simultaneous linear equations by Simplex Method and Examples.	BN - 01
18			Inverse of a matrix by using Simplex method and Examples.	BN - 01
19			Problem Set and Examples.	BN - 01
CO 2				
LO 2	: To learn about introduction of General Linear Programming Problem, Theory of Simplex method, Computational Procedure, Numerical problems, Solutions of simultaneous linear equations, inverse of a matrix using simplex method.			
20	Unit III	Use of artificial variables, Big-M method, Two phase method, Problem of degeneracy and resolution of degeneracy, Applications of simplex method.	Artificial Variable Techniques, Big - M Method , Procedure to solve by BIG – M Method by LPP.	BN -01
21			Example based on AV Techniques by using BIG M method to solve LPP.	BN - 01
22			Two Phase method to solve LPP having Artificial Variables. Examples	BN - 01
23			Degeneracy in LPP and Its Resolution from the LPP Solution. Examples.	BN - 01
24			Applications of Simplex Method. More examples on formulation of LPP and their solution by Simplex Method and BIG M Method.	BN - 01
25			Continued from previous topic : Applications of Simplex Method. More examples on formulation of LPP and their solution by Simplex Method and BIG M Method.	BN - 01
26			Problem set and Examples.	BN - 01

CO 1,2

LO 3: To understand about Use of artificial variables, Big-M method, Two phase method, Problem of degeneracy and resolution of degeneracy, Applications of simplex method.

27	Unit IV	Concept of duality.	Duality : Introduction , General Primal-Dual pair and Their Relationship: Definition, formulating a dual problem, primal-dual pair in matrix form.	BN - 01
28			Primal Problem, Formulation of Dual of LPP with examples .	BN - 01
29			Economic interpretation of duality and Examples.	BN - 01
30			Duality and Simplex method . Solution of Various Examples.	BN - 01
31			Fundamental Properties and Theorems of duality	BN - 01
32			Continued from previous topic : Fundamental Properties and Theorems of duality.	BN - 01
33			Complementary Slackness Theorem and Corollaries.	BN - 01
34			Dual Simplex Method: Procedure and Solution of various examples by Dual Simplex Method.	BN - 01
35			Continued from previous topic : Dual Simplex Method: Procedure and Solution of various examples by Dual Simplex Method.	BN - 01
36			Problem Set and Examples.	BN - 01

CO 3:

LO 4: To understand Concept of duality , General Primal-Dual pair, formulating a dual problem, primal-dual pair in matrix form, economic interpretation of duality, duality and simplex method, Fundamental Properties and Theorems of duality, complementary slackness, dual simplex method.

37	Unit V	Post optimality analysis, Integer Programming Problem, Revised Simplex Method.	Post optimality analysis : Introduction, Meaning , Changes in Objective Function coefficients : Method and Examples.	BN - 01
38			Post optimality analysis : Changes in the RHS values : Method and Examples.	BN - 01
39			Post optimality analysis: Changes in the Coefficient of Constraints : Method and Examples.	BN - 01
40			Post Optimality Analysis : Structural Changes : Addition of the New Activity, Addition of New Constraints, Method and Example.	BN - 01

41		Application of Post Optimality Analysis and solution of various Examples by POA	BN - 01
42		Problem Set and Examples.	BN - 01
43		Integer Programming Problems : Introduction, Types of IPP, Pure and Mixed IPP, GOMORY'S ALL IPP Solution method , Examples.	BN - 01
44		Fractional Cut Method and Examples.	BN - 01
45		Problem set and Examples.	BN - 01
46		Revised Simplex Method: Procedure and Examples .	BN - 01
CO 1, 4			
LO 5 : To understand what is Post optimality analysis, Introduction of integer programming and their solution ,Introduction of revised simplex method.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Operations Research I			
M.Sc. I Semester			
Goal : To provide information to student that they can use to make decisions for improving their knowledge in solving real life problems through mathematical techniques Linear Programming Problem, Integer Programming Problem, etc. To help student to decide alternative courses of actions by identifying and taking advantages of opportunities and by solving the identified problems. For optimising resource allocation and optimal use of them. To study the quality of care in real life and social life.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
12-15Marks	8-12 Marks	04-08Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Mathematical techniques for solving Linear Programming Problem, Integer Programming Problem, Duality of LPP etc.. problems for Decision Making.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education..	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Integral Transform -I, Paper-IV****Session: Jul-Dec****Class: M.Sc. third sem****I: Objective of course:**

The course gives the student a good mathematical maturity and enables to build mathematical thinking and skill. The main objective of this course is to encourage students to develop knowledge of Laplace transform and its properties.

II: Examination:

The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO 1: Understand the Laplace transform standard result properties. Transform of unit step Function and Bessel's function. Inverse Laplace transform and its use.

CO 2: Application of Laplace transforms to solve differential equation of different types.

CO 3: Student will be able to solve partial differential equation and integral equation with the help of Laplace Transform.

CO 4: Use of Laplace Transform to solve Heat equations.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	The Laplace Transform and The Inverse Laplace Transform	Laplace Transform of the derivative of f (t).	B.N. 1
2			Laplace Transform of Integrals multiplication by t.	B.N. 1
3			Multiplication by t ⁿ .	B.N. 1
4			Division by t use of Laplace transform to unit step function (Heaviside’s unit functions).	B.N. 1
5			Use of Laplace Transform to Bessel function.	B.N. 1
6			Inverse Laplace Transform of derivatives.	B.N. 1
7			Problem depends on above topics.	B.N. 1
8			Convolution.	B.N. 1
9			Heaviside’s expansion theorem.	B.N. 1
10			Problem depends on Convolution.	B.N. 1
CO: 1				
LO1: Students learn the Integral Transforms, Examples and Properties, and use of Laplace Transform.				
11	2	Application of Differential Equations	Application of Laplace Transform	B.N. 1
12			Practice problems on related topic	B.N. 1
13			Practice problems on related topic	B.N. 1
14			Practice problems on related topic	B.N. 1
15			Solutions of ordinary Differential Equations With constant Coefficients.	B.N. 1
16			Practice problems on related topic	B.N. 1
17			Practice problems on related topic	B.N. 1
18			Practice problems on related topic	B.N. 1
19			Miscellaneous examples	B.N. 1
CO: 2				
LO2: Students understand the Application of of Laplace Transform in differential equations.				
20	3	Application of Differential Equations	Solution of Simultaneous ordinary Differential Equations by Laplace Transform.	B.N. 1
21			Problem depends on above topics	B.N. 1
22			Problem depends on above topics	B.N. 1
23			Problem depends on above topics	B.N. 1
24			Solution of ordinary differential equations with variable coefficients by Laplace Transform.	B.N. 1
25			Practice Problem depends on above topics	B.N. 1
26			Practice Problem depends on above topics	B.N. 1
27			Practice Problem depends on above topics	B.N. 1

28			Miscellaneous examples	B.N. 1
CO: 2				
LO3: Students learn the Solution of Partial differential equation through Laplace Transform.				
29	4	Application Of Differential Equations And Integral Equation	Solutions of Partial differential Equations by Laplace transform.	B.N. 1
30			Practice Problem depends on above topics	B.N. 1
31			Practice Problem depends on above topics	B.N. 1
32			Practice Problem depends on above topics	B.N. 1
33			Application of Laplace transform to integral equation.	B.N. 1
34			Problem depends on above topics.	B.N. 1
35			Problem depends on above topics.	B.N. 1
36			Problem depends on above topics.	B.N. 1
37			Miscellaneous examples.	B.N. 1
CO: 3				
LO4: Students learn the Solution of ordinary differential equation through Laplace Transform and integral equation .				
38	5	Application of Laplace transforms to boundary value problems.	Application of electrical circuits.	B.N. 1
39			Application to dynamics.	B.N. 1
40			Application to beams.	B.N. 1
41			Problem depends on above topics.	B.N. 1
42			Application to heat conduction equations.	B.N. 1
43			Problems based on Heat conduction equation using Laplace transform.	B.N. 1
44			Problem depends on above topics.	B.N. 1
45			Miscellaneous examples.	B.N. 1
CO: 4				
LO5: Understand the basic rules to use Laplace Transform in solving Heat equations.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Books as Text and Reference:

1. Integral Transform by Goyal & Gupta.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Integral Transform -I			
M.Sc. III Sem.			
Goal: Develop the foundation for further studies of national level examinations such as NET, GATE and CSIR etc. Develop skill to take up challenges in the emerging areas of Industry and Business by using mathematical models and solve the real life problems by application of various techniques by applied subjects of mathematics.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
12-15Marks	8-12 Marks	04-08Marks	00-04 Marks

Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of subject thoroughly. Can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education.	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks

Class Participation		Internal Assessment		Total 60	Final Internal Marks Out of 15
Presentation Out of 10	Assignment Out of 10	MST Out of 20	PUT Out of 20		

IPS ACADEMY, INDORE**Lesson Plan****Subject:** Fundamentals of Computer Science**Session:** Jul-Dec**Class:** MSC II Year

1. **I: Objective of course:** Demonstrate proficiency in high-level programming languages and operating systems.

II: Examination: The internal examination will carry 15 marks. The external examination will be 35 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- CO1 Analyze and model requirements and constraints for the purpose of designing and implementing software artifacts and IT system.
- CO2 Evaluate and compare designs of software products and IT systems on the basis of organizational and user requirements.
- CO3 It implements an achievable practical application and analyze issues related to object-oriented techniques in the C++ programming language.
- CO4 To learn the fundamentals of Operating Systems.

5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

Rubric for Practical Assessment
Subject: Fundamentals of Computer Science
MSC II Year

Goal: Students develop the ability to understand that how an existing C++ program works and discover errors in a C++ program and describe Operating System.

Objective: Students identify and practice the object-oriented programming concepts and techniques, practice the use of C++ classes and class libraries, modify existing C++ classes, develop C++ classes for simple applications, and practice the concepts of Object-Oriented Analysis and Design (OOA/OOD) and understand concepts of Operating System.

20-25 Marks	15-20 Marks	10-15 Marks	00-10 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Object Oriented Programming and understanding of Operating System.	% Students having the basic concept of Object Oriented Programming and understanding of Operating System.	% Students having understanding about concept of Object Oriented Programming and understanding of Operating System.	% Students Need More Efforts for Solution and Basic Concept of Object Oriented Programming and Operating System.

IX: Scheme of Practical Marks

Class Participation			Practical Assessment		Total 50	Final Practical Marks Out of 50
Presentation Out of 10	Written exam Out of 10	Assignment Out of 10	VIVA Out of 10	Practical Out of 10		

Lesson Plan**Subject: Functional Analysis-II****Session: Jul-Dec****Class:M.Sc. - IV Sem**

I: Objective of course: The main aim this course is to provide students basic concepts of functional analysis to facilitate the study of advanced mathematical structures arising in the natural sciences and the engineering sciences and to grasp the newest technical and mathematical literature

II: Examination: The examination scheme for theory examination of Mathematics subject is as follows:- The Semester examination carrying 85 marks .The Semester exam question paper contain 5 Questions with internal choice. The faculty member will award CCE marks based on Mid semester Test,Pre university Test ,Presentation .Assignment and Class performance . The CCE marks of each paper is of 15 marks.

III: Course Outcomes (CO):

CO1 Demonstrate capacity for mathematical reasoning through analysing proving and explaining concepts from functional analysis.

CO2 Understand the relevance of Operator Theory.

CO3 Demonstrate accurate and efficient use of functional analysis techniques.

CO4 Students will understand Hilbert space theory; orthonormality, the Riesz representation theorem, orthonormal, Open and closed Mapping Theorem etc.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

VIII Rubric for Internal Assessment			
Subject: Functional Analysis-II			
M.Sc. IV Sem			
Goal : The goal of this course is to introduce the study of Functional Analysis for students to gain an understanding and appreciation of the elegance, utility and mathematical importance of several algebraic structures; specifically Inner Product Space , Linear Operators, orthonormal sequences & sets etc.			
Objective:. The sequence exposes students to Inner Product Space , Linear Operators, orthonormal sequences & sets etc.

IX: Scheme of internal marks

Internal Assessment		Class Participation		Total 60	Final Internal Marks Out of 15
MST (20)	PUT (20)	Presentation (10)	Assignment (10)		

Lesson Plan

Subject: Advanced Numerical Analysis -II

Session: Jan-June

Class: M.Sc. IV

I: Objective of course: To provide conceptual understanding of various numerical methods, in particular, with reference to numerical solution Ordinary Differential Equation of first and second order and their convergence and stability solution. Important theorems and different formulae for various numerical methods to be covered with an aim of helping the students to understand the fundamentals, concepts and practical use of these methods.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO 1: To understand the basic problem of Extrapolation and partial differentiation with different types and its effect on any numerical computations and also analysis the efficiency of any numerical algorithms.

CO 2 : To understand convergence of Multistep methods and theirs solution by various Numerical computational technique.

CO 3 : To learn how to obtain numerical solution of System Of Linear First Order Differential Equation With advanced numerical methods.

CO4 : To understand and solve some engineering problem of real life using Numerical methods techniques based on Numerical Integration and Ordinary Differential Equation . To Learn how to solve initial and boundary value problems and Finite Difference Methods numerically with using numerical Methods.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	-	3	-	2	1	2	1	3
CO 2	3	2	2	-	2	2	1	2
CO 3	2	2	1	2	1	-	1	-
CO 4	3	-	2	2	-	1	1	1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
01	Unit I	Extrapolation Methods , Partial Differentiation and its estimations, Ordinary Differential Equations : Initial Value Problems, System Of Linear First Order Differential Equation, Multi Step Methods , Various types of Explicit and Implicit Multistep Methods,	Extrapolation : Introduction and Basic Concept, Richardson Extrapolation : Formula Derivation, Standard Table, Solution of Examples	BN01
02			Partial Differentiation : Introduction, Jacobian Matrix, Estimation of various functions and Examples	BN01
03			Introduction to Ordinary Diff Equation with IVP and BVP , Procedure of Reduction Of Higher Order Equation to the system of First Order Diff Equation, Examples on Conversion	BN01
04			Existence and Uniqueness: Theorem based on it, Behavior of non linear equation by test equation and different cases.	BN01
05			Discussion on System Of Linear First Order Differential Equation With Constant Coefficients and its theorem and Examples.	BN01
06			Numerical Methods : Mesh point, Multi Step Method : Explicit Multistep Method, Adams Bashforth Methods: Examples	BN01
07			Multi Step Method : Nystrom Methods, Examples	BN01
08			Implicit Multistep Method and Examples	BN01
09			Implicit Multistep Method and Examples	BN01

			General Multi Methods and Examples.	
CO 1:				
LO1 : To understand and use of Extrapolation Methods (Richardson Extrapolation) , Partial Differentiation and its estimations, Ordinary Differential Equations : Initial Value Problems, Reduction Of Higher Order Equation, Existence and Uniqueness, Test equations , System Of Linear First Order Differential Equation With Constant Coefficients and its theorem, Multi Step Methods , Various types of Explicit and Implicit Multistep Methods, General Multi Methods.				
10	Unit II	Maximum order of k-step methods and theorems and Convergence Of Multi Step Methods, Predicator and Corrector Method, , Stability Analysis First Order and Second Order differential equations.	Maximum order of k-step methods and theorems, Examples, Bounds on the Local Truncation Error, Examples	BN01
11			Procedure of Convergence Of Multi Step Methods, Convergence Theorem, Examples	BN01
12			Predictor and Corrector Method to solve ODE : Introduction , Theorem, Both types of Truncation Error, Examples	BN01
13			Modified Predictor Corrector Method : Formula Derivation and Examples	BN01
14			Stability Analysis of Multistep Method : First Order differential equations, Basic Concept, Definition and theorems	BN01
15			Stability Analysis of Multistep Method : First Order differential equations : Nystrom Method: Derivation	BN01
16			Stability Analysis of Multistep Method : First Order differential equations Milnes Simpson Method, Theorem and Derivation	BN01
17			Stability Analysis of Multistep Method : First Order differential equations: Predictor Corrector Method, Theorem and Derivation	BN01
18			Stability Analysis of Multistep Method : Second Order differential equations, Basic Concept, Definition and theorems	BN01
CO 2 , 3				
LO 2: To learn about Maximum order of k-step methods and theorems, Convergence Of Multi Step Methods, Predicator and Corrector Method, Modified Predicator and Corrector Method, Stability Analysis of Multistep Methods and theorems : First Order and Second Order differential equations.				
19	Unit III	Ordinary	Ordinary Differential Equation: Introduction and Basic Concept, Different Condition , Basic Condition	BN01

20	Differential Equation , Boundary Value Problems : Shooting Method, Alternate Method , Nonlinear Second Order Differential Equation.	Shooting Method for various basic conditions , Derivation and Example	BN01
21		Alternate Method of Shooting Method and Examples	
22		Discussion on More Examples for both method	
23		Nonlinear Second Order Differential Equation : Introduction and Formula Derivation and Examples (Secant and Newtons Raphson Method)	
24		Nonlinear Second Order Differential Equation : Introduction and Formula Derivation and Examples Problem set and Examples (Shooting Method)	
25		Problem set and Examples	
CO 3 :			
LO 3: To understand Ordinary Differential Equation , Boundary Value Problems : Shooting Method, Alternate Method , Nonlinear Second Order Differential Equation.			
26	Unit IV Finite Difference Methods, Linear Second Order Differential Equations, Local Truncation Error, Convergence Of Difference Schemes and theorems, Stability Of Finite Difference Schemes	Finite Difference Methods : Basic Concept, Solution of Linear Second Order Differential Equations	BN01
27		Finite Difference Methods: Local Truncation Error, Solution of Derivative Boundary Condition.	BN01
28		Finite Difference Methods: Local Truncation Error, Solution of Derivative Boundary Condition (Another Method of solution)	BN01
29		Finite Difference Methods : Solutions Of Tridiagonal System, Examples	BN01
30		More Examples on Derivative Boundary condition and Tridiagonal System.	BN01
31		Nonlinear Second Order Differential Equation (Ist Form) Formula Derivation and its Solution by Newton Raphson Method	BN01
32		Nonlinear Second Order Differential Equation : Examples based of NR Method.	BN01
33		Nonlinear Second Order Differential Equation (II Form) Formula Derivation and its Solution by application of Gauss Elimination Method	BN01
34		Convergence Of Difference Schemes : Second Order Method and theorems based on convergence	
35		Stability Of Finite Difference Schemes of various order of Convergence Scheme.	BN01
36		Problem Set and Examples	BN01

CO 3,4

LO 4 : To learn what is Finite Difference Methods Linear Second Order Differential Equations, Local Truncation Error, Derivative Boundary Conditions, Solutions Of Tridiagonal System, Nonlinear Second Order Differential Equation, Convergence Of Difference Schemes and theorems, Stability Of Finite Difference Schemes .

37	Unit V	Finite Element Method, Solution of the Variation Problem, Ritz Method ,Finite Elements, Assembly Of Element Equations, Mixed Boundary Conditions	Finite Element Method : Introduction and Formula Derivation	BN01
38			Solution f the Variation Problem, Ritz Method (Galerkin equations) and Derivation and Examples	
39			Continue of previous lecture : Solution f the Variation Problem, Ritz Method (Galerkin equations) and Derivation and Examples	
40			Finite Elements, and Linear Lagrange Polynomial : Shape Function, Natural Coordinates, Derivation in case of Linear Approximation. Examples	
41			Ritz Finite Element Method : Formula and Examples	
42			Finite element solution of Linear Boundary Value Problems : Formula Derivation and Solution	
43			Assembly Of Element Equations : Formula Derivation and Solution	
44			Mixed Boundary Conditions : Formula Derivation and Solution	
45			Problem Set and Example.	

CO4 , 5:

LO 5: To understand Finite Element Method, Solution f the Variation Problem, Ritz Method (Galerkin equations), Finite Elements, Linear Lagrange Polynomial, Ritz Finite Element Method, Finite element solution of Linear Boundary Value Problems, Assembly Of Element Equations, Mixed Boundary Conditions

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Numerical Methods , Jain, Iyanger and Jain, New Age International Edition 2012,

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Accounting for Managers			
MBA I Sem			
Goal : Student develop the ability to finding numerical solution of fundamentals of numerical methods used for the solution of general numerical problems. Student will understand the basic methods of numerical analysis for approximating the polynomial and finding the errors. Also understand stability and convergence of solution.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences			
12-15Marks	8-12 Marks	04-08Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of numerical methods and formula for solving ordinary differential equation first order and second order linear. Also numerical differentiation of their methods.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education..	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

Lesson Plan

Subject: Operations Research –II

Session: Jan-June

Class: M.Sc. –IV Semester.

I: Objective of course: The main objective of operation research is to provide better quantitative and qualitative information's for making decision. The objective of the course to learn linear optimization problems involving both continuous and integer variable, because these are used in a vast range of real situations. It will present techniques for optimization and the theory behind them, but will also show how to use these techniques on real problems, for example, minimizing cost, maximizing production capacity, or minimizing risk.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 85 marks will have five questions in which there is internal choice and section itself. Each question carries 17 marks.

III: Course Outcomes (CO):

CO 1 : To develop and formulate Optimization models of real life problems and business oriented problems with their applications for decision Making . (Linear Programming Problem)

CO 2 : To learn some optimization techniques to find the optimal solution of optimization problems like Linear Programming Problems etc...

CO 3 : To understand the Simplex method to find an optimal solution for the standard linear programming problem and the corresponding dual problem.

CO 4 : To learn about mathematical techniques that will help them to understand and analyse managerial problems in industry so that resources (Man, machines, money etc.) may be utilized more effectively in optimal manner.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
01	Unit I	Transportation problems and Solution	Transportation Problem : Introduction, Formulation of the Transportation Problem, Existence of Solution in Transportation Problem : Existence of Solution in LP, Theorem. Examples.	BN-01
02			Duality in the Transportation : Basic Concept, Transportation Table, Loops in Transportation Problem. General Transportation Problem.	BN-01
03			Solution of a Transportation Problem : Initial Solution by North West Corner Rule with procedure and example(finding the initial solution of TP by NWCR)	BN-01
04			Solution of a Transportation Problem : Initial Solution by Least Cost Method with procedure and example (finding the initial solution of TP by LCM)	BN-01
05			Solution of a Transportation Problem : Initial Solution by Vogel's Approximation Method with procedure and example (finding the initial solution of TP by VAM)	BN-01
06			Test for Optimality by MODI (u-v method) Method : Procedure and Examples	BN-01
07			Continued from the previous topic : Test for Optimality by MODI (u-v method) Method : Procedure and Examples	BN-01
08			Economic Interpretation of u and v, Degeneracy in TP and It's Resolution , Examples.	BN-01
09			Solution of TP by Stepping Stone Method : Procedure and Example.	BN-01
10			Some Exceptional Cases : Unbalanced and Maximization Problem in TP and their Solution.	BN-01
11			Problem Set and Example	BN-01
CO 2:				
LO 1 : To understand basic concept of Transportation problems , General transportation problem, duality in TP, Transportation Table , LP formulation of T.P., Initial solution of transportation problem : North - West Corner Method, Least – Cost Method, Vogel's Approximation Method, test for optimality by MODI (u-v method) method, economic interpretation, degeneracy in transportation problems, stepping stone algorithm.				
10	Unit	Assignment	Assignment Problem : Introduction, Mathematical	BN-01

	II	problem and Dynamic Programming	Formulation of AP. Example. Reduction Theorem and its proof.	
11			Solution Method of Assignment Problem : Hungarian Method - Procedure and Example.	BN-01
12			Continued from the previous topic - Solution Method of Assignment Problem : Hungarian Method - Procedure and Example.	BN-01
13			Special cases in Assignment problem : Unbalanced and Maximization with their solution. Examples.	BN-01
14			Special Cases in AP : Prohibited Assignment Problem and their solution with example.	BN-01
15			Some more example and their solution on Assignment problem.	BN-01
16			Dual of the assignment problem and Solution of some example.	BN-01
17			Travelling Salesman problem and its formulation ,Solution method and Examples.	BN-01
18			Problem Set and Examples.	BN-01
19			Dynamic Programming: Introduction and Characteristic, Recursive Approach, Dynamic Programming Algorithm : Optimal Sub divisional Problem – procedure.	BN-01
			Example and Solution of Dynamic Programming Problem by recursive approach.	BN-01
	CO 4			
	LO 2 : To understand about basic concept of Assignment problem, Mathematical formulation of assignment problem, Solution of assignment problem : Hungarian Method , Special Cases: Unbalanced Assignment Problem, Maximisation Assignment Problems., Prohibited A.P., Dual of the assignment problem, Travelling Salesman problem. Dynamic Programming : Introduction, Characteristics , Dynamic Programming Algorithms.			
20	Unit III	Network analysis : Critical Path Method (CPM), PERT Calculation,	Network Scheduling : Introduction, Network basic components : Activity, Event, Dummy Activity etc. Logical Sequencing, Network Diagram, Rules for constructing network diagram.	BN-01
21			Examples on Construction of Network Diagram of Various Activity and Preceding Activity.	BN-01
22			Critical Path Method (CPM): Critical Path and Critical Activities , Forward Pass Computation and Backward Pass Computation - Procedure. Examples.	BN-01
23			Calculation of ES,EF,LS,LF and different types of float. Examples by CPM.	BN-01
24			Problem Set and solution with Examples by CPM	BN-01

25			PERT (PROGRAMMING EVALUAITION AND REVIEW TECHNIQUES) Procedure , Three Types of Time estimates in PERT, Probability Calculations , Examples on PERT calculation.	BN-01
26			Examples on PERT calculation- Continued, Difference between CPM/PERT	BN-01
			Problem set and Examples	BN-01
CO 3				
LO: LO 3 : To learn about Network analysis and its Introduction , Basic Terminology/Components, Rules of network construction, Critical Path Method (CPM), PERT Calculation, Difference between CPM /PERT.				
27	Unit IV	Game theory Introduction and Solution Methods of Games	Game Theory : Introduction , Properties, Two-person Zero - Sum Games, Basic Terms : Player, Strategy, Value of Game, Payoff, Maximin - Minimax Principle : Saddle Point ,Theorem	BN-01
28			Solution of Game by Saddle point Technique, Fair and Unfair Game, Examples.	BN-01
29			Games without saddle points - Mixed strategies, Maximin-Minimax Criterion, Solution of 2x2 Game, Theorems, Examples.	BN-01
30			Dominance Property : Rules , Examples based on it, Graphical solution of 2xm and mx2 games : Procedure (Explanation)	BN-01
31			Graphical Solution of 2xm and mx2 Game : Examples. (Both types of Games)	BN-01
32			Problem Set and Examples.	BN-01
33			Arithmetic method for nxn games and Examples	BN-01
34			Solution of mxn games by Linear Programming : Procedure and Example.	BN-01
35			General solution of mxn rectangular games and Examples. Limitations of Games.	BN-01
36			Problem Set and Examples.	BN-01
CO 2 , 3				
LO: LO 4 : To understand about Game theory and its Introduction, Two- person Zero - Sum Games, Basic Terms, The Maximix -Minimax principle, games without saddle points - Mixed strategies, dominance property, Graphical solution of 2xm and mx2 games, Arithmetic method for nxn games, Solution of mxn games by Linear Programming, General solution of mxn rectangular games, Limitations.				
37	Unit V	Non-Linear programming Techniques Quadratic	Non-Linear programming Techniques : Introduction and Formulations. Examples.	BN-01
38			Kuhn -Tucker Conditions with Non – negative Constraints : Necessary and Sufficient Condition : Derivation.	BN-01

39	Programming and their solution method. Separable programming algorithm.	Solution of Non Linear Programming using Kuhn - Tucker Conditions , Examples.	BN-01
40		Different Cases in Non LPP and Their Solution by Kuhn -Tucker Conditions , Examples	BN-01
41		Quadratic Programming : Introduction and Kuhn - Tucker Conditions for QP, Derivation.	BN-01
42		Wolfe's simplex method : Procedure and Examples.	BN-01
43		Beals method: Solution of QP without using Kuhn -Tucker Conditions.	BN-01
44		Separable Convex Programming, Separable programming algorithm. Solution of Non LPP by Separable Programming Algorithms.	BN-01
45		Topic Continued from previous lecture : More examples .	BN-01
46		Problems set and Examples.	BN-01
CO 1			
LO 5 : To understand and development of Non-Linear programming Techniques Kuhn -Tucker Conditions with Non – negative Constraints, Quadratic Programming, Wolfe's simplex method, Beals method, Separable Convex Programming, Separable programming algorithm.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Lesson Plan**Subject: Integral Transform-II Paper-IV****Session: Jul-Dec****Class: M.Sc. - IV Sem**

I: Objective of course: The course gives the student a good mathematical maturity and enables to build mathematical thinking and skill. The main objective of this course is to encourage students to develop knowledge of Fourier transform and its properties finite and infinite both.

II: Examination: The examination scheme for theory examination of Mathematics subject is as follows:- The Semester examination carrying 85 marks .The Semester exam question paper contain 5 Questions with internal choice. The faculty member will award CCE marks based on Mid semester Test, Pre university Test ,Presentation .Assignment and Class performance . The CCE marks of each paper is of 15 marks.

III: Course Outcomes (CO):

CO1. Student learns to solve wave equations with the use of Laplace transform.

CO2. Students will be able to solve electric circuit's beams problems with the use of Laplace transform.

CO3. Understand complex Fourier transform, inversion formula, sine and cosine transform. Properties of Fourier transforms, convolution and Parseval's identity.

CO4 Student will learn finite fourier transform inverse formula. Operational and combined properties of sine and cosine transform.

MST (20)	PUT (20)	Presentation (10)	Assignment (10)		

- **Program Outcome for the B.Sc. (Physics, Mathematics, Electronics) Degree**

1. Develop ability to understand physical concepts theoretically and experimentally with their relevance in day to day life.
2. Development of basic knowledge of Quantum mechanics, Relativity, Nano-technology, Nuclear Physics, Laser & extensive knowledge of Mechanics, Optics, Thermodynamics, Solid state physics, and Electro-Magnetic theory along with skill development of related equipment and experiment.
3. Understanding the basic concepts of Mathematics to develop aptitude of problem solving ability.
4. Applying Mathematics in Interdisciplinary subjects to develop a logical approach.
5. Acquire adequate knowledge of Algebra, Geometry, Calculus, and Trigonometry etc to apply in day to day technology.
6. Understanding the fundamental concepts of basic electronics, Operational amplifiers, Microcontrollers, Microprocessors and Communication systems.
7. Develop the skills in handling scientific instruments designing and fabrication experimental kits apart from the prescribed curriculum as a value added qualification for the industrial and academic fields
8. Inculcate the logical reasoning ability and leadership quality & imbibe the moral, social and ethical values to practice high standards in professional life.

- **Program Outcome for the B.Sc. (Physics, Mathematics, Comp. Sci.) Degree**

1. Develop ability to understand physical concepts theoretically and experimentally with their relevance in day to day life.
2. Development of basic knowledge of Quantum mechanics, Relativity, Nano-technology, Nuclear Physics, Laser & extensive knowledge of Mechanics, Optics, Thermodynamics, Solid state physics, and Electro-Magnetic theory along with skill development of related equipment and experiment.
3. Understanding the basic concepts of Mathematics to develop aptitude of problem solving ability.
4. Applying Mathematics in Interdisciplinary subjects to develop a logical approach.
5. Acquire adequate knowledge of Algebra, Geometry, Calculus, and Trigonometry etc to apply in day to day technology.
6. Inculcate the logical reasoning ability and leadership quality & imbibe the moral, social and ethical values to practice high standards in professional life.
7. Understand the fundamental concepts of computers and business environment and IT application in business and also learn technologies and IT languages so the business problem could be addressed
8. To develop skilled manpower in the various areas of information technology like: data base management, software development, computer-languages, software engineering, web based applications etc.

Lesson Plan**Subject: Algebra and Trigonometry****Session: Jul-Dec****Class: B.Sc. - I Sem**

I: Objective of course: The successful student should be able to acquire a basic vocabulary in mathematics, develop basic skills in manipulating and simplifying algebraic expressions, acquire expertise in solving polynomial equations, linear equations involving exponential, logarithmic and trig functions, , the trig ratios, Law of Sines and Law of Cosines, prove simple trig identities, and prepare for other math courses at the college level.

II: Examination: The examination scheme for theory examination of Mathematics subject is as follows:- The Yearly examination carrying 40 marks (40 marks for each paper I , II and III). The Yearly exam paper –I , Paper-II and paper –III each question paper contain 5 Objective Type Questions, 5 Short answer type questions and 5 Long Answer Type Questions with internal choice. The faculty member will award CCE marks based on Quarterly and Half Yearly Exam marks. The CCE marks of each paper 10 marks based on Quarterly (5 Marks) and Half Yearly (5 Marks) Examination.

III: Course Outcomes (CO):

CO1 Students will able to use matrices techniques for solving system of homogeneous and non-homogeneous simultaneous linear equations. Find Eigen values and Eigen vectors of the matrix.

CO2 Identify consistent, inconsistent, dependent and independent system of equations in three variables and learn to write the solutions for each type.

CO3 Demonstrate algebraic ability with algebraic topics including exponential, logarithmic, and trigonometric functions and can express hyperbolic and inverse hyperbolic functions by using De Moivre's theorem.

CO4 Students will use Boolean algebra to design and simplify logical circuits. Apply truth tables and the rules of propositional and predicate about the statement.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
PAPER-I Algebra and Trigonometry				
1	I	Rank of a matrix ,Characteristic equation of a matrix, Eigen values and Eigen vectors	Introduction of paper and basic definitions.	B.N. 2,5
2			Definition of Rank of row matrices, column matrices and Linearly dependent and Linearly independent matrices.	B.N. 2,5
3			Solve the problems related to previous lecture.	B.N. 2,5
4			Find rank by Echelon form	B.N. 2,5
5			Solve the problems related to previous lecture.	B.N. 2,5
6			Find rank by normal form	B.N. 2,5
7			Solve the problems related to previous lecture.	B.N. 2,5
8			Find rank by direct method	B.N. 2,5
9			Find Eigen value and Eigen vectors of a matrix	B.N. 2,5
10			Solve the problems related to previous lecture	B.N. 2,5
11			Types of matrices and theorem based on definitions.	B.N. 2,5
12			Revision of unit I	
CO: 1,2				
LO: Students will be able to find Rank of a matrix,Normal and Eachlon form of a matrix, Eigen values, eigen vectors.,Characteristic equation of a matrix,Linear independence of row and column matrix.				

Lecture no.	Unit no.	Topics	Sub Topic	Reference
13	II	Cayley Hamilton theorem, Application of matrices to a system of linear (both homogenous and non - homogenous) equations. Theorems on consistency and inconsistency of a system of linear equations.	Prove Cayley Hamilton theorem.	B.N.2,5
14			Problems based on Cayley Hamilton theorem.	B.N. 2,5
15			Problems based on Cayley Hamilton theorem.	B.N. 2,5
16			Practice	B.N. 2,5
17			Cramer's solution , explain conditions for consistency and In consistency	B.N. 2,5
18			Problem based on non-homogeneous equations	B.N. 2,5
19			Solve the problems related to previous lecture	B.N. 2,5
20			Problem based on homogeneous equations	B.N. 2,5
21			Solve the problems related to previous lecture	B.N. 2,5
22			Practice	
23			Revision of unit II	

CO: 1

LO: Students understand the proof of Cayley Hamilton theorem and its use in finding inverse of matrix. Application of matrix to solve system of linear (both homogenous and non - homogenous) equations. Theorems on consistency and inconsistency of a system of linear equations. Solving the linear equations with three unknowns.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
24	III	Theory of equations	Explain basic definition and Problems based on Synthetic division (Short answer type questions).	B.N.3,4,5
25			Problems based on Synthetic division (Long answer type questions).	B.N. .3,4,5
26			Greatest common divisor division (Long answer type questions).	B.N. .3,4,5
27			Solve the problems related to previous lecture	B.N. .3,4,5
28			Relation between the roots and coefficients of a general polynomial equation	B.N. .3,4,5
29			Solve the problems related to previous lecture (Short answer type questions).	B.N. .3,4,5
30			Solve the problems related to previous lecture	B.N. .3,4,5
31			Solve the problems related to previous lecture	B.N. .3,4,5
32			Transformation of equations, Descarte's rule of signs.	B.N. .3,4,5
33			Transformation of equations, roots multiplied by a constant k.	B.N. .3,4,5
34			Transformation of equations, Reciprocal of the roots.	B.N. .3,4,5
35			Transformation of equations, roots diminished by h.	B.N. .3,4,5
36			Problems based on removal of terms.	B.N. .3,4,5
37			Transformation in general	B.N. .3,4,5
38			Solve the problems related to previous lecture	B.N. .3,4,5
39			Descarte's rule	B.N. .3,4,5
40			Revision of unit III	

CO: 1

LO: Students learn the solving skill in the Relation between the roots and coefficients of a general polynomial equation in one variable. Transformation of equations, Descarte's rule of signs.

B.Sc. – I Year

Subject: Algebra and Trigonometry

Lecture no.	Unit no.	Topics	Sub Topic	Reference
41	IV	Symbolic logic and algebra of propositions, Boolean Algebra, Algebra of electric circuits and its application	Basic definitions related to topic and examples.	B.N.5
42			Problems based on Truth table.	B.N. 5
43			Solve the problems related to previous lecture	B.N. 5
44			Problems based on logical equivalence.	B.N. 5
45			Practice the problems.	B.N. 5
46			Properties of Boolean Algebra.	B.N. 5
47			Solve the problems related to previous lecture	B.N. 5
48			Duality and properties of Boolean Algebra.	B.N. 5
49			Solve the problems related to previous lecture	B.N. 5
50			Solve the problems related to previous lecture	B.N. 5
51			Application of Boolean Algebra of switching circuit designs.	B.N. 5
52			Solve the problems related to previous lecture	B.N. 5
53			Logic gates and circuits.	B.N. 5
54			Solve the problems related to previous lecture	B.N.
55			Revision of unit IV	

CO: 4

LO: understand the basic rules, Logic-Logical connectives, Truth tables Tautologies and Contradictions, logical equivalence, Algebra of propositions, Boolean Algebra definition and properties, switching circuits and its applications, logic gates and circuits.

4. R.S. Verma and K.S. Shukla, Text Book on Trigonometry Pothishala Pvt. Ltd.
5. Dr.H.K.Pathak: Algebra and Trigonometry..

VI : Notes

1. There will be individual assignment, presentations and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject:Algebra and Trigonometry			
B.Sc. I Year			
Goal : The goal of this course is to introduce the study of algebra and trigonometry for students to gain an understanding and appreciation of the elegance, utility and mathematical importance of several algebraic structures; specifically matrix,theory of equations,trigonometric functions,etc.			
Objective: The sequence exposes students to matrix, theory of equations,trigonometric functions,etc.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Algebra and Trigonometry further to develop understanding problems of Mathematics and solve.	% Students having the basic concept of Algebra and Trigonometry and further to develop understanding problems of Mathematics	% Students having understanding about mathematical functions.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks

Internal Assessment		Class Participation		Total 40	Final Internal Marks Out of 10
Quaterly Exam (10)	Half Yearly Exam (10)	Presentation (10)	Assignment (10)		

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE

Lesson Plan

Subject: Calculus and Differential Equation, Paper II

Session: Jul - March

Class: B.Sc First year

I: Objective of course: To explain them the method of Integration and use it in solving the various types of differential equation.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 40 marks of theory paper will have three sections A, B and C. Section A objective type question carries 5 marks for 5 questions, Section B short answer type question carries 10 marks for 5 questions which have internal choice itself and Section C long answer type question carries 25 marks for 5 questions which have internal choice itself.

III: Course Outcomes (CO):

CO 1: Develop the ability to use differentiation in expansions of function with the help of Maclaurins and Taylors theorem by using Leibnitz Theorem of successive Differentiation.

CO 2: Develop the ability to find the multiple points for a curve and then trace the curve.

CO 3: Develop the ability to use different methods of Integration for different types of functions. Use the method of Integration to find the area and length of the curves.

CO 4: Develop the method of integration to solve various types of differential equations of first order and Higher degrees and also of second order.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2	-	1	-	1	-	2
CO 2	3	3	2	2	-	3	-	-
CO 3	2	2	-	3	-	3	-	2
CO 4	2	3	3	3	-	2	-	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Successive Differentiation , Leibnitz Theorem , Maclaurin and Taylor Series expansion and Asymptotes	Basics introduction of topic from 12 th class base	B.N.1-4
2			Successive Differentiation	B.N.1-4
3			N th Derivative	B.N.1-4
4			Use of Partial fraction and Leibnitz Theorem	B.N.1-4
5			N th Derivative of some special value of x	B.N.1-4
6			Maclaurin Series expansion ,Proof	B.N.1-4
7			Taylor Series expansion Proof	
8			Practice problems on Maclaurin Series	B.N.1-4
9			Practice problems on Taylor Series	B.N.1-4
10			Practice problems on above topic	B.N.1-4
11			Introduction of Asymptotes	B.N.1-4
12			Asymptotes of the general curve	B.N.1-4
13			Two parallel Asymptotes	B.N.1-4
14			Practice problems on Asymptotes	B.N.1-4
15			Problems on intersection of curve and Asymptotes.	B.N.1-4
CO : 1				
LO1 : Students will able to find Successive differentiation and understand the proof of Leibnitz theorem, Maclaurin's and Taylor series expansions. Concept of Asymptotes				
16	2	Curvature, Tests for concavity and convexity, Points of inflexion. Multiple points, Tracing of curves in Cartesian and polar co-ordinates	Introduction of Curvature	B.N.1-4
17			Various formulae for finding radius of Curvature	B.N.1-4
18			Practice problems on above topic	
19			Practice problems on above topic	B.N.1-4
20			Centre of Curvature and chord of Curvature	B.N.1-4
21			Introduction of Concavity and convexity	B.N.1-4
22			Point of inflexion. Multiple points	B.N.1-4
23			Method to find the Multiple points	B.N.1-4
24			Practice problems on above topic	B.N.1-4
25			Introduction of Tracing of curves	B.N.1-4
26			Tracing of curves in Cartesian co-ordinates	B.N.1-4
27			Tracing of curves in polar co-ordinates	B.N.1-4
28			Practice problems on above topic	B.N.1-4
29			Practice problems on above topic	B.N.1-4

CO: 2

LO: Develop and learn the skills to find the Curvature , Tests for concavity and convexity Points of inflexion. Multiple points, Tracing of curves in Cartesian and polar co-ordinates.

30	3	Integration of transcendental functions, Definite Integrals, Reduction formulae Quadrature , Rectification.	General method of Integration	B.N.1-4
31			Integration of transcendental functions,	B.N.1-4
32			Integration of Hyperbolic functions	B.N.1-4
33			Practice problems on above topic	B.N.1-4
34			Definite Integrals	B.N.1-4
35			General properties of Definite Integrals	B.N.1-4
36			Definite Integrals as a limit	
37			Reduction formulae	B.N.1-4
38			Standard Results	B.N.1-4
39			Practice problems on above topic.	B.N.1-4
40			Practice problems on above topic	B.N.1-4
41			Area Under Curve	B.N.1-4
42			Practice problems on above topic	B.N.1-4
43			Length of curves	B.N.1-4
44			Practice problems on above topic	B.N.1-4

CO :3

LO: Effective use of mathematical skills to solve the Integration of transcendental functions, Reduction formulae. Definite Integrals, Quadrature, Rectification of curves..

45	4	Linear differential equations and equations reducible to the linear form, Exact differential equation, First order higher degree equations solvable for x, y, p, Clairaut's form and singular solutions. Geometrical meaning of differential equations	Introduction of Linear differential equations	B.N.1-4
46			Equations reducible to the linear form	B.N.1-4
47			Change of variable	B.N.1-4
48			Exact differential equation	B.N.1-4
49			Condition of Exact differential equation	B.N.1-4
50			Integrating factor	B.N.1-4
51			Equation solvable for x, y, p,	B.N.1-4
52			Equation Homogeneous in x and y	B.N.1-4
53			Clairaut's form	B.N.1-4
54			Singular solutions.	B.N.1-4
55			Geometrical meaning of differential equations and family of curves.	B.N.1-4
57			Practice problems on above topics	B.N.1-4
58			Practice problems on above topics	B.N.1-4

		Orthogonal Trajectories.	Practice problems on above topics	B.N.1-4	N 1 - 4
59					
CO: 2					
LO : Student can recognize Linear equations and can reduce it to the linear form, Exact differential equation, First order higher degree equations for x, y, p, Clairaut's form and singular solutions of differential equation.					
60	5	Linear differential equations with constant coefficients. Homogenous linear ordinary differential equations, linear Differential equations of second order. Transformation of the equation by changing the dependent variable and the independent variable Method of variation of parameters,	Introduction	B.N.1-4	
61			Auxiliary equation and its practice problem	B.N.1-4	
62			Method of finding Particular Integral	B.N.1-4	
63			Practice problems on above topics	B.N.1-4	
64			Short method of finding Particular Integral	B.N.1-4	
65			Practice problems on above topics	B.N.1-4	
66			Homogenous linear ordinary differential equations,	B.N.1-4	
67			Practice problems on above topics		
67			linear Differential equations of second order.	B.N.1-4	
68			Equation Reducible to linear equations	B.N.1-4	
68			Practice problems on above topics	B.N.1-4	
69			Removal of First Derivative	B.N.1-4	
70			Transformation of the equation by changing the dependent variable	B.N.1-4	
71			Practice problems on above topics	B.N.1-4	
72			Method of variation of parameters,	B.N.1-4	
73			Cauchy Linear Equation	B.N.1-4	
74	Practice problems on above topics	B.N.1-4			
75	Practice problems on above topics	B.N.1-4			

CO 4

LO Determine and implement best technique to solve Linear differential equations with constant coefficients, Homogenous linear ordinary differential equations, linear differential equations of second order. Transformation of the equation by changing the dependent variable and the independent variable by Method of variation of parameters

IPS ACADEMY, INSTITUTE OF SCIENCE & LABORATORY EDUCATION, INDORE**Lesson Plan****Subject: Vector Analysis and Geometry Paper III****Session: Jul-Dec****Class: B.Sc. First year****I: Objective of course:**

The objective of the module is to introduce and develop the methods of vector analysis. These methods provide a natural aid to the understanding of geometry and some physical concepts. They are also a fundamental tool in many theories of Applied Mathematics.

II: Examination:

The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 40 marks of theory paper will have three sections A, B and C. Section A objective type question carries 5 marks for 5 questions, Section B short answer type question carries 10 marks for 5 questions which have internal choice itself and Section C long answer type question carries 25 marks for 5 questions which have internal choice itself.

III: Course Outcomes (CO):

CO1: Skills to calculate the results of vector addition, subtraction, vector product of three and four vectors as well as distance between points, able to find length area and volumes of curve and objects with vector function.

CO2: Learn to apply and verify Green's, Stoke's and Gauss theorem.

CO3: Investigate and relate geometric ideas to object of three dimensional using various approaches and methods.

CO4: Analyze and evaluate rectangular, cylindrical and spherical co-ordinates by different means.

1	1	Scalar and Vector Product, Vector Differentiation, Gradient, Divergence and Curl.	Basics introduction of topic from 12 th class base	B.N. 2,3,6
2			Scalar and vector product of two vectors	B.N. 2,3,6
3			Scalar and vector product of three and four vectors	B.N. 2,3,6
4			Practice problems on above topic	B.N. 2,3,6
5			Reciprocal system of vectors	B.N. 2,3,6
6			Properties and problem on reciprocal system	B.N. 2,3,6
7			Derivative of scalar and cross product of vectors	B.N. 2,3,6
8			Practice problems on above topic	B.N. 2,3,6
9			Derivative of triple products	B.N. 2,3,6
10			Practice problems on above topic	B.N. 2,3,6
11			Introduction to del operator and basic problems	B.N. 2,3,6
12			Concept of Gradient, Divergence and Curl.	B.N. 2,3,6
13			Problems on gradient	B.N. 2,3,6
14			Directional derivative and its problem	B.N. 2,3,6
15			Problems on divergence and curl.	B.N. 2,3,6
CO:1.				
LO 1: Students will able to find Vector product of three and four vectors, Vector differentiation, Gradient, Divergence and Curl.				
16	2	Vector integration, Theorem of Gauss, Theorem of Green, Stoke's theorem	Basic problems on Vector integration.	B.N. 2,3,5,8
17			Line, Surface and volume integral concepts	B.N. 2,3,5,8
18			Line integral problems	B.N. 2,3,5,8
19			Practice problems on above topic	B.N. 2,3,5,8
20			surface integral problems	B.N. 2,3,5,8
21			Practice problems on above topic	B.N. 2,3,5,8
22			Volume integral problems	B.N. 2,3,5,8
23			Practice problems on above topic	B.N. 2,3,5,8
24			Gauss's theorem and application	B.N. 2,3,5,8
25			Problems on Gauss	B.N. 2,3,5,8
26			Green's theorem and application	B.N. 2,3,5,8
27			Problems on Greens	B.N. 2,3,5,8
28			stokes's theorem and application	B.N. 2,3,5,8
29			Problems on Stokes.	B.N. 2,3,5,8
CO: 2				
LO 2: Develop and maintain the skills to solve Vector integration and understand the Gauss, Greens and Stoke's theorem.				

30	3	General Equation of Second degree and Tracing, System, and Polar Equation of Conic.	General equation of second degree and its concept	B.N. 1,3,4
31			Nature and tracing of conic.	B.N. 1,3,4
32			Working rule to find the centre of conic, eccentricity, foci, directrix.	B.N. 1,3,4
33			Tracing of central conic	B.N. 1,3,4
34			Tracing of parabola	B.N. 1,3,4
35			System of conics	B.N. 1,3,4
36			Intersection of two conics	B.N. 1,3,4
37			Angle of intersection of two curves and circles	B.N. 1,3,4
38			Conic passing through five and four fixed points.	B.N. 1,3,4
39			Radical axis and its properties.	B.N. 1,3,4
40			Polar coordinates of a point	B.N. 1,3,4
41			Tracing of conic	B.N. 1,3,4
42			Practice problems on above topic	B.N. 1,3,4
43			Normal and its problems	B.N. 1,3,4
44			Pole and its problem.	B.N. 1,3,4

CO: 3

LO3: Students develop and maintain problem solving skill in general equation of second degree, tracing of conics, polar equation of conics.

45	4	The Cone and Cylinder.	Equation of cone with given vertex and base.	B.N. 1,3,9
46			Practice problems on above topic	B.N. 1,3,9
47			Equation of cone whose vertex at origin.	B.N. 1,3,9
48			Generator of the cone	B.N. 1,3,9
49			Tangent line and plane to cone	B.N. 1,3,9
50			Reciprocal , right circular and enveloping cone	B.N. 1,3,9
51			Equation of a cylinder	B.N. 1,3,9
52			Right circular cylinder	B.N. 1,3,9
53			Tangent plane to a cylinder	B.N. 1,3,9
54			Enveloping cylinder	B.N. 1,3,9
55			Practice problems on above topic.	B.N. 1,3,9

CO:4

LO4 : Demonstrate the properties of Equation of cone with given base, generators of cone, condition for three mutually perpendicular generators, Right circular cone, Equation of Cylinder, Right circular cylinder, enveloping cylinder

56		The central conicoids,	General equation of second degree in three variables.	B.N. 1,3,11
57			Standard equation and its practice problem	B.N. 1,3,11
58			Intersection of a straight line and central conicoid	B.N. 1,3,11
59			Tangent lines and tangent planes, condition of tangency.	B.N. 1,3,11

60	5	Paraboloid and generating lines.	Enveloping cone and cylinder to a conicoid	B.N. 1,3,11		
61			Practice problems on above topics	B.N. 1,3,11		
62			General equation of paraboloid	B.N. 1,3,11		
63			Tangent plane and condition to tangency	B.N. 1,3,11		
64			Normal to the paraboloid	B.N. 1,3,11		
65			Practice problems on above topics	B.N. 1,3,11		
66			Plane section of conicoid theorem	B.N. 1,3,11		
67			Circular section of ellipsoid.	B.N. 1,3,11		
68			Circular section of hyperboloid.	B.N. 1,3,11		
69			Circular section of paraboloid.	B.N. 1,3,11		
70			Practice problems on above topics	B.N. 1,3,11		
71			Generating lines theorem	B.N. 1,3,11		
72			Condition for a line to be generator	B.N. 1,3,11		
73			Generating line of the hyperboloid and its properties.	B.N. 1,3,11		
74			Projection of generators on the principal planes.	B.N. 1,3,11		
75			Practice problems on above topics	B.N. 1,3,11		
CO: 3,4						
LO5: Effective use of mathematical skills to solve the central conicoids, paraboloids, plane section of conicoids, generating line.						

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Vector Analysis and Geometry			
B.Sc. First year			
Goal: Realized how developments in any science subject helps in the development of other science subjects and vice-versa and how interdisciplinary approach helps them in further studies.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
08-10 Marks	05-08 Marks	02-05 Marks	00-02 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of subject thoroughly. Can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education.	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks

Class Participation		Internal Assessment		Total 40	Final Internal Marks Out of 10
Presentation Out of 10	Assignment Out of 10	Quarterly exam Out of 10	Half Yearly Exam Out of 10		

Lesson Plan**Subject: Abstract Algebra -I****Session: Jul-Dec****Class: B.Sc. - II Year**

I: Objective of course: This course is designed for undergraduate mathematics represents an introductory theory-based course in abstract algebra. The focus of the course will be the study of certain structures called groups, rings, fields and some related structures. Abstract algebra gives to student a good mathematical maturity and enables to build mathematical thinking and skill. A major objective is to introduce students to the language and precision of modern abstract algebra. This means that the course will be proof-based, in the sense that students will be expected to understand, construct, and write proofs which is one of the basic pillars of modern mathematics

II: Examination: The examination scheme for theory examination of Mathematics subject is as follows:- The Yearly examination carrying 40 marks (40 marks for each paper I, II and III). The Yearly exam paper –I, Paper-II and paper –III each question paper contain 5 Objective Type Questions, 5 Short answer type questions and 5 Long Answer Type Questions with internal choice. The faculty member will award CCE marks based on Quarterly and Half Yearly Exam marks. The CCE marks of each paper 10 marks based on Quarterly (5 Marks) and Half Yearly (5 Marks) Examination.

III: Course Outcomes (CO):

CO1 Understand the concepts of Groups, Sub-Groups, Normal Subgroups, Quotient Groups, Rings, Sub-Rings, Ideals Including Integral Domain, Homomorphism and Isomorphism.

CO2 Explain the fundamental concepts of advanced algebra and its role in modern mathematics and applications.

CO3 Develop capabilities with an axiomatic treatment of mathematics.

CO4 Demonstrate to understand to verify relationships between operations satisfying various properties of groups.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

PAPER-I Abstract Algebra				
1	I	group, Subgroups, Algebra of subgroups, Cyclic groups and their simple properties.	Introduction of paper and basic definitions.	B.N.1-5
2			Group. abelian group and examples.	B.N.1-5
3			Solve the problems related to previous lecture.	B.N.1-5
4			General properties of groups.	B.N.1-5
5			Solve the problems related to previous lecture.	B.N.1-5
6			Definitions and Solve the problems related to previous lecture.	B.N.1-5
7			Definitions of Subgroup and theorems	B.N.1-5
8			Theorms related to previous lecture.	B.N.1-5
9			Theorms related to previous lecture.	B.N.1-5
10			Theorms related to previous lecture.	B.N.1-5
11			Definitions of Cyclic group and theorems	B.N.1-5
12			Theorems related to previous lecture.	B.N.1-5
13			Theorems related to previous lecture.	B.N.1-5
14			Revision of unit I	
CO:1.				
LO: Students learn the Definition and basic properties of group to find the proof and solve problems. Order of an element of a group, Subgroups, Algebra of subgroups, Cyclic groups and their simple properties.				

Lecture no.	Unit no.	Topics	Sub Topic	Reference
15	II	Coset decomposition. Lagrange's theorem and its corollaries including Fermat's theorem, Normal sub group and Quotient groups.	Explain Cosets and theorems	B.N.1-5
16			Theorems related to previous lecture.	B.N.1-5
17			Theorems related to previous lecture.	B.N.1-5
18			Lagrange's theorem	B.N.1-5
19			Fermat's theorem	B.N.1-5
20			Theorems related to previous lecture.	B.N.1-5

21		Examples related to previous lecture.	B.N.1-5
22		Define Normal subgroups with examples.	B.N.1-5
23		Theorems related to previous lecture.	B.N.1-5
24		Theorems related to previous lecture.	B.N.1-5
25		Centre of a group and theorems	B.N.1-5
26		Quotient group and theorems	B.N.1-5
27		Theorems related to previous lecture.	B.N.1-5
28		Theorems related to previous lecture.	B.N.1-5
29		Revision of unit II	

CO: 1

LO: Students learn Coset decomposition. Lagrange's theorem and its corollaries including Fermat's theorem, Normal sub group and Quotient groups.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
30	III	Homomorphism and Isomorphism of groups , fundamental theorem of Homomorphism, Transformation and Permutation group. S_n (various subgroups of S_n , $n < 5$ to be studied) and Cayley's theorem.	Definitions of Homomorphism and properties of Homomorphism.	B.N.1-5
31			Isomorphism of groups and examples.	B.N.1-5
32			properties of Isomorphism.	B.N.1-5
33			Theorems related to previous lecture.	B.N.1-5
34			Theorems related to previous lecture.	B.N.1-5
35			Kernel of Homomorphism and theorem.	B.N.1-5
36			Second theorem on Homomorphism.	B.N.1-5
37			Theorems related to previous lecture.	B.N.1-5
38			Permutation group and examples.	B.N.1-5
39			Groups of Permutation , Cyclic Permutation and theorem.	B.N.1-5
40			Even and odd Permutation and theorem.	B.N.1-5
41			Cayley's theorem	B.N.1-5
42			Examples .	B.N.1-5
43			Explain Automorphism of a group with example	B.N.1-5
44			Theorems related to previous lecture.	B.N.1-5
45			Examples	B.N.1-5
46			Revision of unit III	

CO : 1,2

LO: Demonstrate the effective use of mathematical skills to solve theorems of Homomorphism and Isomorphism of groups , fundamental theorem of Homomorphism, Transformation and Permutation group. S_n (various subgroups of S_n , $n < 5$ to be studied) and Cayley's theorem.

VIII Rubric for Internal Assessment			
Subject: Abstract Algebra			
B.Sc. II Year			
Goal : The goal of this course is to introduce the study of abstract algebra and for students to gain an understanding and appreciation of the elegance, utility and mathematical importance of several algebraic structures; specifically groups, rings and fields.			
Objective: This sequence provides an introduction to modern algebra. The sequence exposes students to groups, rings and fields. This particular course will focus on the topic of groups and the maps between groups, namely homomorphisms and isomorphisms.

Lesson Plan

Subject: Advance Calculus, Paper II

Session: Jul - March

Class: B. Sc. II year

Objective of course: To explain them the method of Integration , Sequences, Continuity , Partial differentiation, Jacobians , Double and triple Integral

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The semester examination is carrying 40 marks of theory paper will have three sections A, B and C. Section A objective type question carries 5 marks for 5 questions, Section B short answer type question carries 10 marks for 5 questions which have internal choice itself and Section C long answer type question carries 25 marks for 5 questions which have internal choice itself.

III: Course Outcomes (CO):

CO 1 : Develop the ability to understand different types of sequences by various tests. Understand the convergence sequences.

CO 2 : Develop the ability to understand the function, its continuity. Mean Value Theorem and their Geometrical Interpretation.

CO 3 : Develop the ability to understand Limits, Continuity of Function of Two variables. Use of Partial Differentiation in various real problems. Use of differentiation in finding Maxima and Minima of a Function.

CO 4 : Develop the ability to find the double and triple integrals, Beta and Gamma Function. Use of Multiple Integration in finding the volume and surface of the solid.

IV: PO- CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 4	3	3	2	2	-	3	-	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Definition of a Sequence . Theorems on limits of sequences. Bounded and Monotonic of sequences. Cauchy's convergence criterion. Series of non-negative terms. Comparison test, Cauchy's integral test, Ratio test. Raabe's test, logarithmic test. Leibnitz's theorem. Absolute and conditional convergence.	Basics introduction of topic from 12 th class base	B.N.1,2
2			Convergence of Sequences	B.N.1,2
3			Bounded and Monotonic Sequences	B.N.1,2
4			Divergent ,Oscillatory and Cauchy sequences	B.N.1,2
5			Cauchy theorem	B.N.1,2
6			Convergence of Series	B.N.1,2
7			Sequences of partial Sum of a series	B.N.1,2
8			Practice problems on Series	B.N.1,2
9			Different test for series.	B.N.1,2
10			Practice problems on Different test	B.N.1,2
11			Practice problems on Different test	B.N.1,2
12			Alternating series	B.N.1,2
13			Leibnitz's theorem	B.N.1,2
14			Absolute and conditional convergence	B.N.1,2
15			Problems on Absolute and conditional convergence.	B.N.1,2
CO : 1				
LO1 : Students will able to define sequence, Bounded and monotonic sequences. Understand theorems on limits of sequences, Cauchy's convergence criterion. Series of non-negative terms. Able to apply Comparison test, Cauchy's integral test, Ratio test. Raabe's test ,logarithmic test. Leibnitz's theorem. Absolute and conditional convergence.				
16	2	Continuity of function of one	Introduction of Continuity of function of one variable,	B.N.1,2
17			Cauchy Definition of continuity	B.N.1,2

18	variable, Sequential Continuity, Properties of continuous function, Chain Rule of differentiability, Mean value theorems and their geometrical interpretations, Darboux's Intermediate Value, Theorem for derivatives.	Theorem on Sequential Continuity,	B.N.1,2
19		Kinds of Discontinuity	B.N.1,2
20		Bounded function	B.N.1,2
21		Introduction of differentiability	B.N.1,2
22		Practice problems on differentiability	B.N.1,2
23		Chain Rule	B.N.1,2
24		Derivative of the inverse function	B.N.1,2
25		Darboux's Intermediate Value, Theorem for derivatives.	B.N.1,2
26		Mean value theorems	B.N.1,2
27		Geometrical interpretations	B.N.1,2
28		Practice problems on above topic	B.N.1,2
29		Taylor's Theorem	B.N.1,2

CO: 2

LO: Develop the skills to understand Continuity of function of one variable, Sequential Continuity, Properties of continuous function, Chain Rule of differentiability, Mean value theorems and their geometrical interpretations, Darboux's Intermediate Value, Theorem for derivatives.

30	3	Limit and continuity of functions of two variables. Partial differentiation, Change of variables, Euler's Theorem on homogeneous function, Taylor's theorem for function of two variables, Jacobians	Limit and continuity of functions of two variables.	B.N.1,2
31			Algebra of limits	B.N.1,2
32			Continuity of functions of two variables.	B.N.1,2
33			Algebra of Continuous functions	B.N.1,2
34			Partial differentiation	B.N.1,2
35			Geometrical meaning of Partial differentiation	B.N.1,2
36			Homogeneous function	B.N.1,2
37			Euler's Theorem on homogeneous function,	B.N.1,2
38			Practice problems on above topic	B.N.1,2
39			Practice problems on above topic.	B.N.1,2
40			Change of variables	B.N.1,2
41			Taylor's theorem for function of two variables	B.N.1,2
42			Practice problems on above topic	B.N.1,2
43			Jacobians	B.N.1,2
44			Practice problems on above topic	B.N.1,2

CO: 3

LO: : Determine and implement best methods to evaluate Limit and continuity, Partial differentiation,

Taylor's theorem for functions of two variables. Euler's Theorem on homogeneous function, Jacobians				
45	4	Envelope and evolutes, Maxima, Minima of functions of two variables. Lagrange's , multiplier method, Beta and Gamma Functions	Introduction of Envelope and evolutes	B.N.1,2
46			Method of Finding Envelope and evolutes	B.N.1,2
47			Equation of Envelope in terms of Polar co ordinates	B.N.1,2
48			Practice problems on above topic	B.N.1,2
49			Practice problems on above topic	B.N.1,2
50			Maxima and Minima of functions of two variables.	B.N.1,2
51			Necessary condition for Maxima and Minima	B.N.1,2
52			Working Rule	B.N.1,2
53			Lagrange's , multiplier method	B.N.1,2
54			Application	B.N.1,2
55			Beta and Gamma functions	B.N.1,2
57			Properties of Beta and Gamma functions	B.N.1,2
58			Practice problems on above topics	B.N.1,2
59			Practice problems on above topics	B.N.1,2

CO: 4

LO : Effective use of mathematical techniques to solve the envelopes, evolutes, Maxima, Minima of functions of two variables, Beta and Gamma function.

60	5	Double and triple integrals, volumes surfaces of solid of revolutions Dirichlet's integrals. Change of order of integration in double integrals.	Introduction	B.N.1,2
61			Multiple Integral	B.N.1,2
62			Method of finding Double Integral	B.N.1,2
63			Properties	B.N.1,2
64			Triple integrals	B.N.1,2
65			Dirichlet's integrals	B.N.1,2
66			Practice problems on above topics	B.N.1,2
67			Practice problems on above topics	
67			Volumes and surfaces of solid of revolutions	B.N.1,2
68			Different methods	B.N.1,2
68			Practice problems on above topics	B.N.1,2
69			Practice problems on above topics	B.N.1,2

70			Surface of revolutions	B.N.1,2
71			Change of order of integration in double integrals.	B.N.1,2
72			Change of order of integration	B.N.1,2
73			Change of order of integration in polar coordinates	B.N.1,2
74			Practice problems on above topics	B.N.1,2
75			Practice problems on above topics	B.N.1,2

CO :4

LO Students will able to find Double and triple integrals. Dirichlet's integrals, change of order of integration in double integral.

VI: Books as Text and Reference:

14			Orthogonality	B.N. 3,7
15			Christoffel's summation formula.	B.N. 3,7
CO:1				
LO 1: Students will able to understand Series Solution of Differential Equations by Power series Method, Bessel's function, Legendre's function and their properties, recurrence relations and generating functions and the orthogonality of functions.				
16	2	Laplace transformation and Laplace transform of derivative and integral.	Laplace transform, linearity property of Laplace transform	B.N.6,7,8
17			Table of Laplace transform of some elementary function.	B.N. 6,7,8
18			Practice problems on above topic	B.N. 6,7,8
19			First translation or shifting theorem	B.N. 6,7,8
20			Second translation or shifting theorem	B.N. 6,7,8
21			Laplace transform of derivative	B.N. 6,7,8
22			Practice problems on above topic	B.N. 6,7,8
23			Laplace transform of integral	B.N. 6,7,8
24			Practice problems on above topic	B.N. 6,7,8
25			Multiplication and division by t	B.N. 6,7,8
26			Practice problems on above topic	B.N. 6,7,8
27			Differentiation of transform	B.N. 6,7,8
28			Integration of transform	B.N. 6,7,8

29		Practice problems on above topic	B.N. 6,7,8
30		Periodic function and table of Laplace transform theorem	B.N. 6,7,8

CO:2

LO 2: Students develop and maintain problem solving skill in the Laplace transformations, Linearity of the Laplace transformation, Existence theorem, Laplace transforms of derivatives and integrals, Shifting theorem, Differentiation and integration of transforms.

31	3	The Inverse Laplace Transformation and its Application.	Inverse Laplace transform	B.N. 6,7,8
32			Uniqueness of Laplace transform	B.N. 6,7,8
33			Practice problems on above topic	B.N. 6,7,8
34			Linearity property of Laplace transform	B.N. 6,7,8
35			First translation or shifting theorem	B.N. 6,7,8
36			Second translation or shifting theorem	B.N. 6,7,8
37			Practice problems on above topic	B.N. 6,7,8
38			Change of scale property	B.N. 6,7,8
39			Inverse Laplace transform of derivative	B.N. 6,7,8
40			Inverse Laplace transform of integral	B.N. 6,7,8
41			Multiplication by power of p	B.N. 6,7,8
42			Division by a power of p	B.N. 6,7,8
43			Practice problems on above topic	B.N. 6,7,8
44			Convolution theorem	B.N. 6,7,8
45			Practice problems on above topic	B.N. 6,7,8
46			Heaviside's expansion theorem	B.N. 6,7,8
47			Table of inverse Laplace transform theorem	B.N. 6,7,8
48			Practice problems on above topic	B.N. 6,7,8

CO: 2

LO3: Students will be able to find Inverse Laplace transforms, can use Convolution theorem and applications of Laplace transformation in solving linear differential equations with constant coefficients.

49	4	Partial Differential Equation of First Order, Lagrange's solution, Standard Forms and Charpits solution.	Derivative of partial differential equation by the elimination of arbitrary constants	B.N.5, 6,7
50			Derivative of partial differential equation by the elimination of arbitrary functions	B.N. 5,6,7
51			Practice problems on above topic	B.N. 5,6,7
52			Lagrange's method	B.N. 5,6,7
53			Practice problems on above topic	B.N.5, 6,7
54			Practice problems on above topic	B.N. 5,6,7
55			Standard form I	B.N. 5,6,7
56			Practice problems on above topic	B.N. 5,6,7
57			Standard form II	B.N.5, 6,7

58		Practice problems on above topic	B.N. 5,6,7
59		Standard form III	B.N. 5,6,7
60		Practice problems on above topic	B.N. 5,6,7
61		Standard form IV	B.N.5, 6,7
62		Practice problems on above topic	B.N. 5,6,7
63		Charpit's general method	B.N. 5,6,7

CO: 3

LO4: Mathematical skills to solve the Partial Differential equations of the first order, Lagrange's solution. Charpit's general method of solution for Special types of equations other than general.

64	5	Partial Differential Equation of Second and Higher Orders, Homogeneous and non Homogeneous equation with constant coefficient.	Partial differential equation of second order	B.N. 6,7,8
65			Solution by inspection method	B.N. 6,7,8
66			Reduction to canonical forms	B.N. 6,7,8
67			Practice problems on above topic	B.N. 6,7,8
68			Method of finding C.F.	B.N. 6,7,8
69			Alternative Method of finding C.F.	B.N. 6,7,8
70			Practice problems on above topic	B.N. 6,7,8
71			Obtain particular integral	B.N. 6,7,8
72			Short cut methods in finding P.I.	B.N. 6,7,8
73			Practice problems on above topic	B.N. 6,7,8
74			Solution of linear non differential equation	B.N. 6,7,8
75			Practice problems on above topic	B.N. 6,7,8

CO: 4

LO5: Students understand and solve the problems of Partial differential equations of second and higher orders. Homogeneous and non-Homogeneous equations with constant coefficients.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Books as Text and Refrence:

1. Gorakh Prasad – Differential Calculus, Pothishala pvt. Ltd. Allahabad
2. D.A. Murray: Introductory Course in Differential Equations, Orient Long man, India 1967.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Differential Equation			
B.Sc. Second Year			
Goal: Realized how developments in any science subject helps in the development of other science subjects and vice-versa and how interdisciplinary approach helps them in further studies.			
Objective: Students can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.			
08-10 Marks	05-08 Marks	02-05 Marks	00-02 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of subject thoroughly. Can achieve their goal easily in further research and develop the confidence for self-education and ability for lifelong learning in the field of mathematical sciences.	% Students having the basic concept of subject. To achieve goal need more practice. Need to develop confidence for self-education.	% Students having understanding about subject partially, but not satisfactory.	% Students Need More Efforts for Solution and Basic Concept of subject.

IX: Scheme of internal marks

Class Participation		Internal Assessment		Total 40	Final Internal Marks Out of 10
Presentation Out of 10	Assignment Out of 10	Quarterly exam Out of 10	Half Yearly Exam Out of 10		

Lesson Plan

Subject: Linear Algebra, Numerical Analysis

Session: Jul-Dec

Class: B.Sc. Vth Sem

I: Objective of course: To provide the basic knowledge of Various Mathematical Techniques to solve Linear Algebra and Numerical Analysis Problems. Also understanding basic concepts of linear algebra (systems of linear equations, matrix calculus, vectors and basic vector operations) . Solving computational problems of linear algebra. Solving and Methods of various numerical methods of Solving Algebraic equation , interpolation , Simultaneous equation , Numerical Differentiation, Numerical Integration and Ordinary Differential equation.

I: Examination: The faculty member will award CCE marks based on Internal test, assignments. The examination scheme for both theory for B.Sc Mathematics subject is as follows: - The Semester examination carries 125 marks. The paper contains 15 Objective Type Questions, 5 Short answer type questions and 5 Long Answer Type Questions. The CO 25 marks based on internal test, assignment.

III: Course Outcomes (CO):

CO 1 : Develop the ability to analyze and Evaluate the accuracy of General methods and Algorithms such as Interpolation, Algebraic and Transcendental equations to solve numerically First Order Differential Equation.

CO 2: Under the basics of Finite Precision Arithmetic, Conditions of Problems and finding approximate solutions to Various Mathematical problems by using Numerical methods.

CO 3 : To Understand the basic concept of Vector Spaces and Matrix Algebra to solve complex and simple problems.

CO 4 : Use computational techniques and Algebraic skills for the study of system of Linear Equation, Eigen vales, Eigen Vectors and Diagonalization method .

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	-	3	-	2	-	2
CO 2	3	3	2	2	1	2	-	2
CO 3	3	2	2	2	1	2	-	2
CO 4	3	3	2	-	-	-	-	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
01	Unit I	Vector Spaces, subspaces, Basis, , Finite Dimensional vector space Existence theorem and Dimension	Definition and Example of Vector Spaces	B.N.2,3,4,5
02			Vector Subspace and Criterion for a subspace	B.N.2,3,4,5
03			Algebra of subspaces and Theorem based on algebra of subspace	B.N.2,3,4,5
04			Linear and Direct Sum of vector subspace and Theorems	B.N.2,3,4,5
05			Linear Combination of Vector Space, Linear Span, Linearly Dependent and Linearly Independent of Vectors, Basic Properties	B.N.2,3,4,5
06			Basis of a vector space and Finite Dimensional Vector Spaces and theorems	B.N.2,3,4,5
07			Invariance of number of elements in basis, Dimension of finitely generated vector spaces	B.N.2,3,4,5
08			Ordered Basis and Dimension of sum of subspaces, Theorems	B.N.2,3,4,5
09			Exercise and Problems based on above topics	B.N.2,3,4,5
CO 3:				
LO 1 : Use computational techniques and algebraic skills essential for under the vector spaces :vector spaces, subspaces, Sum and direct sum of subspaces, Linear span, Linear dependence, independence and their basic properties, Basis, Finite dimensional vector spaces, Existence theorem for basis, Invariance of the number of elements of a basis set, Dimension, Dimension of sums of vector subspaces.				
10	Unit II	Linear Transformation and Their Representation as Matrices	Linear Transformation : Definitions and Properties Examples based on Linear Mapping	B.N.2,3,4,5
11			Isomorphism of Linear Transformation and some theorems based on Isomorphism	B.N.2,3,4,5
12			Matrix representation of L.T. and Theorems and Examples	B.N.2,3,4,5
13		Rank and Nullity of Linear Transformations	Definition : Rank and Nullity of Linear Transformation	B.N.2,3,4,5
14			Product and Invertible of LT, Singular and Non Singular Linear Transformation	B.N.2,3,4,5
15		Eigen Values and Eigen Vectors of a LT and Diagonalization	Introduction of Eigen values and Eigen Vectors of Linear Transformations and examples	B.N.2,3,4,5
16			Cayley Hamilton Theorems and Examples	B.N.2,3,4,5
17			Diagonalisation of Matrices and Examples of Various Eigen Values Problems	B.N.2,3,4,5
18			Definitions Bilinear Transform and Quadratic form, Examples, LT of Quadratic Form	B.N.2,3,4,5
19		Quotient Space and Its Dimension	Introduction to Quotient Space and Its Dimension with examples	B.N.2,3,4,5
CO 4 :				

LO2 : Find Linear transformations and their representation as matrices, The algebra of linear transformations, The rank- nullity theorem, Eigen values and Eigen vectors of a linear transformation, Diagonalisation, Quotient space and its dimension.

20	Unit III	Approximations , Errors and Its Types, Introduction of solution of Equations (Algebraic and Transcendental)	Definition of Approximations and Errors, Types of Errors, introduction to Bisection Method and Examples	B.N.1,5
21			Solution by Regula False Methods and Newtons Raphsons Method, Examples and Solutions of various types of problems	
22			Order of convergence N R methods, Bisection Method etc.	
23			Introduction and Finding the roots of second degree polynomials	
24		Interpolation	Introductions Finite Differences , Different types of Operators and Relationship between them.	B.N.1,5
25			Solution Methods of Interpolations :Equispaced and unequispaced intervals , Lagranges Interpolations , Derivations and Examples	B.N.1,5
26			Divided difference table and Newton's Divided diff Interpolations : Derivations and Examples	B.N.1,5
27			Newton's Forward Interpolations and Newtons Backword Interpolations Formula and Their examples	B.N.1,5

CO 1 :

LO3 : Derive appropriate numerical methods to solve Approximations, Errors and its types, Solution of Equations: Bisection, Secant, Regula Falsi, Newton- Raphson Method and their order of convergence, Roots of second degree Polynomials, Interpolation: Lagrange interpolation, Divided Differences, Interpolation formulae using Differences and derivations of Interpolation formula.

28	Unit IV	Simultaneous Linear Equations Direct Methods and Indirect (Iterative Mathods)	Introduction : Direct methods , Gauss Elimination Method and Gauss Jordan Method, Examples	B.N.1,5
29			LU decompositions or Factorization Method and Examples	B.N.1,5
30			Cholesky Decompositions Method and Examples	B.N.1,5
31			Iterative Method : Gauss Jacobi and Gauss Seidal Method and examples	B.N.1,5
32			Relaxation Methods and Examples	B.N.1,5
33		Numerical Differentiation	Numerical Differentiation based on various interpolations techniques and examples	B.N.1,5
34			Problems and Examples based on above	B.N.1,5

CO 2:

LO4 : Derive appropriate numerical methods to solve Linear Equations: Direct Methods for Solving Systems of Linear Equations, Gauss elimination, Gauss Jordan Method, LU Decomposition, Cholesky Decomposition, Iterative Methods: Jacobi Method , Gauss - Seidel Method, Relaxation Method, Methods Based on Numerical Differentiation.

35	Unit V	Ordinary Differentiation Equations	Introduction : ODE of first order, Eulers Methods and Examples	B.N.1,5
36			Eulers Modified Method and Examples	
37			Single Steps Methods : Runge Kutta Methods and Examples	
38			Predictor- Corrector Method, Milne's Method , Problems and Examples	
39		Numerical Integration and Quadrature	Examples and Problems based on above	
40			Numerical Integration : Open Type and Closed Type Quadrature Formula , Derivation of Newtons Cotes Quadrature Formula for equidistance	
41			Newtons Cotes formula and derivation of various Nr. Integration Formula(Trapazodial, Simpson's Rule)	
42			Properties of Cotes Formula, Cotes Numbers and Their solution.	
43			Derivations of Trapazodial , Simpsons one third and three eight rules.	B.N.1,5
44			Solutions of Various problems by above methods and examples	B.N.1,5
45			Gaussian Quadrature Formula and Examples	B.N.1,5
CO 1 :				
LO 5 : LO5 : Derive appropriate numerical methods to evaluate Ordinary Differential Equations: Euler Method, Eulers Modified Method, Single-step Methods, Runge-Kutta's Method, Multi-step Methods, Milne Method, Numerical Quadrature, Newton-Cote's Formulae, Gauss Quadrature Formulae, Methods Based on Numerical Integration with their derivation.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

IPS ACADEMY, INSTITUTE OF BUSINESS MANAGEMENT & RESEARCH (IBMR), INDORE

Lesson Plan

Subject: Real Analysis , Discrete Mathematics and Graph Theory

Session: Jan-Jun

Class: B.Sc. Vth Sem

II: Examination: The faculty member will award CCE marks based on Internal test, assignments. The examination scheme for both theory for B.Sc Mathematics subject is as follows: - The Semester examination carries 125 marks. The semester exam paper contains 15 Objective Type Questions, 5 Short answer type questions and 5 Long Answer Type Questions. The CCE marking of 25 marks based on internal test, assignment.

III: Course Outcomes (CO):

CO 1: Recognize the important differences between descriptive and inferential statistics; distinguish between different types of variables and data; summarize, organize, tabulate and graph statistical data; read and understand statistical data present in various forms of the media; find and analyze measures of central tendency and variation for quantitative data.

CO 2: To develop the concepts of various types of Graphs and Recognize properties of graphs such as distinctive circuits or trees. Find shortest path by various algorithms.

CO 3: Students will use Boolean algebra to design and simplify logic circuits. Apply truth tables and the rules of propositional and predicate calculus. Formulate and interpret statements presented in Boolean logic. Reformulate statements from common language to formal logic.

CO 4: Prove various theorems about Riemann sums and Riemann integrals and emphasize the proofs.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
01	Unit I	Riemann integral	Introduction : Some Basic definitions Norms, Partition, Refinement , Upper and Lower Riemann Sums, Discussion on Lemmas related to above.	B.N. 1,3,7
02			Discussion on Lemmas Continue of previous lecture, Upper and Lower Riemann integrals, Theorems based on above. Darboux Theorem.	B.N. 1,3,7
03			Riemann integral , Definition Equivalence of definitions, Necessary and Sufficient Conditions of R-Integrability, Different Forms.	B.N. 1,3,7
04			Numerical Examples based on Riemann Integral	B.N. 1,3,7
05			Discussion on Numerical Example based on Riemann integral continue	B.N. 1,3,7
06			Existence of the Riemann integral , Integrability Theorem and Examples	B.N. 1,3,7
07			Properties of the Riemann Integral, Theorem based on Fundamental Theorem of integral Calculus	B.N. 1,3,7
08			Mean Value Theorem and Examples	B.N. 1,3,7
09			Second Mean Value Theorem and Examples	B.N. 1,3,7

CO: 4

LO: Students will understand and solve Riemann integral, Algebra of Riemann integrable functions, Integrability of continuous and monotonic functions, The fundamental theorem of integral calculus, Mean value theorems of integral calculus.

10	Unit II	Metric Space	Definition Metric Space and Examples , Geometrical Interpretation .	B.N. 1,3,7
11			Bounded, Metric Space, Quasi Metric Space, Pseudo Metric Space, Cauchy Schwarz Inequality, Holder's Inequality and Examples	B.N. 1,3,7
12			Meaning and Definition of neighborhood of a point and Limit point of a set, Interior Point, Open Set and Some theorems	B.N. 1,3,7
13			Closed Set , Closed Sphere, Some Theorem and Examples	B.N. 1,3,7
14			Boundary points and Subspace of a Metric, Examples, Theorems	B.N. 1,3,7
15		Cauchy sequences, Completeness,	Convergence of a sequence in Metric Space, Diff between limit and limit point. Theorems and	B.N. 1,3,7

		Cantor's intersection theorem, Contraction principle	Examples, Cauchy Sequence, Theorems and Examples	
16			Complete Metric Space : Theorems and Examples, Cantor's intersection Theorems and Examples	B.N. 1,3,7
17			Contraction Principle and Fixed point, Examples	B.N. 1,3,7
18		Real numbers as a complete ordered field, Definition of Continuous functions and its illustrations.	Real Numbers , Notations, Axiomatic Introduction, Definitions and Examples	B.N. 1,3,7
19			Definition Continuous Function and Theorem, Examples	B.N. 1,3,7

CO : 1

LO : Bounded, Metric Space, Quasi Metric Space, Pseudo Metric Space, Cauchy Schwarz Inequality, Holder's Inequality and Examples

20	Unit III	Algebra of Logic, Tautologies and Contradictions, logical equivalence, Algebra of propositions, Quantifiers: Universal and Existential Quantifiers	Introduction, Statement and Proposition, Logical Connectives, Examples, Truth Tables of Various Logical Operations, Examples	B.N. 7
21			Tautology and Contradiction, Logical Equivalence, Examples	
22			Some Basic Laws of Algebra of Proposition and Their Truth tables	
23			Quantifiers: Universal and Existential Quantifiers, Examples	
24		Boolean Algebra and its properties, Demorgan's law, Algebra of Electric circuits and its applications.	Definition : Boolean Algebra and Examples, Laws /Properties of Boolean Algebra and Their proof.	B.N. 7
25			Demorgan's Law and its proof, Examples based on Boolean Algebra, Simplification of examples	B.N. 7
26			Switch Algebra, Application , Combination of Two Switches, Design of Various Circuits.	B.N. 7
27			Simplified Circuit of Functions and Numerical Examples.	B.N. 7

CO: 3

LO: Demonstrate the effective use of mathematical skills to solve Algebra of Logic, Tautologies and Contradictions, logical equivalence, Algebra of propositions, Quantifiers: Universal and Existential Quantifiers, Boolean Algebra and its properties, Demorgan's law, Algebra of Electric circuits and its applications.

28	Unit IV	Boolean Function, Disjunction and Conjunction Normal Forms, Boole's Expansion Theorem	Boolean Function : Definition, Minimal Boolean Function, Examples	B.N. 7
29			Disjunctive Normal Form , Complete Disjunctive Normal Form, Some theorems of Disjunctive normal form (Boole's Expansion Theorem)	B.N. 7
30			Conjunctive Normal Form , Complete Conjunctive Normal Form, Some theorems of Conjunctive	B.N. 7

			normal form (Bools Expansion Theorem)	
31			Numerical Examples of Conversion of CNF to DNF	B.N. 7
32			Numerical Examples of Conversion of DNF to CNF	B.N. 7
33			Problems and Examples based on above	B.N. 7

CO: 3

LO: Demonstrate the effective use of mathematical skills to solve Algebra of Logic, Tautologies and Contradictions, logical equivalence, Algebra of propositions, Quantifiers: Universal and Existential Quantifiers, Boolean Algebra and its properties, Demorgan's law, Algebra of Electric circuits and its applications.

34	Unit V	Graphs, Multigraphs, Weighted Graphs, Paths and Circuits, Shortest Paths: Dijkstra's Algorithm, Matrix Representation of Graph: Incidence and Adjacency Matrix,	Introduction of Graph and Basic Definition , Directed and Indirected Graph, Degree of Vertex, Self loop, Parallel Edges, Simple and Multi Graph, Finite and Infinite Graph, Isolated and Null Graph, Theorems.	B.N. 6,7
36			Handshaking Lemma, Indegree and outdegree , Isomorphic Graph : Definition and Examples of Two Isomorphic Graph,	
37			Subgraph, Spanning Subgraph, Operations on Graph, Walk Path and Circuit, Some Theorems, Examples	
38			Shortest Paths: Definition and Dijkstra's Algorithm to find shortest path, Example.	
39			Representation of Graph: Incidence and Adjacency Matrix : Definition and Examples .	
40			Problem and Examples	
41		Trees and its simple properties.	Tree : Definition , Rooted Tree, Binary Tree , Pendent Vertex , Binary Decision Tree, Maximum and Minimum Possible Height of n vertex binary tree. , Spanning Tree, Examples.	
42			Tree : Properties of Tree with their proofs.	
43			Spanning Tree and Kruskal's Algorithm to find Spanning Tree.	
44			Problem set and Examples.	

CO: 2

LO: Demonstrate an understanding of the Graphs, Multigraphs, Weighted Graphs, Paths and Circuits, Shortest Paths: Dijkstra's Algorithm, Matrix Representation of Graph: Incidence and Adjacency Matrix, Trees and its

simple properties.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Department of Biotechnology

IPS Academy, Indore

Programme Outcomes For M.Sc. Biotechnology Classes

1. Students will be able to identify, analyze and understand problems related to biotechnology Engineering and finding valid conclusions with basic knowledge in biotechnology Engineering.
2. Students will be able design, perform experiments, analyze and interpret data for investigating complex problems in biotechnology and related fields.
3. Students will be able to decide and apply appropriate tools and techniques in biotechnological manipulation.
4. Students will be able to justify social, health, safety and legal issues and understand his responsibilities in biotechnological practices.
5. Students will be able to understand the need and impact of biotechnological solutions on environment and societal context keeping in view need for sustainable solution.
6. Students will have knowledge and understanding of related norms and ethics in biotechnology product/technique development.
7. Students will be able to undertake any responsibility as an individual and as a team in a multidisciplinary environment.
8. Student will have through knowledge in Biotechnology and will also be ready to engage themselves in lifelong learning.

IPS ACADEMY, DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper III (Microbiology)****Session: Aug -Dec****Class: M. Sc. First Semester Biotechnology**

I: Objective of course: The objective of the course is to acquaint the students with structure and diversity of bacteria, viruses and other microorganisms and their role in the environment

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

CO1	Have knowledge of Concept of classification of and ultra structure of Prokaryotic and Eukaryotic microorganism for their identification.
CO2	Understand the mechanism pathogenesis of microorganism and their impact on different host including humans
CO3	Have knowledge of techniques for Isolation, preservation and sterilization of microorganism and growth pattern and condition of microorganism from academic and industrial perspective.
CO4	Be able to Employ different microbiological techniques at laboratory level and be able to assess and troubleshoot the result

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	-	-	2	3	-	2
CO 2	-	-	1	-	-	2	1	3
CO 3	3	2	1	3	-	1	1	1
CO 4	-	3	3	2	1	3	3	-

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the subject and the specific paper	-
2	1	Introduction of Microbial Classification	History of microbiology	B.R. 2, 3
3			Applications of microbiology	B.R. 2, 3
4			Classification of organisms-2, 3, 4 kingdom classification5, 6, 8 kingdom classification, 3 domain classification	B.R. 4,5,6
5			General methods of classifying bacteria, nomenclature	B.R.4,5,6
6			Characterization of organisms Bacterial identification-steps 1-3, Bacterial identification steps 4-7	B.R.1,5,6
7			Bergey's manual System.	B.R.1,2,3
8			Ultra structure of Achaea Ultra structure of Eubacteria	B.R.1,2,3
9			Introduction of Unicellular Fungi	B.R. 2,3
CO 1				
LO 1: Understand the Concept in classification of Microorganism and study the structure of prokaryotic and Eukaryotic Microorganism.				
10	2	Microbial nutrition and cultivation techniques	Nutritional classification of bacteria, Macronutrients, Micronutrients	B.R. 4
11			Bacteriological media-types and classification, Diversity of extremophiles	B.R. 3
12			Introduction of sterilization techniques, Physical sterilization methods	B.R. 4,5
13			Chemical sterilization methods	B.R. 2,3
14			Microbial isolation techniques ,Pure culture and enrichment culture techniques	B.R.1,2,3
15			Anaerobic microbial cultivation technique	B.R.1,2,3
16			Techniques for culture collection, Techniques for culture maintenance	B.R. 2, 3
17			Culture collection centers in India	B.R. 2, 3
18			International culture collection centers	B.R.2,3
CO 3				

LO 2: Know about the different technique use in microbial cultivation and nutritional requirement of microbes

19	3	Microbial Growth	What is growth ,Growth in terms of microbes	B.R.1,5,6
20			Physical factors affect the growth of microbes, Chemical factors affect the growth of microbes	B.R.1,2,3
21			Nutritional factors affect the growth of microbes	B.R.1,2,3
22			Growth curve of bacteria	B.R.1,2,3
23			Batch culture & Fed batch technique for microbial growth	B.R.1,2,3
24			Continuous & Synchronous culture technique for microbial growth	B.R.4,5
25			Different bacterial growth pattern in solid culture medium	B.R. 4,5
26			Different bacterial growth pattern in liquid culture medium	B.R.2,3
27			Methods of total microbial cell growth estimation	B.R. 2,3

CO 3&4

LO3: Explanation of process of Microbial growth pattern, type and estimation methods.

28	4	Microbial host pathogen interaction	Concept of host and pathogens, Infection and their types	B.R.1,5,6
29			Pathogenicity and virulence concept, Predisposing factors of pathogenicity	B.R.1,2,3
30			Mechanism of pathogenesis, Pathogenicity islands of host and their role	B.R.1,2,3
31			Bacterial pathogens and their pathogenicity factors,	B.R.1,2,3
32			Fungal pathogens and their pathogenicity factors	B.R.1,2,3
33			Viral pathogens and their pathogenicity factors	B.R.2,3
34			Nematodes and protozoal pathogens and their pathogenicity factors	B.R.4,5
35			Concept of microbial attenuation and Vaccine	B.R. 4,5
36			Concept of microbial toxins: Bacterial toxins, Fungal toxins, Algal toxins.	B.R. 2,3

CO 2 & 4

LO4: Describe the various relations of microbial host and pathogens and their mechanisms.				
37	5	Structure and classification of virus and fungus	Morphology and structure of viruses	B.R.4,5
38			Classification & General features of plant viruses	B.R. 4,5
39			Classification& General features of animal viruses	B.R. 2,3
40			Structure and classification of bacteriophage	B.R.2,3,4
41			Life cycle of bacteriophages, Economic importance of viruses	B.R.2,3
42			Sub viral particals:viroids, virusoids, prions	B.R. 2,3
43			Introduction of fungal classification, Characters and types of fungi, General features of fungi	B.R. 4,5,6
44			Life cycle of multicellular fungi <i>Penicillium sp.</i>	B.R.4,5,6
45			Life cycle of unicellular yeast <i>Saccharomyces sp.</i>	B.R.4,5
CO 1&2				
LO5: Explain the structure and classification of microbes like bacteria, viruses and Fungi.				

VI: Book References:

1. Microbiology: Pelczar MJ Jr., Chain ECS and Kreig NR, Tata McGraw Hill Publication (India)
2. Microbial Genetics: Maloy SR, Cronan JE Jr. and Freifelder D, Jones Barlett Publications
3. Biotechnology: A text book of industrial microbiology: Crueger and A Crueger, Sinauer Associate
4. Industrial Microbiology: G Reed, Prescott and Dunn's, CBS Publications
5. Practical Microbiology: RC Dubey and DK Maheshwari, S. Chand Publications
6. Brock biology of microorganisms: Madigan, Martinko, Dunlap, Clark, Pearson International Edition

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.Late submissions will not be accepted in any case
- 5.Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Paper III(Microbiology)			
M. Sc. Biotechnology I Semester			
Goal : The students will develop the ability to understand the general concept of microbiology and its techniques			
Objective: The objective of the course is to acquaint the students with structure and diversity of bacteria, viruses and other microorganisms and their role in the environment			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Microbiology, structure and diversity of bacteria, viruses and other microorganisms and their role in the environment	% Students having the basic of Microbiology, structure and diversity of bacteria, viruses and other microorganisms and their role in the environment	% Students having understanding about general microbiology	% Students Need More Efforts for general microbiology

IX: Scheme of internal marks

Presentation/Viva	Assignment	Class test	Total	Final total out of
50	50	50	150	15

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper: II Cell and Development Biology****Session: Aug -Dec****Class: M.Sc. Biotechnology Semester – I**

I: Objective of course: Students will have thorough knowledge on cell and developmental biology and genetic control of various related events and be able to perform experiments and interpret its data.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper) The theory Paper will have five optional Long answers type questions each of 17 marks

III: Course Outcomes (CO):

- CO1 To impart knowledge and handling on microscope and cell for their use in research activities and biotechnological practices
- CO2 Elaborate understanding on cell- its composition, structure, function & gene level interactions.
- CO3 To impart knowledge on medical cytophysiology for recent advances in basic understanding of certain diseases and practical knowledge on various techniques.
- CO4 Role of genes during cell development in plant & animals.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	-	3	-	3	-	1	2	2
CO 2	-	2	-	-	-	-	-	3
CO 3	-	3	-	2	-	2	-	2
CO 4	-	2	-	-	-	-	-	3

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference		
1	Unit I	Cell Theory & Methods of Study	Structure of Prokaryotic and Eukaryotic cells, Microscope- parts and working of Light Microscope	B.N.7,8,9		
2			Modifications of microscope–phase contrast & Interference	B.N.9		
3			Fluorescence, Confocal Microscopy	B.N.9		
4			Electron (TEM and SEM), Electron tunneling and Atomic Force Microscopy	B.N.9		
5		Membrane Structure and Function	Structural models; Composition and dynamics; Membrane Structure and Function : Structural models;	B.N.1,2,7		
6			Transport of ions and macromolecules; Pumps, carriers and channels;	B.N.1, 10,11		
7			Endo- and Exocytosis and bulk transport	B.N.1, 10,11		
8			Composition and dynamics of plasma membrane. Membrane carbohydrates and their significance in cellular recognition;	B.N.1, 10,11		
9			Cellular junctions and adhesions; Structure and functional significance of plasmodesmata.	B.N.1, 8,11		
10			Cellular responses to environmental signals in plants and animals.	B.N.8, 12		
CO: 1,2						
LO 1: To acquaint students with basic concepts of cell, its structure and various types of microscope.						
11	Unit II	Organelles	Nucleus – Structure and function of nuclear envelope and nucleolus	B.N.1,2,7		
12			Macromolecular trafficking	B.N.1, 12,		
13			Chromatin organization and packaging	B.N.1, 12,		
14			Mitochondria – structure, organization of respiratory chain complexes and function.	B.N.1, 7 12,11,		
15			Mitochondrial DNA , male sterility and Origin and evolution	B.N.1, 7 12,11,		
16			Chloroplast– Structure & function	B.N.1, 7 12,11,		
17			Chloroplast biogenesis Chloroplast DNA and its significance	B.N.1, 7 12,11,		

DEPARTMENT OF BIOTECHNOLOGY, INDORE

18			Cell cycle and control mechanisms	B.N.1, 7 12,11,
19			Sub cellular fractionation and criteria of functional integrity.	B.N. 12,11,
CO : 1 & 2				
LO 2 : To impart knowledge on various organelles of cell and its functions.				
20	Unit III	Endo- membrane System and Cellular Motility	Structure and function of Golgi apparatus	B.N.1,2, 7
21			Structure and function of Lysosomes and Microbodies	B.N.1,2, 7
22			Structure and function of Endoplasmic Reticulum	B.N.1,2, 7
23			Cell shape & Organization and role of microtubules, microfilaments and Intermediate filaments	B.N.1,2, 7
24			Organization and function of Actin binding proteins and their significance	B.N.1,2, 7,12
25			Organization and function of Molecular motors	B.N.1,2, 7,12
26			Extracellular matrix in plants and animals	B.N.12
CO : 2				
LO 3 : To acquaint student with cellular organelles related to cell motility.				
27	Unit IV	Cellular Movements and Pattern Formation	Laying of body axis planes and genetic control	B.N.8, 12
28			Developmental pattern formation and Cellular polarity in Fucus and genetic role	B.N.8, 12
29			Developmental pattern formation and Cellular polarity in Volvox and genetic role	B.N.8, 12
30			Developmental pattern formation and Maternal gene effects in Drosophila	B.N.8, 12
31			Zygotic gene effects in Drosophila and genetic role	B.N.8, 12
32			Homeotic gene effects in Drosophila and genetic role	B.N.8, 12
33			Embryogenesis and early pattern formation in plants	B.N.8, 12
34			Cell lineages and developmental control genes in Caenorhabditis	B.N.8, 12
CO : 2 and 4				
LO 4 : To provide basic understanding and genetic control of cellular movements during development in fucus, volvox, drosophila, plants and animals.				

DEPARTMENT OF BIOTECHNOLOGY, INDORE

35	Unit V	Differentiation of Specialized Cells	Stem cell and its differentiation and Fibroblasts and their differentiation	B.N.1, 8, 12	
36			Blood cell formation	B.N.1, 8, 12	
37			Differentiation of cancerous cells and role of proto-oncogenes	B.N.1, 7,8, 12	
38			Phase changes in Salmonella and Surface antigen changes in Trypanosomes	B.N.8, 12	
39			Heterocyst differentiation in Anabaena	B.N.8, 12	
40		Plant Meristem Organization and Differentiation	Mating cell types in yeast and Sex determination in Drosophila	B.N.8, 12	
41			Organization of Shoot Apical Meristem (SAM)	B.N.8, 12	
42			Organization of Root Apical Meristem (RAM)	B.N.8, 12	
43			Pollen germination and pollen tube guidance; Heterosis and apomixes	B.N.8, 12	
44			Self-incompatibility and its genetic control in Phloem differentiation	B.N.8, 12	
45			Embryo and endosperm development	B.N.8, 12	
CO : 4 & 5					
LO 5 : To equip students with knowledge on stem cell, cell differentiation, cancer biology and genetic role on development in plants and sex determination in animals.

2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5..Attendance will be a major factor for assessing class performance

VIII: Rubric for Internal Assessment

Subject: Biotechnology Paper-IV (Biostatistics and Bioinformatics)			
M.Sc. I Sem			
Goal – Student develops ability to understand Biostatistics and Bioinformatics.			
Objective: To impart knowledge about application of statistics and informatics in biology to students.			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
____ Students	____ Students	____ Students	____ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the Perfect knowledge of tools and techniques and their applications	% Students studied subject thoroughly, more efforts are required for perfection.	% Students having even lesser interest in the subject	% Students Need More Efforts for giving time and attention to the studies

IX: Scheme of internal marks. what have u taken for yearly system please check

Presentation/Viva	Assignment	Class test	Total	Final total out of
50	50	50	150	15

IPS ACADEMY, DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper III (Immunology)****Session: Aug -Dec****Class: M. Sc. Biotechnology Second Semester**

I: Objective of course: The objective of the course is to acquaint the students with Immunology, to understand the relation between Antigen antibody interaction, immunity and its role for mankind use and their detection techniques.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

- CO1 Have knowledge of Concept of immunity, and organization of immune system.
- CO2 Have knowledge of mechanism and component involve in antigen antibody reactions.
- CO3 Understand the applications immune assay and concept of vaccination, hypersensitivity and tumour immunology from academic and industrial perspective.
- CO4 Be able to Employ different techniques at laboratory level and be able to assess and troubleshoot the result

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2	2	3	2	-	3	2
CO 2	-	-	1	1	-	2	-	-
CO 3	2	1	1	-	-	1	2	3
CO 4	1	-	3	3	1	3	3	-

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the subject and the specific paper	-
2	1	Basic Concepts of Immunology	Introduction of Immunity ,Innate Immunity and their response	B.R.1.2.4
3			Acquired Immunity and their response, Inflammatory responses	B.R.2.4.5
4			Complement system ,Phagocytosis	B.R. 4.5.6
5			Cells of Immune systems	B.R.4.5
6			Formation and maturation of immune cells	B.R. 2,3.5
7			Organs of Immune system	B.R.2.4.5
8			Lymphatic system, Lymphoid tissues and immune response	B.R. 4.5.6
9			Primary Lymphoid Organ ,Secondary Lymphoid Organ	B.R.4.5
CO 1				
LO 1: Understand all types of immune cells and organs, their role in immune system and mechanism and type of immunity				
10	2	Immune Response	Introduction of Immune response	B.R. 4
11			Structure and function of Antigens, Immunogenicity of antigen	B.R. 3
12			Concept of immunogen, Hapten and Adjuvant, Role and properties of Adjuvant	B.R. 2
13			Structure of Immunoglobulin's,Types of Immunoglobulin's, Gene organization of Immunoglobulin's	B.R. 4.5.6
14			Immunoglobulin super families	B.R.4.5
15			Basis of self and non self discrimination	B.R. 2,5
16			B-cell maturation ,activation and differentiation, Antibody generation process by B-cell	B.R.4.5
17			T-cell maturation ,activation and differentiation	B.R. 2,5
18			Cell mediate Immune responses, Complement Pathway	B.R.1.2.4

CO 1&2

LO 2: Know about the structure, properties, types and diversity of antigen and antibodies, Immune response and detail knowledge of complement system and its pathway.

19	3	Antigen-Antibody interaction	Concept of Antigen-Antibody interaction, Antigen-Antibody Affinity	B.R. 4,5,6
20			Antigen-Antibody cross reactivity, Antigen-Antibody specificity	B.R.4,5
21			Reaction involve in Antigen-Antibody interaction: Precipitation, Agglutination, Complement Fixation	B.R. 2,5
22			Immunological Assay Techniques	B.R.4,5
23			Radio immune Assay and its application	B.R. 2,3,5
24			Western blotting and its application	B.R. 4,5,6
25			ELISA and its application, Types of ELISA	B.R.4,5
26			Immunofluorescence Assay and its application	B.R. 2,5
27			Immunoelectrone microscopy Assay and its application	B.R.1.2.4

CO 2,3 &4

LO3: Explanation of Antigen Antibody interaction and technique about all the tools and techniques used detection of antigen antibody reaction.

28	4	Vaccinology	Concept of vaccination ,History of Vaccination	B.R. 4,5,6
29			Role of active immunization and passive immunization in vaccine production	B.R.4,5
30			Live vaccine, Advantage and drawback of live vaccine	B.R. 2,5
31			Killed vaccine, Advantage and drawback of killed vaccine	B.R.4,5
32			Concept of attenuation in vaccine, Subunits of vaccine	B.R. 2,3,5
33			Vaccine technology and Hybridoma technology	B.R. 4,5,6
34			Role and properties of adjuvant in vaccination	B.R.4,5
35			Recombinant DNA vaccine, Protein based vaccine, Plant based vaccine	B.R. 2,5
36			Reverse Vaccinology	B.R.1.2.4

CO 3

LO 4: Describe the Immunization and vaccination strategies

37	5	Clinical Immunology	General idea of clinical immunology	B.R. 1.2.3
38			Introduction of MHC molecules, Types and function of MHC molecule, HLA Typing	B.R.1.2.4
39			Introduction of Hypersensitivity, Type I and Type II Hypersensitivity	B.R.2.4.5
40			Type III and Type IV Hypersensitivity	B.R.2.4.6
41			Autoimmune diseases and its type	B.R.2.4.5
42			Transplantation Immunology, Types of graft and graft rejection process, Immunosuppressive therapy for clinical transplantation	B.R.2.5.6
43			Tumor immunology, Tumor antigens and tumor markers	B.R.4.5.6
44			Immune response towards tumor	B.R. 4.5
45			Cancer cell and immunodeficiency	B.R. 2,5

CO 3

LO: Explain the various aspects of immunology like transplantation immunology, tumor immunology and immunohaematology role of MHC in Immune System Hypersensitivity and Autoimmunity

VI: Book References:

1. Immunology: Kubey, Goldsby RA., Thomas J Kindt., Barbara., and Osborne A., Freeman Publication (International)
2. Clinical Immunology: Brostoff J., Seaddin JK., Male D and Roit IM., Gower Medical Publication (International)

4. Fundamental of Immunology: Paul, Lippencott Raven Publications(international)
6. Monoclonal antibodies:Godging, Academic pressy

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week

4.Late submissions will not be accepted in any case

5.Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Paper III(Immunology)			
M. Sc. Biotechnology II Semester			
Goal : The students will develop the ability to understand the general concept of Immunology and its techniques			
Objective: The objective of the course is to acquaint the students with Immunology, to understand the relation between Antigen antibody interaction, immunity and its role for mankind use and their detection techniques.			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Immunology, structure and diversity Antigen, Antibody and other Immunological techniques and their role in the human health	% Students having the basic concept of Immunology, structure and diversity Antigen, Antibody and other Immunological techniques	% Students having understanding about general Immune System	% Students Need More Efforts for general Immune System

IX: Scheme of internal marks

Presentation/Viva	Assignment	Class test	Total	Final total out of
50	50	50	150	15

DEPARTMENT OF BIOTECHNOLOGY, INDORE

Lesson Plan**Subject: Biotechnology Paper: I Molecular Biology****Session: Aug -Dec****Class: M.Sc. Biotechnology Semester – II**

I: Objective of course: Students will have thorough knowledge on genome organization; replication, transcription and translational machinery and its control, mutation and be able to perform related experiments and interpret its data.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper) The theory Paper will have five optional Long answers type questions each of 17 marks

III: Course Outcomes (CO):

- | | |
|-----|--|
| CO1 | Complete understanding on genome organization and various concepts on genetics in prokaryotes and eukaryotes. |
| CO2 | To impart knowledge on replication, transcription, translation and post transcriptional and translational modifications. |
| CO3 | To impart knowledge and skills on mutation and practical knowledge on genomics. |
| CO4 | To develop concept in students on appropriate tools and techniques in biotechnological experiments and analyzing/interpretation of data. |

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	3	-	-	-	-	3
CO 2	2	-	-	-	-	-	-	3
CO 3	3	3	3	-	-	-	-	3
CO 4	1	3	3	-	-	-	-	3

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	Unit I	Genome organization	Organization of bacterial genome	B.N.2, 6,8, 13
2			Organization of eukaryotic chromosomes, Heterochromatin and Euchromatin	B.N.2, 6,8, 13
3			Role of nuclear matrix and Matrix binding proteins in chromosome organization and function	B.N.2, 6,8, 13
4			DNA reassociation kinetics (Cot curve analysis);	B.N.2, 6,3, 8, 13
5		Membrane Structure and Function	DNA melting and buoyant density	B.N.2, 6,3, 8, 13
6			DNA methylation & Imprinting	B.N.2, 6,38, 13
7			Repetitive and unique sequences; Satellite DNA	B.N.2, 6,3,8, 13
8			Nucleosome phasing; DNase I hypersensitive regions	B.N.2, 3, 6,8, 13, 14

CO: 1 & 4**LO 1:** Detailed understanding on genome organization in prokaryotes and eukaryotes and kinetics on DNA.

9	Unit II	DNA Structure; Replication; Repair & Recombination	Structure of and types DNA - A-,B-, Z and triplex DNA;	B.N.2, 6,8, 13,14
10			Measurement of properties of DNA structure- Spectrophotometric, CD, AFM and Electron microscope analysis	B.N.2, 6,8, 13
11			Replication of DNA in prokaryotes	B.N.9,10,11
12			Replication of DNA in eukaryotes	B.N.9,10,11
13			Fidelity or proof reading in Replication;	B.N.9,10,11
14			Replication of single stranded circular DNA;	B.N.9,10,11
15			DNA damage and repair- enzymes; Photoreactivation; Nucleotide excision repair;	B.N.9,10,11
16			Mismatch correction; SOS repair; Recombination: Homologous and non-homologous	B.N.9,10,11
17			Site specific recombination; FLP/FRT and Cre/Lox recombination	B.N.9,10,11, 12

CO: 1,2 & 4

DEPARTMENT OF BIOTECHNOLOGY, INDORE

LO 2 : To understand in details structure and types and qualitative analysis of DNA and its replication, error and recombination.

18	Unit III	Prokaryotic & Eukaryotic Transcription	Prokaryotic Transcription- Promoters- Constitutive and Inducible; Operators;	B.N.9,10,11,12
19			Eukaryotic transcription- RNA polymerase structure and assembly; RNA polymerase I, II, III; Eukaryotic promoters and enhancers; General Transcription factors; TATA binding proteins (TBP) and TBP associated factors (TAF)	B.N.9,10,11,12
20			Mechanism of transcription- initiation, elongation	B.N.9,10,11,12
21			Mechanism of transcription- termination; Anti-termination	B.N.9,10,11,12
22			Regulation of transcription in prokaryotes- Regulatory elements	B.N.9,10,11,12
23			Regulation of transcription in eukaryotes - Activators and repressors	B.N.9,10,11,12
24			Transcriptional regulation-Positive and negative; Operon concept-lac, trp,	B.N.9,10,11,12
25			Transcriptional regulation-ara, his, and gal operons	B.N.12
26			Transcriptional and post-transcriptional gene silencing, Attenuation;	B.N.12

CO: 2, 4

LO 3 : To impart knowledge on Transcription in prokaryotes and eukaryotes and its regulation.

27	Unit IV	Post Transcriptional Modifications	Processing of mRNA-; 5'-Cap formation; 3'-end processing and polyadenylation; Splicing; and mRNA stability	B.N.9,10,11,12
28			Processing of hnRNA, tRNA	B.N.9,10,11,12, 13
29			Processing of rRNA and RNA editing	B.N.9,10,11,12, 13
30			Nuclear export of mRNA; Catalytic RNA, Isoaccepting tRNA	B.N.9,10,11,12, 13
31		Translation & Transport	Universal genetic code and its characteristics; Genetic code in mitochondria;	B.N.9,10,11,12, 13
32			Ribosomes- Composition and assembly; Wobble hypothesis	B.N.9,10,11,12, 13
33			Translation machinery Mechanism of initiation, elongation and termination;	B.N.9,10,11,12, 13

DEPARTMENT OF BIOTECHNOLOGY, INDORE

DEPARTMENT OF BIO-TECHNOLOGY, ANDHRA				
34			Co- and posttranslational modifications;	B.N.9,12, 14
35			Transport of proteins and molecular chaperones;	B.N.9,12, 14
36			Protein stability; Protein turnover and degradation	B.N.9,13
CO: 2 & 4				
LO 4 : To impart knowledge on post transcriptional modification, translation machinery and its transport.				
37	Unit V	Bacterial mutants and mutations	Isolation of Bacterial mutants	B.N.2, 8
38			Useful phenotypes of mutants (auxotrophic, conditional, lethal, resistant)	B.N.2, 8
39			Mutation and Mechanisms of mutagenesis	B.N.2, 8
40			Types of mutations- base pair changes; frameshift; insertions	B.N.2, 8
41			Types of mutations- deletions; tandem duplication	B.N.2, 8
42		Genetic variation	Reversion vs. suppression	B.N.2, 8
43			Mutagenic agents; Mutation rate	B.N.2, 8
44			Assay of mutagenic agents (Ames test)	B.N.2, 8
45			genome polymorphism; uses of polymorphism	B.N.2, 8
CO: 2, 4				
LO 5 : To develop knowledge on various aspects on mutation and isolation of bacterial mutants.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

VIII Rubric for Internal Assessment			
Subject: Biotechnology Paper -IV			
M.Sc. II Semester			
<p>Goal : Students develop the ability to prepare and analyze molecular events. Topics include Genome organization, Membrane Structure and Function, DNA Structure; Replication; Repair & Recombination, Prokaryotic & Eukaryotic Transcription, Post Transcriptional Modifications, Translation & Transport, Bacterial mutants and mutations and Genetic variation.</p> <p>Objective: Students gain understanding of the genome organization and various molecular level functions of organisms, practical knowledge on molecular biology and enable them to analyze and understand the mechanism.</p>			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students good understanding of genome organization, mechanism of central dogma and mutation.	% Students have basic concept of genome organization, mechanism of central dogma and mutation.	% Students little understanding genome organization, mechanism of central dogma and mutation.	% Students Need More Efforts and hard work for understanding the subject

IX: Scheme of internal marks

VIVA/Presentation	Assignment	Class test	Total 150	Final Internal Marks Out of 15
50 marks	50 marks	50 marks		

Lesson Plan

Subject: PII- Bacterial genetics and genetic engineering

Session: Aug -Dec

Class: M.Sc. Biotechnology Sem II

I: Objective of course: The objective of the course is to acquaint the students with gene transfer in bacteria, bacteriophages and plasmids, basic concept of genetic engineering, cloning vectors and cloning methodologies

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

- | | |
|-----|---|
| CO1 | Have knowledge of biology of bacterial and phage genetics and processes involved in bacterial gene transfer |
| CO2 | Have knowledge of tools and techniques for manipulation and analysis of genomic sequences |
| CO3 | Understand the applications of recombinant DNA technology and genetic engineering from academic and industrial perspective. |
| CO4 | Be able to Employ different techniques at laboratory level and be able to assess and troubleshoot the result |

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the course content	-
2	3	Basic concepts of genetic engineering	Restriction enzyme, DNA ligase, Klenow fragment	B.R. 7
3			T4 DNA polymerase, Polynucleotide kinase, Alkaline phosphatase	B.R. 7
4			Cohesive and blunt end ligation, linkers, adapters and homopolymeric tailing	B.R. 1
5			Labeling of DNA	B.R. 7
6			Radioactive and non radioactive probes	B.R. 7
7			Southern hybridization	B.R. 7
8			Northern and western hybridization	B.R. 7
9			FISH	B.R. 4
10			DNA-protein interactions	B.R. 4

CO 2**LO3 :** Know about all the tools and techniques used in recombinant DNA technology

11	2	Bacteriophage and plasmids and restriction-modification systems	Bacteriophage structure and assay	B.R. 7
12			Gene regulation of phage lambda	B.R. 7
13			Lytic and lysogenic cycles	B.R. 7
14			Plasmid biology: copy number and control, incompatibility	B.R. 7
15			Antibiotic resistance markers	B.R. 7
16			Antibiotic resistance markers	B.R. 7
17			Genetic analysis using phage and plasmids	B.R. 1
18			Phage M13-natural biology and use as vector	B.R. 7
19			Restriction modification systems	B.R. 7

DEPARTMENT OF BIOTECHNOLOGY, INDORE

20			Applications	B.R. 7
CO 1				
LO 2: Understand the normal biology of DNA from different sources (plasmids and phages) so that they can be manipulated in construction of vectors and various survival techniques in bacteria.				
21	1	Gene transfer in bacteria	History	B.R. 1
22			Transduction- generalized	B.R. 1
23			Transduction- specialized	B.R. 1
24			Conjugation	B.R. 1
25			Hfr mediated chromosome transfer, merodiploid generation	B.R. 1
26			Gene mapping- genetic	B.R. 4
27			Gene mapping- physical	B.R. 4
28			Transposons	B.R. 1
29			Transposons	B.R. 1
30			Genetic analysis using transposons	B.R. 1
CO1				
LO1 : Describe all processes of transfer of genetic material in bacteria at genetic level				
31	4	Cloning vectors	Plasmids	B.R. 7
32			Bacteriophage	B.R. 7
33			M13 mp vectors	B.R. 7
34			pUC 19 and Bluescript vectors	B.R. 3
35			Cosmids and EMBL and shuttle vectors	B.R. 3
36			YAC and BAC and yeast based vectors	B.R. 3
37			SV 40, vaccinia vectors	B.R. 3

DEPARTMENT OF BIOTECHNOLOGY, INDORE

38			Baculovirus, pichia and retroviral vectors	B.R. 3
39			Expression vectors- pMal, GST, pET	B.R. 7
40			Protein purification	B.R. 7
41			Plant based vectors	B.R. 3
CO 2				
LO4 : Describe the source, functioning and construction of vectors to be used for different purposes in genetic engineering.				
42	5	Cloning methodologies	Insertion of foreign DNA into host cells	B.R. 8
43			Isolation of total RNA and mRNA	B.R. 7
44			Genomic libraries	B.R. 8
45			cDNA libraries	B.R. 8
46			Expression cloning, jumping libraries	B.R. 7
47			Southwestern and farwestern cloning	B.R. 7
48			Yeast 2- hybrid system	B.R. 5
49			Phage display	B.R. 5
50			Principles in maximizing gene expression	B.R. 7
CO3,4				
LO5 : Explain different strategies of cloning DNA into vectors and their applications.

Lesson Plan

Session: August– December

Subject: Biotechnology Paper- I (Enzyme technology)

Class: M.Sc. III Semester

I: Objective of Course: To impart knowledge about principles and applications of biocatalyst to students.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

CO 1	Student must understand biological significance of biocatalyst.
CO 2	Student must be able to isolate and purify enzymes.
CO 3	Student must be able utilize enzymes for commercial purposes.
CO 4	Student plans, performs and analyzes data related to biocatalyst.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	-	-	-	-	-	-	2
CO 2	-	3	2	-	-	-	-	-

CO 4	-	3	-	-	-	-	-	-

DEPARTMENT OF BIOTECHNOLOGY

Lecture no.	Unit no.	Unit Name	Topics	Reference
1.	First	Introduction to enzymes	Introduction to enzymes.	BR1
2.			Historical development in enzymology.	BR1
3.			IUBMB enzyme classification.	BR1
4.			Sources of enzymes.	BR1
5.			Media used for enzyme isolation	BR1
6.			Methods of enzyme isolation.	BR1
7.			Principle and techniques of enzyme assay.	BR1
8.			Factors affecting enzyme activity	BR1
9.			Factors affecting enzyme activity	BR1
CO : 1				
LO : 1.To learn the rules of classification and factors responsible for enzyme activity.				

Lecture no.	Unit no.	Unit Name	Topics	Reference
10.	- Second	Mechanism of action of enzymes	Intracellular localization of enzymes.	BR2
11.			Mechanism of action of enzyme action.	BR2
12.			Investigation of active site.	BR1
13.			Investigation of active site.	BR1
14.			Enzyme activators.	BR1
15.			Co-enzymes and co-factors in enzyme catalysis.	BR1
16.			Investigation of active site.	BR1
17.			Investigation of active site.	BR1
18.			Test of enzyme homogeneity.	BR1
CO: 2				
LO : 2. To learn the concept of active site, methods of isolation and purification of enzymes.				

DEPARTMENT OF BIOTECHNOLOGY

Lecture no.	Unit no.	Unit Name	Topics	Reference
19	Third	Kinetics of enzyme catalyzed reaction	Bioenergetics and catalysis.	B.R. 3
20			Equilibrium state kinetics.	B.R. 3
21			Significance of k_m V_{max} and k_{cat} .	B.R. 3
22			Steady state kinetics.	B.R. 3
23.			Conversion of Michaelis plot into Line-Weaver plot	B.R. 3
24.			Multisubstrate reactions	B.R. 3
25.			General state equation	B.R. 3
26.			Ordered ,random – order reaction	B.R. 3
27			Ping pong mechanism and their significance	B.R. 3
CO : 1				
LO : 3. To learn enzyme kinetics.				

Lecture no.	Unit no.	Unit Name	Topics	Reference
28.	Fourth	Kinetics of inhibition of enzyme catalyzed reactions	Introduction to enzyme inhibition	B.R. 3
29.			Kinetics of competitive inhibition	B.R. 3
30.			Kinetics of non-competitive inhibition	B.R. 3
31.			Kinetics of uncompetitive inhibition	B.R. 3
32.			Kinetics of mixed and partial inhibition	B.R. 3
33.			Kinetics of substrate inhibition	B.R. 3
34.			Introduction to thermal kinetics	B.R. 3
35.			Effect of temperature on reaction rate	B.R. 3
36.			Enzyme stability , Arrhenius equation and activation energy	B.R. 3
CO : 5				
LO : 4.To learn about variety of enzyme inhibitors.				

DEPARTMENT OF BIOTECHNOLOGY

Lecture no.	Unit no.	Unit Name	Topics	Book Reference
37	Fifth	Types of enzymes	Introduction to allosteric enzymes and sigmoidal kinetics	B.R. 3
38			Cooperativity , MWC & KNF models	B.R. 3
39			Enzyme memory and mnemonical enzymes	B.R. 3
40			Isoenzymes	B.R. 3
41			Multienzyme complexes	B.R. 3
42			Multifunctional enzymes and their significance	B.R. 3
43			Biosensor	B.R. 3
44			Ribozymes	B.R. 3
45			Catalytic antibodies	B.R. 3
CO : 3				
LO :5. To know the variety of biocatalyst and their use as analytical reagent.

IPS ACADEMY, DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper II (Food Science and Technology)****Session: Aug -Dec****Class: M.Sc. Biotechnology Third Semester**

I: Objective of course: The objective of the course is to acquaint the students with food biotechnologies, to understand the relation between industries and biotechnology and their role for mankind use and their extraction techniques.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

CO1	Have knowledge of relation of biotechnology and food industry and microorganism associated with food.
CO2	Have knowledge of spoilage and food borne microbial disease and different food preservation technology, microbes based food product.
CO3	Understand the applications microbial involvement in food, Quality control and safety regulation of food standard from academic and industrial perspective.
CO4	Be able to Employ different techniques at laboratory level and be able to assess and troubleshoot the result

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 3	2	1	-	-	1	3	2	-
CO 4	1	3	3	2	3	2	3	2

V: Session Plan:

Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the subject and the specific paper	-
2	1	Introduction of Biotechnology in relation of food Industries	Introduction of food biotechnology, Use of biotechnology in food industries	B.R.1,2
3			Current status of food biotechnology, Food biotech based national & international industries	B.R.1,2,3
4			Role of GMO in food industries, Food research institute in India	B.R.1,2,3
5			Introduction of food microbiology, Nutritive value of food	B.R.1,2,3
6			Types of microbes associated with food	B.R.2,3
7			Microbes sources in food	B.R.2,3,5
8			Microbial Positive behavior in food	B.R.2,3,5
9			Microbial Negative behavior in food	B.R.1
CO 1				
LO 1: Understand role of biotechnology in food processing and food industries				
10	2	Food Preservation Technologies	Introduction of food preservation	B.R.1,2
11			Food preservation by heat, Concept of pasteurization	B.R.1,2,3
12			Appertization,Balanching and Canning techniques	B.R.1,2,3
13			Food preservation by radiation, Food preservation by cold treatment	B.R.1,2,3
14			Food preservation by different acids & organic substance	B.R.1,2,3
15			Food preservation by Enzymes, New preservation technologies	B.R. 2, 3
16			Food packaging strategies	B.R.1,2
17			Bioprocessing of Meat & Fisheries	B.R.1,2,3
18			Bioprocessing Vegetables & Dairy products	B.R.1,2,3
CO 2				

LO 2: Know about the food processing and preservation technology.

19	3	Food Spoilage and food borne diseases	Concept of food spoilage & types of food spoilage	B.R.1,2
20			Mechanism of food spoilage, Microbes association of food spoilage	B.R.1,2,3
21			Food borne infection and intoxication	B.R.1,2,3
22			Food borne disease caused by Bacteria pathogenesis and mechanism	B.R.1,2,3
23			Food borne disease caused by Fungus pathogenesis and mechanism	B.R.1,2,3
24			Food borne disease caused by Algal pathogenesis and mechanism	B.R.1,2,3
25			Food borne disease caused by protozoa, pathogenesis and mechanism	B.R. 2,3
26			Food borne disease caused by Viruses, pathogenesis and mechanism	B.R.2,3
27			Food borne disease caused by Nematods, pathogenesis and mechanism	B.R.2,3

CO 2&4**LO3 : Explanation of microbial spoilage of food and food borne disease**

28	4	Fermented Food Product	Concept of microbial fermentation, general idea of fermented food product	B.R.1,2
29			Introduction of Fermented dairy product	B.R.1,2,3
30			Production and use of cheese, Buttermilk & yogurt	B.R.1,2,3
31			Introduction of Fermented non beverage plant products product	B.R.1,2,3
32			Production and use of sauerkraut, pickle cucumbers & olives	B.R.1,2,3
33			Introduction of Fermented non beverage plant products product	B.R.1,2,3
34			Production and use of beer and wine	B.R.1,2
35			Use of microbes as food probiotics and prebiotics	B.R.2,3
36			Production of single cell protein by microbes	B.R.2,3

CO 2

LO4: Describe the different fermented food and use of microbes as food.

37	5	Quality control of food	Involvement of microbes in food ,Analysis techniques of microorganism in food item	B.R. 2,3
38				B.R.2,3
39			Surface observation of microorganism in food item	B.R.2,3
40			Culture base analysis of microorganism in food	B.R.2,3,5
41			ELISA, RIA base analysis of microorganism in food item	B.R.2,3,5
42			Quality control guide line of food items in India and international	B.R. 2,3
43			Hygiene guide line of food items in India and international	B.R. 4,5
44			Food regulation and standard of India &International	B.R.4,5
45			Food processing and packaging standard	B.R.3, 4

CO 3&4

LO5: Explain the various aspects of food quality control and safety and hygiene practices of food.

VI: Book References:

4		Initiation and maintenance of suspension culture	B.N. 3,7,8,
5		Organogenesis	B.N. 3,7,8,
6		Somatic embryogenesis	B.N. 3,7,8,
7		Shoot-tip culture: rapid clonal propagation and production of virus-free plants.	B.N. 3,7,8,
8		Single cell clones, Embryo culture and embryo rescue.	B.N. 3,7,8,
9		Protoplast isolation and culture	B.N. 3,7,8,
10		Protoplast fusion and selection of hybrid cells , symmetric and asymmetric hybrids, cybrids	B.N. 3,7,8,
11		Regeneration of hybrid plants, transfer and establishment of whole plants in soil	B.N. 3,7,8,
12		Anther and pollen culture for production of haploid plants and homozygous lines.	B.N. 3,7,8,
13		Ovary culture for production of haploid plants and homozygous lines	B.N. 3,7,8,

CO : 1 & 3**LO 1 :** To acquaint students on various concepts of plant tissue culture and its techniques.

14	Unit II	Plant transformation Technology & Chloroplast transformation	Basis of tumor formation, features of Ti plasmids & Ti vectors	B.N. 3,5,6,
15			Basis of hairy root, features of Ri plasmids & Ri vectors and their advantages	B.N. 3,5,6,,
16			Role of virulence genes, use of Ti and Ri as, binary vectors, viral vectors and their application	B.N. 3,5,6,
17			Genetic markers, use of reporter genes with introns,	B.N. 3,5,6,,
18			Multiple gene transfers, use of 35S and other promoters	B.N. 3,5,6,
19			Mechanisms of DNA transfer- direct	B.N. 3,5,6,,
20			Mechanisms of DNA transfer- indirect	B.N. 3,5,6,
21			Use of scaffold attachment regions methods of nuclear transformation,	B.N. 3,5,6,,

DEPARTMENT OF BIOTECHNOLOGY, INDORE

22			Transformation of monocots.	B.N. 3,5,6,
23			Transgene stability and gene silencing.	B.N. 3,5,6,,
CO: 2,3 & 4				
LO 2 : To acquaint students with various techniques of DNA transfer, vectors used in PTC and its techniques role.				
24	Unit III	Application of plant Transformation for productivity and performance	Herbicide resistance,	B.N. 1, 3, 7,8,
25			Insect resistance,	B.N. 1, 3, 7,8,
26			Virus resistance,	B.N. 1, 3, 7,8,
27			Disease resistance,	B.N. 1, 3, 7,8,
28			Nematode resistance,	B.N. 1, 3, 7,8,
29			Abiotic stress, post-harvest losses,	B.N. 1, 3, 7,8,
30			Long shelf life of fruits and flowers, male sterile lines, bar and barnase system	B.N. 1, 3, 7,8,
CO: 2 & 3				
LO 3 : To impart knowledge on PTC techniques to increase productivity and performance in plants.				
31	Unit IV	Metabolic Engineering and Industrial Products	Plant secondary metabolities	B.N. 1, 3, 7,8,
32			Alkaloids, polyhydraxybutyrate,	B.N. 1, 3, 7,8,
33			Therapeutic proteins, lysosomal enzymes, antibodies, edible vaccines	B.N. 1, 3, 7,8,
34			Purification strategies, oleosin partitioning technology	B.N. 1, 3, 7,8,
35			Control mechanisms and manipulation of phenylpropanoid pathway	B.N. 1, 3, 7,8,
36			Shikimate pathway	B.N. 1, 3, 7,8,
CO: 2 & 3				
LO 4 : To provide understanding on different plant secondary metabolites and its pathway of production along with its application in PTC.				
37	Unit V	Molecular Marker aided-	Basic techniques of rDNA techniques	B.N. 1, 3, 5,6,
38			RFLP, RAPD and AFLP- technique, markers	B.N. 1, 3, 5,6,

DEPARTMENT OF BIOTECHNOLOGY, INDORE

	Breeding:	& maps	
39		RFLP, RAPD and AFLP- markers & maps	B.N. 1, 3, 5,6,
40		Map based cloning,	B.N. 1, 3, 5,6,
41		Molecular marker assisted selection- QTL, SCAR (sequence characterized amplified regions), SSCP	B.N. 1, 3, 5,6,
42		Linkage analysis	B.N. 1, 3, 5,6,
43		STS, microsatellites	B.N. 1, 3, 5,6,
44		Cryopreservation, slow growth	B.N. 1, 3, 5,6,
45		DNA Banking for germplasm conservation	B.N. 1, 3, 5,6, 8
CO: 4			
LO 5 : To impart skills on basic techniques of rDNA used in PTC.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

VIII Rubric for Internal Assessment			
Subject: Biotechnology Paper -IV			
M.Sc. III Semester			
Goal : Students develop the ability to understand the concept of various techniques of plant biotechnology and its applications. The topics include Introduction to cell and Tissue Culture, Plant transformation Technology & Chloroplast transformation, Application of plant Transformation for productivity and performance, Metabolic Engineering and Industrial Products and Molecular Marker aided-Breeding.			
Objective: Students gain understanding of the techniques of plant tissue culture to increase the productivity and performance of plants for betterment of environment, agriculture and metabolic engineering			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
____ Students	____ Students	____ Students	____ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students good understanding of Tissue culture and plant transformation technology, Metabolic and genetic engineering	% Students have basic concept of Tissue culture and plant transformation technology and has room for improvement	% Students has little understanding on the subject.	% Students Need More Efforts and hard work on the subject

IX: Scheme of internal marks

VIVA/Presentation	Assignment	Class test	Total 150	Final Internal Marks Out of 15
50 marks	50 marks	50 marks		

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: PIII- Environmental biology****Session: Aug -Dec****Class: M.Sc. Biotechnology Sem III**

I: Objective of course: The objective of the course is to acquaint the students with basic concepts and issues of the environment, different types of pollution-their source, effects, measurement and bioremediation through biotechnology

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

CO1	Know about the various regional and global concerns regarding the environment
CO2	Understand the recent developments in both the understanding of environmental processes and the technological advances in measurement techniques, remediation processes and pollution control
CO3	Have knowledge of specific examples and explain how chemical, biological and molecular sciences can be applied to identify and address issues of environmental concerns.
CO4	Be familiar with the utilization of microbial processes in waste and water treatment, and bioremediation

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the course content	
2	1	Environment-basic concept and issues	Basic concept of environment	B.R. 1,3
3			Water pollution	B.R. 1
4			Air pollution	B.R. 1
5			Soil pollution	B.R. 1
6			Noise, light and thermal pollution	B.R. 1
7			Sampling	B.R. 1
8			Measurement of water pollution	B.R. 5
9			Measurement of soil pollution	B.R. 5
10			Measurement of air pollution	B.R. 5
11			Biosensors, bioindicators and biomarkers	B.R. 1

CO 1

LO1 : Know various issues of pollution plaguing the world and the methodology for environmental pollution management

12	2	Air and water pollution	Air pollution and its control through biotechnology-biofilters and bioscrubbers	B.R. 3
13			Air pollution and its control through biotechnology-bioplastics, use of microorganisms for chemical, solvent production	B.R. 3,1
14			Air pollution and its control through biotechnology-desulphurization and removal of nitrogen from coal	B.R. 1
15			Water as scarce natural resource, need for water management	B.R. 1
16			Measurement of water pollution	B.R. 5

DEPARTMENT OF BIOTECHNOLOGY, INDORE

17			Source of water pollution	B.R. 7
18			Waste water treatment-physical, chemical, and biological	B.R. 1,5
19			Microbiology of waste water treatment	B.R.1
CO2				
LO 2: Describe the sources, effects and control of air pollution through biotechnological processes				
20	3	Waste water treatment	Aerobic processes	B.R.1
21			Aerobic processes	B.R. 1
22			Aerobic processes	B.R. 1
23			Anaerobic processes	B.R. 1
24			Treatment schemes of wastewater of dairy industry	B.R. 2,3
25			Treatment schemes of wastewater of distillery industry	B.R. 2,3
26			Treatment schemes of wastewater of tannery industry	B.R. 2,3
27			Treatment schemes of wastewater of sugar industry	B.R. 2,3
28			Treatment schemes of wastewater of antibiotic industry	B.R. 2,3
CO 2,4				
LO 3: Understand the concept of water pollution, its treatment through physical, chemical and biological processes and operations of aerobic and anaerobic bioprocesses and proper selection of bioreactors for remediation of water pollution due to industrial effluents				
29	4	Xenobiotics	Microbial degradation of xenobiotic in environment	B.R. 4
30			Ecological considerations	B.R. 4
31			Decay behavior	B.R. 4
32			Degradation of hydrocarbons	B.R. 4

DEPARTMENT OF BIOTECHNOLOGY, INDORE

33		Degradation of hydrocarbons	B.R. 4
34		Degradation of oil pollution	B.R. 4
35		Degradation of surfactants	B.R. 2
36		Degradation of pesticides	B.R. 2
37		Role of degradative plasmid in xenobiotic degradation	B.R. 6

CO 2,3

LO4 : Evaluate the potential for biodegradation of organic pollutants, taking microbial and physical/chemical environments, as well as the chemical structure of the compound itself, into consideration; role of genes in xenobiotic degradation

38		Bioremediation of contaminated soils and wastelands	B.R. 2
39		Bioremediation of contaminated soils and wastelands	B.R. 2
40		Biopesticides	B.R. 2
41		Biopesticides	B.R. 2
42	5	Composting and vermiculture	B.R. 2
43		Biogas production	B.R. 2
44		Ozone depletion and UV-B radiations	B.R. 7
45		Green house effect	B.R. 7
46		Acid rain	B.R. 7

CO 3

LO 5: Have knowledge of methods for reclamation of contaminated wastelands through bioremediation, and methods for disposal and treatment of solid waste through aerobic and anaerobic processes, concept of IPM and role of biopesticides

DEPARTMENT OF BIOTECHNOLOGY, INDORE

Lesson Plan

Session: August– December

Subject: Biotechnology Paper- III (Animal Biotechnology)

Class: M.Sc.IV Semester

I: Objective of Course: To impart knowledge about principles and applications of animal cell culture to students.

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The semester examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper). The theory paper will contain five long answers type questions of 17 marks each, each with an option.

III: Course Outcomes (CO):

CO 1	Student must be able to understand the methods of maintenance and use of animal cells <i>in-vitro</i> .
CO 2	Student knows to scaling up of animal cell culture.
CO 3	Student knows to culture tissue and organ.
CO 4	Student knows to manipulate cells for medicinal applications.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the subject and the specific paper	-
2	1	Introduction of Bioprocess technology	Microorganism and their Industrial importance, microbe based product	B.R. 2, 3,6
3			Fermenter structure and operation technique	B.R. 2, 3,4
4			Isolation, Screening and selection techniques of industrially important microbes	B.R. 2, 3,7
5			Maintenance and preservation technique of industrially important microbes	B.R. 1,2,4
6			Microbial growth study, Microbial Death pattern study	B.R. 2,4,6
7			Strain improvement techniques for industrial useful microbes	B.R.3,4
8			Different techniques use for the improvement of microbial strain	B.R. 1,6
9			Physical & Chemical factor effect the microbial production	B.R.1,6
CO 1 & 4				
LO 1: Understand basic principle of bioprocess technology, industrially important microorganism and their improvement techniques.				
10	2	Production and Extraction techniques of microbe based product	Media requirement for the industrial production of microbe based product	B.R. 4,7
11			Selection and optimization of medium according to microbes	B.R. 3,4,7
12			Scale up & Scale down process	B.R. 2,4,6
13			Concept and application of bioseparation process	B.R. 2,3,4
14			Different filtrations& Sedimentation techniques for bioseparation	B.R. 2,3,4
15			Cell disruption technique for bioseparation, Liquid – liquid extraction techniques for bioseparation	B.R. 2, 3,4
16			Concept of chromatography in purification of bioprocessed product	B.R. 1,2,3
17			Reverse osmosis chromatography, Ultrafiltration chromatography	B.R. 6,7
18			Effluent treatment and its disposal	B.R.6,7

CO 3

LO2: Know about fermentation technology, condition requirement of microbial fermentation and various separation methods for product recovery.

19	3	Fermentation processes	Concept of fermentation and its applications	B.R. 4,6
20			Bioreactor structure and features, Types of different fermenters	B.R.4,5
21			Optimization of different fermentation processes	B.R.4,6,7
22			Batch & Fed Batch fermentation process	B.R.4,5,6
23			Continuous fermentation process	B.R.4,5,6
24			Concept of biotransformation, Comparison of conventional fermentation and biotransformation	B.R.3,5,7
25			Solid substrate & Surface fermentation process	B.R.3,5,7
26			Submerged fermentation process	B.R.3,5,7
27			Measurement & control of bioprocessing reactions	B.R.4,7

CO 2&4

LO3: Explanation of basic concept and types of fermenter.

28	4	Microbial metabolite production methods	Concept microbial metabolites and their industrial use	B.R.1,4,6
29			Microbial production, Processing and recovery of Ethanol	B.R.1,4,6
30			Microbial production, Processing and recovery of Lactic acids	B.R.1,2,4
31			Microbial production, Processing and recovery of Glutamic acid	B.R.2,4,7
32			Microbial production, Processing and recovery of Lysine	B.R.3,4,6
33			Microbial production, Processing and recovery of Vitamine B12	B.R.3,4,7
24			Microbial production of Penicillin	B.R.1, 2,5
35			Microbial production of Streptomycin	B.R.1,3,5
36			Packaging techniques	B.R.2,4,7

CO 2 & 4

LO4:. Describe the industrial production process of microbial products use for mankind.

37	5	Microbe based industrial product and their applications	Introduction of microbial enzymes	B.R. 2,4,6
38			Industrial production & Recovery of fungal amylase	B.R.2,4,5
39			Industrial production & Recovery of fungal protease	B.R.2,4,6
40			Enzyme immobilization techniques, Industrial application of Enzyme immobilization	B.R.1,2,4
41			Biobleaching of minerals by microbes	B.R.2,6,7
42			Oil recovery process by microbes	B.R. 2,3
43			Single cell protein by bacteria, algae and fungi	B.R. 4,3
44			Microbes as bio insecticides	B.R.4,5
45			Microbes as biofertilizers	B.R.4,5

CO 2&4

LO5: Explain the various aspects of product recovery methods and microbes as food**VI: Book References:**

1. Bioprocess engineering in biotechnology: Jackson A T, Englandwood cliffs Publication (International)

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the course content	
2	1	Introduction	DNA sequencing methods-Sanger's	B.R.2
3			DNA sequencing methods- Maxam Gilbert's	B.R.2
4			DNA sequencing methods-automated equencing	B.R.2
5			RNA sequencing	B.R.2
6			Chemical synthesis of oligonucleotides	B.R.3
7			Chemical synthesis of oligonucleotides	B.R.3
8			Gene annotation	B.R.3
9			EST, SNP	B.R.3
CO 1				
LO1 : Explain how DNA is sequenced using the Sanger Method and the recent improvements that have increased the efficiency of this process; discuss chemical synthesis of oligonucleotides and gene annotation.				
10	2	Tools for genome analysis and gene silencing techniques	RFLP, RAPD	B.R.2
11			DNA fingerprinting	B.R.2
12			Physical mapping	B.R.2
13			Genetic mapping	B.R.2
14			PCR- introduction	B.R.5
15			PCR-types	B.R.5
16			PCR-applications	B.R.5
17			Site specific mutagenesis	B.R.5

DEPARTMENT OF BIOTECHNOLOGY, INDORE

18			siRNA technology	B.R.3
19			miRNA technology	B.R.3
20			Gene therapy	B.R.4
21			Creation of knockout mice and disease models	B.R.3
22			Gene replacement and gene targeting	B.R.3
23			Transgenics	B.R.4
24			cDNA and intragenic arrays	B.R.3

CO 2

LO 2: Describe the use of various tools for genome analysis and gene silencing studies.

25			Protein analysis	B.R.1
26			2-D electrophoresis of protein	B.R.1
27			Peptide fingerprinting	B.R.2
28			LC/MS-MS for identification of proteins and modified proteins	B.R.3
29	3	Proteomics and functional genomics and proteomics	SAGE	B.R.3
30			Analysis of microarray data	B.R.5
31			Protein and peptide based microarray technology	B.R.5
32			PISA	B.R.3
33			Structural proteomics	B.R.3.

CO1, 2

LO3: Discuss the field of proteomics, the methods used for protein study, and the potential benefits of proteomic research.

34	4	Introduction to intellectual property	Types of IP	B.R.6,7
35			Industrial design	B.R.6,7

DEPARTMENT OF BIOTECHNOLOGY, INDORE

36		Traditional knowledge	B.R.6,7
37		Protection of GMOs	B.R.6,7
38		IP as a factor in R & D	B.R.6,7
39		Case studies of IP in biotechnology	B.R.6,7
40		Types of patent application	B.R.6,7
41		Patent databases	B.R.6,7

CO3

LO4 : Compare and contrast the different forms of intellectual property protection in terms of their key differences and similarities.

42		Introduction and historical background	B.R.6,7
43		Introduction to biological safety cabinets	B.R.6,7
44		Primary containment for biohazards	B.R.6,7
45	5	Biosafety levels of specific microorganisms	B.R.6,7
46		Recommended safety levels for infectious agents and infected animals	B.R.6,7
47		Biosafety guidelines	B.R.6,7
48		Role of various committees for GMO application in food and agriculture	B.R.6,7

CO 4

LO5 : Describe the fundamentals of biosafety, its different levels and role of Government of India in providing biosafety guidelines

Programme Outcomes

B.Sc. UG Course (Biotechnology)

At the graduation in science faculty a student should have:

1. Acquired the knowledge with facts and figures related to various subjects in pure and applied sciences such as Biotechnology/Chemistry/Computer Science etc.
2. Understood the basic concepts, fundamental principles, and the scientific theories related to various scientific phenomena and their relevancies in the day-to-day life.
3. Acquired the skills in handling scientific instruments, planning and performing in laboratory experiments.
4. The skills of observations and drawing logical inferences from the scientific experiments.
5. Analyze the given chemical & biological data critically and systematically and the ability to elucidate, structure of chemical compounds and their biological significance.
6. Realized how development in chemistry, biotechnology and computer science help in the development of other science subjects and vice-versa and how interdisciplinary approach helps in providing better solutions & new ideas for sustainable development.
7. Realized that knowledge of subjects in other faculties such as humanities, performing arts, social sciences etc. can have greatly and effectively influence which inspires in evolving new scientific theories and inventions.
8. Developed various communication skills such as reading, listening, speaking, etc., which we will help in expressing ideas and views clearly and effectively.

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Biotechnology Paper I: Cell Biology & Structure****Session: Aug - Feb****Class: B.Sc. I year BT-LS**

I: Objective of course: The students will learn the basic knowledge on cell and its components and their functions, cell theories, cell division and pathological conditions in cellular mechanisms of cell.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 To provide basic knowledge on cell – its theory & types in theory and practical.
- CO2 To understand the composition and structure of cell in details with practical experiments.
- CO3 To understand the various function of cell as well as cell division.
- CO4 To provide basic knowledge on certain pathophysiological conditions of cell.

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1.	I	Cell Structure and Theory	Introduction and concept of cell and types of cell	B.R. 2
2.			Salient features of early Cell theories	B.R. 2
3.			Salient features of modern Cell theories	B.R. 2

DEPARTMENT OF BIOTECHNOLOGY, INDORE

4.			Structure of Prokaryotic cell	B.R. 1,2,3
5.			Properties of Archaeobacteria	B.R. 4
6.			Types and examples of Archaeobacteria	B.R. 4
7.			Concept of Eubacteria	B.R. 4
8.			Features of bacterial cell and its arrangement	B.R. 2, 7
9.			Properties and differences of Gram positive and Gram negative cells	B.R. 2, 7
10.			Structure of Eukaryotic cell	B.R. 2, 7
11.			Structure of Plant cell	B.R. 1,2,4
12.			Structure of Animal cell	B.R. 1,2,4
13.			Difference between Prokaryotic and Eukaryotic cells	B.R. 1,2,4
14.			Difference between Plant and Animal cells	B.R. 1,2,4
15.			Revision of unit	
CO: 1, 2				
LO 1 : To provide detailed understanding on various aspects of cell – its theory & various types of cell.				
16.	II	Structure & Function of cell	Structure and function of flagella and pili in bacterial cell	B.R. 2,3
17.			Structure and function of cell wall in bacterial cell	B.R. 2,3
18.			Structure and function of cytoplasmic membrane in bacterial cell	B.R. 2,3
19.			Structure and function of nuclear region in bacterial cell	B.R.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

				2,3
20.			Structure and function of mesosomes & ribosomes in bacterial cell	B.R. 2,3
21.			Structure and function of vacuoles & metachromatic granules in bacterial cell	B.R. 2,3
22.			Structure and function of spores and cysts in bacterial cell	B.R. 2,3,7
23.			Structure and function of cell wall in eukaryotic cell	B.R. 2,3
24.			Structure and function of cell membrane in eukaryotic cell	B.R. 2,3
25.			Structure and function of mitochondria in eukaryotic cell	B.R. 2,3
26.			Structure and function of chloroplast in eukaryotic cell	B.R. 2,3
27.			Structure and function of endoplasmic reticulum in eukaryotic cell	B.R. 2,3
28.			Structure and function of golgi bodies in eukaryotic cell	B.R. 2,3
29.			Structure and function of nucleus in eukaryotic cell	B.R. 2,3
30.			Structure and function of lysosome in eukaryotic cell	B.R. 2,3
31.			Structure and function of cytoskeleton in eukaryotic cell	B.R. 2,3
32.			Structure and function of centriole in eukaryotic cell	B.R. 2,3
33.			Revision of unit	

DEPARTMENT OF BIOTECHNOLOGY, INDORE**CO: 2****LO 2:** To increase understanding on internal composition and structure of prokaryotic and eukaryotic cells.

34.	III	Cell division & cellular mechanisms	Concept of cell cycle	B.R. 1,2,3
35.			Regulation of cell cycle	B.R. 1,2,3
36.			Cell division-mitosis and its significance	B.R. 1,2,3
37.			Cell division-meiosis I	B.R. 1,2,3
38.			Cell division-meiosis II	B.R. 1,2,3
39.			Significance and differences of mitosis & meiosis	B.R. 1,2,3
40.			Anomalies & associated diseases in cell division	B.R. 1,2,3,4
41.			Concept of cell synchrony	B.R. 4,8,9
42.			Methods & measurement of cell synchrony	B.R. 4,8,9
43.			Concept of cell locomotion and types	B.R. 1,2,3
44.			Mechanism of cell locomotion	B.R. 1,2,3
45.			Mechanism of cell locomotion continued	B.R. 1,2,3
46.			Cell differentiation- Cytoplasmic role	B.R. 1,2,3

DEPARTMENT OF BIOTECHNOLOGY, INDORE

47.			Cell differentiation- Nuclear role	B.R. 1,2,3
48.			Revision of unit	
CO: 3				
LO 3: To provide knowledge on cell division and cell cycle and various function of cell like interaction, locomotion and differentiation.				
49.	IV	Transport process	Models of cell membrane	B.R.3,4, 5,6,
50.			Details of Fluid Mosaic model	B.R.3,4, 5,6,
51.			Functions of plasma membrane	B.R.3,4, 5,6,
52.			Membrane proteins & their properties	B.R.3,4, 5,6,
53.			Membrane carbohydrates & their roles	B.R.3,4, 5,6,
54.			Concept of transport across cell membrane	B.R.3,4, 5,6,
55.			Mechanism of simple diffusion	B.R.3,4, 5,6,
56.			Mechanism of passive diffusion	B.R.3,4, 5,6,
57.			Mechanism of osmosis	B.R.3,4, 5,6,
58.			Mechanism of passive transport	B.R.3,4, 5,6,
59.			Mechanism of active transport	B.R.3,4, 5,6,
60.			Mechanism of bulk transport	B.R.3,4, 5,6,

DEPARTMENT OF BIOTECHNOLOGY, INDORE

61.			Mechanism of Phagocytosis & Pinocytosis	B.R.3,4,5,6
62.			Revision of unit	
63.			GD/Quiz/Test of current unit	
CO: 3				
LO 4: To enumerate in details the structure and transport processes across cell membranes.				
64.	V	Introduction to Necrosis, Senescence & Apoptosis	Introduction to Apoptosis and its causes	B.R. 4,8,9
65.			Etymology of Apoptosis	B.R. 4,8,9
66.			Mechanism of Apoptosis- Intrinsic pathway	B.R. 4,8,9
67.			Mechanism of Apoptosis- Extrinsic pathway	B.R. 4,8,9
68.			Regulation of apoptosis	B.R. 4,8,9
69.			Apoptosis in relation to cancer	B.R. 4,8,9
70.			Introduction to Necrosis and its causes	B.R. 4,8,9
71.			Types of Necrosis	B.R. 4,8,9
72.			Difference between Necrosis and Apoptosis	B.R. 4,8,9
73.			Introduction to Senescence	B.R. 4,8,9
74.			Characteristics of Senescence	B.R. 4,8,9
75.			Factors affecting Senescence	B.R. 4,8,9
76.			Evolutionary theories of aging	B.R. 4,8,9
77.			Cancer versus cellular Senescence	B.R. 4,8,9
78.			Revision of unit	
CO:3,4				
LO 5: To acquaint students on pathophysiology of cell like necrosis, apoptosis, cancer & senescence.				

DEPARTMENT OF BIOTECHNOLOGY, INDORE**VI: Book References:**

8. Biotechnology, U.Satyanarayan, Books & Allied Ltd

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
3. The result of each tests/assignment will be declared within one week
4. Late submissions will not be accepted in any case
5. Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Biotechnology Paper -I			
B.Sc. I Year			
Goal : Students develop thorough knowledge on cell & its types, its theories, components, reproduction, transport process, necrosis, apoptosis and senescence, cell interactions, cell locomotion & differentiation			
Objective: Students gain detailed understanding on cell, cytophysiological and cytopathological conditions.			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having very good understanding of cell biology, cellular mechanisms and cytopathological conditions	% Students have basic understanding of cell biology, cellular mechanisms and cytopathological conditions	% Students having less understanding on cell biology & cellular mechanisms and need improvement	% Students need more efforts for developing basic concept of cell biology & cellular mechanisms and need more hard work

IX: Scheme of internal marks

Quarterly Examination	Half yearly Examination	Total 100	Final Internal Marks Out of 10
50 marks	50 marks		

IPS ACADEMY, INDORE

DEPARTMENT OF BIOTECHNOLOGY

Lesson Plan

Session: August– February

Subject: Biotechnology Paper- II (Microbiology)

Class: B.Sc. I Year

I: Objective of Course: The objective of the course is to acquaint the students with structure and diversity of bacteria, viruses and other microorganisms and their role in the environment.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

- | | |
|-----|--|
| CO1 | Gain basic knowledge about microbiology starting from history and classification of microorganisms |
| CO2 | Appreciate the biological diversity of microbial forms, and appreciate that this diversity results from evolutionary processes |
| CO3 | Learn and understand the concept of sterilization in microbiological techniques |
| CO4 | Apply appropriate microbiology laboratory techniques, methodologies, instruments and equipment in accordance with current laboratory safety protocol |

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	-	-	Introduction to the subject and the specific paper	-
2	1	Introduction of Microbiology	History of microbiology	B.R. 2, 3
3			Spontaneous generation vs biogenesis	B.R. 2, 3
4			History of medical microbiology	B.R. 2, 3
5			Applications of microbiology	B.R. 4
6			Applications of microbiology	B.R. 4
7			Classification of organisms-2, 3, 4 kingdom classification	B.R. 2, 3
8			5, 6, 8 kingdom classification	B.R. 2, 3
9			3 domain classification	B.R. 2, 3
10			Characterization of organisms	B.R. 3
11			General methods of classifying bacteria, nomenclature	B.R.3
12			Bacterial identification-steps 1-3	B.R. 1
13			Bacterial identification steps 4-7	B.R.1
14			Bergey’s manual	B.R. 2
15			Bergey’s manual	B.R.2
CO 1				
LO 1: Describe history of microbiology and taxonomical classification of microbes.				
16	2	Structure and diversity of bacteria and viruses	Diversity of microorganisms, structure of viruses	B.R. 4
17			Nutritional classification of bacteria	B.R. 3
18			Macronutrients, Micronutrients	B.R. 2
19			Trace elements	B.R. 2
20			Growth factors	B.R. 2
21			Bacteriological media-types and classification	B.R. 2, 3

DEPARTMENT OF BIOTECHNOLOGY

22			Diversity of extremophiles	B.R. 1
23			Bacterial morphology	B.R. 6
24			Structure and function of cell membrane of bacteria and archaeobacteria	B.R.6
25			Structure and function of cell wall of bacteria and archaeobacteria; outer membrane	B.R.6
26			Capsule, slime layer, pili, fimbriae	B.R.6
27			Storage inclusions, gas vesicles	B.R.6
28			Endospore formation and structure	B.R.6
29			Structure of flagella	B.R.6
30			Cell organelles	B.R.6
CO 2				
LO 2: Have complete understanding of structure of bacteria, archaeobacteria and viruses				
31	3	Structure and diversity of other microorganisms and stains	Algae- occurrence, thallus	B.R. 4
32			Algae- cell structure	B.R.4
33			Algae- reproduction and lifecycles	B.R.4
34			Fungi- occurrence, thallus	B.R.4
35			Fungi- cell structure, reproduction	B.R.4
36			Protozoa- occurrence, ecology and importance of protozoa	B.R.3
37			Protozoa- morphology	B.R.3
38			Protozoa- reproduction	B.R.3
39			Mycoplasma- classification, structure and pathogenicity	B.R.4
40			Stains- meaning, structure and components	B.R.1
41			Classification of stains	B.R.1
42			Types of staining procedures	B.R.1

DEPARTMENT OF BIOTECHNOLOGY

43			Types of staining procedures	B.R.1
44			Algal and fungal stains	B.R.1
CO 2				
LO3 : Compare and contrast the characteristics of algae, fungi, protozoa and mycoplasma that differentiate them from each other and know different method of studying them				
45	4	Microbial growth and control of microorganisms	Mathematical expression of growth	B.R.1
46			Growth curve	B.R.1
47			Factors affecting growth- temperature, oxygen	B.R.1
48			Factors affecting growth- carbon dioxide, pH	B.R.1
49			Batch and continuous culture	B.R.1
50			Synchronous and diauxic growt	B.R.1
51			Quantification of microorganisms- number of cells	B.R.1
52			Quantification of microorganisms- cell mass and activity	B.R.1
53			Control of microorganisms- factors affecting antimicrobial activity	B.R.1
54			Mechanism of cell injury, physical methods of microbial control-temperature	B.R.1
55			Physical methods of microbial control- dessication, osmotic pressure, surface tension, radiations, filtration	B.R.1
56			Chemical methods of microbial control- acids, alkalis, halogens, heavy metals	B.R.1
57			Chemical methods of microbial control- phenol an its derivatives, detergents, quaternary ammonium salts, alcohols, dyes	B.R.1, 3
58			Evaluation of chemical disinfectants- tube dilution and agar diffusion test	B.R.1, 3
59	Evaluation of chemical disinfectants- phenol coefficient test	B.R.1,3		
CO 3				
LO4 : Describe bacterial growth mathematically and its quantification and explain methods of microbial control				

DEPARTMENT OF BIOTECHNOLOGY

60	5	Microbial metabolism	Concept of anabolism and catabolism	B.R. 2
61			Nitrogen fixation-general concept	B.R.2
62			Symbiotic nitrogen fixation	B.R.2
63			Types of nitrogen fixation	B.R.2
64			Mechanisms of nitrogen fixation	B.R.2
65			Nif genes and leghaemoglobin	B.R.2
66			Microbial diseases in plant	B.R.4
67			Microbial diseases in animals	B.R. 4
68			Design of fermentor	B.R. 2,3
69			Design of fermentor	B.R. 2,3
70			Microbes of industrial importance	B.R. 4
71			Microbes of industrial importance	B.R.4
72				
73				
CO 2				
LO 5: Role of microorganisms in nitrogen fixation, fermentation and diseases

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total	Final total out of 10
50	50	100	

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Foundation Paper III Entrepreneurship Development****Session: Aug – Feb****Class: B.Sc. I yr Biotechnology**

I: Objective of course: To enable the students to understand the meaning, functions of entrepreneur, role of regulatory institutions, problems and challenges faced by an entrepreneur.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 The students will be able to understand the concept of entrepreneurship and develop an entrepreneurial way of thinking that will help them in identifying and creating business opportunities that could be commercialized.
- CO2 The students will learn about writing a Project Proposal and they will be able to write a detailed Project Report.
- CO3 The students will gain an understanding of the roles played by various regulatory institutions and how to avail the benefit of various self-employment oriented schemes.
- CO4 The students will be able to recognize the various problems faced by entrepreneurs and they will be able to identify the personal and professional management skills that enable an entrepreneur to face challenges and overcome them.

72			How to overcome the problems of administrations	B.R. 1
73			Continued	B.R. 1
CO: 4				

DEPARTMENT OF BIOTECHNOLOGY, INDORE

LO 5: The students will be able to understand the various problems faced by entrepreneurs like Problem related to Capital, Registration, Administration etc. and they will also learn how to overcome them.

VI: Book References:

- 1. Foundation Course: Entrepreneurship Development: Dr Rajive Sharma and Dr Vipul Patel, Yash Raj Publications**

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5..Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Entrepreneurship Development Paper -III			
B.Sc. I Year			
Goal : Students will be able to set up their own enterprise, prepare their project proposal, understands role of regulatory institutions and come to know about the challenges faced in setting the enterprise.			
Objective: Students gain understanding of different functions, management skills ,of entrepreneur. They also understands the production, marketing and problems related at these level.			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Financial, Cost, and Management. Roles of institutions and entrepreneurs.	% Students having the basic concept of Financial, Cost, and Management Accounting and understanding of problems.	% Students having understanding about management functions.	% Students Need More Efforts for Solution and Basic Concept of Accounting.

IX: Scheme of internal marks

Quarterly Examination	Half yearly Examination	Total 100	Final Internal Marks Out of 10
50 marks	50 marks		

IPS ACADEMY, INDORE

DEPARTMENT OF BIOTECHNOLOGY

Lesson Plan

Session: August – February

Subject: Biotechnology **Paper-I** (Biophysics and Biochemistry)

Class: B.Sc. II Year

I: Objective of Course: To impart knowledge about Biophysical techniques and biomolecules to students.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

CO-1 Student must have the clear concept of relationship among all forms of energy.

CO-2 Student must know the importance of biochemistry including role of water, acids, bases and buffers in life.

CO-3 Students know varieties of biocatalysts.

CO-4 Student acquires skills of drawing logical conclusions from observations taken with the help of scientific instruments.

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
3. The result of each tests/assignment will be declared within one week
4. Late submissions will not be accepted in any case
5. Attendance will be a major factor for assessing class performance

VIII: Rubric for Internal Assessment

Subject: Biotechnology Paper-I (Biophysics and Biochemistry)			
B.Sc. II Year			
Goal – Student develops ability to understand biomolecules and their assessment.			
Objective- To impart knowledge about Biophysical techniques and biomolecules to students.			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the perfect knowledge of molecules and tools of the subject.	% Students studied well, more efforts are required for perfection.	% Students having even lesser interest in the subject.	% Students Need More Efforts for the subject.

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total	Final total out of 10
50	50	100	

IPS ACADEMY, INDORE

DEPARTMENT OF BIOTECHNOLOGY

Lesson Plan

Session: August – February

Subject: Biotechnology Paper-II: (Bioinstrumentation, Biostatistics & Bioinformatics)

Class: B.Sc. II Year

I: Objective of Course: To impart knowledge about bioinstruments, biostatistics and bioinformatics to students.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

CO-1 Student knows different techniques to measure macromolecules.

CO-2 Student knows basics of statistics and computers along with biological databases.

CO-3 Develop the skills to present ideas effectively and efficiently.

CO-4 Student learns to perform and analyze laboratory experiments.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

1.	First	Microscopy	Light	B.R. 1
2.			Phase Contrast	B.R. 1
3.			Fluorescence	B.R. 1
4.			Electron microscopy	B.R. 1
5.			Electron microscopy	B.R. 1
6.		Centrifugation	Electron microscopy	B.R. 1
7.			Principle of centrifugation	B.R. 1
8.			Principle of centrifugation	B.R. 1
9.			Types of centrifuges	B.R. 1
10.			Types of centrifuges	B.R. 1
11.			Varieties of rotors	B.R. 1
12.			Ultracentrifugation	B.R. 1
13.			Differential centrifugation	B.R. 1
14.			Density gradient	B.R. 1
15.			Applications of centrifugation	B.R. 1
CO-I				
LO-I	To learn principles of microscopy and centrifugation.			

DEPARTMENT OF BIOTECHNOLOGY

Lecture No.	Unit No.	Unit Name	Topic	Reference
16.	Second	Chromatography	Introduction to chromatography	B.R. 1
17.			Principle of chromatography	B.R. 1
18.			Applications of chromatography	B.R. 1
19.			Column chromatography	B.R. 1
20.			Gel filtration chromatography	B.R. 1
21.			Ion-exchange, Affinity chromatography	B.R. 1
22.		Electrophoresis	Principle of electrophoresis	B.R. 1
23.			Applications of electrophoresis	B.R. 1
24.			Agarose Gel	B.R. 1
25.			Immunoelectrophoresis	B.R. 1
26.			Blotting – principle	B.R. 1
27.			Southern Blotting	B.R. 1
28.			Western Blotting	B.R. 1
29.			Northern Blotting	B.R. 1
30.			Application of Blotting	B.R. 1
CO-I				
LO-2	To learn the concept of chromatography and electrophoresis.			

DEPARTMENT OF BIOTECHNOLOGY

Lecture No.	Unit No.	Unit Name	Topic	Reference
31.	Third	Photometry	Colorimetry – principle	B.R. 1
32.			Application of colorimeter	B.R. 1
33.			Parts of colorimeter	B.R. 1
34.			Principle of spectrophotometer	B.R. 1
35.			Difference between colorimeter and spectrophotometer	B.R. 1
36.			Instrumentation of spectrophotometer	B.R. 1
37.			Applications of spectrophotometer	B.R. 1
38.		Radioactivity measurements	Radio activity and heavy isotopes	B.R. 1
39.			Radioactive labeling	B.R. 1
40.			Non radioactive labeling	B.R. 1
41.			Half life of radio activity	B.R. 1
42.			Geiger Muller counter	B.R. 1
43.			Scintillation counter	B.R. 1
44.			Autoradiography	B.R. 1
45.			Application of radio activity	B.R. 1
CO-I				
LO-3	To learn colorimetry and radioactive techniques.			

DEPARTMENT OF BIOTECHNOLOGY

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total 100	Final total out of 10
50	50		

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper III Foundation course Environmental Sciences****Session: Aug – Feb****Class: B.Sc. II yr Biotechnology/ Life Sciences**

I: Objective of course: To enable the students to understand the importance, awareness of environment and regulations laws of pollution, cleanliness.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 Understand the natural environment as a system and how human enterprise affects that system.
- CO2 An environmental studies course advances a student's knowledge in a variety of current issues such as energy, pollution and environmental awareness.
- CO3 Course covers how to evaluate and address environmental problems and environmental studies Include forest ecology, energy efficiency in buildings. Sustainable practices, harnessing eco-friendly power sources and political ecology.
- CO4 Object of course is to address the role of regulation on environment, how social & economical conditions affect ecological issues & major environmental challenges.

LO3 : To introduce basic concepts about immune system and pathogens among students.				
44	UNIT 4	Immunology : Antigen and their reactions with antibody	Antigen : its type ,haptenes , epitopes	B R1,2
45			Antigen : its type ,haptenes , epitopes	B R1,2
46			Structure of antibody	B R1,2
47			Structure of antibody	B R1,2
48			Properties of antibody	B R1,2
49			Function of immunoglobulins	B R1,2
50			Function of immunoglobulins	B R1,2
51			Function of immunoglobulins	B R1,2
52			Antigen and antibody reaction	B R1,2
53			Precipitation reactions	B R1,2
54			Precipitation reactions	B R1,2
55			Agglutination reaction	B R1,2
56			Agglutination reaction	B R1,2
57			ELISA technique and type	B R1,2
58			ELISA technique and type	B R1,2

DEPARTMENT OF BIOTECHNOLOGY, INDORE**CO2**

LO4 : To make students aware about various types of antigen and antibody reactions and their applications in various fields.

59	Unit5	Transfection biology and culture techniques of animal cell.	ELISA technique and type	B R1,2
60			ODD – Ouchterlony's double diffusion	B R1,2
61			Radial immunodiffusion	B R1,2
62			Concept about vaccines	B R2,4
63			Type of vaccines	B R2,4
64			Basic of animal cell culture	B R6,4
65			Different type of media	B R6,4
66			Initiation of culture	B R6,4
67			Secondary culture method	B R6,4
68			Different type of cell lines	B R6,4
69			Growth curve of cells in culture	B R6,4
70			Methods of transfection of cell	B R6,4
71			HAT selection method for hybrids and markers	B R6,4
72			Antibiotic resistance concept	B R6,4
73			Study of expression of clone protein in animal cells and tissues	B R6,4
74			Concept and application of system cell	B R6,4
75			Concept and application of system cell	B R6,4

CO 3&4

LO5 : To introduce basic knowledge about transfection biology and techniques used for animal cell culture.

DEPARTMENT OF BIOTECHNOLOGY, INDORE**VI: Book References:**

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
3. The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5.. Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject:			
Goal : To develop basic concept of immune response , microbiology and animal tissue culture among students.			
Objective: To make students learn about antigen antibody , normal microflora , pathogen, animal tissue culture technique and applications.			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of immunology, microbiology, and animal tissue culture and further to develop research accumen related to these fields.	% Students having the basic concept of immunology, microbiology, and animal tissue culture and to become competent to get placed in work field.	% Students having understanding about immunology , microbiology , animal tissue culture.	% Students Need More efforts to understand concept of immunology , microbiology , animal tissue culture

IX: Scheme of internal marks

B.Sc. Biotechnology V Semester
Subject: Immunology & animal biotechnology

DEPARTMENT OF BIOTECHNOLOGY, INDORE

Quiz/GD/Viva	Assignment	Class test	Total	Final total out of
50	50	50	150	15

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Biotechnology Paper: Plant And Environmental Biotechnology****Session: Aug - Dec****Class: B.Sc. VI Sem****I: Objective of course:**

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 15 marks will have 15 Multiple choice questions. Section B carrying 20 marks will contain five optional short answer type questions each of 4 marks. And the section C carrying 50 marks will contain five optional Long answers type questions each of 10 marks

III: Course Outcomes (CO):

- CO1 To develop fundamental knowledge in plant biotechnology and its practical application in laboratory and agricultural field.
- CO2 To develop skills on genetic manipulation in plant.
- CO3 To develop knowledge and skills on various aspects of environmental biotechnology and its applications to protect environment.
- CO4 To expose students on potential careers in various field of biotechnology

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 3	3	3	-	-	3	2	-	-
CO 4	1	-	-	-	-	2	-	-

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	I	Introduction to Plant Tissue culture	Introduction to Plant Tissue culture (PTC)	B.R.1,2,3,4
2			History of Plant Tissue culture (PTC)	B.R.1,2,3,4
3			Requirements of PTC	B.R.1,2,3,4
4			Media-types, composition, preparation	B.R.1,2,3,4
5			Explant selection, sterilization of samples and laboratory	B.R.1,2,3,4
6			Growth regulators-types and uses	B.R.1,2,3,4
7			Types of PTC-Concept and process of Callus culture	B.R.1,2,3,4
8			Selection & maintenance of callus	B.R.1,2,3,4
9			Concept of Single cell culture	B.R.1,2,3,4

CO: 1, 4**LO 1 :** General introduction on the concept of plant tissue culture.

10	II	Techniques in Plant Tissue Culture	Concept & application of Micropropagation	B.R.1,2,3,4
11			Concept & application of Organogenesis	B.R.1,2,3,4
12			Concept & application of Somatic Embryogenesis	B.R.1,2,3,4
13			Concept & process of Anther culture	B.R.1,2,3,4
14			Concept & process of Ovary culture	B.R.1,2,3,4
15			Production of haploid & their uses	B.R.1,2,3,4
16			Cytodifferentiation	B.R.4
17			in vitro pollination	B.R.4
18			in vitro fertilization	B.R.4

CO: 1,4**LO 2 :** To understand different types of plant tissue culture and its techniques.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

19	III	Plant Biotechnology	Concept & process of Protoplast technology	B.R.1,2,3,4
20			Concept & process of Protoplast fusion	B.R.1,2,3,4
21			Concept & process of Somatic hybridization	B.R.1,2,3,4
22			Concept of Cybrids, markers for selection of hybrid cell	B.R.1,2,3,4
23			Introduction to transgenic plants	B.R.1,2,3,4
24			Introduction to Agrobacterium species	B.R.1,2,3,4
25			Genetic manipulation of plants	B.R.1,2,3,4
26			Concept of transfection methods	B.R.1,2,3,4
27.			Advantages of transgenic plants	B.R.1,2,3,4

CO: 1,2, 4**LO 3 :** To developed knowledge on protoplast culture, transgenic plants and transfection methods.

28	IV	Environmental Biotechnolgy	Concept on conventional fuels & impact on environment	B.R. 5,6
29			Concept on modern fuels & impact on environment	B.R. 5,6
30			Comparison on different fuels & recent aspects	B.R. 5,6
31			Concept on Plant based petroleum industry	B.R. 5,6
32			Cellulose degradation for combustible fuels & impact on environment	B.R. 5,6
33			Microbial leaching of copper & uranium	B.R. 5,6
34			Concept on Biorecovery of petroleum-MEOR	B.R. 5,6
35			Concept on bioremediation of petroleum products, leather, textile and paper	B.R. 5,6
36			Concept on biodeterioration	B.R. 5,6

CO: 3, 4**LO 4:** Detailed knowledge environmental biotechnology, various fuels and their environmental impact, bioremediation and biodeterioration.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

37	V	Applications in Environmental Biotechnology	Introduction to bacterial biopesticides	B.R. 5,6, 7
38			Introduction to fungal biopesticides	B.R. 5,6, 7
39			Concept on genetically modified crops	B.R. 5,6, 7
40			Concept on biofertilizers-nitrogen fixers & PSB	B.R. 5,6, 7
41			Concept on biofertilizers- Mycorrhiza & VAM	B.R. 5,6, 7
42			Concept on Biosensors & Biopolymers	B.R. 5,6, 7
43			Concept on biochips,biofilms, & bioplastics	B.R. 5,6, 7
44			Microorganisms as bioindicators	B.R. 5,6, 7
45			Concept on biological weapons & bioterrorism	B.R. 5,6, 7
CO: 3, 4				
LO 5 : To provide skills on agriculture biotechnology such as biopesticides, GMO, Biofertilizers etc.

- 5..Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Plant and Environmental Biotechnology			
B.Sc. VI Semester			
Goal: Students develop the ability to perform plant tissue culture and increase knowledge on current trends environmental biotechnology. The topics include Plant Tissue Culture its techniques and types, transgenic plants and its process, fuels its types and degradation, microbial leaching, MEOR, bioremediation and biodeterioration, Biofertilizers and applications of biotechnology			
Objective: Students gain understanding on PTC both theoretically and practically to develop self entrepreneurial skills and confidence for future job perspective			
13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having very good understanding of Plant Tissue Culture, biotechnological engineering, concept and applications on environmental biotechnology	% Students have basic understanding of Plant Tissue Culture, biotechnological engineering and environmental biotechnology	% Students have less understanding about PTC and biotechnological engineering	% Students Need More Efforts and hard work for developing Basic Concept of PTC and biotechnological engineering.

IX: Scheme of internal marks

Quiz/GD/Viva	Assignment	Class test	Total	Final total out of
50	50	50	150	15

Department of Biotechnology

IPS Academy, Indore

Programme Outcomes B.Sc. UG Course (Life Science)

At the graduation in science faculty a student should have:

1. Acquired the knowledge with facts and figures related to various subjects in pure and applied sciences such as Biotechnology/Life Science/Chemistry etc.
2. Understood the basic concepts, fundamental principles, and the scientific theories related to various scientific phenomena and their relevancies in the day-to-day life.
3. Acquired the skills in handling scientific instruments, planning and performing in laboratory experiments.
4. The skills of observations and drawing logical inferences from the scientific experiments.
5. Analyze the given chemical & biological data critically and systematically and the ability to elucidate, structure of chemical compounds and their biological significance.
6. Realized how development in chemistry, biotechnology and life science help in the development of other science subjects and vice-versa and how interdisciplinary approach helps in providing better solutions & new ideas for sustainable development.
7. Realized that knowledge of subjects in other faculties such as humanities, performing arts, social sciences etc. can have greatly and effectively influence which inspires in evolving new scientific theories and inventions.
8. Developed various communication skills such as reading, listening, speaking, etc., which we will help in expressing ideas and views clearly and effectively.

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Biotechnology Paper I: Cell Biology & Structure****Session: Aug - Feb****Class: B.Sc. I year BT-LS**

I: Objective of course: The students will learn the basic knowledge on cell and its components and their functions, cell theories, cell division and pathological conditions in cellular mechanisms of cell.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 To provide basic knowledge on cell – its theory & types in theory and practical.
- CO2 To understand the composition and structure of cell in details with practical experiments.
- CO3 To understand the various function of cell as well as cell division.
- CO4 To provide basic knowledge on certain pathophysiological conditions of cell.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 2	3	3	1	3	3	-	-	-
CO 3	3	3	2	3	3	-	-	-
CO 4	3	3	-	-	-	1	-	-

V: Session Plan:

Lecture no.	Unit no.	Unit Name	Topics	Reference
1.	I	Cell Structure and Theory	Introduction and concept of cell and types of cell	B.R. 2
2.			Salient features of early Cell theories	B.R. 2
3.			Salient features of modern Cell theories	B.R. 2

DEPARTMENT OF BIOTECHNOLOGY, INDORE

4.			Structure of Prokaryotic cell	B.R. 1,2,3
5.			Properties of Archaeobacteria	B.R. 4
6.			Types and examples of Archaeobacteria	B.R. 4
7.			Concept of Eubacteria	B.R. 4
8.			Features of bacterial cell and its arrangement	B.R. 2, 7
9.			Properties and differences of Gram positive and Gram negative cells	B.R. 2, 7
10.			Structure of Eukaryotic cell	B.R. 2, 7
11.			Structure of Plant cell	B.R. 1,2,4
12.			Structure of Animal cell	B.R. 1,2,4
13.			Difference between Prokaryotic and Eukaryotic cells	B.R. 1,2,4
14.			Difference between Plant and Animal cells	B.R. 1,2,4
15.			Revision of unit	
CO: 1, 2				
LO 1 : To provide detailed understanding on various aspects of cell – its theory & various types of cell.				
16.	II	Structure & Function of cell	Structure and function of flagella and pili in bacterial cell	B.R. 2,3
17.			Structure and function of cell wall in bacterial cell	B.R. 2,3
18.			Structure and function of cytoplasmic membrane in bacterial cell	B.R. 2,3
19.			Structure and function of nuclear region in bacterial cell	B.R.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

				2,3
20.			Structure and function of mesosomes & ribosomes in bacterial cell	B.R. 2,3
21.			Structure and function of vacuoles & metachromatic granules in bacterial cell	B.R. 2,3
22.			Structure and function of spores and cysts in bacterial cell	B.R. 2,3,7
23.			Structure and function of cell wall in eukaryotic cell	B.R. 2,3
24.			Structure and function of cell membrane in eukaryotic cell	B.R. 2,3
25.			Structure and function of mitochondria in eukaryotic cell	B.R. 2,3
26.			Structure and function of chloroplast in eukaryotic cell	B.R. 2,3
27.			Structure and function of endoplasmic reticulum in eukaryotic cell	B.R. 2,3
28.			Structure and function of golgi bodies in eukaryotic cell	B.R. 2,3
29.			Structure and function of nucleus in eukaryotic cell	B.R. 2,3
30.			Structure and function of lysosome in eukaryotic cell	B.R. 2,3
31.			Structure and function of cytoskeleton in eukaryotic cell	B.R. 2,3
32.			Structure and function of centriole in eukaryotic cell	B.R. 2,3
33.			Revision of unit	

DEPARTMENT OF BIOTECHNOLOGY, INDORE**CO: 2****LO 2:** To increase understanding on internal composition and structure of prokaryotic and eukaryotic cells.

34.	III	Cell division & cellular mechanisms	Concept of cell cycle	B.R. 1,2,3
35.			Regulation of cell cycle	B.R. 1,2,3
36.			Cell division-mitosis and its significance	B.R. 1,2,3
37.			Cell division-meiosis I	B.R. 1,2,3
38.			Cell division-meiosis II	B.R. 1,2,3
39.			Significance and differences of mitosis & meiosis	B.R. 1,2,3
40.			Anomalies & associated diseases in cell division	B.R. 1,2,3,4
41.			Concept of cell synchrony	B.R. 4,8,9
42.			Methods & measurement of cell synchrony	B.R. 4,8,9
43.			Concept of cell locomotion and types	B.R. 1,2,3
44.			Mechanism of cell locomotion	B.R. 1,2,3
45.			Mechanism of cell locomotion continued	B.R. 1,2,3
46.			Cell differentiation- Cytoplasmic role	B.R. 1,2,3

DEPARTMENT OF BIOTECHNOLOGY, INDORE

47.			Cell differentiation- Nuclear role	B.R. 1,2,3
48.			Revision of unit	
CO: 3				
LO 3: To provide knowledge on cell division and cell cycle and various function of cell like interaction, locomotion and differentiation.				
49.	IV	Transport process	Models of cell membrane	B.R.3,4, 5,6,
50.			Details of Fluid Mosaic model	B.R.3,4, 5,6,
51.			Functions of plasma membrane	B.R.3,4, 5,6,
52.			Membrane proteins & their properties	B.R.3,4, 5,6,
53.			Membrane carbohydrates & their roles	B.R.3,4, 5,6,
54.			Concept of transport across cell membrane	B.R.3,4, 5,6,
55.			Mechanism of simple diffusion	B.R.3,4, 5,6,
56.			Mechanism of passive diffusion	B.R.3,4, 5,6,
57.			Mechanism of osmosis	B.R.3,4, 5,6,
58.			Mechanism of passive transport	B.R.3,4, 5,6,
59.			Mechanism of active transport	B.R.3,4, 5,6,
60.			Mechanism of bulk transport	B.R.3,4, 5,6,

DEPARTMENT OF BIOTECHNOLOGY, INDORE

61.			Mechanism of Phagocytosis & Pinocytosis	B.R.3,4,5,6
62.			Revision of unit	
63.			GD/Quiz/Test of current unit	
CO: 3				
LO 4: To enumerate in details the structure and transport processes across cell membranes.				
64.	V	Introduction to Necrosis, Senescence & Apoptosis	Introduction to Apoptosis and its causes	B.R. 4,8,9
65.			Etymology of Apoptosis	B.R. 4,8,9
66.			Mechanism of Apoptosis- Intrinsic pathway	B.R. 4,8,9
67.			Mechanism of Apoptosis- Extrinsic pathway	B.R. 4,8,9
68.			Regulation of apoptosis	B.R. 4,8,9
69.			Apoptosis in relation to cancer	B.R. 4,8,9
70.			Introduction to Necrosis and its causes	B.R. 4,8,9
71.			Types of Necrosis	B.R. 4,8,9
72.			Difference between Necrosis and Apoptosis	B.R. 4,8,9
73.			Introduction to Senescence	B.R. 4,8,9
74.			Characteristics of Senescence	B.R. 4,8,9
75.			Factors affecting Senescence	B.R. 4,8,9
76.			Evolutionary theories of aging	B.R. 4,8,9
77.			Cancer versus cellular Senescence	B.R. 4,8,9
78.			Revision of unit	
CO:3,4				
LO 5: To acquaint students on pathophysiology of cell like necrosis, apoptosis, cancer & senescence.				

DEPARTMENT OF BIOTECHNOLOGY, INDORE**VI: Book References:**

2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5..Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Biotechnology Paper -I			
B.Sc. I Year			
Goal : Students develop thorough knowledge on cell & its types, its theories, components, reproduction, transport process, necrosis, apoptosis and senescence, cell interactions, cell locomotion & differentiation			
Objective: Students gain detailed understanding on cell, cytophysiological and cytopathological conditions.			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having very good understanding of cell biology, cellular mechanisms and cytopathological conditions	% Students have basic understanding of cell biology, cellular mechanisms and cytopathological conditions	% Students having less understanding on cell biology & cellular mechanisms and need improvement	% Students need more efforts for developing basic concept of cell biology & cellular mechanisms and need more hard work

IX: Scheme of internal marks

Quarterly Examination	Half yearly Examination	Total 100	Final Internal Marks Out of 10
50 marks	50 marks		

IPS ACADEMY, INDORE

DEPARTMENT OF BIOTECHNOLOGY

Lesson Plan

Session: August– February

Subject: Biotechnology Paper- II (Microbiology)

Class: B.Sc. I Year

I: Objective of Course: The objective of the course is to acquaint the students with structure and diversity of bacteria, viruses and other microorganisms and their role in the environment.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

- | | |
|-----|--|
| CO1 | Gain basic knowledge about microbiology starting from history and classification of microorganisms |
| CO2 | Appreciate the biological diversity of microbial forms, and appreciate that this diversity results from evolutionary processes |
| CO3 | Learn and understand the concept of sterilization in microbiological techniques |
| CO4 | Apply appropriate microbiology laboratory techniques, methodologies, instruments and equipment in accordance with current laboratory safety protocol |

23			Bacterial morphology	B.R. 6
24			Structure and function of cell membrane of bacteria and archaeobacteria	B.R.6
25			Structure and function of cell wall of bacteria and archaeobacteria; outer membrane	B.R.6
26			Capsule, slime layer, pili, fimbriae	B.R.6
27			Storage inclusions, gas vesicles	B.R.6
28			Endospore formation and structure	B.R.6
29			Structure of flagella	B.R.6
30			Cell organelles	B.R.6
CO 2				
LO 2: Have complete understanding of structure of bacteria, archaeobacteria and viruses				
31	3	Structure and diversity of other microorganisms and stains	Algae- occurrence, thallus	B.R. 4
32			Algae- cell structure	B.R.4
33			Algae- reproduction and lifecycles	B.R.4
34			Fungi- occurrence, thallus	B.R.4
35			Fungi- cell structure, reproduction	B.R.4
36			Protozoa- occurrence, ecology and importance of protozoa	B.R.3
37			Protozoa- morphology	B.R.3
38			Protozoa- reproduction	B.R.3
39			Mycoplasma- classification, structure and pathogenecity	B.R.4
40			Stains- meaning, structure and components	B.R.1
41			Classification of stains	B.R.1
42			Types of staining procedures	B.R.1

DEPARTMENT OF BIOTECHNOLOGY

43			Types of staining procedures	B.R.1
44			Algal and fungal stains	B.R.1
CO 2				
LO3 : Compare and contrast the characteristics of algae, fungi, protozoa and mycoplasma that differentiate them from each other and know different method of studying them				
45	4	Microbial growth and control of microorganisms	Mathematical expression of growth	B.R.1
46			Growth curve	B.R.1
47			Factors affecting growth- temperature, oxygen	B.R.1
48			Factors affecting growth- carbon dioxide, pH	B.R.1
49			Batch and continuous culture	B.R.1
50			Synchronous and diauxic growt	B.R.1
51			Quantification of microorganisms- number of cells	B.R.1
52			Quantification of microorganisms- cell mass and activity	B.R.1
53			Control of microorganisms- factors affecting antimicrobial activity	B.R.1
54			Mechanism of cell injury, physical methods of microbial control-temperature	B.R.1
55			Physical methods of microbial control- dessication, osmotic pressure, surface tension, radiations, filtration	B.R.1
56			Chemical methods of microbial control- acids, alkalis, halogens, heavy metals	B.R.1
57			Chemical methods of microbial control- phenol an its derivatives, detergents, quaternary ammonium salts, alcohols, dyes	B.R.1, 3
58			Evaluation of chemical disinfectants- tube dilution and agar diffusion test	B.R.1, 3
59	Evaluation of chemical disinfectants- phenol coefficient test	B.R.1,3		
CO 3				
LO4 : Describe bacterial growth mathematically and its quantification and explain methods of microbial control				

DEPARTMENT OF BIOTECHNOLOGY

60	5	Microbial metabolism	Concept of anabolism and catabolism	B.R. 2
61			Nitrogen fixation-general concept	B.R.2
62			Symbiotic nitrogen fixation	B.R.2
63			Types of nitrogen fixation	B.R.2
64			Mechanisms of nitrogen fixation	B.R.2
65			Nif genes and leghaemoglobin	B.R.2
66			Microbial diseases in plant	B.R.4
67			Microbial diseases in animals	B.R. 4
68			Design of fermentor	B.R. 2,3
69			Design of fermentor	B.R. 2,3
70			Microbes of industrial importance	B.R. 4
71			Microbes of industrial importance	B.R.4
72				
73				
CO 2				
LO 5: Role of microorganisms in nitrogen fixation, fermentation and diseases

IPS ACADEMY, INDORE

DEPARTMENT OF BIOTECHNOLOGY

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
3. The result of each tests/assignment will be declared within one week
4. Late submissions will not be accepted in any case
5. Attendance will be a major factor for assessing class performance

VIII: Rubric for Internal Assessment

VIII Rubric for Internal Assessment			
Subject: Biotechnology Paper II			
B. Sc. I year			
Goal : The students will develop the ability to understand the general concept of microbiology and its techniques			
Objective: The objective of the course is to acquaint the students with structure and diversity of bacteria, viruses and other microorganisms and their role in the environment			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Microbiology, structure and diversity of bacteria, viruses and other microorganisms and their role in the environment	% Students having the basic of Microbiology, structure and diversity of bacteria, viruses and other microorganisms and their role in the environment	% Students having understanding about general microbiology	% Students Need More Efforts for general microbiology

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total	Final total out of 10
50	50	100	

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Foundation Paper III Entrepreneurship Development****Session: Aug – Feb****Class: B.Sc. I yr Biotechnology**

I: Objective of course: To enable the students to understand the meaning, functions of entrepreneur, role of regulatory institutions, problems and challenges faced by an entrepreneur.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 The students will be able to understand the concept of entrepreneurship and develop an entrepreneurial way of thinking that will help them in identifying and creating business opportunities that could be commercialized.
- CO2 The students will learn about writing a Project Proposal and they will be able to write a detailed Project Report.
- CO3 The students will gain an understanding of the roles played by various regulatory institutions and how to avail the benefit of various self-employment oriented schemes.
- CO4 The students will be able to recognize the various problems faced by entrepreneurs and they will be able to identify the personal and professional management skills that enable an entrepreneur to face challenges and overcome them.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 2	3	2	2	1	1	2	3	3
CO 3	1				1	2	3	3
CO 4	1		2		1	3	3	2

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	Unit 1		Definition and meaning of Entrepreneurship with examples	B.R. 1
2			Concept of of entrepreneurship	B.R. 1
3			Importance of Entrepreneurship	B.R. 1
4			Importance of entrepreneurship	B.R. 1
5			Importance of entrepreneurship	B.R. 1
6			Functions of Entrepreneur basic concept	B.R. 1
7			Types of functions Managerial	B.R. 1
8			Organizational functions	B.R. 1
9			Management functions	B.R. 1
10			Production functions	B.R. 1
11			Determination of Goals	B.R. 1
12			Target achieving	B.R. 1
13			Facing Challenges in achieving goal	B.R. 1
14			Steps of Problem Solving	B.R. 1
15			Steps of solving problems with few more examples	B.R. 1
CO 1				
LO 1: The students will be able to understand the concept and importance of Entrepreneurship and different functions of entrepreneurs. They will also be able to understand how to determine goals, how to face challenges and different steps of problem solving.				
16	Unit II		Project proposal definition meaning and concept	B.R. 1

DEPARTMENT OF BIOTECHNOLOGY, INDORE

17			Preparation of project proposal	B.R. 1
18			Preparation of project proposal with example	B.R. 1
19			Nature of Organisation	B.R. 1
20			Sole proprietorship meaning characteristics	B.R. 1
21			Sole proprietorship Merits and demerits	B.R. 1
22			Partnership meaning and characteristics	B.R. 1
23			Merits and demerits of partnership	B.R. 1
24			Cooperative Committee meaning and characteristics	B.R. 1
25			Merits and demerits of Cooperative Committee	B.R. 1
26			Differences between the different organisations	B.R. 1
27			Production management concept and meaning	B.R. 1
28			Types of production management	B.R. 1
29			Marketing management	B.R. 1
30			Consumer management	B.R. 1

CO: 2

LO2 : The students will be able to understand the concept and importance of Entrepreneurship and different functions of entrepreneurs. They will also be able to understand how to determine goals, how to face challenges and different steps of problem solving.

31			Role of regulatory institutions	B.R. 1
32			Continued	B.R. 1
33			Continued	B.R. 1
34			Role of development	B.R. 1
35			Continued	B.R. 1
36			Continued	B.R. 1

DEPARTMENT OF BIOTECHNOLOGY, INDORE

37		Self employment schemes	B.R. 1
38		Prime minister self employment schemes	B.R. 1
39		Rani durgawati	B.R. 1
40		Rani durgawati self employment schemes	B.R. 1
41		Pt deen dayal self employment schemes	B.R. 1
42		Khadi and village grant schemes	B.R. 1
43		Women development schemes	B.R. 1

CO3:

LO 3: The students will be able to understand the Role of Regulatory Institutions and Development Organizations in the development of entrepreneurship. They will also learn about various growth schemes and self-employment oriented schemes.

44	Unit -IV	Financial institutions and their role. Basic concept	B.R. 1
45		Functions of financial institutions	B.R. 1
46		Types of financial institutions	B.R. 1
47		IFCI roles objectives and functions	B.R. 1
48		ICICI, IDBI objectives functions	B.R. 1
49		SFC, LIC, HDFC objectives functions	B.R. 1
50		NABARD, RURAL BANKS objectives functions	B.R. 1
51		Capital estimation meaning and concept	B.R. 1
52		Ways of estimating the capital	B.R. 1
53		How to arrange the capital from outsource	B.R. 1
54		Cost and price determinations	B.R. 1
55		Continued	B.R. 1

DEPARTMENT OF BIOTECHNOLOGY, INDORE

56			Quality estimation	B.R. 1
57			Accounting management: making of account books	B.R. 1
58			Maintainance of account books	B.R. 1
CO: 3				
LO4: The students will be able to understand the role of Financial Institutions in the development of entrepreneurship. They will also learn about various aspects of Financial Management for Project like Capital estimation, Cost and Price determination and Accounting.				
59			Problems relating Capital	B.R. 1
60			Continued	B.R. 1
61			Continued	B.R. 1
62			How to overcome the problems of Capital	B.R. 1
63			Continued	B.R. 1
64			Problems relating registration	B.R. 1
65			Continued	B.R. 1
66			Continued	B.R. 1
67			How to overcome the problems of registrations	B.R. 1
68			Continued	B.R. 1
69			Problems relating Administrations	B.R. 1
70			Continued	B.R. 1
71			Continued	B.R. 1
72			How to overcome the problems of administrations	B.R. 1
73			Continued	B.R. 1
CO: 4				

DEPARTMENT OF BIOTECHNOLOGY, INDORE

LO 5: The students will be able to understand the various problems faced by entrepreneurs like Problem related to Capital, Registration, Administration etc. and they will also learn how to overcome them.

VI: Book References:

- 1. Foundation Course: Entrepreneurship Development: Dr Rajive Sharma and Dr Vipul Patel, Yash Raj Publications**

VII: Notes:

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5..Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Entrepreneurship Development Paper -III			
B.Sc. I Year			
Goal : Students will be able to set up their own enterprise, prepare their project proposal, understands role of regulatory institutions and come to know about the challenges faced in setting the enterprise.			
Objective: Students gain understanding of different functions, management skills ,of entrepreneur. They also understands the production, marketing and problems related at these level.			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Financial, Cost, and Management. Roles of institutions and entrepreneurs.	% Students having the basic concept of Financial, Cost, and Management Accounting and understanding of problems.	% Students having understanding about management functions.	% Students Need More Efforts for Solution and Basic Concept of Accounting.

IX: Scheme of internal marks

Quarterly Examination	Half yearly Examination	Total 100	Final Internal Marks Out of 10
50 marks	50 marks		

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Life Science Paper-I: Introduction to Biochemistry, Cell Biology Plant & Animal Diversity****Session: Aug -Feb****Class: B.Sc. I year****I: Objective of course:**

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

- CO1 To acquaint students on biochemistry of complex molecules like carbohydrates, lipids, amino acids, vitamins, enzymes and nucleic acid with practical knowledge.
- CO2 To impart knowledge and complete understanding on cell and its functions with practical experiments.
- CO3 To impart knowledge on plant kingdom & its diversity with practical experiments.
- CO4 To impact knowledge on animal kingdom for a wider knowledge on life science.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

VIII Rubric for Internal Assessment			
Subject: Life Science Paper -I			
B.Sc. 1st Year			
Goal : Students develop the ability to understand and analyze their knowledge on biochemistry of various molecules, structure and functions of cell, diversity of living world as well as special features of some species.			
Objective: Students gain understanding on biomolecules, cell biology and diversity of plants and animals			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having very good understanding of biomolecules, cell biology and diversity of plants and animals	% Students have basic understanding of biomolecules, cell biology and diversity of plants and animals	% Students having less understanding on biomolecules, cell biology and diversity of plants and animals and need improvement	% Students Need More Efforts for developing Basic Concept on biomolecules, cell biology and diversity of plants and animals and need more hard work

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total	Final total out of 10
50	50	100	

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject:** Life science paper II (Environmental biology, genetics and evolution)**Session:** Aug -Feb**Class:** B. Sc. First Year**I: Objective of course:** The student will be able to understand about interaction between organisms and the environment, environmental issues at global scale, fundamental principles of genetics and evolution**II: Examination:** The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks**III: Course Outcomes (CO):**

- CO1 Understand how interactions between organisms and their environments drive the dynamics of individuals, populations, communities, and ecosystems
- CO2 Have an understanding of the critical issues facing the environment at global scales.
- CO3 Describe the fundamental molecular principles of genetics
- CO4 Understand the processes and patterns of evolution, and the role of evolution as the central unifying concept in environmental science

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5..Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment			
Subject: Life science P II			
B. Sc. I year			
Goal : The students will develop the general understanding of the concept of ecosystem, evolution and genetics			
Objective: The student will be able to understand about interaction between organisms and the environment, environmental issues at global scale, fundamental principles of genetics and evolution			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of interaction between organisms and the environment, environmental issues at global scale, fundamental principles of genetics and evolution	% Students having the basic concept of interaction between organisms and the environment, environmental issues at global scale, fundamental principles of genetics and evolution	% Students having general idea about environment, genetics and evolution.	% Students Need More Efforts for environment, evolution and genetics

IX: Scheme of internal marks

Quarterly Examination	Half yearly Examination	Total 100	Final Internal Marks Out of 10
50 marks	50 marks		

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper I Morphology, Developmental Biology and Physiology of Angiosperms****Session: Aug – Feb****Class: B.Sc. II yr Life Sciences**

I: Objective of course: To impart knowledge on anatomy and physiology of plant along with the development of floral parts, growth regulators and metabolism of carbohydrates, nitrogen and ATP synthesis.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 To impart knowledge on morphology, physiology and developmental biology of plants
- CO2 To equip students on metabolism of carbohydrates, nitrogen & ATP synthesis.
- CO3 To Impart knowledge on plant physiology and its mechanism.
- CO4 Student must know in details the growth and development in plants.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	2	3	3	2		1	-
CO 2	2	1	3	2		2		-
CO 3			3	3	3	3	-	-
CO 4	2	3	2	3	3	2	1	-

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	Unit 1		Root apex Introduction	B.R.1,2,3
2			Tissues and cells of root apex	B.R.1,2,3
3			Functions of various cells and tissues	B.R.1,2,3
4			Apical meristem root apex theories	B.R.1,2,3
5			Organization of root apex	B.R.1,2,3
6			Anatomy of Dicot root	B.R.1,2,3
7			Anatomy Monocot root	B.R.1,2,3
8			Apical meristem shoot: Introduction and theories	B.R.1,2,3
9			Organisation of shoot apex	B.R.1,2,3
10			Anatomy of Dicot stem	B.R.1,2,3
11			Anatomy of monocotyledonous stem	B.R.1,2,3
12			Anatomy of leaf dicot	B.R.1,2,3
13			Anatomy of monocot leaf	B.R.1,2,3
14			Structure of Stomata	B.R.1,2,3
15			Secondary growth of stem in dicotyledonous	B.R.1,2,3

CO : 1**LO 1:** To impart knowledge on root system, shoot system and anatomy of leaf in monocots and dicots.

16	Unit II		Morphology of flowers, calyx and corolla, their arrangements	B.R.1,2,3,
17			Stamens , arrangements and gynoecium , carpels, structure in flower.	B.R.1,2,3,
18			Microsporogenesis, introduction, structure of anther	B.R.1,2,3,
19			Attachment of anther with corolla, detailed structure of anther	B.R.1,2,3,

DEPARTMENT OF BIOTECHNOLOGY, INDORE

20			Development of male gametophyte	B.R.1,2,3,
21			Development of male gametophyte	B.R.1,2,3,
22			Megasporangium , introduction, parts of gynoecium in detail	B.R.1,2,3,
23			Megasporogenesis, types of embrosac,	B.R.1,2,3,
24			Development of female gametophyte	B.R.1,2,3,
25			Structure of ovary and placentation	B.R.1,2,3,
26			Pollination, its types	B.R.1,2,3,
27			Fertilization of ovary, types of fertilization, development of zygote	B.R.1,2,3,
28			Endosperm, types of endosperm,	B.R.1,2,3,
29			Embryogenesis in dicots	B.R.1,2,3,
30			Embryogenesis in monocots	B.R.1,2,3,

CO: 1

LO 2: Detailed understanding on plant development – microsprogensis , megasporogenesis, pollination, fertilization and post fertilization development.

31	Unit III		Absorbtion of water in plants	B.R. 5,6,7
32			Transpiration meaning and method of transpiration	B.R. 5,6,7
33			Types of transpiration	B.R. 5,6,7
34			Stomatal movement its theories	B.R. 5,6,7
35			Factors affecting transpiration	B.R. 5,6,7
36			Ascent of sap mechanism	B.R. 5,6,7
37			Theories of ascent of sap	B.R. 5,6,7
38			Photosynthesis: photosynthetic apparatus structure and function	B.R. 5,6,7
39			Photosynthetic pigments in detail	B.R. 5,6,7

DEPARTMENT OF BIOTECHNOLOGY, INDORE

40			Z scheme of photosynthesis	B.R. 5,6,7
41			Factors affecting photosynthesis	B.R. 5,6,7
42			Factors affecting photosynthesis	B.R. 5,6,7
43			Revision	

CO: 3**LO3:** To impart knowledge on plant physiology such as transpiration, ascent of sap & photosynthesis.

44	Unit IV		Respiration in plants introduction	B.R. 5,6
45			Glycolysis	B.R. 5,6
46			Glycolysis continued with energy balance	B.R. 5,6
47			TCA cycle	B.R. 5,6
48			TCA cycle continued, energy balance in the cycle	B.R. 5,6
49			Electron transport in Mitochondria	B.R. 5,6
50			Pentose phosphate pathway	B.R. 5,6
51			Pathway continued	B.R. 5,6
52			C 3 cycle	B.R. 5,6
53			C 4 cycle difference between C 3 and C4 cycle	B.R. 5,6
54			Biological Nitrogen fixation, introduction and mechanism	B.R. 5,6
55			Types of N ₂ fixation by different nitrogen fixing bacteria	B.R. 5,6
56			Leg haemoglobin and nif genes	B.R. 5,6
57			Regulation of Nitrogen reduction	B.R. 5,6
58			Ammonia assimilation	B.R. 5,6

CO: 2**LO 4:** To impart knowledge on metabolism of carbohydrates, nitrogen and oxidative phosphorylation.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

59	Unit V		Structure and functions of Auxins	B.R. 5,6
60			Functions of Auxin continued	B.R. 5,6
61			Structure and functions of Gibberllins	B.R. 5,6
62			Functions of Gibberllins continued	B.R. 5,6
63			Structure and functions of cytokinin	B.R. 5,6
64			Structure and functions of ethylene	B.R. 5,6
65			Structure and functions abscisic acid	B.R. 5,6
66			Structure and functions of ethylene	B.R. 5,6
67			Concept of photoperiodism	B.R. 5,6
68			Concept of vernalization	B.R. 5,6
69			General idea of phytochrome	B.R. 5,6
70			Concept of plant movement	B.R. 5,6
71			Autonomic or spontaneous movement	B.R. 5,6
72			Paratonic movement	B.R. 5,6
73			Induced movement	B.R. 5,6
CO: 4				
LO 5: To impart knowledge on growth and development regulators in plant, plant movements and concept of photoperiodism.

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	I	Digestive & Excretory system in mammals	Introduction & components of digestive system	B.R.2,3
2			Histology of digestive system	B.R.5
3			Functions of digestive system	B.R.2,3
4			Absorptions of monomers in digestive system	B.R.2,3
5			Secretory functions of salivary & gastric gland	B.R.2,3
6			Secretory functions of liver & gall bladder	B.R.2,3
7			Secretory functions of pancreas & intestine	B.R.2,3
8			Overview of disorders of digestive system	B.R.2,3
9			Introduction & components of excretory system	B.R.2,3
10			Functions of digestive system	B.R.2,3
11			Mechanism of urine formation	B.R.2,3
12			Counter current mechanism	B.R.2,3
13			Process of formation of urea (ornithine cycle)	B.R.2,3
14			Overview of disorders of excretory system	B.R.2,3
15			Revision of unit	B.R.2,3
CO : 3				
LO 1: To impart skills on morphology and physiology digestive and excretory system of mammals.				
16	Unit II	Digestive & Respiratory system in mammals	Introduction and structure of respiratory system in mammals	B.R.2,3
17			Morphology of respiratory organs	B.R.2,3
18			Mechanism of respiration- inspiration	B.R.2,3

DEPARTMENT OF BIOTECHNOLOGY, INDORE

19			Mechanism of respiration – expiration	B.R2,3
20			Exchange of gases in alveoli & tissue	B.R2,3
21			Transport of oxygen by blood	B.R2,3
22			Transport of co2 by blood	B.R2,3
23			Introduction of circulatory system in mammals	B.R2,3
24			Morphology of heart & blood vessels	B.R2,3
25			Course of blood circulation- mechanism	B.R2,3
26			Conduction system of heart, heart rate, cardiac cycle	B.R2,3
27			Disorders of circulatory system	B.R2,3
28			Composition of blood	B.R2,3
29			Functions of blood	B.R2,3
30			Mechanism of blood clotting	B.R2,3
31			Overview & revision of unit	B.R2,3

CO : 3

LO 2: To impact knowledge on morphology and physiology respiratory and circulatory system of mammals.

32	Unit III	muscular system and nervous system	Types of muscles – structure & function	B.R2,3,5
33			Components of muscle proteins	B.R2,3,5
34			Mechanism of muscle contraction	B.R2,3,5
35			Revision of muscle contraction	B.R2,3,5,
36			Structure of nervous tissue	B.R2,3,5
37			Types of nervous tissue	B.R2,3,5
38			Classification of nervous system	B.R2,3,5
39			Mechanism of nerve impulse generation (depolarisation)	B.R2,3,5

DEPARTMENT OF BIOTECHNOLOGY, INDORE

40		Repolarisation and hyperpolarisation	B.R2,3,5
41		Transmission of nerve impulse	B.R2,3,5
42		Nerve junction & disorders	B.R2,3,5
44		Reflex action and examples	B.R2,3,5
45		Revision of unit	B.R2,3,5

CO : 3

LO 3: To acquaint students on morphology and physiology muscular and nervous system of mammals.

45	Unit IV	Endocrine & reproductive system	Structure and function of anterior pituitary gland	B.R2,3,5,6
47			Structure and function of posterior pituitary gland	B.R2,3,5,6
48			Structure and function of hypothalamus	B.R2,3,5,6
49			Structure and function of thyroid and disorders	B.R2,3,5,6
50			Structure and function of parathyroid and disorders	B.R2,3,5,6
51			Structure and function of adrenal cortex and disorders	B.R2,3,5,6
52			Structure and function of adrenal medulla and disorders	B.R2,3,5,6
53			Disorders of pituitary hormone	B.R2,3,5,6
54			Structure and function of male reproductive system	B.R2,3,5,6
55			Structure and function of female reproductive system	B.R2,3,5,6
56			Female reproductive cycles - ovarian	B.R2,3,5,6
57			Female reproductive cycles - menstrual	B.R2,3,5,6
58			Disorders of reproductive system	B.R2,3,5,6
59			Estrous cycle	B.R2,3,5,6
60			Revision of unit	B.R2,3,5,6

CO: 1 2

LO 4: To acquaint students on morphology and physiology endocrine and reproductive system of mammals.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

61	Unit V	Embryonic development	Process of spermatogenesis	B.R1,2,3,6
62			Process of oogenesis	B.R1,2,3,6
63			Mechanism of fertilisation- step 1,2 ,3	B.R1,2,3,6
64			Mechanism of fertlisation- step 4,5	B.R1,2,3,6
65			Significance and abnormalities of fertilization	B.R1,2,3,6
66			Introduction and types of cleavage	B.R1,2,3,6
67			Patterns of cleavage	B.R1,2,3,6
68			Other patterns of cleavage	B.R1,2,3,6
69			Process of blastulation	B.R1,2,3,6
70			Formation of germinal layers	B.R1,2,3,6
71			Fate of germinal layers	B.R1,2,3,6
72			Structure of extra embryonic membranes	B.R1,2,3,6
73			Function of extra embryonic membranes	B.R1,2,3,6
74			Placentation in mammals	B.R1,2,3,6
75			Revision of unit	B.R1,2,3,6
CO : 3,4				
LO 5: To provide knowledge on gametogenesis, fertilization, post fertilization developments and placentation in mammals

DEPARTMENT OF BIOTECHNOLOGY

Lesson Plan

Session: August- February

Subject: Biotechnology **Paper-I** (Biophysics and Biochemistry)

Class: B.Sc. II Year

I: Objective of Course: To impart knowledge about Biophysical techniques and biomolecules to students.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

CO-1 Student must have the clear concept of relationship among all forms of energy.

CO-2 Student must know the importance of biochemistry including role of water, acids, bases and buffers in life.

CO-3 Students know varieties of biocatalysts.

CO-4 Student acquires skills of drawing logical conclusions from observations taken with the help of scientific instruments.

3. Text book of Biochemistry By S.P. Singh. CBS Publishers and distributors.
4. Fundamentals of Biochemistry By J.L. Jain. S.Chand.

DEPARTMENT OF BIOTECHNOLOGY**VII: Notes:**

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
3. The result of each tests/assignment will be declared within one week
4. Late submissions will not be accepted in any case
5. Attendance will be a major factor for assessing class performance

VIII: Rubric for Internal Assessment

Subject: Biotechnology Paper-I (Biophysics and Biochemistry)			
B.Sc. II Year			
Goal – Student develops ability to understand biomolecules and their assessment.			
Objective- To impart knowledge about Biophysical techniques and biomolecules to students.			
9,10 Marks	6-8 Marks	4-5 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the perfect knowledge of molecules and tools of the subject.	% Students studied well, more efforts are required for perfection.	% Students having even lesser interest in the subject.	% Students Need More Efforts for the subject.

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total	Final total out of 10
50	50	100	

IPS ACADEMY, INDORE

DEPARTMENT OF BIOTECHNOLOGY

Lesson Plan

Session: August – February

Subject: Biotechnology Paper-II: (Bioinstrumentation, Biostatistics & Bioinformatics)

Class: B.Sc. II Year

I: Objective of Course: To impart knowledge about bioinstruments, biostatistics and bioinformatics to students.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper). The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks.

III: Course Outcomes (CO):

CO-1 Student knows different techniques to measure macromolecules.

CO-2 Student knows basics of statistics and computers along with biological databases.

CO-3 Develop the skills to present ideas effectively and efficiently.

CO-4 Student learns to perform and analyze laboratory experiments.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	-	2	-	-	-	-	-
CO 2	-	-	-	1	-	2	-	-
CO 3	-	-	-	-	-	-	-	3
CO 4	-	-	2	-	-	-	-	-

Lecture No.	Unit No.	Unit Name	Topic	Reference
1.	First	Microscopy	Light	B.R. 1
2.			Phase Contrast	B.R. 1
3.			Fluorescence	B.R. 1
4.			Electron microscopy	B.R. 1
5.			Electron microscopy	B.R. 1
6.		Centrifugation	Electron microscopy	B.R. 1
7.			Principle of centrifugation	B.R. 1
8.			Principle of centrifugation	B.R. 1
9.			Types of centrifuges	B.R. 1
10.			Types of centrifuges	B.R. 1
11.			Varieties of rotors	B.R. 1
12.			Ultracentrifugation	B.R. 1
13.			Differential centrifugation	B.R. 1
14.			Density gradient	B.R. 1
15.			Applications of centrifugation	B.R. 1
CO-I				
LO-I	To learn principles of microscopy and centrifugation.			

DEPARTMENT OF BIOTECHNOLOGY

Lecture No.	Unit No.	Unit Name	Topic	Reference
16.	Second	Chromatography	Introduction to chromatography	B.R. 1
17.			Principle of chromatography	B.R. 1
18.			Applications of chromatography	B.R. 1
19.			Column chromatography	B.R. 1
20.			Gel filtration chromatography	B.R. 1
21.			Ion-exchange, Affinity chromatography	B.R. 1
22.		Electrophoresis	Principle of electrophoresis	B.R. 1
23.			Applications of electrophoresis	B.R. 1
24.			Agarose Gel	B.R. 1
25.			Immunoelectrophoresis	B.R. 1
26.			Blotting – principle	B.R. 1
27.			Southern Blotting	B.R. 1
28.			Western Blotting	B.R. 1
29.			Northern Blotting	B.R. 1
30.			Application of Blotting	B.R. 1
CO-I				
LO-2	To learn the concept of chromatography and electrophoresis.			

DEPARTMENT OF BIOTECHNOLOGY

Lecture No.	Unit No.	Unit Name	Topic	Reference
31.	Third	Photometry	Colorimetry – principle	B.R. 1
32.			Application of colorimeter	B.R. 1
33.			Parts of colorimeter	B.R. 1
34.			Principle of spectrophotometer	B.R. 1
35.			Difference between colorimeter and spectrophotometer	B.R. 1
36.			Instrumentation of spectrophotometer	B.R. 1
37.			Applications of spectrophotometer	B.R. 1
38.		Radioactivity measurements	Radio activity and heavy isotopes	B.R. 1
39.			Radioactive labeling	B.R. 1
40.			Non radioactive labeling	B.R. 1
41.			Half life of radio activity	B.R. 1
42.			Geiger Muller counter	B.R. 1
43.			Scintillation counter	B.R. 1
44.			Autoradiography	B.R. 1
45.			Application of radio activity	B.R. 1
CO-I				
LO-3	To learn colorimetry and radioactive techniques.			

DEPARTMENT OF BIOTECHNOLOGY

Lecture No.	Unit No.	Unit Name	Topic	Reference
46.	Fourth	Biostatistics	Introduction of Biostatistics	B.R. 2
47.			Scope of Biostatistics	B.R. 2
48.			Use of statistic collection	B.R. 2
49.			Classification of data	B.R. 2
50.			Data summarization	B.R. 2
51.			Presentation of data	B.R. 2
52.			Arithmetic mean, median	B.R. 2
53.			Standard deviation	B.R. 2
54.			Probability definition	B.R. 2
55.			Random Variable	B.R. 2
56.			Distribution of random variable	B.R. 2
57.			Distribution of random variable	B.R. 2
58.			Distribution of random variable	B.R. 2
59.			Binomial Probability and distribution	B.R. 2
60.			Binomial Probability and distribution	B.R. 2
CO-2				
LO-4	To learn the concept of sampling from population and applying results on the population.			

DEPARTMENT OF BIOTECHNOLOGY

____ Students	____ Students	____ Students	____ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the perfect knowledge of tools and techniques of the subject.	% Students studied well , more efforts are required for perfection.	% Students having even lesser knowledge and interest in the subject.	% Students Need More Efforts for the subject to do better.

IX: Scheme of internal marks

Quarterly examination	Half yearly examination	Total 100	Final total out of 10
50	50		

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Paper III Foundation course Environmental Sciences****Session: Aug – Feb****Class: B.Sc. II yr Biotechnology/ Life Sciences**

I: Objective of course: To enable the students to understand the importance, awareness of environment and regulations laws of pollution, cleanliness.

II: Examination: The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 50 marks (10 Marks for internal and 40 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 5 marks will have 5 Multiple choice questions. Section B carrying 15 marks will contain five optional short answer type questions each of 3 marks. And the section C carrying 20 marks will contain five optional Long answers type questions each of 4 marks

III: Course Outcomes (CO):

- CO1 Understand the natural environment as a system and how human enterprise affects that system.
- CO2 An environmental studies course advances a student's knowledge in a variety of current issues such as energy, pollution and environmental awareness.
- CO3 Course covers how to evaluate and address environmental problems and environmental studies Include forest ecology, energy efficiency in buildings. Sustainable practices, harnessing eco-friendly power sources and political ecology.
- CO4 Object of course is to address the role of regulation on environment, how social & economical conditions affect ecological issues & major environmental challenges.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

1. There will be individual assignment
2. Class tests will be based on theoretical and practical aspect of the subject.
- 3 The result of each tests/assignment will be declared within one week
- 4.. Late submissions will not be accepted in any case
- 5..Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment**Subject: , Immunology,animal cell culture****B.Sc. Life Science V Semester**

Goal : To develop basic concept of immune response , microbiology and animal tissue culture among students.

Objective: To make students learn about antigen antibody , normal microflora , pathogen, animal tissue culture technique and applications.

13-15 Marks	8-12 Marks	4-7 Marks	0-3 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of immunology, microbiology, and animal tissue culture and further to develop research accumen related to these fields.	% Students having the basic concept of immunology, microbiology, and animal tissue culture and to become competent to get placed in work field.	% Students having understanding about immunology , microbiology , animal tissue culture.	% Students Need More efforts to understand concept of immunology , microbiology , animal tissue culture

IX: Scheme of internal marks

Quiz/GD/Viva	Assignment	Class test	Total	Final total out of
50	50	50	150	15

B.Sc. Life Science V Semester**Subject: Microbiology, Immunology,animal cell culture**

DEPARTMENT OF BIOTECHNOLOGY, INDORE**Lesson Plan****Subject: Biotechnology Paper: Plant And Environmental Biotechnology****Session: Aug - Dec****Class: B.Sc. VI Sem****I: Objective of course:**

II: Examination: The faculty member will award internal marks out of 15 and the bifurcation is mention in the scheme of internal marks. The yearly examination carrying 100 marks (15 Marks for internal and 85 marks for theory paper) The theory Paper will have three sections A, B and C. Section A worth 15 marks will have 15 Multiple choice questions. Section B carrying 20 marks will contain five optional short answer type questions each of 4 marks. And the section C carrying 50 marks will contain five optional Long answers type questions each of 10 marks

III: Course Outcomes (CO):

- CO1 To develop fundamental knowledge in plant biotechnology and its practical application in laboratory and agricultural field.
- CO2 To develop skills on genetic manipulation in plant.
- CO3 To develop knowledge and skills on various aspects of environmental biotechnology and its applications to protect environment.
- CO4 To expose students on potential careers in various field of biotechnology

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

DEPARTMENT OF BIOTECHNOLOGY, INDORE**V: Session Plan:**

Lecture no.	Unit no.	Unit Name	Topics	Reference
1	I	Introduction to Plant Tissue culture	Introduction to Plant Tissue culture (PTC)	B.R.1,2,3,4
2			History of Plant Tissue culture (PTC)	B.R.1,2,3,4
3			Requirements of PTC	B.R.1,2,3,4
4			Media-types, composition, preparation	B.R.1,2,3,4
5			Explant selection, sterilization of samples and laboratory	B.R.1,2,3,4
6			Growth regulators-types and uses	B.R.1,2,3,4
7			Types of PTC-Concept and process of Callus culture	B.R.1,2,3,4
8			Selection & maintenance of callus	B.R.1,2,3,4
9			Concept of Single cell culture	B.R.1,2,3,4

CO: 1, 4**LO 1 :** General introduction on the concept of plant tissue culture.

10	II	Techniques in Plant Tissue Culture	Concept & application of Micropropagation	B.R.1,2,3,4
11			Concept & application of Organogenesis	B.R.1,2,3,4
12			Concept & application of Somatic Embryogenesis	B.R.1,2,3,4
13			Concept & process of Anther culture	B.R.1,2,3,4
14			Concept & process of Ovary culture	B.R.1,2,3,4
15			Production of haploid & their uses	B.R.1,2,3,4
16			Cytodifferentiation	B.R.4
17			in vitro pollination	B.R.4
18			in vitro fertilization	B.R.4

CO: 1,4**LO 2 :** To understand different types of plant tissue culture and its techniques.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

19	III	Plant Biotechnology	Concept & process of Protoplast technology	B.R.1,2,3,4
20			Concept & process of Protoplast fusion	B.R.1,2,3,4
21			Concept & process of Somatic hybridization	B.R.1,2,3,4
22			Concept of Cybrids, markers for selection of hybrid cell	B.R.1,2,3,4
23			Introduction to transgenic plants	B.R.1,2,3,4
24			Introduction to Agrobacterium species	B.R.1,2,3,4
25			Genetic manipulation of plants	B.R.1,2,3,4
26			Concept of transfection methods	B.R.1,2,3,4
27.			Advantages of transgenic plants	B.R.1,2,3,4

CO: 1,2, 4**LO 3 :** To developed knowledge on protoplast culture, transgenic plants and transfection methods.

28	IV	Environmental Biotechnolgy	Concept on conventional fuels & impact on environment	B.R. 5,6
29			Concept on modern fuels & impact on environment	B.R. 5,6
30			Comparison on different fuels & recent aspects	B.R. 5,6
31			Concept on Plant based petroleum industry	B.R. 5,6
32			Cellulose degradation for combustible fuels & impact on environment	B.R. 5,6
33			Microbial leaching of copper & uranium	B.R. 5,6
34			Concept on Biorecovery of petroleum-MEOR	B.R. 5,6
35			Concept on bioremediation of petroleum products, leather, textile and paper	B.R. 5,6
36			Concept on biodeterioration	B.R. 5,6

CO: 3, 4**LO 4:** Detailed knowledge environmental biotechnology, various fuels and their environmental impact, bioremediation and biodeterioration.

DEPARTMENT OF BIOTECHNOLOGY, INDORE

37	V	Applications in Environmental Biotechnology	Introduction to bacterial biopesticides	B.R. 5,6, 7
38			Introduction to fungal biopesticides	B.R. 5,6, 7
39			Concept on genetically modified crops	B.R. 5,6, 7
40			Concept on biofertilizers-nitrogen fixers & PSB	B.R. 5,6, 7
41			Concept on biofertilizers- Mycorrhiza & VAM	B.R. 5,6, 7
42			Concept on Biosensors & Biopolymers	B.R. 5,6, 7
43			Concept on biochips,biofilms, & bioplastics	B.R. 5,6, 7
44			Microorganisms as bioindicators	B.R. 5,6, 7
45			Concept on biological weapons & bioterrorism	B.R. 5,6, 7
CO: 3, 4				
LO 5 : To provide skills on agriculture biotechnology such as biopesticides, GMO, Biofertilizers etc.

DEPARTMENT OF COMMERCE, IPS ACADEMY

PROGRAM OUTCOME

B.Com. (Plain)

1. This program could provide well tainted professionals for the industries, banking sectors, insurance companies, financing companies, Transport agencies, warehousing etc. to meet the well trained men power requirements. The graduates will get hands on experience in various aspects acquiring skills for marketing manager, selling managers, overall administration abilities of the companies.
2. After completing this course they can become a manager, accountant, management accountant, cost accountant, bank manager, auditor, company secretary teacher, professor, stock agents and get govt. jobs easily.
3. The course offer the number of value based and job oriented courses (Industry visit, summer training) ensures that students are trained can get aware about the present scenario of the world.
4. Create a base to compete and participate and gain leadership positions in organizations at National and International levels
5. Through this course department is putting efforts to nurture entrepreneurial skills and capabilities.
6. Demonstrate an understanding of the concept, principles theories and arguments of the area of economics and business.
7. Demonstrate a knowledge of micro economic theory as it relates to market firms, gov. policy and recourse allocation.
8. To enlighten the student's knowledge on banking regulation acts after the successful completion of the course the students should have a thorough knowledge on Indian banking system and acts pertaining to it.

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Business Mathematics****Session: July-June****Class: B.Com. I year Pass Courses**

I: Objective of course: The objective of this course is to teach the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: have basic knowledge in the areas of business calculus and financial mathematics

CO2: be able to work with simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.

CO3: be able to understand and use equations, formulae, and mathematical expressions and relationships in a variety of contexts

CO4: apply the knowledge in mathematics (matrices, percentage, ratio- proportion, averages) in solving business problems

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	2			2	2		
CO 2		2			2	2	2	2

CO 4	3			2	2	3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Ratio – gaining and Sacrificing Ratio, proportion, Percentage, Commission, Discount and Brokerage	Ratio- Meaning, features and types of ratio.	B.N.4
2			Ratio related to partnership	B.N.4
3			Profit sharing ratio, Sacrificing ratio & Gaining ratio.	B.N.4
4			Ratio Short numerical questions.	B.N.4
5			Ratio- Long numerical questions	B.N.4
6			Ratio- Long numerical questions	B.N.4
7			Ratio- Long numerical questions	B.N.4
8			Proportion- Meaning, rules & kinds.	B.N.4
9			Problems related to Inverse & compound proportion.	B.N.4
10			Problems related to continued & direct proportion	B.N.4
11			Percentage- Rules & numerical.	B.N.1
12			Percentage- Numerical.	B.N.1
13			Percentage- Numerical	B.N.1
14			Commission- Calculation of different types of commission	B.N.1
15			Commission- Practical Problems	B.N.1
16			Commission- Practical Problems	B.N.1
17			Discount & Brokerage- Meaning and different types.	B.N.1
18			Practical problems regarding Discount & brokerage.	B.N.1
19			Practical problems regarding Discount & brokerage.	B.N.1
CO: 1, 4				
LO: Able to solve different problems regarding ratio and percentage.				
20	2	Simultaneous Equations – Meaning,	Simultaneous Equations- Methods of solving equations.	B.N.3
21			Problems relating to Number and Fraction.	B.N.3

22		Characteristics, Types and Calculations. Preparation of invoice.	Problems relating to Age.	B.N.3
23			Solving Miscellaneous Problems.	B.N.3
24			Solving Miscellaneous Problems.	B.N.3
25			Solving Miscellaneous Problems.	B.N.3
26			Preparation of Invoice- Meaning & advantages.	B.N.3
27			Objects and methods of preparing Invoice.	B.N.3
28			Kinds or types of Invoices	B.N.3
29			Preparation of Invoice- Practical Questions.	B.N.3
30			Preparation of Invoice- Practical Questions.	B.N.3
31			Preparation of Invoice- Practical Questions.	B.N.3
32			Preparation of Invoice- Practical Questions.	B.N.3
CO: 2,3				
LO: Framing and solving equations, Invoice preparation.				
33	3	Elementary Matrices – Definitions and Calculations, Types of Matrices.	Elementary Matrix- Meaning and Definitions	B.N.4
34			Elementary Matrix- Rules regarding calculations.	B.N.4
35			Types of Matrix.	B.N.4
36			Addition of Matrices.	B.N.4
37			Subtraction of matrices.	B.N.4
38			Multiplication of a matrix – Procedure.	B.N.4
39			Multiplication of a matrix by a Scalar or constant.	B.N.4
40			Solving Numerical questions of Matrix	B.N.4
41			Solving Numerical questions of Matrix	B.N.4
42			Solving Numerical questions of Matrix	B.N.4
43			Word problems regarding Matrices.	B.N.4
44			Word problems regarding Matrices	B.N.4

45			Word problems regarding Matrices	B.N.4
CO: 4				
LO: Conceptual knowledge of Matrices				
46	4	Logarithms and Antilogarithms- Principles and Calculations, Simple and Compound Interest.	Logarithms and their application.	B.N.1
47			Rules of conversion of simple sums into logarithms.	B.N.1
48			Antilogarithm- Method and Rules.	B.N.1
49			Numerical questions of logarithms.	B.N.1
50			Numerical questions of logarithms.	B.N.1
51			Simple Interest- Formulas and Calculation.	B.N.1
52			Simple Interest- Practical Problems.	B.N.1
53			Simple Interest- Practical Problems.	B.N.1
54			Simple Interest- Practical Problems.	B.N.1
55			Compound Interest and Simple interest.	B.N.1
56			Calculation of compound Interest.	B.N.1
57			Calculation of compound Interest - Practical's.	B.N.1
58			Calculation of compound Interest - Practical's.	B.N.1

VII: Notes:

1. There will be individual assignment, presentation and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Business Mathematics			
B.Com. I Year			
Goal: Students develop the ability to work simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.			
Objective: Students gain understanding of the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Business Mathematics.	% Students having the desirable understanding of Business Mathematics.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

12			Adjustments in Final Accounts, Numerical – Final Accounts	B.N.2
13			Numerical – Final Accounts	B.N.2
14			Numerical – Final Accounts	B.N.2
15			Numerical – Final Accounts	B.N.2
CO: 1				
LO: To understand the Concept & Conventions of Double Entry System and Accounting. To record the basic journal entries, to know how the accounting entries are posted in books & preparation of Trial Balance.				
16	2	Introduction to IAS	Introduction to IAS, Definition & Terminology	B.N.3
17		Detail Study of AS-6	Introduction to AS-6 (Revised) Depreciation Accounting – Terminology, Explanation & Disclosure	B.N.3
18		Detail Study of AS-10	Introduction to AS-10 (Accounting for Fixed Assets)– Definition, Explanation & Disclosure	B.N.3
19		Branch Accounts	Definition & Importance of Branch Accounts, Methods for preparing Branch Accounts	B.N.2
20			Numerical – Branch Accounts	B.N.2
21			Numerical – Branch Accounts	B.N.2
22			Numerical – Branch Accounts, Conversion of Trial	B.N.2

		Balance of Foreign Branch	
23		Numerical – Foreign Branch	B.N.2
24	Departmental Accounts	Meaning, Objectives, Advantages of Departmental Accounts, Departmental Trading & P&L A/c	B.N.2
25		Inter Departmental Transfers – Numerical	B.N.2
26		Departmental Accounts - Numerical	B.N.2
27		Calculation of Closing Stock, Calculation of Unrealized profit on Stock - Numerical	B.N.2

CO: 2

LO: To understand how to Prepare the final accounts and making adjustment. To understand the purpose of Accounting Standards and detail study of AS-6 & AS-10. To understand the types of Branch and methods of Branch accounting and departmental accounting.

28	3	Royalty Accounts	Meaning & Definition of Royalty, Terminology relating to Royalty	B.N.3
29			Journal Entries in the Books of Lessee & Lessor	B.N.3
30			Royalty Accounts - Numerical	B.N.3
31			Royalty Accounts – Numerical	B.N.3
32			Patent Royalty – Journal Entries & Ledger Accounts, Copyright Royalty - Numerical	B.N.3
33		Accounting of Non Profit Making Organization	Meaning, Definition of Nonprofit Organizations, Receipts & Payment A/c and Income & Expenditure A/c. Rules Regarding Conversion.	B.N.1
34			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
35			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
36			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1
37			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1

CO: 3

LO: Able to maintain royalty and Non Profit Organization.

38	4	Joint Venture Accounts	Meaning, Characteristics, Need, Merits & Demerits of Joint venture	B.N.3
39			Numerical - Joint Venture Accounts	B.N.3
40			Numerical - Joint Venture Accounts	B.N.3
41			Numerical - Joint Venture Accounts	B.N.3
42		Consignment	Meaning, Terminology, Characteristics, Need, Merits & Demerits of Consignment.	B.N.3

43			Accounts to be open in the books of Consignor and Consignee.	B.N.3	
44			Numerical – Consignment Accounts	B.N.3	
45			Numerical – Consignment Accounts	B.N.3	
46			Numerical – Consignment Accounts	B.N.3	
47			Numerical – Consignment Accounts	B.N.3	
48			Numerical – Consignment Accounts	B.N.3	
49			Numerical – Consignment Accounts	B.N.3	
50		Investment Account	Meaning of Investment, Types of Interest and Type of Securities	B.N.3	
51			Accounting for Investment Account, Valuation of Closing Investment	B.N.3	
52			Numerical – Investment Accounts	B.N.3	
53			Numerical – Investment Accounts	B.N.3	
54			Numerical – Investment Accounts	B.N.3	
55			Numerical – Investment Accounts	B.N.3	
CO: 3					
LO: Recording entries of joint venture a/c & Able to maintain joint venture a/c, Consignment & Investment a/c.					
56	5	Dissolution of Partnership	Meaning of Dissolution, entries in Dissolved Firm – Numerical	B.N.4	
57			Dissolution of Firm – Numerical	B.N.4	
58			Dissolution of Firm – Numerical	B.N.4	
59			Dissolution of Firm – Numerical	B.N.4	
60			Dissolution of Firm – Numerical	B.N.4	
61			Dissolution of Firm – Numerical	B.N.4	
62		Insolvency of Partner	Meaning of Insolvency, entries in Insolvent firm – Numerical	B.N.4	
63			Garner v/s Murray Rule	B.N.4	
64			Garner v/s Murray Rule – Numerical	B.N.4	
65			Garner v/s Murray Rule – Numerical	B.N.4	
66			Gradual realization of assets & distribution of cash accordingly or Piecemeal or Inter distribution	B.N.4	
67			Proportionate Capital Method - Numerical	B.N.4	
68			Maximum Loss Method - Numerical	B.N.4	
69	Amalgamation of	Meaning of Amalgamation, Entries in the books of Old	B.N.4		

	Partnership Firms	& New Firm	
70		Numerical – Amalgamation of Partnership Firm	B.N.4
71		Numerical – Amalgamation of Partnership Firm	B.N.4
72		Numerical – Amalgamation of Partnership Firm	B.N.4
73		Numerical – Amalgamation of Partnership Firm	B.N.4
74	Conversion of firm to company.	Meaning of Conversion of Partnership Firm into Joint Stock Company, Meaning of Purchase Consideration & Methods	B.N.4
75		Allocation of Purchase Consideration among partner's, Entries in the book of vendor's firm & Purchasing Company	B.N.4
76		Numerical – Conversion of Partnership Firm into Company	B.N.4
77		Numerical – Conversion of Partnership Firm into Company	B.N.4
78		Numerical – Conversion of Partnership Firm into Company	B.N.4
CO: 4			
LO: Easily examine the dissolution of partnership. Easily can prepare the journal entries of amalgamations & Conversion of partnership firm into Joint Stock Company.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

25		National income and economic welfare	B.N.3

CO: 1**LO: To know circular flow model and use the concept of aggregate demand and supply**

1	3	Theories of wages, interest and employment	Meaning, nominal and real wages	B.N.3
2			Subsistence theory of wages	B.N.3
3			The wage fund theory of wages	B.N.3
4			Marginal productivity theory of wages	B.N.3
5			The market theory of wages	B.N.1
6			Backward slopping supply curve of labour	B.N.3

7		Modern theory of wages	B.N.1
8		Concept of interest gross and net interest	B.N.3
9		Assistance or waiting theory of interest	B.N.3
10		Classical theory of interest	B.N.3
11		Loan able fund theory of interest	B.N.3
12		Liquidity preference theory of interest	B.N.3
13		Concept meaning of employment	B.N.1
14		Concept of full employment	B.N.3
15		Classical concept of full employment	B.N.1
16		Classical theory of employment	B.N.3
17		Say's law of market	B.N.3
18		Keynes criticism against classical theory	B.N.3
19		Keynesian theory of employment	B.N.3
20		Determination of effective demand	B.N.3

CO: 4

LO: Able to know the concept of gross domestic product inflation unemployment and how they are measured

1	4	Monitory theories- Quantity theory of money, modern theory of money, Keynes theory of money and prices	Quantity theory of money concept	B.N.3
2			Transactions approach- fisher's quantity theory of money	B.N.2
3			Assumption of the theory	B.N.3
4			Critical appraisal of quantity theory of money	B.N.3
5			The marshalian equation of quantity theory of money	B.N.3
6			Pigou's equation	B.N.2

7			Robertson's equation, Keynes equation	B.N.3
8			Modern theory of money	B.N.2
9			Keynesian approach- liquidity preference	B.N.3
10			Bumol- tobin theory of the transactions demand for money	B.N.3
11			Friedman's theory	B.N.3
12			Demand by ultimate wealth holders	B.N.2
13			Liquidity theory of money	B.N.3
14			Radcliffe committee view	B.N.3
15			Gurley- Shaw view	B.N.3

CO: 1**LO: Understanding about the fiscal and monetary policy and how these affect the economy**

1			Meaning of industrial policy and objectives	B.N.3
2			Industrial policy of 1948, 1956, 1991,	B.N.3
3			Main heads of the new industrial policy	B.N.3
4			Abolition of MRTP act	B.N.3
5			Make in India	B.N.3
6			Disinvestment	B.N.3

CO: 1

LO: Understanding about the role of public, private, joint and cooperative sector and financial development strategy.

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject

VI: Book References:

1. Dr. Abha Mittal, Macro economics, Taxmann publication private limited new delhi 2009
2. R.S Myneni, Principles of economics, Allahabad law agency 2016
3. S.K. Sing and J.P Mishra, Micro economics, Sahitya bhavan publication 2018

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Macro Economics			
B.Com. I year Plain			
Goal : Students develop the ability to analyze unemployment, inflation, deflation and to make sound policy decision that can affect the entire economy and all individuals.			
Objective: Students gain understanding about the basic knowledge of whole economy. All economic analysis that refers to aggregate unemployment rate, inflation rate and the rate of economic growth.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
____ Students	____ Students	____ Students	____ Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Macro economics.	% Students having the desirable understanding of Macro economics.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Exam	Total 50	Final Internal Marks 10
Presentation 10	GD 10	Assignment 10			

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Micro Economics****Session: July-June****Class: B.com. Ist year Plain****I: Objective of course:**

The objective of this course is to give students a thorough understanding of the principles of economics that apply to the decisions of individuals--both consumers and producers--within the large economic system

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Understanding about the allocation of scarce resources that scarcity forces choice.

CO2: Understanding how comparative advantage provides the basis for gain through trade

CO3: Able to explain the welfare loss in non competitive market through deep knowledge of perfect competition and imperfect competition.

CO4: Understanding how much profit maximizing firms determine how much to produce with the help of cost of production.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 3				2	2	3	3	
CO 4					2	2	2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Micro economics- definition, meaning, inductive and deductive methods, importance and limitations of micro economics.	Introduction of micro economics	B.N.1
2			A science of wealth	B.N.1
3			A science of material welfare	B.N.1
4			A science of scarcity	B.N.1
5			Limited or scare means	B.N.1
6			Scope and subject matter of economics	B.N.1
7			Central nucleus-modern	B.N.1
8			Subject matter of economics	B.N.2
9			Methods of economic analysis	B.N.1
10			Deductive and inductive methods	B.N.1
11			Merits of inductive methods	B.N.1
12			Demerits of inductive methods	B.N.1
13			Merits and demerits of deductive methods	B.N.1
CO: 1				
LO: Help how to use micro economic models to use of scare resources.				
1	2	Law of demand- meaning and definition, characteristics, exceptions law of Demand.	Definition of demand concept	B.N.1
2			Introduction meaning and types of demand	B.N.1
3			Demand function	B.N.1
4			Demand curve	B.N.1
5			Individual curve and market demand curve	B.N.1
6			Bandwagon and Snob effect on market demand curve	B.N.1

7			Exceptional demand curve	B.N.1
8			Basis of the law of demand	B.N.1
9			Changes in demand	B.N.1
10			Increase or decrees demand	B.N.1
11			Determinants of demand	B.N.2
12			Changes in income	B.N.1
13			Changes in the price of other goods	B.N.1

CO: 2

LO: To provide knowledge how to determine demand and supply and differentiate between major economic system

1			Meaning of elasticity of demand	B.N.1
2			Measurement of price elasticity of demand	B.N.1
3			Types or degree of price elasticity of demand	B.N.1
4			Points of caution	B.N.1
5			Point elasticity of demand	B.N.1
6			Arc elasticity of demand	B.N.1
7			Income elasticity of demand	B.N.1
8			Types of income elasticity of demand	B.N.3
9			Production function	B.N.3
10			Short run production function law of variable proportion or law of diminishing return.	B.N.3
11			Assumptions of the law	B.N.3
12			Three stages of law of variable proportion	B.N.3
13			Increasing returns to scale	

CO: 2

LO: To understand how to calculate other elasticity using common economic variable.

1	4	Factors of production- land,	Meaning of the production and factors of the production	B.N.1
---	---	------------------------------	---	-------

2		labor, capital, organization and enterprise cost and revenue analysis.	Land ‘labour capital organization and entrepreneurs	B.N.1
3			Characteristics of all the factors	B.N.1
4			Specific or no specific factors	B.N.1
5			Meaning and types of cost	B.N.1
6			Cost output relation	B.N.1
7			Traditional theory of costs in short run	B.N.1
8			Variable cost or prime cost	B.N.1
9			Shape of average variable cost	B.N.1
10			Long run cost curve	B.N.1
11			Modern theory of cost	B.N.1
12			Relationship between average revenue and marginal revenue curves	B.N.1
13			Revenue curve under monopoly or imperfect competition	B.N.1
CO: 1				
LO: To know about the break-even point for a product or service occurs when revenue generated by the product equals the cost incurred in producing.				
1	5	Market structure - concept, definition, characteristics, classification, price determination under perfect and imperfect competition.	Meaning and types of market	B.N.3
2			Industry and firm	B.N.3
3			Classifications of market	B.N.3
4			Perfect competition	B.N.3
5			Introduction and meaning of monopolistic competition	B.N.3
6			Price determination under perfect competition	B.N.3

7	Marginal productivity theory of distribution.	Importance of the elements of time	B.N.3
8		Market period: determination of market price	B.N.3
9		Short run equilibrium of demand and supply	B.N.3
10		Long period: Determination of long period normal price	B.N.3
11		Price determination under imperfect competition Robin’s theory	B.N.3
12		Pricing under monopolistic competition	B.N.3
13		Shot- Period analysis of the firm	B.N.3
CO: 4			
LO: Understanding about the behavior of consumer under different market and how to maximize their profit.			

Note: : apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject

VI: Book References:

- 1-There will be individual assignment, presentation and group assignment.
- 2-Class test will be based on theoretical and practical aspect of the subject.
- 3-Class performance and discipline will be an important factor for assessing internal marks.
- 4-The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: EVS			
B.Com. 2nd Year			
Goal : The field of environmental science can be divided into three main goals, which are to learn how the natural world works, to understand how we as humans interact with the environment, and also to determine how we affect the environment.			
Objective: Environment education is concerned with those aspects of human behaviour which are more directly related to man's interaction with bio-physical environment and his ability to understand this interaction.			
4-5Marks	3-3.5 Marks	2-2.5 Marks	00-1.5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of EVS	% Students having the desirable understanding of EVS	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Exam	Total 25	Final Internal Marks 5
Presentation 5	GD 5	Assignment 5			

Department of Commerce, IPS Academy , INDORE**Lesson Plan****Subject: Indian Company Act****Session: July-June****Class: B.Com II Year (Plain)**

I: Objective of course: To develop awareness and knowledge about various provisions and laws and their compliance related to formation and management of Companies.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
Total				40

III: Course Outcomes (CO):

CO1: Providing knowledge about the essential documents required for incorporating a company

CO2: Understand the legal and fiscal structure of different forms of business organisation and their responsibilities as employer

CO3: Giving an understanding about the responsibilities and duties of key personnel of the Company

CO4: Enlightening about the involvement of stakeholders in decision making process with their rights, duties and powers.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	I	Company	Introduction to company law 1956 & 2013 with Definitions and Meaning of Company	B.N. 3 & 1
2			Nature and Characteristics of Companies and principle of separate legal entity	B.N. 1
3			Lifting of Corporate Veil Difference between Public & Private Company	B.N. 2 & 6
4		Types Of Company	Brief introduction towards Types of Companies	B.N. 2
5			Explaining various basis of bi-furcating Companies	B.N. 1
6			Detailed study of Public Company	B.N. 2
7			Detailed study of Private Company & One Person Company	B.N. 2
8		Formation Of Company	Introduction to Formation of Company	B.N. 1
9			List of various Documents required	B.N. 2
10			Stages of formation of Company	B.N. 2
11		Promotion of Company	Brief awareness about Promotion and Promoters of Company	B.N. 1
12			Promoters: functions, duties and liabilities	B.N. 1
13			Legal Positon of Promoters and their remuneration	B.N. 1
14		Incorporation & Commencement of Business	Stages of Incorporation of Business	B.N. 2
15			Briefing about the Stages with capital subscription option analysis	B.N. 2
16			Difference between incorporation and commencement of business	B.N. 2
17			Text & Cases related to Incorporation of Business	
18			Doubt solving session for Unit I	

CO: 1 & 2				
LO: Provides an introduction about Company its types and how it can be brought into existence.				
19	II	Memorandum of Association	Introduction to MoA with its features and importance	B.N. 1
20			Format of MoA for different Companies	B.N. 1
21			Contents of MoA and its Clauses	B.N. 1
22			Explanation of various clauses	B.N. 1
23			Alteration In MoA	B.N. 1
24			Detail study of Alteration in clause	B.N. 1
25			Provisions related to various alterations in MoA	B.N. 1
26		Articles of Association	Introduction to AoA with its features and importance	B.N. 1
27			Format of AoA for different Companies	B.N. 1
28			Contents of AoA and its Clauses	B.N. 1
29			Explanation of various clauses	B.N. 1
30			Alteration In AoA	B.N. 1
31			Provisions related to various alteration in AoA	B.N. 1
32		Prospectus	Introduction to Prospectus with its definitions and features	B.N. 1
33			Issuer of prospectus and when it is not necessary to issue prospectus	B.N. 1
34			Various rules regarding issue of prospectus and its types	B.N. 1
33			Contents of Prospectus	B.N. 1
34			Consequences and Remedies for Misstatement in Prospectus	B.N. 1
35		Discussed MoA, AoA& Prospectus of a Company		
36		Revision class for Unit II		
37		Doubt session for Unit II		
CO: 1				
LO: Deals with the essential documents to be prepared by promoters to bring a company into legal existence				

38	III	Shares	Introduction and concept to Capital Types of Share Capital	B.N. 2
39			Types of Equity Share Capital and its buy back	B.N. 2
40			Guidelines regarding issue and buy back of shares	B.N. 2
41			Alteration in Capital Clause with related provisions	B.N. 2
42		Transfer & Transmission of Shares	Meaning and Provisions related to Transfer of Shares	B.N. 1
43			Transmission of Nominated shares and associated provisions	B.N. 1
44			Difference between Transfer & Transmission of shares	B.N. 1
45			Restriction on transfer of shares	B.N. 1
46		Members v/s Shareholders	Meaning of members and shareholders of company and related rules	B.N. 1
47			Difference between Shareholders and Members of Company	B.N. 1
48			Rules and Provisions related to becoming a Member of company with its duties and liabilities	B.N. 1
49		Borrowings Power	Meaning and provisions related to borrowing of funds	B.N. 1
50			Ultra Vires Borrowings, its consequences and remedies to lender	B.N. 1
51			Meaning and Kinds of Debentures	B.N. 1
52			Provisions regarding issue of Debentures	B.N. 1
53			Introduction to Charges and Mortgage	B.N. 1
54			Provisions related to Public Deposits	B.N. 1
55			Revision lecture for Unit III	

CO: 2& 4

LO: Provides the various options available to a company for accumulation of funds and rules regarding them

56	IV	Directors	Meaning, Definition and position of Directors	B.N. 2
57			Provisions related to Directorship and numbers o Directors in various Companies	B.N. 2
58			Modes of appointment of Directors	B.N. 2

59			Removal of Directors and Types of Directors and directorship	B.N. 2
60			Powers, Duties of Directors	B.N. 2
61			Liabilities of Directors	B.N. 2
62			Introduction to Managing Personnel and provisions related to them	B.N. 2
63			Qualifications of Directors and Key Managing Personnel's	B.N. 2
64		Company Meetings	General Introduction about Company Meetings and its classifications	B.N. 1
65			Various provisions related to Company Meetings	B.N. 1
66			Kinds of Company Meetings	B.N. 1
67			Methods of ascertaining sense of Meetings	B.N. 1
68			Introduction to Quorum, Proxies & Minutes of meeting	B.N. 1
69			Motions in meetings and various types of resolutions	B.N. 1
70			Difference between Ordinary and Special Resolution	B.N. 1
71			Provisions regarding conducting a Meeting	B.N. 1
72			Consequences of contravening to rules of Meetings	B.N. 1
73			Revision class for Unit IV	
CO: 3				
LO: Provide knowledge about the various rules regarding appointment of directors and conducting Meetings				
74	V	Majority Powers & Minority Rights And Prevention of Oppression and Mismanagement	Introduction and meaning of Majority and its exceptions	B.N. 1
75			Meaning of Oppression and its prevention	B.N. 1
76			Meaning of Mismanagement and its Prevention	B.N. 1
77			Role of Tribunal in Prevention	B.N. 1
78			Effects of order by Tribunal	B.N. 1

79			Meaning, Definition and Nature of Winding Up	B.N. 1
80			Difference between Winding up & Dissolution of Company	B.N. 1
81			Modes of Winding Up of Company	B.N. 1
82			Procedure and rules relating to Winding Up	B.N. 1
83			Introduction to Liquidator and his duties	B.N. 1
84			Types of Voluntary Winding Up	B.N. 1
85			Difference between Member's and Creditor's Voluntary Winding Up	B.N. 1
86			Case discussion of related topics in Unit V	
87			Revision of Unit V	
CO: 4				
LO: Gives the information about the powers & rights of various members and how and why legal entity of company is brought to an end				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Presentation 10	GD 10	Assignment 10	20		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Principles of Statistics****Session: July-June****Class: B.Com. II year Pass Courses**

I: Objective of course: Objective of course is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses. The central objective is to equip students with consequently requisite quantitative skills that they can employ and build on in flexible ways.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: be statistically and numerically literate.

CO2: have statistical concepts such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data.

CO3: be able to independently read statistical literature of various types, including survey articles, scholarly books, and online sources.

CO4: be able independently to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc.

28			Computation of harmonic mean.	B.N.2		
29			Combined mean.	B.N.2		
30			Partition Value – Quartiles	B.N.2		
31			Formulae for Computing quartiles.	B.N.2		
32			Computation of quartiles.	B.N.2		
CO: 1, 4						
LO: Able to calculate measurement of central tendency.						
33	3	Dispersion and skewness. Analysis of time series- Meaning, importance, components, Decomposition of time series, Measurement of long term trends, measurement of cyclical and irregular fluctuations.	Dispersion- meaning and methods of measuring.	B.N.1		
34			Methods of limits: Range, I.Q.R. & percentile range.	B.N.1		
35			Quartile deviation or semi –inter-quartile range.	B.N.1		
36			Mean deviation.	B.N.1		
37			Standard deviation.	B.N.1		
38			Coefficient of Mean deviation & Standard deviation.	B.N.1		
39			Skewness and its measures.	B.N.1		
40			Computation of karl Pearson’s coefficient of skewness.	B.N.1		
41			Computation of Bowley’s coefficient of skewness.	B.N.1		
42			Analysis of time Series.	B.N.1		
43			Secular Trend or Long term trend.	B.N.1		

44			Seasonal Variations.	B.N.1
45			Cyclical variations.	B.N.1
46			Irregular or Random Variations.	B.N.1
47			Practical problems regarding trend analysis.	B.N.1
CO: 4				
LO: Fundamental concepts of dispersion and skewness, measurement of different trends.				
48	4	Correlation- Meaning, Definitions, Types and degree of correlation, methods of correlation, regression analysis- meaning, uses, difference between correlation and regression, linear regression, regression equations, Calculation of coefficient of regression.	Correlation- meaning, importance & types.	B.N.3
49			Degree of coorelation.	B.N.3
50			Methods of determining correlation.	B.N.3
51			Karl Pearson’s method of correlation.	B.N.3
52			Spearman’s Rank difference method.	B.N.3
53			Concurrent deviation method.	B.N.3
54			Probable error.	B.N.3
55			Standard error.	B.N.3
56			Least squares method.	B.N.3
57			Correlation and Regression.	B.N.3
58			Coefficient of correlation with the help of regression coefficients.	B.N.3
59			Coefficient of correlation with the help of regression coefficients.	B.N.3
60			Computation of regression equations.	B.N.3
61			Computation of regression equations.	B.N.3
62			Solving practical problems of regression & correlation.	B.N.4
63			Solving practical problems of regression & correlation.	B.N.4
64			Solving practical problems of regression & correlation.	B.N.4
65			Solving practical problems of regression & correlation.	B.N.4
CO: 3,4				

LO: Able to correlate data and its degree, regression and its types.				
66	5	Index number-Meaning, characteristics, importance and uses. Construction of index numbers-Cost of living index, Fisher's ideal index number. Diagrammatic and Graphic presentation of data.	Index Number- meaning, features & kinds.	B.N.5
67			Importance and utility of index number	B.N.5
68			Construction of Index numbers.	B.N.5
69			Construction of Index numbers	B.N.5
70			Construction of Index numbers	B.N.5
71			Fisher's index number	B.N.5
72			Computation of Index number by different formulae.	B.N.5
73			Consumer price index number.	B.N.5
74			Test of Adequacy of Index formula.	B.N.5
75			Miscellaneous problems regarding index number.	B.N.5
76			Diagrammatic and Graphic presentation of data.	B.N.5
77			Diagrammatic and Graphic presentation of data.	B.N.5
CO: 3,4				
LO: Knowledge about index numbers and their presentation in different ways.				

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. S.M. Shukla, Advanced Statistics, Sahitya Bhawan Publication
2. Oswal, Sahu & Shukla, Principles of Statistics, Ramesh Book depot.
3. S.C. Gupta, Business Statistics, Himalaya Publishing house.
4. R.P. Hooda, Statistics for Business and Economics, MacMillan.
5. S.M. Shuka, Principles of Statistics, Sahitya bhawan Publication.

VII: Notes:

1. There will be individual assignment, presentation and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Principles of Statistics			
B.Com. II Year Pass Courses			
Goal: Develop the ability to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc. and able to understand statistical concepts to include probability distributions, sampling, estimation, hypothesis testing, regression, and correlation analysis, regression coefficients and their properties.			
Objective: Objective of subject is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Business Statistics.	% Students having the desirable understanding of Business Statistics.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Income Tax Law & Practice			
B.Com. V Semester			
Goal : To provide students with a working knowledge of the fundamental tax principles and rules that applies to commonly encountered transactions undertaken by individuals; To know the process of determined residential status and Heads and types of income; Analyze the assessment procedure and representation before appropriate authorities under the law.			
Objective: Able to students understand the various provision of Income Tax Act relating to computation of Income of individual assesses.			
12-15 Marks	9-11 Marks	5-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Income Tax Law and Practice	% Students having the desirable understanding of Income Tax Law and Practice.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Assessment	Total 75	Final Internal Marks Out 15
Presentation 15	GD 15	Assignment 15	30		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Management Accounting****Session: July-Dec****Class: B.Com. V Semester****I: Objective of course:**

The course objective is to give students a good understanding about the concepts and techniques of management accounting. Students are introduced to the application of management accounting tools for pricing, budgetary control and performance evaluation as well as new developments in management accounting knowledge and techniques and how to assess these through cost-benefit analysis.

II: Examination:

The faculty members will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination pattern will carry 85 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: Apply managerial accounting and its objectives in a way that demonstrates a clear understanding of ethical responsibilities

CO2: Apply and analyze different types of activity-based management tools through the preparation of estimates.

CO3: Analyze cost-volume-profit techniques to determine optimal managerial decisions.

CO4: Prepare a master budget and demonstrate an understanding of the relationship between the components and prepare analyses of various special decisions, using relevant costing and benefits.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

Lesson Plan**Subject: Indirect Tax****Session: Jan-June****Class: B.Com. VI Semester (III Year)**

I: Objective of course: The Objective of this Course is to acquaint the Students with the basic Concept of Indirect Tax and further to develop understanding the utilities of indirect tax.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: To introduce the basic concept of Indirect Tax. To familiarize the concept of Central Excise Duty & its classification. To Understand the valuation rules under central excise act.

CO2: Make the students familiarizes with the concept of Custom Duty and its provisions. It give more practical knowledge to computation of assessable value & calculation of Custom Duty.

CO3: Make the students familiarizes with the concept of Central Sales Tax and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of Central Sales Tax. Make the students familiarizes with the concept of M.P.VAT and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of M.P.VAT.

CO4: Make the students familiarizes with the concept of Service Tax and its provisions. It give more practical knowledge to computation of Taxable Service & calculation of Service Tax.

English Session Plan

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
CO: 3 The student will learn about the different thoughts expressed in the text .They will also learn about the various literary devices used in the text.				
LO 4: The students will acquire with English language and Literature by studying this. They will also learn about allusions, references, poets, writers and stories etc.				
2	IV	Stopping By Woods on a Snowy Evening	Explanation of the Poem, Poet.	B.NO 1
3			Discussion of Question and answer	B.NO 1
4		Communication Education and Information Technology	Discussion about the author and then explaining the story in detail.	B.NO 1
5			Discussion of exercises related to story	B.NO 1
6		The Gif Of Maggi	Explanation of Story	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		The Cherry Tree	Discussion about the author and the topic	B.NO 1
9			Discussion of Question and answer	B.NO 1
CO:4				
LO: Vocabulary plays an important role in enriching language. Students will improve their communication by enhancing their vocabulary.				
10		Translation	Translation of passage English to Hindi and Hindi to English	B.NO.2
11		Email-Writing	Format and Importance of Email writing	B.NO 3

12	V	Power Point Presentation	Elements of power point presentation skills and its role in today's scenario	B.NO 2,3
13		Basic language Skills Countable and Uncountable Nouns, Verbs, Adverbs	Common nouns, Collective nouns , material nouns and abstract nouns, Transitive and Intransitive verbs and types of Adverbs	B.NO 4,5
14		Sentence Correction	Common Errors will be dealt.	B.NO 3

DEPARTMENT OF COMMERCE, IPS ACADEMY

PROGRAM OUTCOME

B.Com. (Honors)

1. This program could provide well tainted professionals for the industries, banking sectors, insurance companies, financing companies, Transport agencies, warehousing etc. to meet the well trained men power requirements. The graduates will get hands on experience in various aspects acquiring skills for marketing manager, selling managers, overall administration abilities of the companies.
2. After completing this course they can become a manager, accountant, management accountant, cost accountant, bank manager, auditor, company secretary teacher, professor, stock agents and get govt. jobs easily.
3. The course offer the number of value based and job oriented courses (Industry visit, summer training) ensures that students are trained can get aware about the present scenario of the world.
4. Create a base to compete and participate and gain leadership positions in organizations at National and International levels
5. Through this course department is putting efforts to nurture entrepreneurial skills and capabilities.
6. . B.Com (Honors) is an undergraduate degree program that focuses on systematic study of the concepts of Accountancy, Banking, Costing, Business studies, Managerial Economics, Business Mathematics, Finance, Law, Taxation, and Management Studies etc. It is a career oriented in nature that opens many job opportunities after successful completion of the program.
7. This course seeks to provide students with the knowledge and technical skills necessary to understand and participate in the modern business and economics world, to prepare them for subsequent graduate studies and to allow them to achieve the highest level of success in their professional careers
8. Students will be able to do higher education and advance research in the field of Commerce and finance.

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Business Mathematics****Session: July-June****Class: B.Com. I year (Honors.)**

I: Objective of course: The objective of this course is to teach the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: have basic knowledge in the areas of business calculus and financial mathematics

CO2: apply the knowledge in mathematics (Set theory, percentage, ratio- proportion, averages) in solving business problems.

CO3: be able to work with simple and compound interest, annuities, trade discounts, true discount, and banker's discount problems in various situations and use correct mathematical terminology.

CO4: be able to understand and use Simultaneous equations and Quadratic equations in a variety of contexts.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 2		2	2	2		2		2
CO 3		2		2		2		
CO 4	2							2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Average, Ratio and proportion, Percentage	Ratio- Meaning, features and types of ratio.	B.N. 1
2			Ratio related to partnership	B.N. 1
3			Profit sharing ratio, Sacrificing ratio & Gaining ratio.	B.N. 1
4			Ratio Short numerical questions.	B.N. 1
5			Ratio- Long numerical questions	B.N. 1
6			Ratio- Long numerical questions	B.N. 1
7			Ratio- Long numerical questions	B.N. 1
8			Proportion- Meaning, rules & kinds.	B.N. 1
9			Problems related to Inverse & compound proportion.	B.N. 1
10			Problems related to continued & direct proportion	B.N. 1
11			Percentage- Rules & numerical.	B.N. 4
12			Percentage- Numerical.	B.N. 4
13			Percentage- Numerical	B.N. 4
14			Calculation of simple averages.	B.N. 4
15			Calculation of Weighted averages.	B.N. 4
16			Calculation of arithmetic mean.	B.N. 4
17			Calculation of harmonic mean	B.N. 4
18			Calculation of Geometric mean	B.N. 4
19			Practical problems related to averages.	B.N. 4
CO: 1, 2				
LO: Able to solve problems related to ratio, percentage & averages.				
20	2	Profit and loss, Simple and Compound	Simple Interest- Formulas and Calculation.	B.N. 3
21			Simple Interest- Practical Problems.	B.N. 3

22		Interest.	Simple Interest- Practical Problems.	B.N. 3		
23			Compound Interest and Simple interest.	B.N. 3		
24			Calculation of compound Interest.	B.N. 3		
25			Calculation of compound Interest - Practical's.	B.N. 3		
26			Calculation of compound Interest - Practical's.	B.N. 3		
27			Calculation of compound Interest – Practical's	B.N. 3		
28			Profit & Loss- Meaning & important Formulae	B.N. 3		
29			Practical questions related to profit & loss.	B.N. 3		
30			Practical questions related to profit & loss.	B.N. 3		
31			Practical questions related to profit & loss.	B.N. 3		
32			Practical questions related to profit & loss.	B.N. 3		
CO: 2,3						
LO: Having knowledge of interest and profit & loss calculation						
33	3	Annuities, True Discount and Banker's Discount.	Meaning and types of Annuities.	B.N. 4		
34			Practical problems regarding annuity.	B.N. 4		
35			Problems relating to present value of annuity.	B.N. 4		
36			Problems relating to deferred annuity.	B.N. 4		
37			Problems relating to sinking fund.	B.N. 4		
38			True discount- meaning and definitions.	B.N. 4		
39			Banker's discount – meaning & definitions.	B.N. 4		
40			Simple interest and true discount.	B.N. 4		
41			Banker's gain.	B.N. 4		
42			Computation of true discount.	B.N. 4		
43			Computation of Banker's gain & discount.	B.N. 4		
44			Practical problems regarding various discounts.	B.N. 4		

45			Practical problems regarding various discounts.	B.N. 4
CO: 3				
LO: Fundamental knowledge of annuities, true & banker’s discount				
46	4	Basic concepts of Set Theory: Definition, Types, Operations on Sets, Venn Diagram. Simultaneous Equations – Meaning, Characteristics, Types and Calculations.	Concept of set theory.	B.N. 5
47			Meaning, definition and types of sets.	B.N. 5
48			Operations on sets.	B.N. 5
49			Operations on sets.	B.N. 5
50			Operations on sets.	B.N. 5
51			Venn Diagram.	B.N. 5
52			Venn Diagram.	B.N. 5
53			Venn Diagram.	B.N. 5
54			Simultaneous Equations – meaning & characteristics.	B.N. 5
55			Different Methods of solving equations.	B.N. 5
56			Problems relating to Number and Fraction	B.N. 5
57			Problems relating to Age.	B.N. 5
58			Solving Miscellaneous Problems.	B.N. 5
59			Solving Miscellaneous Problems.	B.N. 5
60			Solving Miscellaneous Problems.	B.N. 5
CO: 2, 4				
LO: Conceptual knowledge of Set theory, framing and solving equations.				
61	5	Quadratic Equation in one variable inequalities, linear Programming (two variable)	Quadratic equation- meaning & concept	B.N. 2
62			Formation of quadratic equation.	B.N. 2
63			Factorization method to solve quadratic equation.	B.N. 2
64			Formula method to solve equation.	B.N. 2
65			Discriminate & Nature of roots.	B.N. 2
66			Relation between roots & coefficients of quadratic equation.	B.N. 2
67			Linear inequalities and its types.	B.N. 2
68			Solution of inequality.	B.N. 2

69		Solution of simultaneous linear inequalities.	B.N. 2
CO: 3,4			
LO: Concept of quadratic equations & linear programming			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

The objective of this course is to give basic knowledge of whole economy. All economic analysis that refers to aggregate unemployment rate, inflation rate and the rate of economic growth.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Learning how to use economic models, mathematics in common economic application.

CO2: Understanding the society's trade – off by using production possibilities.

CO3: Learn to calculate other elasticity using common economic variables.

CO4: Learn critique of the unemployment rate measure of the problem and differentiate between different types of unemployment.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Macro Economics- concept, nature, importance, limitations difference between micro and macro	Difference between macro and micro economics	B.N.3
2			Concept of macro economics	B.N.3
3			Nature of macro economics	B.N.3
4			Importance of macro economics	B.N.3
5			Limitations of macro economics	B.N.3
6			Definition of macro economics	B.N.3
7			Relationship between macro and micro economics	B.N.3
8			Interdependency between macro and micro economics	B.N.3
9			Differences between macro and micro economics	B.N.3
10			Scope and subject matter of macro economics	B.N.3
CO: 1				
LO: Able to describe and analyze the economy in quantitative terms				
1	2	National income- Meaning definition and concept method for measuring national income in India	Introduction of national income	B.N.3
2			Marshallian definition	B.N.3
3			Pigovian definition	B.N.3
4			Fisher’s definition	B.N.3
5			Domestic income and national income	B.N.3
6			Differences between domestic income and national income	B.N.3
7			flow of national income	B.N.3
8			Concept of value added	B.N.3
9			Value added at factor cost and market price	B.N.1
10			Concept of national income	B.N.3

11			Net national product	B.N.3
12			Gross domestic product	B.N.3
13			Gross national product	B.N.3
14			Net domestic product at factor cost	B.N.3
15			Private income and personal income	B.N.2
16			Transfer payment	B.N.2
17			Personal disposable income- per capita income	B.N.2
18			Measurement of national income	B.N.3
19			Product method	B.N.3
20			Income method	B.N.3
21			Expenditure method	B.N.3
22			Numerical example	B.N.3
23			Difficulties of measuring national income in India	B.N.3
24			Importance of national income analysis	B.N.3
25			National income and economic welfare	B.N.3

CO: 1**LO: To know circular flow model and use the concept of aggregate demand and supply**

1			Meaning, nominal and real wages	B.N.3
2			Subsistence theory of wages	B.N.3
3			The wage fund theory of wages	B.N.3
4	3	Theories of wages, interest and employment	Marginal productivity theory of wages	B.N.3
5			The market theory of wages	B.N.1
6			Backward slopping supply curve of labour	B.N.3
7			Modern theory of wages	B.N.1

8			Concept of interest gross and net interest	B.N.3
9			Assistance or waiting theory of interest	B.N.3
10			Classical theory of interest	B.N.3
11			Loan able fund theory of interest	B.N.3
12			Liquidity preference theory of interest	B.N.3
13			Concept meaning of employment	B.N.1
14			Concept of full employment	B.N.3
15			Classical concept of full employment	B.N.1
16			Classical theory of employment	B.N.3
17			Say's law of market	B.N.3
18			Keynes criticism against classical theory	B.N.3
19			Keynesian theory of employment	B.N.3
20			Determination of effective demand	B.N.3

CO:4.**LO:** Able to know the concept of gross domestic product inflation unemployment and how they are measured

1			Quantity theory of money concept	B.N.3
2			Transactions approach- fisher's quantity theory of money	B.N.2
3			Assumption of the theory	B.N.3
4	4	Monitory theories- Quantity theory of money, modern theory of money, Keynes theory of money and prices	Critical appraisal of quantity theory of money	B.N.3
5			The marshallian equation of quantity theory of money	B.N.3
6			Pigou's equation	B.N.2
7			Robertson's equation, Keynes equation	B.N.3

8			Modern theory of money	B.N.2
9			Keynesian approach- liquidity preference	B.N.3
10			Bumol- tobin theory of the transactions demand for money	B.N.3
11			Friedman’s theory	B.N.3
12			Demand by ultimate wealth holders	B.N.2
13			Liquidity theory of money	B.N.3
14			Radcliffe committee view	B.N.3
15			Gurley- Shaw view	B.N.3
CO:1				
LO: Understanding about the fiscal and monitory policy and how these affect the economy				
1	5	Recent industrial policy, Industrial growth in phase II and phase III disinvestment foreign direct investment	Meaning of industrial policy and objectives	B.N.3
2			Industrial policy of 1948, 1956, 1991,	B.N.3
3			Main heads of the new industrial policy	B.N.3
4			Abolition of MRTP act	B.N.3
5			Make in India	B.N.3
6			Disinvestment	B.N.3
CO: 2				
LO: Understanding about the role of public, private, joint and cooperative sector and financial development strategy.				

Note:

Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

2. R.S Myneni, Principles of economics, Allahabad law agency 2016
3. S.K. Sing and J.P Mishra, Micro economics, Sahitya bhavan publication 2018

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment

Subject: Macro Economics

B.Com. I year Honors

Goal :

Students develop the ability to analyze unemployment, inflation, deflation and to make sound policy decision that can affect the entire economy and all individuals.

Objective:

Students gain understanding about the basic knowledge of whole economy. All economic analysis that refers to aggregate unemployment rate, inflation rate and the rate of economic growth.

8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Macro economics.	% Students having the desirable understanding of Macro economics.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Concept and techniques- nature and scope of managerial economics, application of economics in managerial decision making- marginal analysis; meaning and definition of demand function of demand, types of demand forecasting.	Meaning and definition of managerial economics	B.N. 2
2			Nature and characteristics of managerial economics	B.N. 2
3			Scope of managerial economics.	B.N. 2
4			Distinction between managerial economics and traditional economics	B.N. 2
5			Importance and significance of managerial economics	B.N. 2
6			Role or function of managerial economist in a business term	B.N. 2
7			Responsibilities of managerial economist. Fundamental	B.N. 2
8			principles of managerial economic	B.N. 2
9			Principles of opportunity cost and incremental cost	B.N. 2
10			Principles of perspective, discounting, Equi-Marginal. and profit maximization theory.	B.N. 2
CO: Learn how to techniques and theories of managerial economics can be used to explain how firms and consumers behave.				
LO: Understanding the economic goal of the firm and optimal decision making				
1	2	Production function- types of production function – one variable two variables, law of return and return to scale, law of variable proportion, isoquant curves and economies of scale.	Production function meaning definition	B.N. 2
2			Short run and long run production function.	B.N. 2
3			Producer’s equilibrium with equal product curve .	B.N. 2
4			Scale line or expansion path.	B.N. 2
5			Equal product curve or Isoquant.	B.N. 2
6			Iso- Product or equal product map.	B.N. 2
7			Properties of equal product curve.	B.N. 2
8			Efficient allocation of resources.	B.N. 2

9		Law of variable proportion.	B.N. 2
10		Production functions with all variable inputs.	B.N. 2
11		Law of diminishing marginal return.	B.N. 2
12		Assumptions of the law.	B.N. 2
13		Causes of operation of law.	B.N. 2
14		Scope of law.	B.N. 2
15		Law of increasing return.	B.N. 2
16		Explanation by example.	B.N. 2

CO: Understand the internal and external decision Understand the internal to be made by managers.

LO: To analyze the affect of these factors on market dynamic

1		Market structure meaning concept.	B.N. 2
2		Classification of market.	B.N. 2
3		Perfect competition, monopolistic competition. Price determination under perfect competition.	B.N. 2
4		Importance of the limit of time.	B.N. 2
5		Short run equilibrium of demand and supply.	B.N. 2
6		Determination of long period normal price.	B.N. 2
7		COBWEB theorem.	B.N. 2
8		Stability of prices.	B.N. 2
9		Dynamics of demand and supply.	B.N. 2
10		Stability of equilibrium in perfect competition.	B.N. 2
11		Competitive price: conclusion.	B.N. 2
12		Price determination under imperfect competition.	B.N. 2
13		Robinson's theory.	B.N. 2

3
Market structure – price and output decision under different market structures, price discrimination, and non price competition, price determination under perfect and monopolistic market

14			Pricing under monopolistic competition.	B.N. 2
15			Short period analysis of the firm.	B.N. 2
16			Non price competition.	B.N. 2
CO: Understand different cost of production and how they affect short and long run decision.				
LO: Understanding the determinants of elasticity of analyze how elasticity affects revenue				
1	4	Factor pricing; meaning, definition and types of rent, wages marginal productivity theory.	Factor pricing; meaning and definition.	B.N. 2
2			Types of rent.	B.N. 2
3			Types of wages.	B.N. 2
4			Marginal productivity theory.	B.N. 2
5			Origin of the theory.	B.N. 2
6			Neoclassical or traditional approach.	B.N. 2
7			Modern explanation.	B.N. 2
8			Supply of factors of production.	B.N. 2
9			Adding-up and exhaustion theorem.	B.N. 3
10			Evaluation of marginal productivity theory.	B.N. 3
11			How are prices set and introduction.	B.N. 3
12			Multy product pricing.	B.N. 3
13			Price discrimination.	B.N. 3
14			Cost based pricing method.	B.N. 3

15			Value pricing.	B.N. 3
16			Product building.	B.N. 3
CO: To integrate the basic concept of economics with tools of mathematics and statistics in order to analyze and make optimal business decision.				
LO : Acquiring knowledge about price output decision of perfectly competitive firm both in short and long run.				
1	5	New economic policy – 1991; liberalization, privatization, globalization, impact on business, business cycle.	Concept of new economic policy objectives.	B.N. 1
2			Liberalization in 1990 in service and industry.	B.N. 1
3			Drawback of liberalization.	B.N. 1
4			Privatization in India Meaning concept and definition.	B.N. 1
5			Rational for privatization.	B.N. 1
6			Benefits and objectives of privatization.	B.N. 1
7			Disadvantages of privatization.	B.N. 1
8			Globalization meaning concept and definition.	B.N. 1
9			Globalization and Indian economy.	B.N. 1
10			Positive implication of globalization.	B.N. 1
CO: Understand the internal and external decision to be made by managers.				
LO: To know about fundamental features of new economic policy and how it provides freedom to entrepreneurs.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment
Subject: Advance Accounting and Practice
B.Com. V Semester
<p>Goal : Explain the objectives of not-for-profit organizations, banking and insurance company and account for these organizations; Describe the financial reporting objectives for government and discuss the reporting issues relevant to government; Demonstrate the ability to assess a situation, identify issues and alternatives, and provide a recommendation using advanced accounting knowledge and ethical professional judgment; Develop competency in advanced accounting procedures in preparation for a professional career in accounting.</p>
<p>Objective: The course objective is to give students a good understanding about the concepts and techniques of advance accounting. Students are introduced to the application of accounting tools for reporting of govt., banking and insurance companies accounts and develop competency in advanced accounting procedures in preparation for a professional career in accounting.</p>

8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Advance accounting and practice.	% Students having the desirable understanding of Advance accounting and practice.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Assessment	Total 50	Final Internal Marks 10
Presentation 10	GD 10	Assignment 10	20		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Advanced Statistics****Session: July-June****Class: B.Com. II year Honors.**

I: Objective of course: Objective of course is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses. The central objective is to equip students with consequently requisite quantitative skills that they can employ and build on in flexible ways.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Be statistically and numerically literate.

CO2: Have statistical concepts such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data

CO3: be able independently to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc.

CO4: be able to understand statistical concepts to include measurements of location and dispersion, probability, probability distributions, sampling, estimation, hypothesis testing, regression, and correlation analysis, regression coefficients and their properties.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8

CO 2		2	2		1		2	3
CO 3	2			2				
CO 4		2		2		2	2	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Introduction to Statistics, Concept of population and sample, types of data, Primary and secondary data, collection of data, organization of data- frequency tables and frequency distributions. Presentation of data- bar diagram, pie diagram, line graph, histograms and frequency polygons.	Statistics- Meaning, definition and scope.	B.N.5
2			Significance and limitations of statistics.	B.N.5
3			Planning and types of statistical Investigation.	B.N.5
4			Methods of Investigation.	B.N.5
5			Collection of primary and secondary data.	B.N.5
6			Preparation of Questionnaire.	B.N.5
7			Editing of primary Data.	B.N.5
8			Classification of statistical errors and their sources.	B.N.5
9			Classification and tabulation of data.	B.N.5
10			Kinds of tables, rules of tabulation.	B.N.5
11			Analysis and Interpretation of data.	B.N.5
12			Analysis and Interpretation of data.	B.N.5
13			Frequency distribution and statistical series.	B.N.5
14			Diagrammatical and graphical presentation.	B.N.5
15			Diagrammatical and graphical presentation.	B.N.5
16			Graphs of frequency distribution.	B.N.5
17			Graphs of frequency distribution.	B.N.5
CO: 1,2				
LO: Identifying and classification of data, preparation of series and questionnaire				
18	2	Measurement of central tendency- Mean, Median, Mode, Geometric mean. Measures of dispersion- Range, Quartile deviation,	Central tendency- Meaning, objects & limitations.	B.N.1
19			Calculation of Arithmetic mean in different series.	B.N.1
20			Calculation of Arithmetic mean by short cut method.	B.N.1
21			Computation of Median in different series.	B.N.1

22	Mean deviation, Standard deviation and basic concept of Skewness and Kurtosis.	Computation of Median in different series.	B.N.1
23		Mode – meaning and definition.	B.N.1
24		Computation of mode in different series.	B.N.1
25		Methods of calculating Geometric mean.	B.N.1
26		Computation of harmonic mean.	B.N.1
27		Partition Value – Quartiles.	B.N.1
28		Dispersion- meaning and methods of measuring	B.N.1
29		Mean deviation and Standard deviation.	B.N.1
30		Coefficient of Mean deviation & Standard deviation.	B.N.1
31		Skewness and its measures.	B.N.1
32		Computation of Karl Pearson's and Bowley's coefficient of skewness.	B.N.1

CO: 3, 4**LO:** Measurement of statistical averages, partition values, concept of skewness and kurtosis.

33	3	Theory of Probability- Experiments, sample spaces and Events, Addition and multiplication theorem, Conditional Probability. Concept of Discrete and Continuous Random Variables. Probability Distributions - Binomial, Poisson and Normal distributions.	Concept of probability.	B.N.1
34			Fundamental concepts relating to probability.	B.N.1
35			Expression of Probability.	B.N.1
36			Probability theorems.	B.N.1
37			Addition theorems.	B.N.1
38			Multiplication Theorems.	B.N.1
39			Theorem of Conditional probability.	B.N.1
40			Probability of happening at least one event.	B.N.1
41			Factorial, Permutation & Combination.	B.N.1
42			Concept of Discrete and Continuous Random	B.N.1
43			Probability Distributions - Binomial, Poisson and Normal distributions.	B.N.1
44			Miscellaneous problems related probability.	B.N.4

45			Miscellaneous problems related probability.	B.N.4
46			Miscellaneous problems related probability.	B.N.4
47			Miscellaneous problems related probability.	B.N.4

CO: 4**LO:** Conceptual knowledge of probability theories.

48			Concept of Sampling distribution.	B.N.1
49			Random sampling or probability sampling.	B.N.1
50			Non random or non probability sampling.	B.N.1
51			Sampling theory- parameter and Statistic.	B.N.1
52			Statistical significance and its application.	B.N.1
53			Hypothesis testing and errors.	B.N.1
54			Testing of hypothesis.	B.N.1
55			General procedure of testing a hypothesis.	B.N.1
56			Sampling and non sampling errors.	B.N.1
57			Standard error of the mean.	B.N.1
58			Test of significance of the mean of small sample.	B.N.1
59			Calculation of sample mean and S.D.	B.N.1
60			Fixing the limits of population mean.	B.N.1
61			Solving of numerical questions.	B.N.3
62			Solving of numerical questions.	B.N.3
63			Solving of numerical questions.	B.N.3
64			Solving of numerical questions.	B.N.3
65			Solving of numerical questions.	B.N.3

CO: 4**LO:** Sampling distribution and its uses, framing of hypothesis and its testing.

66			Correlation- meaning, importance & types.	B.N.2
67			Degree of correlation.	B.N.2
68			Methods of determining correlation.	B.N.2
69			Karl Pearson's method of correlation.	B.N.2

70	coefficient of correlation, Spearman's Rank Correlation coefficient. Simple linear regression- Lines of regression, Regression coefficients and their properties. Application of regression in forecasting.	Spearman's Rank difference method.	B.N.2
71		Concurrent deviation method.	B.N.2
72		Correlation and Regression.	B.N.2
73		Coefficient of correlation with the help of regression coefficients.	B.N.2
74		Coefficient of correlation with the help of regression coefficients.	B.N.2
75		Computation of regression equations.	B.N.2
76		Computation of regression equations	B.N.2
77		Solving practical problems of regression & correlation	B.N.2
78		Solving practical problems of regression & correlation.	B.N.2
79		Application of regression in forecasting.	B.N.2
80		Application of regression in forecasting.	B.N.2
CO: 3,4			
LO: Able to correlate data and its degree, regression and its types.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Presentation 05	GD 05	Assignment 05	10		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Corporate Accounting****Session: July-June****Class: B. Com. II Year (Honors.)**

I: Objective of course: The main object of the subject is to enable the students to develop awareness and curiosity about issue of shares, Debentures, Final accounts , liquidation of companies etc..in conformity with the latest provisions of the Companies Act ,2013.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Able to understand the procedure of Issue of Shares & Debentures and its redemption

CO2: Helps to give an exposure to the Final Accounts of Companies and distribution of Profit & Loss of Pre Incorporation and Post Incorporation.

CO3: Gain knowledge about Valuation of Shares and Goodwill & got an idea of Liquidation of Companies.

CO4: Able to understand the knowledge of Holding & Subsidiary Company and learned accounting procedure for Amalgamation and Reconstruction.

Lesson Plan

Subject: English

Session: July-June

Class : B.Com II Year

I: Objective of course:

The objective of this course is to facilitate language learning which is a mean or verbal medium for expressing or communicating ideas, feelings, experiences and realization. The aim of the course is to impart the students the four basic skills of language-speaking, writing, reading and listening that are depending on the knowledge of grammar and correct pronunciation, correct spellings, correct reading and listening.

II: Examination:

The faculty member will award internal marks out of 5 and the bifurcation is mentioned in the scheme of internal marks. The end year examination will be worth 30 marks having theory and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	3	3	9
C	Long Answer Types of Questions	4	4	16
				30

III: Course Outcomes (CO):

CO1. The course of English allows student to develop new ideas and ethical view point. Studying English course enriches their LSWR skills and it will help students to update and increase their vocabulary and sentence formation pertaining to all walks of life.

CO2. Students will be able to form the sentence grammatically correct by following the rules and concepts of grammar pertaining to tenses, articles, nouns, pronoun, determiners and verbs.

CO3. Students will be able to comprehend and write an essay in a proper structure –Introduction, main body and the conclusion. They will be able to compose different types of formal and informal letters. While writing letter students adopt different strategies so that the letter serves the intended purpose and is not misunderstood.

CO4. Students will be able to achieve the goal of perfect translation by getting proficiency at both the source language and the target language. They differentiate between sense translation and literal translation.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
2	I	The Poem “Tree” composed by Tina Morris	Explanation of the Poem, Poet by focusing on the imp of preservation and conservation of nature.	B.NO 1
3			Discussion of textual Questions and answers	B.NO 1
4		Night of the Scorpion	Explanation of the poem and poet by highlighting superstitious belief and unconditional love of rural India.	B.NO 1
5			Discussion and explanation of exercises related to the poem	B.NO 1
6		Idgah: Premchand(translated by Khushwant Singh)	Discussion about the author and then explanation of the story by realizing the various aspects of emotions like love, motherhood, care, sacrifice, happiness and kindness between grandson and grandmother	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		Letter to God by G.L. Swanteh(translated by Donald A. Yates)	Discussion about the author and then explanation of the story by instilling belief in the significance of faith that develops confidence in students.	B.NO 1
9			Discussion of textual questions and answers	B.NO 1
10		The humorous story “My Bank Account” by Stephen Leacock	Discussion about the author and then explaining the story by exposing of witty article by the most popular	B.NO 1

			mockers and article writer.	
11			Discussion of textual questions and answers	B.NO 1
12		The short story “God Sees the Truth, But Wait” by Leo Tolstoy	Discussion about the author and then explaining the story by enriching students’ spiritual quotient	B.NO 1
13			Discussion of exercises related to the short story	B.NO 1
CO1				
LO 1- The students will gain good amount of knowledge of English language and Literature by studying various prose, poetry and story. They will also comprehend about allusions, references, poets, writers and stories etc.				
14	II	Idioms, proverbs and phrasal verbs	a list of appropriate idioms, proverbs and phrasal verbs	B.NO 2,3
15		Tenses	Rules of Tenses and their uses	B.NO 4
16		Prepositions	The importance of correct usage of Preposition	B.NO 2
17		Determiners and verbs	Types of Determiners	B.NO 3,4
18		Articles	Definite and Indefinite Articles	B.NO 2
CO2				
LO2 Students will get to know nouns, pronouns and their types and learn in detail about the function of verbs and their placement in a sentence. They will be able to gain the knowledge of prepositions and articles and their usages.				
17	III	Short Essays on given topics	Formal and Informal essays , some points in writing essays	B.NO 3
18		Formal Letters	The latest format of the formal letter and practice letter	B.NO 3
19		Informal Letters	The latest format of the informal letter and practice letter	B.NO 3
CO3				
LO3 Students will be able to figure out the relevance and importance of essay writing. They will be understand the characteristic features of an essay and learn about the different stages in the writing of an essay. Students will be able to understand the various elements of business letters. They learn the different layouts of a letter, such as indented layout, semi-block layout and full block layout.				
20	IV	Translation of sentences	Translation of passage English to Hindi and Hindi to English	B.NO 2
21			Some passages are given for translation	B.NO 2
CO4				
LO4 Students will be able to understand that translation is a significant vehicle in cross-cultural, cross-lingual and cross-national civilization. They will be able comprehend written and oral translation.				
23	V	Curriculum- vitae	The format of CV	B.NO 3
24		Design of Resume	The points are given in preparing impressive C.V.	B.NO 3
CO4				
Students will be able to understand the nature and importance of employment communication. They will be able to learn about resume design and describe three acceptable resume styles: chronological, functional and combination. They will be able to know how to write a persuasive resume.

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Management Accounting			
B.Com. V Semester (H)			
Goal : Apply managerial accounting and its objectives in a way that demonstrates a clear understanding of ethical responsibilities; Apply and analyze different types of activity-based management tools through the preparation of estimates; Analyze cost-volume-profit techniques to determine optimal managerial decisions; Prepare a master budget and demonstrate an understanding of the relationship between the components and prepare analyses of various special decisions, using relevant costing and benefits.			
Objective: The course objective is to give students a good understanding about the concepts and techniques of management accounting. Students are introduced to the application of management accounting tools for pricing, budgetary control and performance evaluation as well as new developments in management accounting knowledge and techniques and how to assess these through cost-benefit analysis.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Management account.	% Students having the desirable understanding of Management account.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Assessment	Total 75	Final Internal Marks Out 15
Presentation 15	GD 15	Assignment 15	30		

Subject : Moral Value And Hindi language and English

Session: Jan-June

Class :B.Com VI Semester

I: Objective of Course :

1. lkfgR;] foKku] dyk] ijaijk] bfrgkl] i;kZoj.k ds lkFk O;kdj.k ds vfuok;Z Kku dks fodflr djsaxsaA
2. fo|kFkhZ u dsoy lQy thohdksiktZu djsa vfirg lkFkZd] l{ke tkx:d ukxfjd cusA

Objective: The aim of the course is to impart the students the four basic skills of language-speaking, writing, reading and listening that are depending on the knowledge of grammar and correct pronunciation, correct spellings, correct reading and listening.

II: Examination:

The faculty members will award internal marks out of 15(5+5+5) and the bifurcation is mentioned in the scheme of internal marks. The end semester examination will be worth 85(15+35+35) marks having theory.

English

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	2	10
C	Long Answer Types of Questions	4	5	20
				35

The faculty member will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The end year examination will be worth 50 marks having theory and have 3 sections A, B and C.

Moral values and Hindi

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	3	5	15
C	Long Answer Types of Questions	3	10	30

English Session Plan

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
CO: 3 The student will learn about the different thoughts expressed in the text .They will also learn about the various literary devices used in the text.				
LO : The students will acquire with English language and Literature by studying this. They will also learn about allusions, references, poets, writers and stories etc.				
2	IV	Stopping By Woods on a Snowy Evening	Explanation of the Poem, Poet.	B.NO 1
3			Discussion of Question and answer	B.NO 1
4		Communication Education and Information Technology	Discussion about the author and then explaining the story in detail.	B.NO 1
5			Discussion of exercises related to story	B.NO 1
6		The Gif Of Maggi	Explanation of Story	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		The Cherry Tree	Discussion about the author and the topic	B.NO 1
9			Discussion of Question and answer	B.NO 1
CO:4				
LO: Vocabulary plays an important role in enriching language. Students will improve their communication by enhancing their vocabulary.				
10		Translation	Translation of passage English to Hindi and Hindi to English	B.NO.2
11		Email-Writing	Format and Importance of Email writing	B.NO 3

12	V	Power Point Presentation	Elements of power point presentation skills and its role in today's scenario	B.NO 2,3
13		Basic language Skills Countable and Uncountable Nouns, Verbs, Adverbs	Common nouns, Collective nouns , material nouns and abstract nouns, Transitive and Intransitive verbs and types of Adverbs	B.NO 4,5
14		Sentence Correction	Common Errors will be dealt.	B.NO 3

DEPARTMENT OF COMMERCE, IPS ACADEMY

PROGRAM OUTCOME

B.Com. (Tax)

1. This program could provide well tainted professionals for the industries, banking sectors, insurance companies, financing companies, Transport agencies, warehousing etc. to meet the well trained men power requirements. The graduates will get hands on experience in various aspects acquiring skills for marketing manager, selling managers, overall administration abilities of the companies.
2. After completing this course they can become a manager, accountant, management accountant, cost accountant, bank manager, auditor, company secretary teacher, professor, stock agents and get govt. jobs easily.
3. The course offer the number of value based and job oriented courses (Industry visit, summer training) ensures that students are trained can get aware about the present scenario of the world.
4. Create a base to compete and participate and gain leadership positions in organizations at National and International levels
5. Through this course department is putting efforts to nurture entrepreneurial skills and capabilities.
6. The course aim to provide and in-depth knowledge on the provisions of tax. To familiarize the students with recent amendments in taxes.
7. The students are exposed to details of GST, Advanced GST. Upon completion of the course, the students become capable to perform well in banking, financial institutions, in accounting, marketing services, etc.
8. The benefits of completing a taxation program student can start their own business as a tax preparer.

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Business Mathematics****Session: July-June****Class: B.Com. I year Pass Courses**

I: Objective of course: The objective of this course is to teach the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: have basic knowledge in the areas of business calculus and financial mathematics

CO2: be able to work with simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.

CO3: be able to understand and use equations, formulae, and mathematical expressions and relationships in a variety of contexts

CO4: apply the knowledge in mathematics (matrices, percentage, ratio- proportion, averages) in solving business problems

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Ratio – gaining and Sacrificing Ratio, proportion, Percentage, Commission, Discount and Brokerage	Ratio- Meaning, features and types of ratio.	B.N.4
2			Ratio related to partnership	B.N.4
3			Profit sharing ratio, Sacrificing ratio & Gaining ratio.	B.N.4
4			Ratio Short numerical questions.	B.N.4
5			Ratio- Long numerical questions	B.N.4
6			Ratio- Long numerical questions	B.N.4
7			Ratio- Long numerical questions	B.N.4
8			Proportion- Meaning, rules & kinds.	B.N.4
9			Problems related to Inverse & compound proportion.	B.N.4
10			Problems related to continued & direct proportion	B.N.4
11			Percentage- Rules & numerical.	B.N.1
12			Percentage- Numerical.	B.N.1
13			Percentage- Numerical	B.N.1
14			Commission- Calculation of different types of commission	B.N.1
15			Commission- Practical Problems	B.N.1
16			Commission- Practical Problems	B.N.1
17			Discount & Brokerage- Meaning and different types.	B.N.1
18			Practical problems regarding Discount & brokerage.	B.N.1
19			Practical problems regarding Discount & brokerage.	B.N.1
CO: 1, 4				
LO: Able to solve different problems regarding ratio and percentage.				
20	2	Simultaneous Equations – Meaning,	Simultaneous Equations- Methods of solving equations.	B.N.3
21			Problems relating to Number and Fraction.	B.N.3

22		Characteristics, Types and Calculations. Preparation of invoice.	Problems relating to Age.	B.N.3
23			Solving Miscellaneous Problems.	B.N.3
24			Solving Miscellaneous Problems.	B.N.3
25			Solving Miscellaneous Problems.	B.N.3
26			Preparation of Invoice- Meaning & advantages.	B.N.3
27			Objects and methods of preparing Invoice.	B.N.3
28			Kinds or types of Invoices	B.N.3
29			Preparation of Invoice- Practical Questions.	B.N.3
30			Preparation of Invoice- Practical Questions.	B.N.3
31			Preparation of Invoice- Practical Questions.	B.N.3
32			Preparation of Invoice- Practical Questions.	B.N.3
CO: 2,3				
LO: Framing and solving equations, Invoice preparation.				
33	3	Elementary Matrices – Definitions and Calculations, Types of Matrices.	Elementary Matrix- Meaning and Definitions	B.N.4
34			Elementary Matrix- Rules regarding calculations.	B.N.4
35			Types of Matrix.	B.N.4
36			Addition of Matrices.	B.N.4
37			Subtraction of matrices.	B.N.4
38			Multiplication of a matrix – Procedure.	B.N.4
39			Multiplication of a matrix by a Scalar or constant.	B.N.4
40			Solving Numerical questions of Matrix	B.N.4
41			Solving Numerical questions of Matrix	B.N.4
42			Solving Numerical questions of Matrix	B.N.4
43			Word problems regarding Matrices.	B.N.4
44			Word problems regarding Matrices	B.N.4

45			Word problems regarding Matrices	B.N.4
CO: 4				
LO: Conceptual knowledge of Matrices				
46	4	Logarithms and Antilogarithms- Principles and Calculations, Simple and Compound Interest.	Logarithms and their application.	B.N.1
47			Rules of conversion of simple sums into logarithms.	B.N.1
48			Antilogarithm- Method and Rules.	B.N.1
49			Numerical questions of logarithms.	B.N.1
50			Numerical questions of logarithms.	B.N.1
51			Simple Interest- Formulas and Calculation.	B.N.1
52			Simple Interest- Practical Problems.	B.N.1
53			Simple Interest- Practical Problems.	B.N.1
54			Simple Interest- Practical Problems.	B.N.1
55			Compound Interest and Simple interest.	B.N.1
56			Calculation of compound Interest.	B.N.1
57			Calculation of compound Interest - Practical's.	B.N.1
58			Calculation of compound Interest - Practical's.	B.N.1
59			Calculation of compound Interest – Practical's.	B.N.1
60			Calculation of compound Interest - Practical's.	B.N.1
CO: 2				
LO: Able to calculate interest with the help of log table				
61	5	Averages- Simple, Weighted and Statistical Averages, Arithmetic Mean, Harmonic mean, Geometric mean. Profit and loss.	Profit & Loss- Meaning & important Formulae	B.N.5
62			Practical questions related to profit & loss.	B.N.5
63			Practical questions related to profit & loss.	B.N.5
64			Practical questions related to profit & loss.	B.N.5
65			Practical questions related to profit & loss.	B.N.5
66			Calculation of simple averages.	B.N.2

67		Calculation of Weighted averages.	B.N.2
68		Calculation of arithmetic mean.	B.N.2
69		Calculation of harmonic mean	B.N.2
70		Calculation of Geometric mean	B.N.2
CO: 1,4			
LO: Knowledge of statistical averages, finding out profit & loss.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Concept of Double Entry System	Meaning, Definition & Concept of Double Entry System	B.N.2
2		Accounting Concepts & Conventions	Fundamental Principles of Accounting, Concepts & Conventions.	B.N.2
3		Preparation of Journals	Meaning, Features & Formats, Separate & Compound Journal Entries	B.N.1
4			Numerical – Journal Entries	B.N.1
5		Sub division of Journal	Cash Book – Simple & Double Column, Triple Column, Multi Column Cash Book, Petty Cash Book	B.N.1
6			Purchase Book & Sales Book, Purchase Return & Sales Return Book	B.N.1
7			Bills Receivable & Bills Payable Books _ Numerical	B.N.1
8		Preparation of Ledger	Meaning, Format & Methods of Posting	B.N.1
9			Numerical - Ledger	B.N.1
10		Trial Balance	Meaning, Objectives & Methods, Preparation of Trial Balance	B.N.1
11		Final Accounts – with Adjustments	Meaning & Definitions of Final Accounts, Performa – Trading & P&L Account, Balance Sheet	B.N.2
12			Adjustments in Final Accounts, Numerical – Final Accounts	B.N.2
13			Numerical – Final Accounts	B.N.2
14			Numerical – Final Accounts	B.N.2
15			Numerical – Final Accounts	B.N.2
CO: 1				
LO: To understand the Concept & Conventions of Double Entry System and Accounting. To record the basic journal entries, to know how the accounting entries are posted in books & preparation of Trial Balance.				
16	2	Introduction to IAS	Introduction to IAS, Definition & Terminology	B.N.3
17		Detail Study of AS-6	Introduction to AS-6 (Revised) Depreciation Accounting – Terminology, Explanation & Disclosure	B.N.3
18		Detail Study of AS-10	Introduction to AS-10 (Accounting for Fixed Assets)– Definition, Explanation & Disclosure	B.N.3
19		Branch Accounts	Definition & Importance of Branch Accounts, Methods for preparing Branch Accounts	B.N.2
20			Numerical – Branch Accounts	B.N.2
21			Numerical – Branch Accounts	B.N.2
22			Numerical – Branch Accounts, Conversion of Trial	B.N.2

		Balance of Foreign Branch	
23		Numerical – Foreign Branch	B.N.2
24	Departmental Accounts	Meaning, Objectives, Advantages of Departmental Accounts, Departmental Trading & P&L A/c	B.N.2
25		Inter Departmental Transfers – Numerical	B.N.2
26		Departmental Accounts - Numerical	B.N.2
27		Calculation of Closing Stock, Calculation of Unrealized profit on Stock - Numerical	B.N.2

CO: 2

LO: To understand how to Prepare the final accounts and making adjustment. To understand the purpose of Accounting Standards and detail study of AS-6 & AS-10. To understand the types of Branch and methods of Branch accounting and departmental accounting.

28	3	Royalty Accounts	Meaning & Definition of Royalty, Terminology relating to Royalty	B.N.3
29			Journal Entries in the Books of Lessee & Lessor	B.N.3
30			Royalty Accounts - Numerical	B.N.3
31			Royalty Accounts – Numerical	B.N.3
32			Patent Royalty – Journal Entries & Ledger Accounts, Copyright Royalty - Numerical	B.N.3
33		Accounting of Non Profit Making Organization	Meaning, Definition of Nonprofit Organizations, Receipts & Payment A/c and Income & Expenditure A/c. Rules Regarding Conversion.	B.N.1
34			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
35			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
36			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1
37			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1

CO: 3

LO: Able to maintain royalty and Non Profit Organization.

38	4	Joint Venture Accounts	Meaning, Characteristics, Need, Merits & Demerits of Joint venture	B.N.3
39			Numerical - Joint Venture Accounts	B.N.3
40			Numerical - Joint Venture Accounts	B.N.3
41			Numerical - Joint Venture Accounts	B.N.3
42		Consignment	Meaning, Terminology, Characteristics, Need, Merits & Demerits of Consignment.	B.N.3

43			Accounts to be open in the books of Consignor and Consignee.	B.N.3	
44			Numerical – Consignment Accounts	B.N.3	
45			Numerical – Consignment Accounts	B.N.3	
46			Numerical – Consignment Accounts	B.N.3	
47			Numerical – Consignment Accounts	B.N.3	
48			Numerical – Consignment Accounts	B.N.3	
49			Numerical – Consignment Accounts	B.N.3	
50		Investment Account	Meaning of Investment, Types of Interest and Type of Securities	B.N.3	
51			Accounting for Investment Account, Valuation of Closing Investment	B.N.3	
52			Numerical – Investment Accounts	B.N.3	
53			Numerical – Investment Accounts	B.N.3	
54			Numerical – Investment Accounts	B.N.3	
55			Numerical – Investment Accounts	B.N.3	
CO: 3					
LO: Recording entries of joint venture a/c & Able to maintain joint venture a/c, Consignment & Investment a/c.					
56	5	Dissolution of Partnership	Meaning of Dissolution, entries in Dissolved Firm – Numerical	B.N.4	
57			Dissolution of Firm – Numerical	B.N.4	
58			Dissolution of Firm – Numerical	B.N.4	
59			Dissolution of Firm – Numerical	B.N.4	
60			Dissolution of Firm – Numerical	B.N.4	
61			Dissolution of Firm – Numerical	B.N.4	
62		Insolvency of Partner	Meaning of Insolvency, entries in Insolvent firm – Numerical	B.N.4	
63			Garner v/s Murray Rule	B.N.4	
64			Garner v/s Murray Rule – Numerical	B.N.4	
65			Garner v/s Murray Rule – Numerical	B.N.4	
66			Gradual realization of assets & distribution of cash accordingly or Piecemeal or Inter distribution	B.N.4	
67			Proportionate Capital Method - Numerical	B.N.4	
68			Maximum Loss Method - Numerical	B.N.4	
69		Amalgamation of	Meaning of Amalgamation, Entries in the books of Old	B.N.4	

	Partnership Firms	& New Firm	
70		Numerical – Amalgamation of Partnership Firm	B.N.4
71		Numerical – Amalgamation of Partnership Firm	B.N.4
72		Numerical – Amalgamation of Partnership Firm	B.N.4
73		Numerical – Amalgamation of Partnership Firm	B.N.4
74	Conversion of firm to company.	Meaning of Conversion of Partnership Firm into Joint Stock Company, Meaning of Purchase Consideration & Methods	B.N.4
75		Allocation of Purchase Consideration among partner's, Entries in the book of vendor's firm & Purchasing Company	B.N.4
76		Numerical – Conversion of Partnership Firm into Company	B.N.4
77		Numerical – Conversion of Partnership Firm into Company	B.N.4
78		Numerical – Conversion of Partnership Firm into Company	B.N.4
CO: 4			
LO: Easily examine the dissolution of partnership. Easily can prepare the journal entries of amalgamations & Conversion of partnership firm into Joint Stock Company.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

20		Practical questions of agriculture income	B.N. 1	
21		Meaning & rules of residential status	B.N. 1	
22		Practical questions determined residential status	B.N. 1	
23		Determined tax liability according to residential status	B.N. 1	
24		Practical questions of determined tax liability	B.N. 1	
25		Practical questions of determined tax liability.	B.N. 1	
26		Residential status & Tax liability.	B.N. 1	
27		Concept & types of exempted income	B.N. 1	
28		Continue above exempted income	B.N. 1	
29	Types of Exempted Income.	B.N. 1		
CO :2				
LO: Able to understand the Important definitions, Agricultural Income, Residential status and Exempted Income.				
30	3	Computation of taxable Income of Salaried persons. Exempt Items and taxable Income .Computation In Case of Retirement.	Meaning & concept of income from salary	B.N. 1
31			Types of allowances	B.N. 1
32			Types of perquisites	B.N. 1
33			Practical questions of income from salary	B.N. 1
34			Practical questions of income from salary	B.N. 1
35			Practical questions of income from salary	B.N. 1
36			Concept of income from salary (retirement)	B.N. 1

37			Practical questions of income from salary of retired person	B.N. 1
38			Practical questions of income from salary of retired person.	B.N. 1
CO: 3				
LO: Able to understand the procedure of filing IT return of salaried person.				
39	4	Computation of taxable income from house property. Calculation of taxable income from business or profession. Provisions relating to calculation of income on estimated basis of small traders, contractors, Transporters & professionals.	Income from house property	B.N. 1
40			Types of house	B.N. 1
41			Procedure of calculating income from house property	B.N. 1
42			Practical questions of income from house property	B. N. 1
43			Practical questions of income from house property	B. N. 1
44			Practical questions of income from house property	B. N. 1
45			Meaning & concept of income from business & profession	B. N. 1
46			Procedure of calculate income from business & profession	B. N. 1
47			Computation of Income on estimation basis of truck operators (Sec. 44 AE)	B. N. 1
48			Practical Questions.	B. N. 1
CO: 3				
LO: To provide knowledge about calculation of House Property & Income from Business or Profession.				
49	5	Capital gains – Calculation of taxable capital gain/loss on short term and Long term capital assets. Exemption for Capital gains. Computation of	Meaning & types of capital gain	B.N. 3
50			Capital assets & exemptions	B.N. 3
51			Procedure of calculate capital gain	B.N. 3

	Income from Other sources.		
52		Practical questions of income from capital gain	B.N.3
53		Practical questions of income from capital gain	B.N.3
54		Practical questions of income from capital gain	B.N.3
55		Meaning & concepts of income from other sources	B. N. 3
56		Types of income & rules of making gross up	B. N. 3
57		Practical questions of income from other sources	B. N. 3
CO: 4			
LO: Familiarize with the concept of capital gains and income from other sources.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Shripal Saklecha, Income Tax Law & Practice, 2018.
2. Dr. H.C. Mehrotra, 59th Edition Income Tax Law & Practice, 2018
3. Dr. Kamlesh Bhandari, Income Tax Law & Practice, 2018.

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Direct tax system -Income Tax			
B.Com. I Year (Tax)			
Goal : To provide students with a working knowledge of the fundamental tax principles and rules that applies to commonly encountered transactions undertaken by individuals; To know the process of determined residential status and Heads and types of income; Analyze the assessment procedure .			
Objective: The Objective of this subject is to expose the students to the basic concept of Income Tax Act and help them to apply the provisions and compute Income under various heads..

- 1-There will be individual assignment, presentation and group assignment.
- 2-Class test will be based on theoretical and practical aspect of the subject.
- 3-Class performance and discipline will be an important factor for assessing internal marks.
- 4-The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: EVS			
B.Com. 2nd Year			
Goal : The field of environmental science can be divided into three main goals, which are to learn how the natural world works, to understand how we as humans interact with the environment, and also to determine how we affect the environment.			
Objective: Environment education is concerned with those aspects of human behaviour which are more directly related to man's interaction with bio-physical environment and his ability to understand this interaction.			
4-5Marks	3-3.5 Marks	2-2.5 Marks	00-1.5 Marks

Lesson Plan**Subject: Income Tax Procedure & Practice****Session: July-June****Class: B.Com. II year (Tax)**

I: Objective of course: The Objective of this subject is to expose the students to the various provision of Income Tax Act relating to computation of Income of various categories of assesses.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: To provide students with a working knowledge of the fundamental tax principles and rules that applies to commonly encountered transactions undertaken by individuals

CO2: To know the process of determination of tax liability of HUF, Company, Partnership firms and Cooperative Society.

CO3: Able to understand the procedure relating to PAN, prescribed return forms and their furnishing

CO4: Analyze the assessment procedure and representation before appropriate authorities under the law.

Lesson Plan**Subject: Principles of Statistics****Session: July-June****Class: B.Com. II year Pass Courses**

I: Objective of course: Objective of course is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses. The central objective is to equip students with consequently requisite quantitative skills that they can employ and build on in flexible ways.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: be statistically and numerically literate.

CO2: have statistical concepts such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data.

CO3: be able to independently read statistical literature of various types, including survey articles, scholarly books, and online sources.

CO4: be able independently to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc.

1	1	Statistics- Meaning and definitions, Significance, Scope and limitations of statistics. Statistical investigation. Process of data collection, Primary and secondary data, Methods of sampling, Preparation of questionnaire, Classification and tabulation of data, preparation of statistical series and its types.	Statistics- Meaning, definition and scope.	B.N.5
2			Significance and limitations of statistics.	B.N.5
3			Planning and types of statistical Investigation.	B.N.5
4			Methods of Investigation.	B.N.5
5			Collection of primary and secondary data.	B.N.5
6			Preparation of Questionnaire.	B.N.5
7			Editing of primary Data.	B.N.5
8			Classification of statistical errors and their sources.	B.N.5
9			Classification and tabulation of data.	B.N.5
10			Kinds of tables, rules of tabulation.	B.N.5
11			Analysis and Interpretation of data.	B.N.5
12			Analysis and Interpretation of data.	B.N.5
13			Frequency distribution and statistical series.	B.N.5
14			Diagrammatical and graphical presentation.	B.N.5
15			Diagrammatical and graphical presentation.	B.N.5
16			Graphs of frequency distribution.	B.N.5
17			Graphs of frequency distribution.	B.N.5
CO: 1,2				
LO: Identifying and classification of data, preparation of series and questionnaire				
18	2	Measurements of central tendency- Mean , Median, Quartile, Mode, Geometric mean	Central tendency- Meaning, objects & limitations.	B.N.2
19			Calculation of Arithmetic mean in different series.	B.N.2
20			Calculation of Arithmetic mean by short cut method.	B.N.2

21		and harmonic mean.	Computation of Median in different series.	B.N.2		
22			Computation of Median in different series.	B.N.2		
23			Mode – meaning and definition.	B.N.2		
24			Computation of mode in individual series.	B.N.2		
25			Grouping method of Mode.	B.N.2		
26			Merits and Demerits of Mode.	B.N.2		
27			Methods of calculating Geometric mean.	B.N.2		
28			Computation of harmonic mean.	B.N.2		
29			Combined mean.	B.N.2		
30			Partition Value – Quartiles	B.N.2		
31			Formulae for Computing quartiles.	B.N.2		
32			Computation of quartiles.	B.N.2		
CO: 1, 4						
LO: Able to calculate measurement of central tendency.						
33	3	Dispersion and skewness. Analysis of time series- Meaning, importance, components, Decomposition of time series, Measurement of long term trends, measurement of cyclical and irregular fluctuations.	Dispersion- meaning and methods of measuring.	B.N.1		
34			Methods of limits: Range, I.Q.R. & percentile range.	B.N.1		
35			Quartile deviation or semi –inter-quartile range.	B.N.1		
36			Mean deviation.	B.N.1		
37			Standard deviation.	B.N.1		
38			Coefficient of Mean deviation & Standard deviation.	B.N.1		
39			Skewness and its measures.	B.N.1		
40			Computation of karl Pearson’s coefficient of skewness.	B.N.1		
41			Computation of Bowley’s coefficient of skewness.	B.N.1		
42			Analysis of time Series.	B.N.1		
43			Secular Trend or Long term trend.	B.N.1		

44			Seasonal Variations.	B.N.1
45			Cyclical variations.	B.N.1
46			Irregular or Random Variations.	B.N.1
47			Practical problems regarding trend analysis.	B.N.1
CO: 4				
LO: Fundamental concepts of dispersion and skewness, measurement of different trends.				
48	4	Correlation- Meaning, Definitions, Types and degree of correlation, methods of correlation, regression analysis- meaning, uses, difference between correlation and regression, linear regression, regression equations, Calculation of coefficient of regression.	Correlation- meaning, importance & types.	B.N.3
49			Degree of coorelation.	B.N.3
50			Methods of determining correlation.	B.N.3
51			Karl Pearson’s method of correlation.	B.N.3
52			Spearman’s Rank difference method.	B.N.3
53			Concurrent deviation method.	B.N.3
54			Probable error.	B.N.3
55			Standard error.	B.N.3
56			Least squares method.	B.N.3
57			Correlation and Regression.	B.N.3
58			Coefficient of correlation with the help of regression coefficients.	B.N.3
59			Coefficient of correlation with the help of regression coefficients.	B.N.3
60			Computation of regression equations.	B.N.3
61			Computation of regression equations.	B.N.3
62			Solving practical problems of regression & correlation.	B.N.4
63			Solving practical problems of regression & correlation.	B.N.4
64			Solving practical problems of regression & correlation.	B.N.4
65			Solving practical problems of regression & correlation.	B.N.4
CO: 3,4				

LO: Able to correlate data and its degree, regression and its types.				
66	5	Index number- Meaning, characteristics, importance and uses. Construction of index numbers- Cost of living index, Fisher's ideal index number. Diagrammatic and Graphic presentation of data.	Index Number- meaning, features & kinds.	B.N.5

1. There will be individual assignment, presentation and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Principles of Statistics			
B.Com. II Year Pass Courses			
Goal: Develop the ability to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc. and able to understand statistical concepts to include probability distributions, sampling, estimation, hypothesis testing, regression, and correlation analysis, regression coefficients and their properties.			
Objective: Objective of subject is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Business Statistics.	% Students having the desirable understanding of Business Statistics.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

Lesson Plan**Subject: Management Accounting****Session: July-Dec****Class: B.Com. V Semester****I: Objective of course:**

The course objective is to give students a good understanding about the concepts and techniques of management accounting. Students are introduced to the application of management accounting tools for pricing, budgetary control and performance evaluation as well as new developments in management accounting knowledge and techniques and how to assess these through cost-benefit analysis.

II: Examination:

The faculty members will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination pattern will carry 85 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: Apply managerial accounting and its objectives in a way that demonstrates a clear understanding of ethical responsibilities

CO2: Apply and analyze different types of activity-based management tools through the preparation of estimates.

CO3: Analyze cost-volume-profit techniques to determine optimal managerial decisions.

CO4: Prepare a master budget and demonstrate an understanding of the relationship between the components and prepare analyses of various special decisions, using relevant costing and benefits.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Concept of Management accounting and its introduction	Introduction of Subject	B.N. 2
2			Syllabus Discussion	B.N. 2
3			Meaning and definition of Management accounting	B.N. 2
4			Essentials of Management accounting	B.N. 2
5			Scope of Management accounting	B.N. 2
6			Objectives of Management accounting	B.N. 2
7			Functions of management accounting	B.N. 2
8			Difference between Management, Financial and Cost Accounting	B.N. 2
9			Tools and Techniques of management accounting	B.N. 2
10			Need and significance of Management accounting	B.N. 2
11			Role of management accounting in decision making	B.N. 2
CO: 1				
LO: To enlighten the students thought and knowledge on management Accounting.				
12	2	Financial Statements Analysis	Meaning and limitations of financial statement	B.N. 2
13			Objectives and methods of financial statement analysis	B.N. 2
14			Practical problems of Common Size income statement	B.N. 2
15			Practical problems of Common Size Balance Sheet	B.N. 2
16			Practical problems of Comparative Income statement	

17	2		Practical problems of Comparative Balance Sheet	
18		Ratio Analysis	Ratio analysis - Interpretation of the ratio	B.N. 2
19			Guidelines for use of ratios, Importance, limitations	B.N. 2
20			Classification of Ratio	B.N. 2
21			Advantages & Limitations of ratio analysis	B.N. 2
22			Practical problems of Ratio analysis	B.N. 2
23			Practical problems of Ratio analysis	B.N. 2
24			Practical problems of Ratio analysis	B.N. 2
25			Practical problems of Ratio analysis	B.N. 2
CO: 2				
LO: Helps to give proper idea on financial statement analysis in practical point of view.				
26	3	Fund Flow Analysis	Concept and advantages of Fund flow analysis	B.N. 3
27			Limitation and methods of Fund flow analysis	B.N. 3
28			Rules regarding preparation of Fund Flow Statement	B.N. 3
29			Practical problems of Fund Flow analysis	B.N. 3
30			Practical problems of Fund Flow analysis	B.N. 3
31			Practical problems of Fund Flow analysis	B.N. 3
32			Practical problems of Fund Flow analysis	B.N. 3
33			Practical problems of Fund Flow analysis	B.N. 3
34			Practical problems of Fund Flow analysis	B.N. 3
35			Cash Flow Analysis	Concept and advantages of Cash flow analysis

36	3	Cash Flow Analysis	Limitation and methods of Cash flow analysis	B.N. 3
37			Rules regarding preparation of Cash Flow Statement	B.N. 3
38			Difference between Fund flow and Cash flow statement	B.N. 3
39			Practical problems of Cash Flow analysis	B.N. 3
40			Practical problems of Cash Flow analysis	B.N. 3
41			Practical problems of Cash Flow analysis	B.N. 3
42			Practical problems of Cash Flow analysis	B.N. 3
43			Practical problems of Cash Flow analysis	B.N. 3

CO: 2,4**LO:** To introduce the concept of fund flow and cash flow statement.

44	4	Marginal Costing	Concept and types of Absorption and Marginal costing	B.N. 3
45			Marginal and differential costing as a tool for decision making.	B.N. 3
46			Practical problems of marginal costing	B.N. 3
47			Practical problems of marginal costing	B.N. 3
48			Practical problems of marginal costing	B.N. 3
49		Break Even Analysis	Meaning of Break even analysis. Limitation, assumption and use of break even analysis	B.N. 1
50			Practical problems of break even analysis	B.N. 1
51			Practical problems of break even analysis	B.N. 1
52			Practical problems of break even analysis	B.N. 1

CO: 3**LO:** To develop the know-how and concept of marginal costing with practical problems.

53	5	Budgetary Control	Meaning of Budget and budgetary control	B.N. 1
54			Objectives, merits and limitations of budgetary control	B.N. 1

55	5	Budgetary Control	Types of budget	B.N. 1
56			Practical problems of flexible budget	B.N. 1
57			Practical problems of flexible budget	B.N. 1
58			Practical problems of Cash budget	
59			Practical problems of Cash budget	B.N. 1
60		Management audit & responsibility accounting	Meaning and concept of Management Audit	B.N. 3
61			Procedure of management audit	B.N. 3
62			Concept of Responsibility accounting	B.N. 3
63			Procedure of accountability of responsibility	B.N. 3
64		Management Reports	Meaning and concept of Management reports	B.N. 3
65			Types of reports	B.N. 3
66			Qualities of a good report	B.N. 3
67			Revision	
68			Revision	
69			Revision	

CO: 1,4

LO: To provide knowledge about budget control keeping in mind the scope of the concept and preparation of management report.

Note : apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Basics of Computer & Information Technology - I			
B.com VIth Semester			
Goal : Students have the ability to understand fundamental components of a computer, making the power point representation and use of protocol.			
Objective: To understand fundamental components of a computer, Input-Output devices and different types of operating systems and memory.			
12-15 Marks	9-11 Marks	5-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of fundamental components of a computer and understanding of different types of operating systems. Use of Internet in business applications.	% Students having the basic concept of fundamental components of a computer and understanding of different types of operating systems. Use of Internet in business applications.	% Students having the basic concept of fundamental components of a computer and understanding of different types of operating systems. Use of Internet in business applications.	% Students Need More Efforts to understand basic concept of computer system and understanding of different types of operating systems.

IX: Scheme of internal marks

Class Participation			Internal Exam	Total 75	Final Internal Marks 15

Lesson Plan**Subject: Custom Duty And M.P. Stamp Duty****Session: Jan-June****Class: B.Com 6th Sem.****I: Objective of course:**

This course is designed to give detailed knowledge about the Custom Duty and M.P. Stamp Duty.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: Students will learn to define customs duty (import and export) and M.P. Stamp Duty.

CO2: Give an overview of procedure for import and export.

CO3: Knowledge of methodology of calculation of custom duty.

CO4: To enable the students to understand the types of assets and registration of property.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

Lesson Plan**Subject: Indirect Tax****Session: Jan-June****Class: B.Com. VI Semester (III Year)**

I: Objective of course: The Objective of this Course is to acquaint the Students with the basic Concept of Indirect Tax and further to develop understanding the utilities of indirect tax.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: To introduce the basic concept of Indirect Tax. To familiarize the concept of Central Excise Duty & its classification. To Understand the valuation rules under central excise act.

CO2: Make the students familiarizes with the concept of Custom Duty and its provisions. It give more practical knowledge to computation of assessable value & calculation of Custom Duty.

CO3: Make the students familiarizes with the concept of Central Sales Tax and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of Central Sales Tax. Make the students familiarizes with the concept of M.P.VAT and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of M.P.VAT.

CO4: Make the students familiarizes with the concept of Service Tax and its provisions. It give more practical knowledge to computation of Taxable Service & calculation of Service Tax.

English Session Plan

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
CO: 3 The student will learn about the different thoughts expressed in the text .They will also learn about the various literary devices used in the text.				
LO : The students will acquire with English language and Literature by studying this. They will also learn about allusions, references, poets, writers and stories etc.				
2	IV	Stopping By Woods on a Snowy Evening	Explanation of the Poem, Poet.	B.NO 1
3			Discussion of Question and answer	B.NO 1
4		Communication Education and Information Technology	Discussion about the author and then explaining the story in detail.	B.NO 1
5			Discussion of exercises related to story	B.NO 1
6		The Gif Of Maggi	Explanation of Story	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		The Cherry Tree	Discussion about the author and the topic	B.NO 1
9			Discussion of Question and answer	B.NO 1
CO:4				
LO: Vocabulary plays an important role in enriching language. Students will improve their communication by enhancing their vocabulary.				
10		Translation	Translation of passage English to Hindi and Hindi to English	B.NO.2
11		Email-Writing	Format and Importance of Email writing	B.NO 3

12	V	Power Point Presentation	Elements of power point presentation skills and its role in today's scenario	B.NO 2,3
13		Basic language Skills Countable and Uncountable Nouns, Verbs, Adverbs	Common nouns, Collective nouns , material nouns and abstract nouns, Transitive and Intransitive verbs and types of Adverbs	B.NO 4,5
14		Sentence Correction	Common Errors will be dealt.	B.NO 3

DEPARTMENT OF COMMERCE, IPS ACADEMY

PROGRAM OUTCOME

B.Com. (Computer Application)

1. This program could provide well tainted professionals for the industries, banking sectors, insurance companies, financing companies, Transport agencies, warehousing etc. to meet the well trained men power requirements. The graduates will get hands on experience in various aspects acquiring skills for marketing manager, selling managers, overall administration abilities of the companies.
2. After completing this course they can become a manager, accountant, management accountant, cost accountant, bank manager, auditor, company secretary, tax practitioner, teacher, professor, stock agents and get govt. jobs easily.
3. The course offer the number of value based and job oriented courses (Industry visit, summer training) ensures that students are trained can get aware about the present scenario of the world.
4. Create a base to compete and participate and gain leadership positions in organizations at National and International levels
5. Through this course department is putting efforts to nurture entrepreneurial skills and capabilities.
6. To enable the students to play a focal role in the field of E-Commerce by updating their knowledge with the new techniques.
7. To provide the students about computing principles and business practices in software solutions, outsourcing services, public and private sectors
8. Students will be able to demonstrate progressive learning of various tax issues and tax forms related to individuals. Students will be able to demonstrate knowledge in setting up a computerized set of accounting books.

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Business Mathematics****Session: July-June****Class: B.Com. I year Pass Courses**

I: Objective of course: The objective of this course is to teach the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: have basic knowledge in the areas of business calculus and financial mathematics

CO2: be able to work with simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.

CO3: be able to understand and use equations, formulae, and mathematical expressions and relationships in a variety of contexts

CO4: apply the knowledge in mathematics (matrices, percentage, ratio- proportion, averages) in solving business problems

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	2			2	2		
CO 2		2			2	2	2	2
CO 3		2		2	2	2		
CO 4	3			2	2	3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Ratio – gaining and Sacrificing Ratio, proportion, Percentage, Commission, Discount and Brokerage	Ratio- Meaning, features and types of ratio.	B.N.4
2			Ratio related to partnership	B.N.4
3			Profit sharing ratio, Sacrificing ratio & Gaining ratio.	B.N.4
4			Ratio Short numerical questions.	B.N.4
5			Ratio- Long numerical questions	B.N.4
6			Ratio- Long numerical questions	B.N.4
7			Ratio- Long numerical questions	B.N.4
8			Proportion- Meaning, rules & kinds.	B.N.4
9			Problems related to Inverse & compound proportion.	B.N.4
10			Problems related to continued & direct proportion	B.N.4
11			Percentage- Rules & numerical.	B.N.1
12			Percentage- Numerical.	B.N.1
13			Percentage- Numerical	B.N.1
14			Commission- Calculation of different types of commission	B.N.1
15			Commission- Practical Problems	B.N.1
16			Commission- Practical Problems	B.N.1
17			Discount & Brokerage- Meaning and different types.	B.N.1
18			Practical problems regarding Discount & brokerage.	B.N.1
19			Practical problems regarding Discount & brokerage.	B.N.1
CO: 1, 4				
LO: Able to solve different problems regarding ratio and percentage.				
20	2	Simultaneous Equations – Meaning,	Simultaneous Equations- Methods of solving equations.	B.N.3
21			Problems relating to Number and Fraction.	B.N.3

22	Characteristics, Types and Calculations. Preparation of invoice.	Problems relating to Age.	B.N.3	
23		Solving Miscellaneous Problems.	B.N.3	
24		Solving Miscellaneous Problems.	B.N.3	
25		Solving Miscellaneous Problems.	B.N.3	
26		Preparation of Invoice- Meaning & advantages.	B.N.3	
27		Objects and methods of preparing Invoice.	B.N.3	
28		Kinds or types of Invoices	B.N.3	
29		Preparation of Invoice- Practical Questions.	B.N.3	
30		Preparation of Invoice- Practical Questions.	B.N.3	
31		Preparation of Invoice- Practical Questions.	B.N.3	
32		Preparation of Invoice- Practical Questions.	B.N.3	
CO: 2,3				
LO: Framing and solving equations, Invoice preparation.				
33	3	Elementary Matrices – Definitions and Calculations, Types of Matrices.	Elementary Matrix- Meaning and Definitions	B.N.4
34			Elementary Matrix- Rules regarding calculations.	B.N.4
35			Types of Matrix.	B.N.4
36			Addition of Matrices.	B.N.4
37			Subtraction of matrices.	B.N.4
38			Multiplication of a matrix – Procedure.	B.N.4
39			Multiplication of a matrix by a Scalar or constant.	B.N.4
40			Solving Numerical questions of Matrix	B.N.4
41			Solving Numerical questions of Matrix	B.N.4
42			Solving Numerical questions of Matrix	B.N.4
43			Word problems regarding Matrices.	B.N.4
44			Word problems regarding Matrices	B.N.4

45			Word problems regarding Matrices	B.N.4
CO: 4				
LO: Conceptual knowledge of Matrices				
46	4	Logarithms and Antilogarithms- Principles and Calculations, Simple and Compound Interest.	Logarithms and their application.	B.N.1
47			Rules of conversion of simple sums into logarithms.	B.N.1
48			Antilogarithm- Method and Rules.	B.N.1
49			Numerical questions of logarithms.	B.N.1
50			Numerical questions of logarithms.	B.N.1
51			Simple Interest- Formulas and Calculation.	B.N.1
52			Simple Interest- Practical Problems.	B.N.1
53			Simple Interest- Practical Problems.	B.N.1
54			Simple Interest- Practical Problems.	B.N.1
55			Compound Interest and Simple interest.	B.N.1
56			Calculation of compound Interest.	B.N.1
57			Calculation of compound Interest - Practical's.	B.N.1
58			Calculation of compound Interest - Practical's.	B.N.1
59			Calculation of compound Interest – Practical's.	B.N.1
60			Calculation of compound Interest - Practical's.	B.N.1
CO: 2				
LO: Able to calculate interest with the help of log table				
61	5	Averages- Simple, Weighted and Statistical Averages, Arithmetic Mean, Harmonic mean, Geometric mean. Profit and loss.	Profit & Loss- Meaning & important Formulae	B.N.5
62			Practical questions related to profit & loss.	B.N.5
63			Practical questions related to profit & loss.	B.N.5
64			Practical questions related to profit & loss.	B.N.5
65			Practical questions related to profit & loss.	B.N.5
66			Calculation of simple averages.	B.N.2

67		Calculation of Weighted averages.	B.N.2
68		Calculation of arithmetic mean.	B.N.2
69		Calculation of harmonic mean	B.N.2
70		Calculation of Geometric mean	B.N.2
CO: 1,4			
LO: Knowledge of statistical averages, finding out profit & loss.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. S.M. Shukla, Business mathematics, Sahitya Bhawan Publication.
2. C. Sancheti, Business Math's, S.Chand Publishing House.
3. Ramesh Mangal, Business mathematics, Satish Printers and publishers.
4. Sanjay Mehta, Business Mathematics, Devi Ahilya Prakashan.
5. M. Raghavachari, Mathematics for Management, tata mcgraw hill publishers.

VII: Notes:

1. There will be individual assignment, presentation and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Business Mathematics			
B.Com. I Year			
Goal: Students develop the ability to work simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.			
Objective: Students gain understanding of the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

Lesson Plan**Subject: Business law****Session: July-June****Class: B. Com. I Year (Pass course)**

I: Objective of course: The objective of this course is to familiarize the student with the basic concept of Indian Contract Act, Negotiable Instrument Act, Consumer Protection Act to develop understanding the legal procedure and legislation.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Identify the fundamental legal principles behind contractual agreement.

CO2: Able to understand basic knowledge of the important business legislation along with relevant case law.

CO3: Help to understand the knowledge of the legal environment & principles in which a consumer & business operates.

CO4: Help student to bind maintain legally enforceable relations and conduct business and non- business transactions

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Indian Contract Act 1872 – Definition, Nature of Contract, Offer & Acceptance, Capacity of parties to Contract, Free Consent and Consideration, Expressly declared Void agreement, Performance of Contract.	Introduction & Meaning of Contract Act 1872	B.N.1
2			Nature & Characteristics of Contract	B.N.1
3			Types Of Contract Essentials of a valid Contract	B.N.2
4			Difference between Agreement & Contract	B.N.2
5			All Contracts are agreements but all agreements are not contract	B.N.1
6			Meaning & characteristics of -proposal or offer.	B. N 2
7			Legal rules as to offer or proposal.	B. N. 3
8			Meaning & legal rules of Valid acceptance.	B.N.3
9			Capacity of Parties to Contract – meaning & competent person.	B. N. 2
10			The rules Governing Judicial Philosophy as to Minors.	B.N.1
11			Persons of unsound mind.	B.N.1
12			Persons Disqualified by Laws.	B.N.1
13			Meaning & definition of Free consent.	B.N.1
14			Meaning & essentials of Coercion.	B.N.3
15			Essentials of Undue Influence.	B.N.3
16			Difference between Coercion & Undue Influence.	B.N.4
17			Elements of Fraud & Silence as Fraud.	B.N.3
18			Ways or Acts of Misrepresentation.	B.N.1
19			Mistake of Law & Mistake of Fact	B.N.1

20			. Meaning & Definitions of Consideration.	B.N.2
21			Contract without consideration is void.	B.N.3
22			Void Agreements – Agreements in Restraint of Trade.	B.N.1
23			Introduction of Performance of contract	B.N.2

CO: 1**LO:** Oldest Act developed Interest and knowledge in basic legal procedure.

24			Modes of Discharge of Contract.	B.N.2
25			Difference between Notation & Alteration.	B.N.2
26			The Doctrine of Frustration.	B.N.3
27			Types of Breach of Contract.	B.N. 1
28			Remedies for Breach of Contract.	B.N.2
29			Meaning & Essential features of contract of Indemnity.	B.N.2
30			Meaning & Kinds of Guarantee.	B.N.1
31			Meaning, definition & essentials of Bailment.	B.N.1
32			Rights & duties of Bailer & Baillie.	B.N.2
33			Meaning & rules of Agency.	B.N.1
34			Agency by Ratification.	B.N.1
35			Relation of Principal & Agent.	B.N. 2
36			Termination of Agency.	B.N.2
37			Meaning & definition of Pledge.	B.N.1
38			Rights and duties of Pledge & Pledger.	B.N.1

CO: 3				
LO: Got basic knowledge of the important business laws along with relevant case laws				
39	3	Negotiable Instrument Act 1881 – Definition , Features ,Promissory note ,Bill of Exchange and Cheques , Holder and Holder in Due Course, Crossing of Cheque, Types of Crossing , Dishonor and Discharge of Negotiable Instrument	Meaning & definition of Negotiable Instrument. .	B.N.2
40			Kinds of Negotiable Instrument.	B.N.2
41			Essentials of Promissory Note.	B.N.4
42			Meaning & essentials of Bill of Exchange.	B.N.4
43			Meaning & essential elements of Cheque.	B.N.3
44			Classification of Negotiable Instrument.	B.N.5
45			Rights & Privileges of Holder in Due Course.	B.N.2
46			Meaning of Crossing of Cheque.	B.N.3
47			Kinds of Crossing of Cheque.	B.N.3
48			Protection to collecting Banker.	B.N.2
49			Provisions regarding Dishonor of Cheque.	B.N.3
50			Meaning of Dishonor of Instruments.	B.N.3
51			Rules as to compensation for dishonor.	B.N.2
52			Modes of discharge.	B.N.3
53			Noting and protest.	B.N.1
CO: 3				
LO: Students can able to use Negotiable Instrument in practical life.				
54	4	Consumer Protection Act 1986- Main	Meaning & definition of Consumer Protection Act 1986.	B.N.3
55			Salient features of Consumer protection act.	B.N.4

56	Provisions, Consumer Disputes, Consumer Disputes Redressal Agencies .MRTP Act – Meaning, scope, Importance and main provisions.	Introduction & procedure of District Forum.	B.N.3
57		Introduction & procedure of National Commission.	B.N.3
58		Introduction & procedure of State Commission.	B.N.3
59		Three –Tier mechanism for promoting consumer rights.	B.N.2
60		Consumer Disputes and redressal agencies.	B.N.2
61		Introduction & objectives of MRTP Act 1969.	B.N.2
62		Extent and commencement of the Act.	B.N.3
63		Non –Applicability of the Act.	B.N.3
64		Main provisions of the Act.	B.N.3

CO: 3**LO:** Learn how to pursue the Consumer rights under Consumer Protection Act .

65	5	Foreign Exchange Management Act 2000 (FEMA) – Objectives and Main Provisions , Introduction to Intellectual Property Right Act – Copyright , Patent and Trademark	Meaning & definition of Foreign Exchange Management Act 2000.	B.N.1
66			Salient features of FEMA.	B.N.2
67			Difference between FERA & FEMA.	B.N.1
68			Meaning & definition of Intellectual property rights.	B.N.3
69			Objectives of IPRs.	B.N.3
70			Enforcement of IPRs.	B.N.3
71			Salient features of The Copyright Act 1957.	B.N.2
72			Assignment of Copyright.	B.N.2
73			Salient features of The Patent Act 1970.	B.N.2
74			Registrar of Patents.	B.N.2
75			Working of Patents.	B.N.2
76			Salient features of Trademark Act 1999	B.N.3

77		Extent & commencement of Trademark.	B.N.3
78		Grounds for refusal of registration of trademark.	B.N.2
CO: 2			
LO: Have knowledge about basic Intellectual property rights.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. R.L. Nolakha, Business Law ,R.B.D.Publications,.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Business Organization	Syllabus discussion, meaning of Business and organization	B.N.-1
2			Definition, concept and characteristics of B.O.	B.N.-1
3			Objectives of B.O.	B.N.-1
4			Significance of Business	B.N.-1
5		Social responsibilities of B.O.	Social responsibilities of B.O.	B.N.-2
6			Promotion of business- meaning of promoter	B.N.-2
7			Types and functions of promoter	B.N.-2
8			Functions of Business Promotion	B.N.-1
9			Factors to be considered for setting up business enterprise	B.N.1
10			Stages of Business Promotion	B.N.-2
11			Stages of Business Promotion	B.N.-2
12		Sole Proprietorship	Sole Proprietorship-meaning, characteristics	B.N.-2
13			Advantages of Sole Proprietorship	B.N.-2
14			Disadvantages of Sole Proprietorship	B.N.-1
15			Importance of Sole Proprietorship	B.N.-1
16		Partnership	Partnership Deed-meaning, registration	B.N.-1
17			Rights and duties of partners	B.N.-2
18			Advantages and disadvantages of partnership	B.N.-1

19			Dissolution of partnership firm	B.N.-2
20			Dissolution of partnership firm	B.N.-1
CO: 1 and2				
LO: Explained the students about the various forms of business organizations.				
21	2	Company	Company-meaning, definition	B.N.-3
22			Characteristics of Company	B.N.-3
23			Private Company-meaning, definition	B.N.-1-
24			Characteristics of Private Company	B.N.1
25			Public Company- meaning, definition	B.N.-2
26			Characteristics of Public Company	B.N.-2
27			Advantages and disadvantages of Public Company	B.N.-2
28			Difference between private and public company	B.N.-2
29			Advantages and disadvantages of company	B.N.-2
30		Co-operative organization	Meaning, need, significance	B.N.-2
31			Merits and demerits of Co-operative organization	B.N.-2
32			Public Enterprises Concept, Meaning	B.N.-2
33			Characteristic of Public Enterprises	B.N. -2
34			Objectives and Significance of Public Enterprises	B.N.-2
35			Business size and location	B.N.-5
36			Plant layout and combination of business	B.N.-5
37		MNCs	Meaning and Introduction	B.N.-5
38			Advantages of Multinational Corporations	B.N.-5
39			Disadvantages of Multinational Corporations	B.N.-5
CO: 2 and3				

LO: Explained them the objectives and significance of plant layout and Business Combination.				
40	3	Communication-	Communication-meaning, definition	B.N.-4
41			Objects and nature of business communication	B.N.-4
42			Importance of business communication to management	B.N.-4
43			Elements of communication and feedback	B.N.-4
44			Dimension and direction of communication	B.N.-4
45			advantages and disadvantages of upward and downward communication0	B.N.-4
46		Means of communication	Means of communication-verbal communication	B.N.-4
47		SWOT Analysis	SWOT Analysis-meaning, parts	B.N.-1
48			SWOT Analysis-Use of SWOT analysis	B.N.-1
49			Importance of SWOT analysis	B.N.-1
50			limitations of SWOT analysis	B.N.-1
51		Feed Back & Directions	Importance of feedback in Organization	
52			Process of Feedback	B.N.-1
53			Directions of Communication	B.N.-4
54			Upward communication	B.N.-4
55			Downward Communication	B.N.-4
CO: 3				
LO: Explained the different dimension and direction of communication				
56	4	Non verbal communication	Non verbal communication-meaning ,functions	B.N.-4
57			Body language and Para language	B.N.-4
58			Body language and Para language	B.N.-4
59		Barriers of communication	Barriers of communication- Physical, organizational	B.N.-4

60			Barriers of communication- Psychological & others	B.N.-4
61			Importance of written communication	B.N.-4
62		Business letter	Business letter-meaning, need	B.N.-4
63		Business letter	Kinds of Business Letter	B.N.-2
64			Essentials of an effective Business Letter	B.N.-2
CO: 3				
LO: Described the channel of communication and barriers in communication

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Concept of Double Entry System	Meaning, Definition & Concept of Double Entry System	B.N.2
2		Accounting Concepts & Conventions	Fundamental Principles of Accounting, Concepts & Conventions.	B.N.2
3		Preparation of Journals	Meaning, Features & Formats, Separate & Compound Journal Entries	B.N.1
4			Numerical – Journal Entries	B.N.1
5		Sub division of Journal	Cash Book – Simple & Double Column, Triple Column, Multi Column Cash Book, Petty Cash Book	B.N.1
6			Purchase Book & Sales Book, Purchase Return & Sales Return Book	B.N.1
7			Bills Receivable & Bills Payable Books _ Numerical	B.N.1
8		Preparation of Ledger	Meaning, Format & Methods of Posting	B.N.1
9			Numerical - Ledger	B.N.1
10		Trial Balance	Meaning, Objectives & Methods, Preparation of Trial Balance	B.N.1
11		Final Accounts – with Adjustments	Meaning & Definitions of Final Accounts, Performa – Trading & P&L Account, Balance Sheet	B.N.2
12			Adjustments in Final Accounts, Numerical – Final Accounts	B.N.2
13			Numerical – Final Accounts	B.N.2
14			Numerical – Final Accounts	B.N.2
15			Numerical – Final Accounts	B.N.2
CO: 1				
LO: To understand the Concept & Conventions of Double Entry System and Accounting. To record the basic journal entries, to know how the accounting entries are posted in books & preparation of Trial Balance.				
16	2	Introduction to IAS	Introduction to IAS, Definition & Terminology	B.N.3
17		Detail Study of AS-6	Introduction to AS-6 (Revised) Depreciation Accounting – Terminology, Explanation & Disclosure	B.N.3
18		Detail Study of AS-10	Introduction to AS-10 (Accounting for Fixed Assets)– Definition, Explanation & Disclosure	B.N.3
19		Branch Accounts	Definition & Importance of Branch Accounts, Methods for preparing Branch Accounts	B.N.2
20			Numerical – Branch Accounts	B.N.2
21			Numerical – Branch Accounts	B.N.2
22			Numerical – Branch Accounts, Conversion of Trial	B.N.2

		Balance of Foreign Branch	
23		Numerical – Foreign Branch	B.N.2
24	Departmental Accounts	Meaning, Objectives, Advantages of Departmental Accounts, Departmental Trading & P&L A/c	B.N.2
25		Inter Departmental Transfers – Numerical	B.N.2
26		Departmental Accounts - Numerical	B.N.2
27		Calculation of Closing Stock, Calculation of Unrealized profit on Stock - Numerical	B.N.2

CO: 2

LO: To understand how to Prepare the final accounts and making adjustment. To understand the purpose of Accounting Standards and detail study of AS-6 & AS-10. To understand the types of Branch and methods of Branch accounting and departmental accounting.

28	3	Royalty Accounts	Meaning & Definition of Royalty, Terminology relating to Royalty	B.N.3
29			Journal Entries in the Books of Lessee & Lessor	B.N.3
30			Royalty Accounts - Numerical	B.N.3
31			Royalty Accounts – Numerical	B.N.3
32			Patent Royalty – Journal Entries & Ledger Accounts, Copyright Royalty - Numerical	B.N.3
33		Accounting of Non Profit Making Organization	Meaning, Definition of Nonprofit Organizations, Receipts & Payment A/c and Income & Expenditure A/c. Rules Regarding Conversion.	B.N.1
34			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
35			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
36			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1
37			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1

CO: 3

LO: Able to maintain royalty and Non Profit Organization.

38	4	Joint Venture Accounts	Meaning, Characteristics, Need, Merits & Demerits of Joint venture	B.N.3
39			Numerical - Joint Venture Accounts	B.N.3
40			Numerical - Joint Venture Accounts	B.N.3
41			Numerical - Joint Venture Accounts	B.N.3
42		Consignment	Meaning, Terminology, Characteristics, Need, Merits & Demerits of Consignment.	B.N.3

43			Accounts to be open in the books of Consignor and Consignee.	B.N.3	
44			Numerical – Consignment Accounts	B.N.3	
45			Numerical – Consignment Accounts	B.N.3	
46			Numerical – Consignment Accounts	B.N.3	
47			Numerical – Consignment Accounts	B.N.3	
48			Numerical – Consignment Accounts	B.N.3	
49			Numerical – Consignment Accounts	B.N.3	
50		Investment Account	Meaning of Investment, Types of Interest and Type of Securities	B.N.3	
51			Accounting for Investment Account, Valuation of Closing Investment	B.N.3	
52			Numerical – Investment Accounts	B.N.3	
53			Numerical – Investment Accounts	B.N.3	
54			Numerical – Investment Accounts	B.N.3	
55			Numerical – Investment Accounts	B.N.3	
CO: 3					
LO: Recording entries of joint venture a/c & Able to maintain joint venture a/c, Consignment & Investment a/c.					
56	5	Dissolution of Partnership	Meaning of Dissolution, entries in Dissolved Firm – Numerical	B.N.4	
57			Dissolution of Firm – Numerical	B.N.4	
58			Dissolution of Firm – Numerical	B.N.4	
59			Dissolution of Firm – Numerical	B.N.4	
60			Dissolution of Firm – Numerical	B.N.4	
61			Dissolution of Firm – Numerical	B.N.4	
62		Insolvency of Partner	Meaning of Insolvency, entries in Insolvent firm – Numerical	B.N.4	
63			Garner v/s Murray Rule	B.N.4	
64			Garner v/s Murray Rule – Numerical	B.N.4	
65			Garner v/s Murray Rule – Numerical	B.N.4	
66			Gradual realization of assets & distribution of cash accordingly or Piecemeal or Inter distribution	B.N.4	
67			Proportionate Capital Method - Numerical	B.N.4	
68			Maximum Loss Method - Numerical	B.N.4	
69		Amalgamation of	Meaning of Amalgamation, Entries in the books of Old	B.N.4	

	Partnership Firms	& New Firm	
70		Numerical – Amalgamation of Partnership Firm	B.N.4
71		Numerical – Amalgamation of Partnership Firm	B.N.4
72		Numerical – Amalgamation of Partnership Firm	B.N.4
73		Numerical – Amalgamation of Partnership Firm	B.N.4
74	Conversion of firm to company.	Meaning of Conversion of Partnership Firm into Joint Stock Company, Meaning of Purchase Consideration & Methods	B.N.4
75		Allocation of Purchase Consideration among partner's, Entries in the book of vendor's firm & Purchasing Company	B.N.4
76		Numerical – Conversion of Partnership Firm into Company	B.N.4
77		Numerical – Conversion of Partnership Firm into Company	B.N.4
78		Numerical – Conversion of Partnership Firm into Company	B.N.4
CO: 4			
LO: Easily examine the dissolution of partnership. Easily can prepare the journal entries of amalgamations & Conversion of partnership firm into Joint Stock Company.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Financial Accounting			
B.Com. I Year Pass Courses			
Goal : Explain the purpose of double entry system to understanding the accounting system properly. Preparation of trial balance, ratification of errors and final accounts. To understand the aspects of Accounting Standards in modern scenario Specially AS-6 & AS-10. To familiarize the concept of Branch account and Scope of departmental accounting. To understand the concept of royalty. To deputize the concept of joint venture and Investment. Getting acquainted with the consignment accounts. Enable the students to understand partnership account from dissolution including Insolvency to Amalgamation of firms & Conversion of firm into Company.			
Objective: The Objective of this Course is to acquaint the Students with the basic Concept of Financial Accounting and further to develop understanding of accounting for managers.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Financial, Cost, and Management Accounting and further to develop understanding of Accounting for Managers for Decision Making.	% Students having the basic concept of Financial, Cost, and Management Accounting and understanding of Accounting for Managers for Decision Making.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Exam		Total 50	Final Internal Marks 10
Presentation 10	GD 10	Assignment 10	20	Presentation 10		

Department of Commerce, IPS ACADEMY, INDORE

Lesson Plan

Subject: Fundamental of computer and PC-Software

Session: July-June

Class: BCOM- I YEAR (CA)

I: Objective of course: The objective of this course is to review the basic concepts and functional knowledge in the field of computer application and to expose the students to computer application in the field of business

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

- CO1 This course introduces the concepts of computer fundamental & their applications for the efficient use of office technology.
- CO2 Demonstrate the basic technicalities of creating Word documents, Create and design a spreadsheet for general office.
- CO3 Demonstrate the basic technicalities of creating a PowerPoint presentation.
- CO4 Basic knowledge of MIS and Internet.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	MS-Introduction to computer system	Block diagram, components of compter	B.N.1
2			Input devices, Output devices	B.N.1
3			CPU ,memory	B.N.1
4			Types of software	B.N.1
5			Operating system	B.N.1
6			Utility programs	B.N.1
7			Programming languages	B.N.1
8			Compiler, Interpreter, Assembler	B.N.1
CO: 1				
LO: Students will be able to learn computer fundamentals and types of software and programming languages.				
9	2	Operating system	Definition, functions of OS	B.N.7
10			Types of OS	B.N.7
11			Elementary idea of various common OS	B.N.7
12		MS-Windows	Introduction and features, desktop, taskbar	B.N.7
13			Files and folders, start menu operations	B.N.7
14			My computer, network neighborhood, recycle bin	B.N.7
15			Windows explorer , creating, copying, moving, deleting files	B.N.7
16			Setting wall paper, changing mouse pointer	B.N.7
17			Notepad, paint	B.N.7
CO: 2				
LO: Students will be able to learn operating system and its types				
18	3	Introduction To MS-Word	Advantage of word processing, creating, saving and editing a document	B.N.6
19			Selecting, deleting, replacing text copy text to	B.N.6

			another file	
20			Insert, formatting text and paragraph, using font	B.N.6
21			Dialog box, paragraph formatting using bullets and numbers	B.N.6
22			Use of smart art, spelling checking, line spacing	B.N.6
24			Margins, space before and after paragraph ribbon	B.N.6
25			Mail merge	B.N.6
26		Introduction To MS- Excel	Entering information, formula	B.N.6
27			Inserting and deleting rows and columns	B.N.6
28			Excel function	B.N.6
29			Validation, chart creation	B.N.6
30			Goal Seek, Scenario	B.N.6
31		MS-Power point	Creating, Manipulating & Enhancing Slides,	B.N.6
32			Organizational Charts, Excel Charts,	B.N.6
33			Word Art, Layering Art Objects	B.N.6
34			Animations And Sounds,	B.N.6
35			Inserting Animated Pictures	B.N.6
36			Accessing Through Object,	B.N.6
37			Inserting Recorded Sound Effect Or In-Built Sound Effect	B.N.6

CO:3

LO: Students will be able to learn office automation using MS-word, spread sheet creation using MS- excel, create power point presentation

38	4	Decision Support System	Importance, limitation, characteristics of DSS	B.N.8
39			Decision Support and structure of Decision making	B.N.8
40			Decision Support and repetitiveness of Decisions, DSS users	B.N.8

41		Expert System	Support for decision making phases, support for intelligence phase	B.N.8
42			Support for design phase, support for choice phase	B.N.8
43			Decision Support and alternative concepts of decision making	B.N.8
44		Management Information System	Introduction, role of IT, MIS characteristics	B.N.8
45			Application areas, business and technology trends-specialization	B.N.8
46			Management by methodology, decentralization, internationalization	B.N.8

CO:4

LO: Students will be able to learn concept of DSS and MIS

47		Internet	Meaning, definition, history of Internet	B.N.4
48			Internet protocols, TCP/IP	B.N.4
49			FTP	B.N.4
50			HTTP, URL	B.N.4
51			Internet browsers, WWW consortium	B.N.4
52			Search engines	B.N.4
53			Introduction to Internet security, network security	B.N.4
54			Firewall, cryptography, password	B.N.4
55			Biometrics, digital signature, digital certificate	B.N.4
56			Business application of internet, e-mail	B.N.4
57			Intranet, extranet, telnet	B.N.4
58			e-ticketing, chatting	B.N.4
59		E-banking and its benefits	Smart card, E-cash, stock trading	B.N.8

60			E-booking, E-business model	B.N.8
61			Do-it-yourself model, made-to-order model	B.N.8
62			Information service model, emerging hybrid model	B.N.8
CO:4				
LO: Students will be able to learn concept Internet and E-banking				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Final Accounts of Companies (Including calculation of managerial remuneration) Declaration of Dividends, Profit & Loss appropriation account & disposal of profits, calculation of pre & post incorporation profit or loss.	Introduction & meaning of Final Accounts or Annual Accounts of companies.	B.N.1
2			General Instructions for preparation of Balance sheet.	B.N.1
3			General instructions for preparation of Statement of Profit & Loss.	B.N.1
4			Practical Questions of Final Accounts of Companies.	B.N.1
5			Practical Questions of Final Accounts of Companies	B.N.1
6			Remuneration to the Directors and Managing Directors.	B.N.1
7			Determination of net profit for calculating managerial remuneration.	B.N.1
8			Practical Questions of Managerial remuneration.	B.N.1
9			Practical Questions of Managerial remuneration	B.N.1
10			Introduction & meaning of Dividend and divisible profit.	B.N.1
11			Procedure of declaration of Dividend.	B.N.1
12			Practical Questions .	B.N.1
13			Appropriation of profit and loss.	B.N.1
14			Procedure of disposal of profit.	B.N.1
15			Practical Questions.	B.N.1
16			Method of finding out Profit or loss prior to or subsequent to Incorporation.	B.N.1

17		Allocation of Expenses.	B.N.1
18		Practical Questions of Apportionment of profit.	B.N.1
19		Practical Questions based on statement of P&l	B.N.1
20		Practical Questions of Division of profit on monthly average basis.	B.N.1
21		Preparation of Balance Sheet .	B.N.1

Co: 2

Lo: Can able to calculate managerial remuneration & know the difference between capital and revenue profit.

22	2	Valuation of goodwill & shares, Methods of valuation, accounts of public utility companies (Electricity company)	Meaning and definition of Goodwill.	B.N. 4
23			Nature and types of Goodwill.	B.N. 4
24			Factors affecting the value of goodwill.	B.N. 4
25			Average profit method	B.N. 4
26			Practical Questions of Average profit method.	B.N. 4
27			Practical Questions of Average profit method	B.N. 4
28			Calculation of Weighted Average profit method.	B.N. 4
29			Practical Questions .	B.N. 4
30			Super profit method .	B.N. 4
31			Practical Questions of Super profit method.	B.N. 4
32			Practical Questions of Average profit method	B.N. 4
33			Calculation of Capitalisation method.	B.N. 4
34			Practical Questions .	B.N. 4
35			Annuity method for valuation of goodwill.	B.N. 4

36			Practical Questions.	B.N. 4		
37			Meaning and necessity of Valuation of Shares.	B.N. 4		
38			Factors affecting value of shares.	B.N. 4		
39			Net Asset or Asset valuation method .	B.N. 4		
40			Practical Questions.	B.N. 4		
41			Practical Questions.	B.N. 4		
42			Yield or Income Valuation Method.	B.N. 4		
44			Practical Questions	B.N. 4		
45			Calculation of Fair Value Method.	B.N. 4		
46			Practical Questions.	B.N. 4		
47			Practical Questions of Earning Per Share Method.	B.N. 4		
48			Meaning of Public Utility Company & double Account System.	B.N. 4		
49			General Balance Sheet.	B.N. 4		
50			Practical Questions.	B.N. 3		
51			Practical Questions	B.N. 3		
52			Practical Questions.	B.N. 3		
CO: 3						
LO: Knowledge of super profit, capitalization of profit, annuity method.						
53	3	Meaning of Holding & Subsidiary company	Meaning & Formation of Holding Company.	B.N.1		
54			Accounting Standards and Consolidated Financial Statements.	B.N.1		

55		,Preparation of consolidated balance sheet of a holding company with one subsidiary company ,Accounting for liquidation of companies	Preparation of Consolidated Balance Sheet.	B.N.1
56			Calculation of Goodwill / Capital Reserve,Minority Interest.	B.N.1
57			Practical Questions.	B.N.1
58			Practical Questions	B.N.1
59			Practical Questions	B.N.1
60			Modes of Winding –Up.	B.N.1
61			Liquidator’s Statement of account.	B.N.1
62			Practical Questions.	B.N.1
63			Practical Questions.	B.N.1
CO:4				
LO Fundamental knowledge of Holding Companies and their working style.				
64	4	Accounting for merger as par AS 14 ,Internal reconstruction of a company as par Indian accounting standard 14 (Excluding intercompany holdings and external reconstruction scheme)	.Definition and types of Amalgamation.	B.N.1
65			Accounting standard -14 and Amalgamation.	B.N.1
66			Determination of Purchase Consideration.	B.N.1
67			Journal Entries in the books of Transferor Company.	B.N.1
68			Journal Entries in the books of Transferee company.	B.N.1
69			Necessary Ledger Accounts.	B.N.1
70			Practical Questions.	B.N.2
71			Practical Questions.	B.N.2
72			Practical Questions.	B.N.2
73			Practical Questions.	B.N.2
74			Introduction of Internal Reconstruction of Companies.	B.N.1
75			Journal entries related to Internal Reconstruction.	B.N.1

76			Practical Questions.	B.N.1
77			Practical Questions.	B.N.1
CO: 4				
LO: Practical knowledge of merger & reconstruction				
78	5	Accounting of banking companies ,Accounts of Insurance companies with claim settlement	Functions and services of a Modern Bank	B.N.1
79			New form of Profit & Loss Account & Balance sheet.	B.N.1
80			Practical Questions.	B.N.1
81			Practical Questions.	B.N.1
82			Practical Questions.	B.N.1
83			Accounts of Insurance Companies.	
84			Practical Questions.	B.N.1
CO: 1				
LO: Understand the accounting procedure of banking companies and Insurance companies.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. S.M. Shukla, Corporate Accounting, Sahitya Bhawan Publication.
2. S.N. Maheshwari, Corporate Accounting, Vikas Publishing house.
3. K.K. Verma, Corporate Accounting, Excel books.
4. Sanjay Mehta, Corporate Accounting, Devi Ahilya Prakashan.

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment
Subject: Corporate Accounting
B.Com. II Year (Pass Course)
Goal : Students develop the ability to understand the accounting procedure of Banking Companies and Insurance

Company , Final Accounts of Companies and distribution of Profit & Loss of Pre Incorporation and Post Incorporation ,methods for valuation of goodwill and shares

Objective: The main object of the subject is to enable the students to develop awareness and curiosity about issue of shares ,Debentures, Final accounts , liquidation of companies etc.in conformity with the latest provisions of the Companies Act ,2013

8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Corporate Accounting.	% Students having the desirable understanding of Corporate Accounting.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Assessment	Total 50	Final Internal Marks 10
Presentation 10	GD 10	Assignment 10	20		

Department of Commerce, IPS Academy , INDORE**Lesson Plan****Subject: Cost Accounting****Session: July-June****Class: - B.Com II yr.**

I: Objective of course: to objectives of this course is to acquaint the students with the basic concept of cost accounting, Unit costing, contract, process & marginal costing.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Explain the concept and role of cost accounting in the business management of manufacturing and non-manufacturing companies.

CO2: Define the unit costing, Contract, operating & Processing cost and their impact on value creation in the manufacturing and non-manufacturing companies.

CO3: Depth study of cost accounting systems and accumulation procedures and a search into the elements of material, labor and factory overhead costs.

CO4: Marginal costing and used for decision making and performance evaluation.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Introduction of Cost accounting	Cost Meaning, concept	B.N.-2
2			Classification, Elements of Cost	B.N.-2
3			Nature & Importance of	B.N.-2
4		Material Cost Control	Cost , Material costing.	B.N.-2
5			Methods of Valuation of Material issued.	B.N.-2&1
6			Concept and material control and its techniques	B.N.-2
7			Particle Question of Material Control	B.N.-2
8			Particle Question of Material Control	B.N.-2
9			Particle Question of Material Control	B.N.-2
10			Labour costing	Labour costing Meaning, concept, their techniques
11		Particle Question of Labour costing		B.N.-2
12		Particle Question of Labour costing		B.N.-2
13		Particle Question of Labour costing		B.N.-2
14		Wage Payment	Wages Payment and their concept	B.N.-2
15			Methods of Wages Payment	B.N.-2
16			Particle Question of Wages Payment	B.N.-2
17			Particle Question of Wages Payment	B.N.-2
18			Particle Question of Wages Payment	B.N.-2
CO: 1 &3				

LO: To express the place and role of cost accounting in the material and material Labour costing manufacturing business

19	2	Unit Costing	Meaning ,objectives of unit or output costing	B.N.-2
20			Methods of determining unit cost	B.N.-2
21			Types of Cost sheet	B.N.-2
22			Preparation of Cost sheet and Practical problem of cost sheet	B.N.-2
23			Practical problem of cost sheet	B.N.-2
24			Practical problem of cost sheet	B.N.-3
25			Practical problem of Absorption overheads rate	B.N.-2
26			Practical problem of cost but no change in past percentage	B.N.-3
27			statement of cost (Including calculation of tender price)	B.N.-3
28			Practical problem of tender price	B.N.-2
29			Practical problem of tender price	B.N.-2
30		Machine hour rate method	Overheads costing meaning and process of of machinery hour rate	B.N.-2
31			Overheads costing (Including calculation of machinery hour rate)	B.N.-2
32			Practical problem of Machine hour rate	B.N.-2
33			Practical problem of Machine hour rate	B.N.-3
34			Practical problem of Machine hour rate	B.N.-1
35			Practical problem of Machine hour rate	B.N.-7

CO: 2

LO: Provide unit costing, cost accounting and overheads costing importance their impact on business

36	3	Contract costing	Contract meaning , features & contract ledgers	B.N.-2
37			Specimen of contract account and Explanation of various shown in debit & credit sides of contract a/c	B.N.-2
38			Practical problem of contract costing	B.N.-2

39			Practical problem of contract costing	B.N.-7
40			Practical problem of Incomplete contract costing	B.N.-2
41			Practical problem of work certification contract costing	B.N.-2
42			Practical problem of cost of work uncertified	B.N.-3
43			Practical problem of contract a/c based on Trial Balance	B.N.-7
44			Practical problem of Accounting standard-7	B.N.-2
45				
46	Job Costing		Procedure of Job costing	B.N.-2
47			Practical problem of Job Costing	B.N.-3
48	Operating Costing		Meaning , scope of operating costing	B.N.-2
48			Transport operating costing & Practical problem of operating costing	B.N.-2
49			Practical problem of power house Operating costing	B.N.-2
50			Practical problem of power house Operating costing	B.N.-3
51			Practical problem of power house Operating costing	B.N.-7
52			Practical problem of hotel Operating costing	B.N.-3
53			Practical problem of hotel Operating costing	B.N.-2
54			Practical problem of hotel Operating costing	B.N.-2
55			Practical problem of Hospital Operating costing	B.N.-3
56			Practical problem of Hospital Operating costing	B.N.-3

57			Practical problem of Cinema Operating costing	B.N.-2
58			Practical problem of Cinema Operating costing	B.N.-7
59			Practical problem of Cinema Operating costing	B.N.-3
CO: 1 & 3				
LO: To Differentiate methods of Contract, Job costing of production and Operating cost is help in business				
60	5	Process costing	Process costing –meaning & characteristics	B.N.-2
61			Distinction between job costing & process costing	B.N.-2
62			Practical problem of Process costing	B.N.-2
63			Practical problem of Process costing	B.N.-2
64			Practical problem of normal loss having realizable value of scrap	B.N.-3
65			Practical problem of Abnormal wastage Process costing	B.N.-7
66			Practical problem of Abnormal Gain Process costing	B.N.-7
67			Practical problem of Process having opening & closing stocks	B.N.-7
68				Practical problem of Process costing
69		Reconciliation of Cost	Meaning, objectives ,process of Reconciliation	B.N.-2
70			Practical problems of Reconciliation	B.N.-2
71			Practical problems of Reconciliation statement	B.N.-2
72			Practical problems of Reconciliation statement when total cost & cost per unit	B.N.-2
73			Practical problems of Reconciliation statement when total cost & cost per unit	B.N.-2
CO: 2				
LO: To Interpret the impact of the Process costing & reconciliation of cost & financial Accounts.				
74	5	Marginal Costing	Marginal Costing –meaning & concept, Profit – Volume Ratio,	B.N.-2

75		Practical problems of Profit –Volume Ratio, Break Even Point	B.N.-2
76		Practical problems of Profit –Volume Ratio, Break Even Point	B.N.-2
77		Practical problems of Margin of safety , Application of Break –Even Analysis	B.N.-7
78		Practical problems of Standard costing and various analysis (material and Labour only)	B.N.-7
CO:4			
LO: To provide differentiate methods of calculating marginal costing			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

IPS ACADEMY, Dept Of Commerce INDORE (M.P.)
IPS ACADEMY, INDORE
Lesson Plan

Subject: DBMS

Session: July-June

Class: BCOM(CA) – II Year

I: Objective of course: The objective of this course is to introduce the concept of Database Management System.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

- CO1 To acquire the basic concepts and understand the applications of database system.
- CO2 To construct an Entity-Relationship (E-R) model from specifications and to transform to relational model.
- CO3 To construct SQL queries to perform CRUD operations on database. (Create, Retrieve, Update, Delete)
- CO4 Understand and apply database normalization principles.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	2		2	2		3	
CO 2			1				2	
CO 3	2	2					2	
CO 4			1				2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic of Database System	Introduction to Different storage system, Comparative study of manual storage.	B.N. 1
2			File storage and dbms,data,database,	
3		View of data, data models, Overall system structure	Advantage disadvantage of dbms,data development process.	B.N.1
4			Data models: object oriented model	B.N.2
5			object based, record based	
6			Hierarchical and physical data model,	
7			Relational, network data model	B.N.2
CO: 1				
LO: Student will learn to understand what a database is, about different types of databases, and why they are valuable. How a database system differs from a file system. Why data models are important.				
8	2	Entity Relationship Model	E-r model: entity, entity set,	B.N.1
9			Relationship & their types	B.N.1
10			mapping constraints	B.N.2
11			Extended E-R features:	B.N.2
12			generalization,	
13			specialization	B.N.2
14			Aggregation ,	
15			E-R diagram	
CO: 2				
LO: Students will be able to understand how relationships between entities are defined, and how such relationships are incorporated into the database design process.				
16	3	Structured Query Language	Introduction to database language: SQL function limitation of sql,	B.N.2
17			Component of sql(DDL,DML,DCL,TCL with syntax, e.g.)	B.N.2
18			Practical DDL command	
19			Practical DML,DCL command	B.N.4
20			Sql query	
21			Data types of sql	
22			Introduction to different operator,	
23			Set operator, aggregate function.	B.N.4

CO: 3

LO: Students will learn the basic commands and functions of SQL. How to use SQL to query a database to extract useful information.

24	4	Relational Database Design	Advanced sql:review of sql,concept of group by,	B.N.2
25			Having, order by clause,	
26			Nested query	
27			Join & its types	B.N.3
28			Different function of sql,	
29			Numeric,data,data type conversion	

CO: 3

LO: Students will learn about the relational set operators. How to create and use updatable views.

30	5	Normalization	Normalization: Introduction to normalization	B.N. 2
31			Need of normalization,	B.N. 2
32			Normal form	B.N. 3
33			Normalization using partial dependency,	
34			Using full dependency,	
35			Fully functional dependency,	
36			Multivalued dependency,	
37			Transitive dependency,	B.N. 3
38			Join dependency,	

CO:4

LO: Student will understand what normalization is and what role it plays in the database design process. How normal forms can be transformed from lower normal forms to higher normal forms.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment**Subject: DBMS****BCOM 2nd Year**

Goal: database management system is to provide a way to store and retrieve database information that is convenient and efficient. Management of data involves both defining **structure** for storage of information and providing mechanism for manipulation of information.

Objective: Student understand the database design and creation . Emphasis is on data dictionaries, normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms.

8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Internet, Internet services and E-mail	Evolution, concept and growth of Internet, ISP and different ISP in India	B.N. 1
2			Types of connectivity: Dial-up, leased line, broadband, RF, VSAT etc	B.N. 1
3			Methods of sharing of internet connection, proxy server	B.N. 1
4			Usenet, Gopher, WAIS, Archie, Veronica, IRC, Search engine	B.N. 1
5			Web concept & other protocols	B.N. 1
6			E-mail	B.N. 1
CO: 1				
LO: Students aware about basic building blocks of internet, its services and its application.				
7	2	Introduction to E-commerce	Emergence of Internet, Commercial use of internet	B.N. 3
8			Emergence of World wide web	B.N. 3
9			Advantages and disadvantages of E-Commerce	B.N. 3
10			Transition to E-Commerce in India, E-Commerce opportunities for industries	B.N. 3
CO: 4				
LO: To understand how internet should be commercialized Determine the effects of ecommerce in various fields.				
11	3	Models	Business models for E-Commerce	B.N. 3
12			Models based on relationship of transaction parties	B.N. 3
13			Models based on relationship of transaction types	B.N. 3
CO: 2				
LO: Analyze the different business models of ecommerce based on transaction parties and types.				
14	4	E-Marketing	Identifying web presence goals	B.N. 3

15		versus Traditional Marketing	Browsing behavior model, online marketing, E- advertising	B.N. 3
16			Internet marketing trends, E-branding and E- marketing strategies	B.N. 3
CO: 2				
LO: To understand traditional and web marketing approaches and elements of branding, marketing trends and behavior				
17	5	E-security, E- payment system	Information system security, security on Internet	B.N. 3
18			E business risk management issue , Information security in India	B.N. 3
19			Digital payment requirement, digital token based e- payment system	B.N. 3
20			Properties of electronic cash, risk and e-payment system and designing e-payment system	B.N. 3
21			Secure business, web store ,online payment, internet banking	B.N. 3
22			E-commerce security issue, cryptography, digital signature and authentication protocol	B.N. 3
23			Digital certificates, online security, secure electronic transaction(SET)	B.N. 3
CO: 3				
LO: Describe E-Commerce payment and security systems to handle data fruitfully				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Department of Commerce, IPS Academy , INDORE

Lesson Plan

Subject: English

Session: July-June

Class : B.Com II Year

I: Objective of course:

The objective of this course is to facilitate language learning which is a mean or verbal medium for expressing or communicating ideas, feelings, experiences and realization. The aim of the course is to impart the students the four basic skills of language-speaking, writing, reading and listening that are depending on the knowledge of grammar and correct pronunciation, correct spellings, correct reading and listening.

II: Examination:

The faculty member will award internal marks out of 5 and the bifurcation is mentioned in the scheme of internal marks. The end year examination will be worth 30 marks having theory and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	3	3	9
C	Long Answer Types of Questions	4	4	16
				30

III: Course Outcomes (CO):

CO1. The course of English allows student to develop new ideas and ethical view point. Studying English course enriches their LSWR skills and it will help students to update and increase their vocabulary and sentence formation pertaining to all walks of life.

CO2. Students will be able to form the sentence grammatically correct by following the rules and concepts of grammar pertaining to tenses, articles, nouns, pronoun, determiners and verbs.

CO3. Students will be able to comprehend and write an essay in a proper structure –Introduction, main body and the conclusion. They will be able to compose different types of formal and informal letters. While writing letter students adopt different strategies so that the letter serves the intended purpose and is not misunderstood.

CO4. Students will be able to achieve the goal of perfect translation by getting proficiency at both the source language and the target language. They differentiate between sense translation and literal translation.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
2	I	The Poem "Tree" composed by Tina Morris	Explanation of the Poem, Poet by focusing on the imp of preservation and conservation of nature.	B.NO 1
3			Discussion of textual Questions and answers	B.NO 1
4		Night of the Scorpion	Explanation of the poem and poet by highlighting superstitious belief and unconditional love of rural India.	B.NO 1
5			Discussion and explanation of exercises related to the poem	B.NO 1
6		Idgah: Premchand(translated by Khushwant Singh)	Discussion about the author and then explanation of the story by realizing the various aspects of emotions like love, motherhood, care, sacrifice, happiness and kindness between grandson and grandmother	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		Letter to God by G.L. Swanteh(translated by Donald A. Yates)	Discussion about the author and then explanation of the story by instilling belief in the significance of faith that develops confidence in students.	B.NO 1
9			Discussion of textual questions and answers	B.NO 1
10		The humorous story "My Bank Account" by Stephen Leacock	Discussion about the author and then explaining the story by exposing of witty article by the most popular	B.NO 1

			mockers and article writer.	
11			Discussion of textual questions and answers	B.NO 1
12		The short story “God Sees the Truth, But Wait” by Leo Tolstoy	Discussion about the author and then explaining the story by enriching students’ spiritual quotient	B.NO 1
13			Discussion of exercises related to the short story	B.NO 1
CO1				
LO 1- The students will gain good amount of knowledge of English language and Literature by studying various prose, poetry and story. They will also comprehend about allusions, references, poets, writers and stories etc.				
14	II	Idioms, proverbs and phrasal verbs	a list of appropriate idioms, proverbs and phrasal verbs	B.NO 2,3
15		Tenses	Rules of Tenses and their uses	B.NO 4
16		Prepositions	The importance of correct usage of Preposition	B.NO 2
17		Determiners and verbs	Types of Determiners	B.NO 3,4
18		Articles	Definite and Indefinite Articles	B.NO 2
CO2				
LO2 Students will get to know nouns, pronouns and their types and learn in detail about the function of verbs and their placement in a sentence. They will be able to gain the knowledge of prepositions and articles and their usages.				
17	III	Short Essays on given topics	Formal and Informal essays , some points in writing essays	B.NO 3
18		Formal Letters	The latest format of the formal letter and practice letter	B.NO 3
19		Informal Letters	The latest format of the informal letter and practice letter	B.NO 3
CO3				
LO3 Students will be able to figure out the relevance and importance of essay writing. They will be understand the characteristic features of an essay and learn about the different stages in the writing of an essay. Students will be able to understand the various elements of business letters. They learn the different layouts of a letter, such as indented layout, semi-block layout and full block layout.				
20	IV	Translation of sentences	Translation of passage English to Hindi and Hindi to English	B.NO 2
21			Some passages are given for translation	B.NO 2
CO4				
LO4 Students will be able to understand that translation is a significant vehicle in cross-cultural, cross-lingual and cross-national civilization. They will be able comprehend written and oral translation.				
23	V	Curriculum- vitae	The format of CV	B.NO 3
24		Design of Resume	The points are given in preparing impressive C.V.	B.NO 3
CO4				
Students will be able to understand the nature and importance of employment communication. They will be able to learn about resume design and describe three acceptable resume styles: chronological, functional and combination. They will be able to know how to write a persuasive resume.

Lesson Plan**Subject: Environmental Studies****Session: July-June****Class: II Year**

I: Objective of course: This subject is concerned with the environment pollution, environmental degradation and understands those aspects of human behavior which are more directly related to man's interaction with bio-physical environment.

II: Examination:

The faculty members will award internal marks out of 5 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 25 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	0.5	2.5
B	Short Answer Types of Questions	5	1.5	7.5
C	Long Answer Types of Questions	5	3	15
				25

III: Course Outcomes (CO):

CO1: Understand the natural environment as a system and how human enterprise affects that system.

CO2: An environmental studies course advances a student's knowledge in a variety of current issues such as energy, pollution and environmental awareness.

CO3: Course covers how to evaluate and address environmental problems and environmental studies Include forest ecology, energy efficiency in buildings. Sustainable practices, harnessing eco- friendly power sources and political ecology.

CO4: Object of course is to address the role of regulation on environment, how social & economical conditions affect ecological issues & major environmental challenges.

Lesson Plan**Subject: Principles of Statistics****Session: July-June****Class: B.Com. II year Pass Courses**

I: Objective of course: Objective of course is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses. The central objective is to equip students with consequently requisite quantitative skills that they can employ and build on in flexible ways.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: be statistically and numerically literate.

CO2: have statistical concepts such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data.

CO3: be able to independently read statistical literature of various types, including survey articles, scholarly books, and online sources.

CO4: be able independently to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc.

CO: 1, 4						
LO: Able to calculate measurement of central tendency.						
33	3	Dispersion and skewness. Analysis of time series- Meaning, importance, components, Decomposition of time series, Measurement of long term trends, measurement of cyclical and irregular fluctuations.	Dispersion- meaning and methods of measuring.	B.N.1		
34			Methods of limits: Range, I.Q.R. & percentile range.	B.N.1		
35			Quartile deviation or semi –inter-quartile range.	B.N.1		
36			Mean deviation.	B.N.1		
37			Standard deviation.	B.N.1		
38			Coefficient of Mean deviation & Standard deviation.	B.N.1		
39			Skewness and its measures.	B.N.1		
40			Computation of karl Pearson’s coefficient of skewness.	B.N.1		
41			Computation of Bowley’s coefficient of skewness.	B.N.1		
42			Analysis of time Series.	B.N.1		
43			Secular Trend or Long term trend.	B.N.1		

44			Seasonal Variations.	B.N.1
45			Cyclical variations.	B.N.1
46			Irregular or Random Variations.	B.N.1
47			Practical problems regarding trend analysis.	B.N.1
CO: 4				
LO: Fundamental concepts of dispersion and skewness, measurement of different trends.				
48	4	Correlation- Meaning, Definitions, Types and degree of correlation, methods of correlation, regression analysis- meaning, uses, difference between correlation and regression, linear regression, regression equations, Calculation of coefficient of regression.	Correlation- meaning, importance & types.	B.N.3
49			Degree of coorelation.	B.N.3
50			Methods of determining correlation.	B.N.3
51			Karl Pearson’s method of correlation.	B.N.3
52			Spearman’s Rank difference method.	B.N.3
53			Concurrent deviation method.	B.N.3
54			Probable error.	B.N.3
55			Standard error.	B.N.3
56			Least squares method.	B.N.3
57			Correlation and Regression.	B.N.3
58			Coefficient of correlation with the help of regression coefficients.	B.N.3
59			Coefficient of correlation with the help of regression coefficients.	B.N.3
60			Computation of regression equations.	B.N.3
61			Computation of regression equations.	B.N.3
62			Solving practical problems of regression & correlation.	B.N.4
63			Solving practical problems of regression & correlation.	B.N.4
64			Solving practical problems of regression & correlation.	B.N.4
65			Solving practical problems of regression & correlation.	B.N.4
CO: 3,4				

LO: Able to correlate data and its degree, regression and its types.				
66	5	Index number- Meaning, characteristics, importance and uses. Construction of index numbers- Cost of living index, Fisher's ideal index number. Diagrammatic and Graphic presentation of data.	Index Number- meaning, features & kinds.	B.N.5
67			Importance and utility of index number	B.N.5
68			Construction of Index numbers.	B.N.5
69			Construction of Index numbers	B.N.5
70			Construction of Index numbers	B.N.5
71			Fisher's index number	B.N.5
72			Computation of Index number by different formulae.	B.N.5
73			Consumer price index number.	B.N.5
74			Test of Adequacy of Index formula.	B.N.5
75			Miscellaneous problems regarding index number.	B.N.5
76			Diagrammatic and Graphic presentation of data.	B.N.5
77			Diagrammatic and Graphic presentation of data.	B.N.5
CO: 3,4				
LO: Knowledge about index numbers and their presentation in different ways.				

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. S.M. Shukla, Advanced Statistics, Sahitya Bhawan Publication
2. Oswal, Sahu & Shukla, Principles of Statistics, Ramesh Book depot.
3. S.C. Gupta, Business Statistics, Himalaya Publishing house.
4. R.P. Hooda, Statistics for Business and Economics, MacMillan.
5. S.M. Shukla, Principles of Statistics, Sahitya bhawan Publication.

VII: Notes:

1. There will be individual assignment, presentation and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Principles of Statistics			
B.Com. II Year Pass Courses			
Goal: Develop the ability to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc. and able to understand statistical concepts to include probability distributions, sampling, estimation, hypothesis testing, regression, and correlation analysis, regression coefficients and their properties.			
Objective: Objective of subject is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Business Statistics.	% Students having the desirable understanding of Business Statistics.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	General Introduction of Indian Income Tax	Introduction of Indian income tax	B.N. 2
2			Meaning, definition & history of income tax	B.N. 2
3			Characteristics of income tax	B.N. 2
4		Agriculture Income	Concept of agriculture income	B.N. 2
5			Types of agriculture income	B.N. 2
6			Practical questions of agriculture income	B.N. 2
7			Practical questions of agriculture income	B.N. 2
8		Basic Concepts	Basic definitions- income, casual income, assessment year	B.N. 2
9			Basic definitions- previous year, person, assessee & GTI, TI	B.N. 2
10			Concept & types of exempted income	B.N. 2
11			Continue above exempted income	B.N. 2
12		Residential Status & Tax Laibility	Meaning & rules of residential status	B.N. 2
13			Practical questions of determined residential status	B.N. 2
14			Determined tax liability according to residential status	B.N. 2
15			Practical questions of determined tax liability	B.N. 2
CO: 1,2				
LO: To provide knowledge about types of income and determine the concept of residential status.				
16	2	Income From Salary	Meaning & concept of income from salary	B.N. 1
17			Types of allowances	B.N. 1

18	2	Income From Salary	Types of perquisites	B.N. 1
19			Practical questions of income from salary	B.N. 1
20			Practical questions of income from salary	B.N. 1
21			Practical questions of income from salary	B.N. 1
22			Concept of income from salary (retirement)	B.N. 1
23			Practical questions of income from salary of retired person	B.N. 1
24			Practical questions of income from salary of retired person	B.N. 1
25			Income From House Property	Income from house property
26		Types of house		B.N. 1
27		Procedure of calculating income from house property		B.N. 1
28		Practical questions of income from house property		B.N. 1
29		Practical questions of income from house property		B.N. 1
30		Practical questions of income from house property		B.N. 1
CO: 1,3				
LO: To enlighten the concept of income from salary & House property.				
31	3	Income From Business and Profession	Meaning & concept of income from business & profession	B.N. 1
32			Procedure of calculate income from business & profession	B.N. 1
33			Formats of income from business & profession, Rates of depreciation & rules	B.N. 1

34	3	Income From Business and Profession	Practical questions of income from business & profession	B.N. 1
35			Practical questions of income from business & profession	B.N. 1
36			Practical questions of income from business & profession	B.N. 1
37		Income From Capital Gains	Meaning & types of capital gain	B.N. 1
38			Capital assets & exemptions	B.N. 1
39			Procedure of calculate capital gain	B.N. 1
40			Practical questions of income from capital gain	B.N. 1
41			Practical questions of income from capital gain	B.N. 1
42			Practical questions of income from capital gain	B.N. 1
43		Income From Other Sources	Meaning & concepts of income from other sources	B.N. 1
44			Types of income & rules of making gross up	B.N. 1
45			Practical questions of income from other sources	B.N. 1
CO: 1,3				
LO: To determine the concept of income from Business & Profession, capital gains and other sources.				
46	4	Set Off and Carry forward of Losses	Meaning & concept of set-off	B.N. 1
47			Rules of losses carry forward	B.N. 1
48			Practical questions of carry forward & set-off losses.	B.N. 1
49		Deduction From GTI	Meaning & types of deductions	B.N. 1
50			Rules regarding deductions	B.N. 1
51			Practical questions of deduction	B.N. 1
52			Practical questions of deduction	B.N. 1
53	4	Clubbing of Income	Concept and Provisions of clubbing of income	B.N. 1
54			Practical questions of clubbing of income	B.N. 1

55	4	Computation of Total Income & Tax Liability of an Individual	Meaning of total income & its procedure	B.N. 1
56			Procedure of tax calculations in various cases	B.N. 1
57			Practical problems	B.N. 1
58			Practical problems	B.N. 1
59			Practical problems	B.N. 1

CO: 1

LO: Enabling the students to have a fair idea on set-off and carry forward of losses, clubbing of income and to determine the concept of assessment of individual.

60	5	Assessment Procedure	Procedure of assessment	B.N. 1
61			Types of assessment, return, pan card & signature	B.N. 1
62		Tax deducted at Sources	Meaning & provisions of tax deducted at sources (TDS)	B.N. 1
63			Practical questions of TDS	B.N. 1
64		Advance Payment of Tax	Meaning & procedure of advance payment of tax	B.N. 1
65			Practical questions of advance payment of tax	B.N. 1
66	5	Income Tax Authorities	Income tax authorities	B.N. 3
67		Appeal, Revision and Penalties	Appeal to the commissioner and appellate tribunal	B.N. 3
68			Appeal to high court & revision by commissioner	B.N. 3
69			Penalties & Prosecutions and its provisions	B.N. 3

CO: 1,4

LO: To provide knowledge about assessment procedure, advance tax, authorities involved and penalties.

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Presentation 15	GD 15	Assignment 15	30		

Lesson Plan

Subject: Internet Technology & Introduction to E-Commerce

Session: Jul-Dec

Class: BCOM(CA) – V Sem

I: Objective of course: The objective of this course is to introduce the basic concept of networking, internet concept and introduction to E-commerce.

II: Examination: The faculty members will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination pattern will carry 85 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

- CO1 To provide an introduction to the fundamental concept on data communication and the basic knowledge of computer network.
- CO2 To get familiarized with the basic protocol of computer network.
- CO3 To develop an understanding of scope of E-Commerce.
- CO4 To develop an understanding of electronic market and electronic data interchange.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic of Networking	Introduction to networking, network topology.	B.N. 4
2			Types of network, network connecting device	
3		Concepts of OSI layer, TCP\IP model	OSI Model concept	B.N.4
4			Different OSI Layer	
5			TCP\IP Model	B.N.4
6			Basic protocol	
7			Introduction to internet & extranet	B.N.4
CO: 1,2				
LO: Students will learn the concept of the different types of network topologies and protocols. Enumerate the layers of the OSI model and TCP/IP. Explain the function(s) of each layer. Identify the different types of network and network devices and their functions within a network.				
8	2	Data Communication:	Different types of data transfer mode	B.N.1
9			Multiplexing	B.N.4
10			Demultiplexing	B.N.4
11			Switching techniques	B.N.4
12			Types of switching techniques	
13			Asynchronous transfer mode	B.N.4
14			STM,Communication services	
15			ISDN	
CO: 1				
LO: Students will be able to understand the basic concepts of data communications including the key aspects of networking and their interrelationship, packet switching, circuit switching, message switching				
16	3	Internet Concept	History of internet advantage & disadvantage of internet	B.N.2
17			WWW	B.N.2
18			IP addressing	
19			DNS,	B.N.4
20			FTP SMTP	
21			TCP and its concept	
22			User datagram protocol	
23		Web browser & search engine	B.N.4	

24			Introduction & working of e-mail	B.N.4
25			HTTP protocol	B.N.4
CO: 2				
LO: Students will learn basic concept of main protocols such as HTTP, FTP, SMTP, TCP, UDP, and IP.				
26	4	Overview of E-commerce Technologies	define E-commerce, types of E-commerce	B.N.5
27			Application of E-commerce	
28			Advantage & disadvantage of E-commerce	
29			Features and infrastructure of E-commerce	
30			Different E-commerce website	
31			Traditional E-commerce	
CO: 3				
LO: Students will know the concept of E-commerce, types of E-commerce and describe the features of e-commerce technology.				
32	5	Overview of E-banking system	Electronic data interchange	B.N. 6
33			Overview of E-payment system	B.N. 6
34			Different type of EPS	B.N. 6
35			Risk & different fraud in EPS	
CO:4				
LO: Students will learn the concept of E-commerce payment system, different type of EPS, structure of EPS, Understand key security issues of e-commerce and define how Electronic data interchange.				

VI: Book References:

5. E-commerce An Indian Perspective, P.T. Joseph, S.J.PHI
6. Electronic commerce; Greenstein, Merylin Tata Mc Grew Hill

VII: Notes:

1. There will be individual assignment, presentations and group assignments.

2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Internet Technology & Introduction to E-Commerce			
BCOM V Sem			
Goal: Students develop the ability to understand the relevance of computers in our society, to provide basic knowledge of networking with application to various fields of information technology and its role in Business today.			
Objective: Students Gain the ability to design reliable wireless networks and to learn the way to model and analyze the structural performance for some commonly used in business network architectures and understand the e-commerce.			
12-15 Marks	9-11 Marks	5-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having an understanding about networking technology, basic concept of protocols and working principles of models and E-commerce concept.	% Students having the basic concept of networking and E-commerce.	% Students having understanding about protocol and E-commerce	% Students Need More Efforts for concept of internet technology.

Class Participation			Internal Exam	Total 75	Final Internal Marks 15
Presentation 15	GD 15	Assignment 15	30		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Management Accounting****Session: July-Dec****Class: B.Com. V Semester****I: Objective of course:**

The course objective is to give students a good understanding about the concepts and techniques of management accounting. Students are introduced to the application of management accounting tools for pricing, budgetary control and performance evaluation as well as new developments in management accounting knowledge and techniques and how to assess these through cost-benefit analysis.

II: Examination:

The faculty members will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination pattern will carry 85 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: Apply managerial accounting and its objectives in a way that demonstrates a clear understanding of ethical responsibilities

CO2: Apply and analyze different types of activity-based management tools through the preparation of estimates.

CO3: Analyze cost-volume-profit techniques to determine optimal managerial decisions.

CO4: Prepare a master budget and demonstrate an understanding of the relationship between the components and prepare analyses of various special decisions, using relevant costing and benefits.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

5			Scope of Management accounting	B.N. 2
6			Objectives of Management accounting	B.N. 2
7			Functions of management accounting	B.N. 2
8			Difference between Management, Financial and Cost Accounting	B.N. 2
9			Tools and Techniques of management accounting	B.N. 2
10			Need and significance of Management accounting	B.N. 2
11			Role of management accounting in decision making	B.N. 2
CO: 1				
LO: To enlighten the students thought and knowledge on management Accounting.				
12	2	Financial Statements Analysis	Meaning and limitations of financial statement	B.N. 2
13			Objectives and methods of financial statement analysis	B.N. 2
14			Practical problems of Common Size income statement	B.N. 2
15			Practical problems of Common Size Balance Sheet	B.N. 2
16			Practical problems of Comparative Income statement	

17	2		Practical problems of Comparative Balance Sheet	
18		Ratio Analysis	Ratio analysis - Interpretation of the ratio	B.N. 2
19			Guidelines for use of ratios, Importance, limitations	B.N. 2
20			Classification of Ratio	B.N. 2
21			Advantages & Limitations of ratio analysis	B.N. 2
22			Practical problems of Ratio analysis	B.N. 2
23			Practical problems of Ratio analysis	B.N. 2
24			Practical problems of Ratio analysis	B.N. 2
25			Practical problems of Ratio analysis	B.N. 2
CO: 2				
LO: Helps to give proper idea on financial statement analysis in practical point of view.				
26	3	Fund Flow Analysis	Concept and advantages of Fund flow analysis	B.N. 3
27			Limitation and methods of Fund flow analysis	B.N. 3
28			Rules regarding preparation of Fund Flow Statement	B.N. 3
29			Practical problems of Fund Flow analysis	B.N. 3
30			Practical problems of Fund Flow analysis	B.N. 3
31			Practical problems of Fund Flow analysis	B.N. 3
32			Practical problems of Fund Flow analysis	B.N. 3
33			Practical problems of Fund Flow analysis	B.N. 3
34			Practical problems of Fund Flow analysis	B.N. 3
35			Cash Flow Analysis	Concept and advantages of Cash flow analysis

36	3	Cash Flow Analysis	Limitation and methods of Cash flow analysis	B.N. 3
37			Rules regarding preparation of Cash Flow Statement	B.N. 3
38			Difference between Fund flow and Cash flow statement	B.N. 3
39			Practical problems of Cash Flow analysis	B.N. 3
40			Practical problems of Cash Flow analysis	B.N. 3
41			Practical problems of Cash Flow analysis	B.N. 3
42			Practical problems of Cash Flow analysis	B.N. 3
43			Practical problems of Cash Flow analysis	B.N. 3

CO: 2,4**LO:** To introduce the concept of fund flow and cash flow statement.

44	4	Marginal Costing	Concept and types of Absorption and Marginal costing	B.N. 3
45			Marginal and differential costing as a tool for decision making.	B.N. 3
46			Practical problems of marginal costing	B.N. 3
47			Practical problems of marginal costing	B.N. 3
48			Practical problems of marginal costing	B.N. 3
49		Break Even Analysis	Meaning of Break even analysis. Limitation, assumption and use of break even analysis	B.N. 1
50			Practical problems of break even analysis	B.N. 1
51			Practical problems of break even analysis	B.N. 1
52			Practical problems of break even analysis	B.N. 1

CO: 3**LO:** To develop the know-how and concept of marginal costing with practical problems.

53	5	Budgetary Control	Meaning of Budget and budgetary control	B.N. 1
54			Objectives, merits and limitations of budgetary control	B.N. 1

55	5	Budgetary Control	Types of budget	B.N. 1
56			Practical problems of flexible budget	B.N. 1
57			Practical problems of flexible budget	B.N. 1
58			Practical problems of Cash budget	
59			Practical problems of Cash budget	B.N. 1
60		Management audit & responsibility accounting	Meaning and concept of Management Audit	B.N. 3
61			Procedure of management audit	B.N. 3
62			Concept of Responsibility accounting	B.N. 3
63			Procedure of accountability of responsibility	B.N. 3
64		Management Reports	Meaning and concept of Management reports	B.N. 3
65			Types of reports	B.N. 3
66			Qualities of a good report	B.N. 3
67			Revision	
68	Revision			
69	Revision			
CO: 1,4				
LO: To provide knowledge about budget control keeping in mind the scope of the concept and preparation of management report.				

Note : apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Presentation 15	GD 15	Assignment 15	30		

Department of Commerce, IPS Academy , INDORE
Lesson Plan

Subject: Indirect Tax**Session: Jan-June****Class: B.Com. VI Semester (III Year)**

I: Objective of course: The Objective of this Course is to acquaint the Students with the basic Concept of Indirect Tax and further to develop understanding the utilities of indirect tax.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

CO1: To introduce the basic concept of Indirect Tax. To familiarize the concept of Central Excise Duty & its classification. To Understand the valuation rules under central excise act.

CO2: Make the students familiarizes with the concept of Custom Duty and its provisions. It give more practical knowledge to computation of assessable value & calculation of Custom Duty.

CO3: Make the students familiarizes with the concept of Central Sales Tax and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of Central Sales Tax. Make the students familiarizes with the concept of M.P.VAT and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of M.P.VAT.

CO4: Make the students familiarizes with the concept of Service Tax and its provisions. It give more practical knowledge to computation of Taxable Service & calculation of Service Tax.

Lesson Plan

Subject: VISUAL BASIC

Session: Jan-June

Class: B.Com 6 SEM <computer application>

I: Objective of course:

The objective of this subject is to help students to understand concept of event driven programming so that student can develop basic applications using visual basic.

II: Examination:

The faculty members will award internal marks out of 15 and the bifurcation is mentioned in the scheme of internal marks. The semester examination pattern will carry 85 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	15	1	15
B	Short Answer Types of Questions	5	4	20
C	Long Answer Types of Questions	5	10	50
				85

III: Course Outcomes (CO):

1. Students gain knowledge in the basic concepts of event driven programming.
2. Build skills to develop basic applications using VB.
3. Understand and code Event-Driven procedures.
4. Develop a GUI which is capable store and retrieve data by using VB with MS-Access.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

V: SESSION PLAN

Lecture no.	Unit no.	TOPIC	Sub Topic	Reference
1.	UNIT 1	INTRODUCTION TO GUI AND BASIC VB CONTROLS	Introduction to GUI and event driven programming	B.N 1
2.			Introduction to visual basic	B.N 1
3.			Basic VB controls: text box and forms, buttons	B.N 1
4.			Basic VB controls: list box and label	B.N 1
5.			Basic VB controls: combo box, check box	B.N 1
6.			Properties of basic controls	B.N 1
7.			Events related to above controls	B.N 1
8.			Events related to above controls	B.N 1
CO 1				
LO: Student will come to know what GUI,VB IDE and visual basic controls(basic tools for designing GUI).				
9.	UNIT 2	VARIABLES,OPERATORS,DATA TYPES	Declaring variables	B.N 2
10.			Scope of variables	B.N 2
11.			Data types	B.N 2
12.			VB operators and their precedence	B.N 2
13.			Declaring functions	B.N 2
14.			Introduction to menu editor	B.N 2
CO 2				
LO: Student will learn programming terminology and how to them by applied using Visual Basic (e.g., variables, naming conventions and scope along with operators).				
15.	UNIT 3	CONTROL CONSTRUCTS	Control statement : If,if else and nested if,nested if else	B.N 1
16.			Control structures: do while loop	B.N 1
17.			Control structures: while loop	B.N 1
18.			Control structures: for loop	B.N 1
19.			Implementing control constructs using option button and check boxes	B.N 1
20.			Displaying message in message box.	B.N 1
21.			Testing validity of input data	B.N 1
CO 3				
LO: Student will be able to develop an application using decision control statements and structure				

22.	UNIT 4	VB FORM	Introduction to forms and its types	B.N 2
23.			Form properties	B.N 2
24.			Form events	B.N 2
25.			Adding various form	B.N 2
26.			Loading and hiding of forms	B.N 2
27.			Me keyword, referring to objects on forms	B.N 2
CO 1,2				
LO: Student will be able to develop an application using decision control statements and structures.				
28.	UNIT 5	DATABASE HANDLING	Introduction to database handling	B.N 1
29.			Creating database files using MS-Access	B.N 1
30.			Using data control and setting its properties	B.N 1
31.			Using data control with forms, combo box	B.N 1
32.			Using data control with list box	B.N 1
33.			Updating records using VB as front end	B.N 1
34.			deleting records using VB as front end	B.N 1
35.			Retrieving records using VB as front end	B.N 1
CO 4				
LO: Student will understand how to store, retrieve, update and delete data using MS-Access as their database

PROGRAM OUTCOME

B.Com. (Foreign Trade)

1. This program could provide well tainted professionals for the industries, banking sectors, insurance companies, financing companies, Transport agencies, warehousing etc. to meet the well trained men power requirements. The graduates will get hands on experience in various aspects acquiring skills for marketing manager, selling managers, overall administration abilities of the companies.
2. After completing this course they can become a manager, accountant, management accountant, cost accountant, bank manager, auditor, company secretary teacher, professor, stock agents and get govt. jobs easily.
3. The course offer the number of value based and job oriented courses (Industry visit, summer training) ensures that students are trained can get aware about the present scenario of the world.
4. Create a base to compete and participate and gain leadership positions in organizations at National and International levels
5. Through this course department is putting efforts to nurture entrepreneurial skills and capabilities.
6. The Bachelor of commerce (Foreign trade) equips the students with the knowledge which is vital and helps them to participate in the fast changing world.
7. Provides conceptual knowledge of various business laws and policies.
8. The program provides strong foundation by making students aware of export documents, financing, marketing and shipping to start with their business.

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Business Mathematics****Session: July-June****Class: B.Com. I year Pass Courses**

I: Objective of course: The objective of this course is to teach the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: have basic knowledge in the areas of business calculus and financial mathematics

CO2: be able to work with simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.

CO3: be able to understand and use equations, formulae, and mathematical expressions and relationships in a variety of contexts

CO4: apply the knowledge in mathematics (matrices, percentage, ratio- proportion, averages) in solving business problems

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	2			2	2		
CO 2		2			2	2	2	2
CO 3		2		2	2	2		
CO 4	3			2	2	3		

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Ratio – gaining and Sacrificing Ratio, proportion, Percentage, Commission, Discount and Brokerage	Ratio- Meaning, features and types of ratio.	B.N.4
2			Ratio related to partnership	B.N.4
3			Profit sharing ratio, Sacrificing ratio & Gaining ratio.	B.N.4
4			Ratio Short numerical questions.	B.N.4
5			Ratio- Long numerical questions	B.N.4
6			Ratio- Long numerical questions	B.N.4
7			Ratio- Long numerical questions	B.N.4
8			Proportion- Meaning, rules & kinds.	B.N.4
9			Problems related to Inverse & compound proportion.	B.N.4
10			Problems related to continued & direct proportion	B.N.4
11			Percentage- Rules & numerical.	B.N.1
12			Percentage- Numerical.	B.N.1
13			Percentage- Numerical	B.N.1
14			Commission- Calculation of different types of commission	B.N.1
15			Commission- Practical Problems	B.N.1
16			Commission- Practical Problems	B.N.1
17			Discount & Brokerage- Meaning and different types.	B.N.1
18			Practical problems regarding Discount & brokerage.	B.N.1
19			Practical problems regarding Discount & brokerage.	B.N.1
CO: 1, 4				
LO: Able to solve different problems regarding ratio and percentage.				
20	2	Simultaneous Equations – Meaning,	Simultaneous Equations- Methods of solving equations.	B.N.3
21			Problems relating to Number and Fraction.	B.N.3

22		Characteristics, Types and Calculations. Preparation of invoice.	Problems relating to Age.	B.N.3
23			Solving Miscellaneous Problems.	B.N.3
24			Solving Miscellaneous Problems.	B.N.3
25			Solving Miscellaneous Problems.	B.N.3
26			Preparation of Invoice- Meaning & advantages.	B.N.3
27			Objects and methods of preparing Invoice.	B.N.3
28			Kinds or types of Invoices	B.N.3
29			Preparation of Invoice- Practical Questions.	B.N.3
30			Preparation of Invoice- Practical Questions.	B.N.3
31			Preparation of Invoice- Practical Questions.	B.N.3
32			Preparation of Invoice- Practical Questions.	B.N.3
CO: 2,3				
LO: Framing and solving equations, Invoice preparation.				
33	3	Elementary Matrices – Definitions and Calculations, Types of Matrices.	Elementary Matrix- Meaning and Definitions	B.N.4
34			Elementary Matrix- Rules regarding calculations.	B.N.4
35			Types of Matrix.	B.N.4
36			Addition of Matrices.	B.N.4
37			Subtraction of matrices.	B.N.4
38			Multiplication of a matrix – Procedure.	B.N.4
39			Multiplication of a matrix by a Scalar or constant.	B.N.4
40			Solving Numerical questions of Matrix	B.N.4
41			Solving Numerical questions of Matrix	B.N.4
42			Solving Numerical questions of Matrix	B.N.4
43			Word problems regarding Matrices.	B.N.4
44			Word problems regarding Matrices	B.N.4

45			Word problems regarding Matrices	B.N.4
CO: 4				
LO: Conceptual knowledge of Matrices				
46	4	Logarithms and Antilogarithms- Principles and Calculations, Simple and Compound Interest.	Logarithms and their application.	B.N.1
47			Rules of conversion of simple sums into logarithms.	B.N.1
48			Antilogarithm- Method and Rules.	B.N.1
49			Numerical questions of logarithms.	B.N.1
50			Numerical questions of logarithms.	B.N.1
51			Simple Interest- Formulas and Calculation.	B.N.1
52			Simple Interest- Practical Problems.	B.N.1
53			Simple Interest- Practical Problems.	B.N.1
54			Simple Interest- Practical Problems.	B.N.1
55			Compound Interest and Simple interest.	B.N.1
56			Calculation of compound Interest.	B.N.1
57			Calculation of compound Interest - Practical's.	B.N.1
58			Calculation of compound Interest - Practical's.	B.N.1
59			Calculation of compound Interest – Practical's.	B.N.1
60			Calculation of compound Interest - Practical's.	B.N.1
CO: 2				
LO: Able to calculate interest with the help of log table				
61	5	Averages- Simple, Weighted and Statistical Averages, Arithmetic Mean, Harmonic mean, Geometric mean. Profit and loss.	Profit & Loss- Meaning & important Formulae	B.N.5
62			Practical questions related to profit & loss.	B.N.5
63			Practical questions related to profit & loss.	B.N.5
64			Practical questions related to profit & loss.	B.N.5
65			Practical questions related to profit & loss.	B.N.5
66			Calculation of simple averages.	B.N.2

67		Calculation of Weighted averages.	B.N.2
68		Calculation of arithmetic mean.	B.N.2
69		Calculation of harmonic mean	B.N.2
70		Calculation of Geometric mean	B.N.2
CO: 1,4			
LO: Knowledge of statistical averages, finding out profit & loss.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. S.M. Shukla, Business mathematics, Sahitya Bhawan Publication.
2. C. Sancheti, Business Math's, S.Chand Publishing House.
3. Ramesh Mangal, Business mathematics, Satish Printers and publishers.
4. Sanjay Mehta, Business Mathematics, Devi Ahilya Prakashan.
5. M. Raghavachari, Mathematics for Management, tata mcgraw hill publishers.

VII: Notes:

1. There will be individual assignment, presentation and group assignment.
2. Class test will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Business Mathematics			
B.Com. I Year			
Goal: Students develop the ability to work simple and compound interest, annuities, pricing, invoice preparation, trade discounts, taxes, and depreciation problems in various situations and use correct mathematical terminology.			
Objective: Students gain understanding of the mathematical concepts in the areas of business calculus and financial mathematics, independently solving of business problems.

Lesson Plan

Subject: Basics of Foreign Trade

Session: July-June

Class: B-com (Foreign Trade) First Year

I: Objective of course: The objective of this course is to acquaint the students with the basic concept of foreign trade, tariff structure and institutions working for the development of foreign trade.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Ability to understand foreign trade and its theories.

CO2: Able to understand trade policy instruments such as tariffs, quotas, retaliatory measures like anti-dumping duties, countervailing duties

CO3: Understanding concept of exchange control and determining exchange rate.

CO4: Be familiar with the major recent development in International economic institutions.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

IX: Scheme of Internal Marks

Class Participation			Internal Exam	Total 25	Final Internal Marks 05
Presentation 05	GD 05	Assignment 05	10		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Financial Accounting****Session: July-June****Class: B.Com. I Year Pass Courses**

I: Objective of course: The Objective of this Course is to acquaint the Students with the basic Concept of Financial Accounting and further to develop understanding of accounting for managers.

II: Examination:

The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: Explain the purpose of double entry system to understanding the accounting system properly. Record journal entries bookkeeping and Prepare ledger accounts using double entry accordingly. Preparation of trial balance, ratification of errors and final accounts.

CO2: To understand the aspects of Accounting Standards in modern scenario Specially AS-6 & AS-10. To familiarize the concept of Branch account and Scope of departmental accounting.

CO3: To understand the concept of royalty and its benefits. To depute the concept of joint venture and Investment & accounting for it.

CO4: Getting acquainted with the consignment accounts & its usage. Enable the students to understand partnership account from dissolution including Insolvency to Amalgamation of firms & Conversion of firm into Company.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	3	2			3		2
CO 2	1	2				2	2	2
CO 3						1	2	2
CO 4						1	2	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Concept of Double Entry System	Meaning, Definition & Concept of Double Entry System	B.N.2
2		Accounting Concepts & Conventions	Fundamental Principles of Accounting, Concepts & Conventions.	B.N.2
3		Preparation of Journals	Meaning, Features & Formats, Separate & Compound Journal Entries	B.N.1
4			Numerical – Journal Entries	B.N.1
5		Sub division of Journal	Cash Book – Simple & Double Column, Triple Column, Multi Column Cash Book, Petty Cash Book	B.N.1
6			Purchase Book & Sales Book, Purchase Return & Sales Return Book	B.N.1
7			Bills Receivable & Bills Payable Books _ Numerical	B.N.1
8		Preparation of Ledger	Meaning, Format & Methods of Posting	B.N.1
9			Numerical - Ledger	B.N.1
10		Trial Balance	Meaning, Objectives & Methods, Preparation of Trial Balance	B.N.1
11		Final Accounts – with Adjustments	Meaning & Definitions of Final Accounts, Performa – Trading & P&L Account, Balance Sheet	B.N.2
12			Adjustments in Final Accounts, Numerical – Final Accounts	B.N.2
13			Numerical – Final Accounts	B.N.2
14			Numerical – Final Accounts	B.N.2
15			Numerical – Final Accounts	B.N.2
CO: 1				
LO: To understand the Concept & Conventions of Double Entry System and Accounting. To record the basic journal entries, to know how the accounting entries are posted in books & preparation of Trial Balance.				
16	2	Introduction to IAS	Introduction to IAS, Definition & Terminology	B.N.3
17		Detail Study of AS-6	Introduction to AS-6 (Revised) Depreciation Accounting – Terminology, Explanation & Disclosure	B.N.3
18		Detail Study of AS-10	Introduction to AS-10 (Accounting for Fixed Assets)– Definition, Explanation & Disclosure	B.N.3
19		Branch Accounts	Definition & Importance of Branch Accounts, Methods for preparing Branch Accounts	B.N.2
20			Numerical – Branch Accounts	B.N.2
21			Numerical – Branch Accounts	B.N.2
22			Numerical – Branch Accounts, Conversion of Trial	B.N.2

		Balance of Foreign Branch	
23		Numerical – Foreign Branch	B.N.2
24	Departmental Accounts	Meaning, Objectives, Advantages of Departmental Accounts, Departmental Trading & P&L A/c	B.N.2
25		Inter Departmental Transfers – Numerical	B.N.2
26		Departmental Accounts - Numerical	B.N.2
27		Calculation of Closing Stock, Calculation of Unrealized profit on Stock - Numerical	B.N.2

CO: 2

LO: To understand how to Prepare the final accounts and making adjustment. To understand the purpose of Accounting Standards and detail study of AS-6 & AS-10. To understand the types of Branch and methods of Branch accounting and departmental accounting.

28	3	Royalty Accounts	Meaning & Definition of Royalty, Terminology relating to Royalty	B.N.3
29			Journal Entries in the Books of Lessee & Lessor	B.N.3
30			Royalty Accounts - Numerical	B.N.3
31			Royalty Accounts – Numerical	B.N.3
32			Patent Royalty – Journal Entries & Ledger Accounts, Copyright Royalty - Numerical	B.N.3
33		Accounting of Non Profit Making Organization	Meaning, Definition of Nonprofit Organizations, Receipts & Payment A/c and Income & Expenditure A/c. Rules Regarding Conversion.	B.N.1
34			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
35			Numerical Receipts & Payment A/C to Income & Expenditure A/c	B.N.1
36			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1
37			Numerical Income & Expenditure A/c to Receipts & Payment A/C	B.N.1

CO: 3

LO: Able to maintain royalty and Non Profit Organization.

38	4	Joint Venture Accounts	Meaning, Characteristics, Need, Merits & Demerits of Joint venture	B.N.3
39			Numerical - Joint Venture Accounts	B.N.3
40			Numerical - Joint Venture Accounts	B.N.3
41			Numerical - Joint Venture Accounts	B.N.3
42		Consignment	Meaning, Terminology, Characteristics, Need, Merits & Demerits of Consignment.	B.N.3

43		Accounts to be open in the books of Consignor and Consignee.	B.N.3
44		Numerical – Consignment Accounts	B.N.3
45		Numerical – Consignment Accounts	B.N.3
46		Numerical – Consignment Accounts	B.N.3
47		Numerical – Consignment Accounts	B.N.3
48		Numerical – Consignment Accounts	B.N.3
49		Numerical – Consignment Accounts	B.N.3
50	Investment Account	Meaning of Investment, Types of Interest and Type of Securities	B.N.3
51		Accounting for Investment Account, Valuation of Closing Investment	B.N.3
52		Numerical – Investment Accounts	B.N.3
53		Numerical – Investment Accounts	B.N.3
54		Numerical – Investment Accounts	B.N.3
55		Numerical – Investment Accounts	B.N.3
CO: 3			
LO: Recording entries of joint venture a/c & Able to maintain joint venture a/c, Consignment & Investment a/c.			
56		Meaning of Dissolution, entries in Dissolved Firm – Numerical	B.N.4
57		Dissolution of Firm – Numerical	B.N.4
58		Dissolution of Firm – Numerical	B.N.4
59		Dissolution of Firm – Numerical	B.N.4
60		Dissolution of Firm – Numerical	B.N.4
61		Dissolution of Firm – Numerical	B.N.4
62		Meaning of Insolvency, entries in Insolvent firm – Numerical	B.N.4
63		Garner v/s Murray Rule	B.N.4
64		Garner v/s Murray Rule – Numerical	B.N.4
65		Garner v/s Murray Rule – Numerical	B.N.4
66		Gradual realization of assets & distribution of cash accordingly or Piecemeal or Inter distribution	B.N.4
67		Proportionate Capital Method - Numerical	B.N.4
68		Maximum Loss Method - Numerical	B.N.4
69	Amalgamation of	Meaning of Amalgamation, Entries in the books of Old	B.N.4

	Partnership Firms	& New Firm	
70		Numerical – Amalgamation of Partnership Firm	B.N.4
71		Numerical – Amalgamation of Partnership Firm	B.N.4
72		Numerical – Amalgamation of Partnership Firm	B.N.4
73		Numerical – Amalgamation of Partnership Firm	B.N.4
74	Conversion of firm to company.	Meaning of Conversion of Partnership Firm into Joint Stock Company, Meaning of Purchase Consideration & Methods	B.N.4
75		Allocation of Purchase Consideration among partner's, Entries in the book of vendor's firm & Purchasing Company	B.N.4
76		Numerical – Conversion of Partnership Firm into Company	B.N.4
77		Numerical – Conversion of Partnership Firm into Company	B.N.4
78		Numerical – Conversion of Partnership Firm into Company	B.N.4
CO: 4			
LO: Easily examine the dissolution of partnership. Easily can prepare the journal entries of amalgamations & Conversion of partnership firm into Joint Stock Company.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

CO 4					2	2		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
PART-I				
1	1	Analysis of India’s Foreign trade growth trends under plans. Major Imports and major exports. Effects of Liberalization and privatization on Indian foreign trade	India’s Foreign trade before Independence	B.NO.8
2			India’s Foreign trade after independence	B.NO.8
3			Discussion on Third and forth five year plans	B.NO.8
4			Annual plans and other five year plans	B.NO.8
5			Significant expansion trade over two and a half decades	B.NO.8
6			Direction of India’s foreign trade	B.NO.8
7			Composition of Export trade	B.NO.5
8			Composition of Import trade	B.NO.5
9			Impact before Liberalization	B.NO.8
10			Need of liberalization	B.NO.8
11			Recent trends in liberalization in India	B.NO.8
12			Scope of Privatization	B.NO.8
13			Positive implications of globalization	B.NO.8
14			Negative implications of globalization	B.NO.8
CO: 1				
LO: Analyzing foreign trade growth under five year plans and effects of liberalization and privatization on India’s foreign trade.				
15	2	India’s Balance of payment including invisibles, foreign market selection- Need, process and determinates.	India’s Balance of Payment	B.NO.5
16			Balance of Payment in Post-Independence Period	B.NO.5
17			Structure of India’s Balance of Payment	B.NO.5
18			Items of Balance of Payment	B.NO.13
19			Favourable and unfavourable Balance of Payment	B.NO.13
20			Causes of unfavourable of Balance of Payment	B.NO.13

21			Measures for correcting unfavourable Balance of Payment	B.NO.13
22			Concept of market selection in international market	B.NO.1
23			Market selection process	B.NO.1
24			Determinants of market selection	B.NO.1
25			Market segment selection	B.NO.1
26			Group discussion on international markets	

CO: 3

LO: Analysing the process of foreign market selection and understanding the importance of Balance of Payments

27	3	Product planning, salient features of India's Export and Import Policy. Institutional setup for export promotion	Concept of Product planning	B.NO.5
28			Need and importance of product planning	B.NO.5
29			Product design strategy	B.NO.5
30			Process of new product development	B.NO.5
31			Product Life Cycle	B.NO.5
32			Branding and its Significance	B.NO.1
33			Brand Piracy	B.NO.1
34			Meaning and definition of packing	B.NO.1
35			Types of packing	B.NO.1
36			Importance of packaging	B.NO.1
37			Factors to be considered for package designing for exportable products	B.NO.5
38			Marking and Labeling on Package	B.NO.5
39			Objectives of EXIM Policy	B.NO.15
40			Main provisions of EXIM Policy	B.NO.15
41			Various schemes under EXIM Policy	B.NO.5
42			Export Promotion Council	B.NO.1
43			Objectives and functions of Export promotion council	B.NO.15
44			Role of export promotion council	B.NO.15

45			Objective and functions of commodity boards	B.NO.15
46			Various service institutions facilitating export trade of the country	B.NO.1
CO:2				
LO: Learning the process of product development and the role of EXIM Policy in foreign trade				
47	4	Export assistance measures, Free Trade Zones and 100% EOUs.	Need for export assistance	B.NO.1
48			Import facilities for exporters	B.NO.1
49			Marketing assistance for Indian exporters	B.NO.3
50			Deemed exports supplies	B.NO.3
51			Significance of export houses and trading houses	B.NO.3
52			Facilities and incentives offered to units operating in Free Trade Zones	B.NO.3
53			Features of Export Oriented Units	B.NO.3
54			Free Trade Zones in India	B.NO.1
55			Electronic hardware and software technology parks	B.NO.1
56			Difference between EPZ and SEZ	B.NO.3
57			Salient features of Software technology parks	B.NO.3
CO: 2,4				
LO: Understanding export assistance measures and various schemes provided by government				
58	5	State Trading in India, sources and analysis of Foreign Trade Statistics.	Introduction of State Trading Corporation of India	B.NO.1
59			Functions of STC	B.NO.1
60			Critical evaluation of working of STC	B.NO.1
61			Handicraft Export corporation of India	B.NO.1
62			Tea trading corporation of India	B.NO.1
63			Functions of Minerals and Metal Trading corporation of India	B.NO.1
64			Methods for collecting data	B.NO.3
65			Survey method	B.NO.3
66			Internal and external sources of information	B.NO.3

67		Sources of foreign trade statistics	B.NO.8
68		Analysis of foreign trade statistics	B.NO.8
CO: 2,4			
LO: Role of State Trading of India in promoting foreign trade.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Presentation 10	GD 10	Assignment 10	20		

Department of Commerce, IPS Academy , INDORE

Lesson Plan

Subject: English

Session: July-June

Class : B.Com II Year

I: Objective of course:

The objective of this course is to facilitate language learning which is a mean or verbal medium for expressing or communicating ideas, feelings, experiences and realization. The aim of the course is to impart the students the four basic skills of language-speaking, writing, reading and listening that are depending on the knowledge of grammar and correct pronunciation, correct spellings, correct reading and listening.

II: Examination:

The faculty member will award internal marks out of 5 and the bifurcation is mentioned in the scheme of internal marks. The end year examination will be worth 30 marks having theory and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	3	3	9
C	Long Answer Types of Questions	4	4	16
				30

III: Course Outcomes (CO):

CO1. The course of English allows student to develop new ideas and ethical view point. Studying English course enriches their LSWR skills and it will help students to update and increase their vocabulary and sentence formation pertaining to all walks of life.

CO2. Students will be able to form the sentence grammatically correct by following the rules and concepts of grammar pertaining to tenses, articles, nouns, pronoun, determiners and verbs.

CO3. Students will be able to comprehend and write an essay in a proper structure –Introduction, main body and the conclusion. They will be able to compose different types of formal and informal letters. While writing letter students adopt different strategies so that the letter serves the intended purpose and is not misunderstood.

CO4. Students will be able to achieve the goal of perfect translation by getting proficiency at both the source language and the target language. They differentiate between sense translation and literal translation.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
2	I	The Poem “Tree” composed by Tina Morris	Explanation of the Poem, Poet by focusing on the imp of preservation and conservation of nature.	B.NO 1
3			Discussion of textual Questions and answers	B.NO 1
4		Night of the Scorpion	Explanation of the poem and poet by highlighting superstitious belief and unconditional love of rural India.	B.NO 1
5			Discussion and explanation of exercises related to the poem	B.NO 1
6		Idgah: Premchand(translated by Khushwant Singh)	Discussion about the author and then explanation of the story by realizing the various aspects of emotions like love, motherhood, care, sacrifice, happiness and kindness between grandson and grandmother	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		Letter to God by G.L. Swanteh(translated by Donald A. Yates)	Discussion about the author and then explanation of the story by instilling belief in the significance of faith that develops confidence in students.	B.NO 1
9			Discussion of textual questions and answers	B.NO 1
10		The humorous story “My Bank Account” by Stephen Leacock	Discussion about the author and then explaining the story by exposing of witty article by the most popular	B.NO 1

			mockers and article writer.	
11			Discussion of textual questions and answers	B.NO 1
12		The short story “God Sees the Truth, But Wait” by Leo Tolstoy	Discussion about the author and then explaining the story by enriching students’ spiritual quotient	B.NO 1
13			Discussion of exercises related to the short story	B.NO 1
CO1				
LO 1- The students will gain good amount of knowledge of English language and Literature by studying various prose, poetry and story. They will also comprehend about allusions, references, poets, writers and stories etc.				
14	II	Idioms, proverbs and phrasal verbs	a list of appropriate idioms, proverbs and phrasal verbs	B.NO 2,3
15		Tenses	Rules of Tenses and their uses	B.NO 4
16		Prepositions	The importance of correct usage of Preposition	B.NO 2
17		Determiners and verbs	Types of Determiners	B.NO 3,4
18		Articles	Definite and Indefinite Articles	B.NO 2
CO2				
LO2 Students will get to know nouns, pronouns and their types and learn in detail about the function of verbs and their placement in a sentence. They will be able to gain the knowledge of prepositions and articles and their usages.				
17	III	Short Essays on given topics	Formal and Informal essays , some points in writing essays	B.NO 3
18		Formal Letters	The latest format of the formal letter and practice letter	B.NO 3
19		Informal Letters	The latest format of the informal letter and practice letter	B.NO 3
CO3				
LO3 Students will be able to figure out the relevance and importance of essay writing. They will be understand the characteristic features of an essay and learn about the different stages in the writing of an essay. Students will be able to understand the various elements of business letters. They learn the different layouts of a letter, such as indented layout, semi-block layout and full block layout.				
20	IV	Translation of sentences	Translation of passage English to Hindi and Hindi to English	B.NO 2
21			Some passages are given for translation	B.NO 2
CO4				
LO4 Students will be able to understand that translation is a significant vehicle in cross-cultural, cross-lingual and cross-national civilization. They will be able comprehend written and oral translation.				
23	V	Curriculum- vitae	The format of CV	B.NO 3
24		Design of Resume	The points are given in preparing impressive C.V.	B.NO 3
CO4				
Students will be able to understand the nature and importance of employment communication. They will be able to learn about resume design and describe three acceptable resume styles: chronological, functional and combination. They will be able to know how to write a persuasive resume.

5. K. Aswathappa, Human Resource Development, McGraw Hill Publication.

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Principles of Management			
B.Com.II Year			
Goal: To develop understanding among students about management and leadership..			
Objective: to provide knowledge about the management's functions: planning, organizing, leading, and controlling etc. and how to apply all of these in a business enterprise.			
8-10 Marks	6-7 Marks	4-5 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Management.	% Students having the desirable understanding of Management.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Exam	Total 50	Final Internal Marks 10
Presentation 10	GD 10	Assignment 10	20		

Department of Commerce, IPS Academy , INDORE

Lesson Plan**Subject: Principles of Statistics****Session: July-June****Class: B.Com. II year Pass Courses**

I: Objective of course: Objective of course is to help students to design data collection plans, analyze data appropriately and interpret and draw conclusions from those analyses. The central objective is to equip students with consequently requisite quantitative skills that they can employ and build on in flexible ways.

II: Examination: The faculty members will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The yearly examination pattern will carry 40 marks and have 3 sections A, B and C.

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	3	15
C	Long Answer Types of Questions	5	4	20
				40

III: Course Outcomes (CO):

CO1: be statistically and numerically literate.

CO2: have statistical concepts such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data.

CO3: be able to independently read statistical literature of various types, including survey articles, scholarly books, and online sources.

CO4: be able independently to calculate basic statistical parameters (mean, measures of dispersion, correlation coefficient, indexes etc.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 3	3		2			2	2	
CO 4	3				2			

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Statistics- Meaning and definitions, Significance, Scope and limitations of statistics. Statistical investigation. Process of data collection, Primary and secondary data, Methods of sampling, Preparation of questionnaire, Classification and tabulation of data, preparation of statistical series and its types.	Statistics- Meaning, definition and scope.	B.N.5
2			Significance and limitations of statistics.	B.N.5
3			Planning and types of statistical Investigation.	B.N.5
4			Methods of Investigation.	B.N.5
5			Collection of primary and secondary data.	B.N.5
6			Preparation of Questionnaire.	B.N.5
7			Editing of primary Data.	B.N.5
8			Classification of statistical errors and their sources.	B.N.5
9			Classification and tabulation of data.	B.N.5
10			Kinds of tables, rules of tabulation.	B.N.5
11			Analysis and Interpretation of data.	B.N.5
12			Analysis and Interpretation of data.	B.N.5
13			Frequency distribution and statistical series.	B.N.5
14			Diagrammatical and graphical presentation.	B.N.5
15			Diagrammatical and graphical presentation.	B.N.5
16			Graphs of frequency distribution.	B.N.5
17			Graphs of frequency distribution.	B.N.5
CO: 1,2				
LO: Identifying and classification of data, preparation of series and questionnaire				
18	2	Measurements of central tendency- Mean , Median, Quartile, Mode, Geometric mean	Central tendency- Meaning, objects & limitations.	B.N.2
19			Calculation of Arithmetic mean in different series.	B.N.2
20			Calculation of Arithmetic mean by short cut method.	B.N.2

21		and harmonic mean.	Computation of Median in different series.	B.N.2		
22			Computation of Median in different series.	B.N.2		
23			Mode – meaning and definition.	B.N.2		
24			Computation of mode in individual series.	B.N.2		
25			Grouping method of Mode.	B.N.2		
26			Merits and Demerits of Mode.	B.N.2		
27			Methods of calculating Geometric mean.	B.N.2		
28			Computation of harmonic mean.	B.N.2		
29			Combined mean.	B.N.2		
30			Partition Value – Quartiles	B.N.2		
31			Formulae for Computing quartiles.	B.N.2		
32			Computation of quartiles.	B.N.2		
CO: 1, 4						
LO: Able to calculate measurement of central tendency.						
33	3	Dispersion and skewness. Analysis of time series- Meaning, importance, components, Decomposition of time series, Measurement of long term trends, measurement of cyclical and irregular fluctuations.	Dispersion- meaning and methods of measuring.	B.N.1		
34			Methods of limits: Range, I.Q.R. & percentile range.	B.N.1		
35			Quartile deviation or semi –inter-quartile range.	B.N.1		
36			Mean deviation.	B.N.1		
37			Standard deviation.	B.N.1		
38			Coefficient of Mean deviation & Standard deviation.	B.N.1		
39			Skewness and its measures.	B.N.1		
40			Computation of karl Pearson’s coefficient of skewness.	B.N.1		
41			Computation of Bowley’s coefficient of skewness.	B.N.1		
42			Analysis of time Series.	B.N.1		
43			Secular Trend or Long term trend.	B.N.1		

44			Seasonal Variations.	B.N.1
45			Cyclical variations.	B.N.1
46			Irregular or Random Variations.	B.N.1
47			Practical problems regarding trend analysis.	B.N.1
CO: 4				
LO: Fundamental concepts of dispersion and skewness, measurement of different trends.				
48	4	Correlation- Meaning, Definitions, Types and degree of correlation, methods of correlation, regression analysis- meaning, uses, difference between correlation and regression, linear regression, regression equations, Calculation of coefficient of regression.	Correlation- meaning, importance & types.	B.N.3
49			Degree of coorelation.	B.N.3
50			Methods of determining correlation.	B.N.3
51			Karl Pearson’s method of correlation.	B.N.3
52			Spearman’s Rank difference method.	B.N.3
53			Concurrent deviation method.	B.N.3
54			Probable error.	B.N.3
55			Standard error.	B.N.3
56			Least squares method.	B.N.3
57			Correlation and Regression.	B.N.3
58			Coefficient of correlation with the help of regression coefficients.	B.N.3
59			Coefficient of correlation with the help of regression coefficients.	B.N.3
60			Computation of regression equations.	B.N.3
61			Computation of regression equations.	B.N.3
62			Solving practical problems of regression & correlation.	B.N.4
63			Solving practical problems of regression & correlation.	B.N.4
64			Solving practical problems of regression & correlation.	B.N.4
65			Solving practical problems of regression & correlation.	B.N.4
CO: 3,4				

LO: Able to correlate data and its degree, regression and its types.				
66	5	Index number- Meaning, characteristics, importance and uses. Construction of index numbers- Cost of living index, Fisher's ideal index number. Diagrammatic and Graphic presentation of data.	Index Number- meaning, features & kinds.	B.N.5
67			Importance and utility of index number	B.N.5
68			Construction of Index numbers.	B.N.5
69			Construction of Index numbers	B.N.5
70			Construction of Index numbers	B.N.5
71			Fisher's index number	B.N.5
72			Computation of Index number by different formulae.	B.N.5
73			Consumer price index number.	B.N.5
74			Test of Adequacy of Index formula.	B.N.5
75			Miscellaneous problems regarding index number.	B.N.5
76			Diagrammatic and Graphic presentation of data.	B.N.5
77			Diagrammatic and Graphic presentation of data.	B.N.5
CO: 3,4				
LO: Knowledge about index numbers and their presentation in different ways.				

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	General Introduction of Indian Income Tax	Introduction of Indian income tax	B.N. 2
2			Meaning, definition & history of income tax	B.N. 2
3			Characteristics of income tax	B.N. 2
4		Agriculture Income	Concept of agriculture income	B.N. 2
5			Types of agriculture income	B.N. 2
6			Practical questions of agriculture income	B.N. 2
7			Practical questions of agriculture income	B.N. 2
8		Basic Concepts	Basic definitions- income, casual income, assessment year	B.N. 2
9			Basic definitions- previous year, person, assessee & GTI, TI	B.N. 2
10			Concept & types of exempted income	B.N. 2
11			Continue above exempted income	B.N. 2
12		Residential Status & Tax Laibility	Meaning & rules of residential status	B.N. 2
13			Practical questions of determined residential status	B.N. 2
14			Determined tax liability according to residential status	B.N. 2
15			Practical questions of determined tax liability	B.N. 2
CO: 1,2				
LO: To provide knowledge about types of income and determine the concept of residential status.				
16	2	Income From Salary	Meaning & concept of income from salary	B.N. 1
17			Types of allowances	B.N. 1

18	2	Income From Salary	Types of perquisites	B.N. 1
19			Practical questions of income from salary	B.N. 1
20			Practical questions of income from salary	B.N. 1
21			Practical questions of income from salary	B.N. 1
22			Concept of income from salary (retirement)	B.N. 1
23			Practical questions of income from salary of retired person	B.N. 1
24			Practical questions of income from salary of retired person	B.N. 1
25			Income From House Property	Income from house property
26		Types of house		B.N. 1
27		Procedure of calculating income from house property		B.N. 1
28		Practical questions of income from house property		B.N. 1
29		Practical questions of income from house property		B.N. 1
30		Practical questions of income from house property		B.N. 1
CO: 1,3				
LO: To enlighten the concept of income from salary & House property.				
31	3	Income From Business and Profession	Meaning & concept of income from business & profession	B.N. 1
32			Procedure of calculate income from business & profession	B.N. 1
33			Formats of income from business & profession, Rates of depreciation & rules	B.N. 1

34	3	Income From Business and Profession	Practical questions of income from business & profession	B.N. 1
35			Practical questions of income from business & profession	B.N. 1
36			Practical questions of income from business & profession	B.N. 1
37		Income From Capital Gains	Meaning & types of capital gain	B.N. 1
38			Capital assets & exemptions	B.N. 1
39			Procedure of calculate capital gain	B.N. 1
40			Practical questions of income from capital gain	B.N. 1
41			Practical questions of income from capital gain	B.N. 1
42			Practical questions of income from capital gain	B.N. 1
43		Income From Other Sources	Meaning & concepts of income from other sources	B.N. 1
44			Types of income & rules of making gross up	B.N. 1
45			Practical questions of income from other sources	B.N. 1
CO: 1,3				
LO: To determine the concept of income from Business & Profession, capital gains and other sources.				
46	4	Set Off and Carry forward of Losses	Meaning & concept of set-off	B.N. 1
47			Rules of losses carry forward	B.N. 1
48			Practical questions of carry forward & set-off losses.	B.N. 1
49		Deduction From GTI	Meaning & types of deductions	B.N. 1
50			Rules regarding deductions	B.N. 1
51			Practical questions of deduction	B.N. 1
52			Practical questions of deduction	B.N. 1
53	4	Clubbing of Income	Concept and Provisions of clubbing of income	B.N. 1
54			Practical questions of clubbing of income	B.N. 1

55	4	Computation of Total Income & Tax Liability of an Individual	Meaning of total income & its procedure	B.N. 1
56			Procedure of tax calculations in various cases	B.N. 1
57			Practical problems	B.N. 1
58			Practical problems	B.N. 1
59			Practical problems	B.N. 1

CO: 1

LO: Enabling the students to have a fair idea on set-off and carry forward of losses, clubbing of income and to determine the concept of assessment of individual.

60	5	Assessment Procedure	Procedure of assessment	B.N. 1
61			Types of assessment, return, pan card & signature	B.N. 1
62		Tax deducted at Sources	Meaning & provisions of tax deducted at sources (TDS)	B.N. 1
63			Practical questions of TDS	B.N. 1
64		Advance Payment of Tax	Meaning & procedure of advance payment of tax	B.N. 1
65			Practical questions of advance payment of tax	B.N. 1
66	5	Income Tax Authorities	Income tax authorities	B.N. 3
67		Appeal, Revision and Penalties	Appeal to the commissioner and appellate tribunal	B.N. 3
68			Appeal to high court & revision by commissioner	B.N. 3
69			Penalties & Prosecutions and its provisions	B.N. 3

CO: 1,4

LO: To provide knowledge about assessment procedure, advance tax, authorities involved and penalties.

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

4			Qualities of an Auditor.	B. N. 3
5			Objectives of Auditing.	B. N. 2
6			Types of Audit.	B. N. 1
7			Audit program.	B. N. 1
8			Audit and books.	B. N. 1
9			Errors and types of error.	B. N. 1
10			Advantages of Audit.	B. N. 1
11			Limitations of Audit.	B. N. 2
12			Characteristics of Internal Audit.	B. N. 1
13			Auditor’s duty.	B. N. 1
14			Preparation before Audit.	B. N. 3
15			Advantages and disadvantages of Audit program.	B. N. 3
16			Audit note –book.	B. N. 2
17			Audit Evidence .	B. N. 2
18			Purpose of working paper.	B. N. 2
CO: .1				
LO: Capable to understand objectives , types of Audit & Audit books .				

19	2	Internal Check system-routine checking ,Internal check & test checking ,Internal control & audit procedure .	Meaning of Routine checking.	B.N. 4
20			Advantages and disadvantages of routine checking.	B. N. 4
21			Test checking or selective verification.	B. N. 2
22			Advantages and disadvantages of test checking.	B. N. 2
23			Meaning and introduction of Internal control.	B. N. 1
24			Characteristics and division of internal control.	B. N. 1
25			Basic principles of Internal control.	B. N. 1
26			Meaning of Internal Check.	B. N. 3
27			Objectives of Internal Check.	B. N.2
28			Audit procedure.	B. N. 2

CO:1**LO** : Get knowledge about Internal Check system & Audit procedure .

29	3	Vouching, Verification of assets & liabilities	Meaning & introduction of Vouching	B. N. 1
30			.Vouching of Cash book.	B. N. 1
31			.Vouching of Cash payments.	B. N. 1
32			Vouching of impersonal ledger.	B. N. 1
33			Introduction of Verification of Assets & Liabilities'	B. N. 1
34			Classification of Assets.	B. N. 1
35			Verification of different types of Assets.	B. N. 1
36			Valuation of Stock : Some basic principles.	B. N. 1
37			Work in progress and Auditor's duty.	B. N. 1
38			Verification of liabilities.	B. N. 1
39			Verification of liabilities.	B. N. 1

40			Verification of Loans and Advances..	B. N. 1
41			Bank Overdraft.	B. N. 1
42			Auditor’s duty.	B. N. 1
CO :2				
LO:. Practical knowledge of Vouching, Verification of Assets and liabilities.				
43	4	Company auditors –Qualification & disqualification, Appointment – Removal, remuneration, Rights, Duties & Liabilities.	Qualification of a Company Auditor. & profits v/s divisible profits	B.N.3
44			Disqualification of a Company Auditor.	B.N.3
45			Appointment of Company Auditors.	B.N.3
46			Removal of Auditor.	B.N.3
47			Remuneration and status of an Auditor.	B.N.3
48			Rights /Powers of an Auditor.	B.N.3
49			Duties of an Auditor.	B.N.3
50			Meaning of profit & profits v/s divisible profits.	B.N.3
51			Profits v/s divisible profits.	B.N.3
52			Declaration and payment of dividend.	B.N.3
53			Contents of the Audit Report.	B.N.3
54			Form of Audit Report.	B.N.3
55			Clean or Unqualified Report.	B.N.3
56			Qualified Report.	B.N.3
CO :3				
LO: Get the knowledge of Company Auditors duties responsibilities.& Report.				
57	5	Investigation – Objective ,Difference	Meaning and essentials for Investigation.	B.N.1
58			Process of Investigation.	B.N.1

59	between audit & Investigation ,Process of investigation ,Special audit of banking companies ,Educational ,Non profit institutions & Insurance companies	Scope and types of Investigation.	B.N.1
60		Objects of Investigation.	B.N.1
61		Difference between Audit and Investigation.	B.N.1
62		Audit of Banking Companies.	B.N.1
63		Audit of Educational Institututions.	B.N.1
64		Audit of Non- Profit Organizations’.	B.N.2
65		Audit of General Insurance Companies.	B.N.2
CO :4			
LO : get knowledge about investigation and able to understand the procedure of special audit of banking, insurance, education and non -profit Institution.			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

55			Numerical - Input Tax rebate & Inventory rebate	B.N.2
56		Authorities: powers and duties.	VAT Authorities – Power of VAT Authorities	B.N.2
57			Duties of VAT Authorities	B.N.2
58		Appeal and	Appeal & Revision procedure under VAT	B.N.2

		revision.	
59		Difficulties in VAT.	Difficulties in implementation of VAT. B.N.2
60		Service Tax: Introduction, objectives	Meaning, Objectives & Scope of Service Tax B.N.1
61			Exemption limit in Service Tax B.N.1
62		Main provisions	Main provisions of Service Tax liability B.N.1
63			Registration & payment B.N.1
64			Numerical - Tax liability under Service Tax B.N.1
65			Numerical - Tax liability under Service Tax B.N.1
66			Service Tax – Assessment procedure B.N.1
67			Service Tax credit B.N.1
68		Assessment procedure and computation of service tax.	Service Tax - provisions relating to interest & penalty B.N.1
69			Valuation of Taxable Services – Rules B.N.1
70			Numerical - Service Tax B.N.1
71			Numerical - Service Tax B.N.1
72			Numerical - Service Tax B.N.1
73			Numerical - Service Tax B.N.1
CO: 3,4			
LO: To understand M.P.VAT Payment & Recovery of Tax, Input Tax Rebate, Authorities. To understand the Concept of and Determination of Taxable Services under Service Tax and Tax payable.			

Note: apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Indirect Taxes, H.C. Mehrotra, SBP, Agra, 2017
2. Indirect Tax, , SPP, Indore, 2018
3. Indirect Taxes Law and Practice, , Texmann, 2012

VII: Notes:

- 1-There will be individual assignment, presentation and group assignment.
- 2-class test will be based on theoretical and practical aspect of the subject.
- 3-class performance and discipline will be an important factor for assessing internal marks.
- 4-the result of each test/assignment will be declared within 15 days.

VIII Rubric for Internal Assessment			
Subject: Indirect Tax			
B.Com. VI Semester			
<p>Goal : To introduce the basic concept of Indirect Tax. To familiarize the concept of Central Excise Duty. To Understand the valuation rules under central excise act. Make the students familiarizes with the concept of Custom Duty. It give more practical knowledge to computation of assessable value & calculation of Custom Duty. Make the students familiarizes with the concept of Central Sales Tax and its provisions. It give more practical knowledge to computation of Taxable Turnover & calculation of Central Sales Tax. Make the students familiarizes with the concept of M.P.VAT. It give more practical knowledge to computation of Taxable Turnover & calculation of M.P.VAT. Make the students familiarizes with the concept of Service Tax. It give more practical knowledge to computation of Taxable Service & calculation of Service Tax.</p>			
<p>Objective: The Objective of this Course is to acquaint the Students with the basic Concept of Indirect Tax and further to develop understanding the utilities of indirect tax.</p>			
12-15 Marks	9-11 Marks	5-8 Marks	00-04 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having excellent understanding of Indirect Tax	% Students having the desirable understanding of Indirect Tax.	% Students having satisfactory understanding about the subject.	% Students Need More Efforts.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 75	Final Internal Marks Out 15
Presentation 15	GD 15	Assignment 15	30	Presentation 15		

Subject : Moral Value And Hindi language and English

Session: Jan-June

Class :B.Com VI Semester

I: Objective of Course :

1. lkfgR;] foKku] dyk] ijaijk] bfrgkl] i;kZoj.k ds lkFk O;kdj.k ds vfuok;Z Kku dks fodflr djsaxsaA
2. fo|kFkhZ u dsoy lQy thohdksiktZu djsa vfir lkFkZd] l{ke tkx:d ukxfjd cusA

Objective: The aim of the course is to impart the students the four basic skills of language-speaking, writing, reading and listening that are depending on the knowledge of grammar and correct pronunciation, correct spellings, correct reading and listening.

II: Examination:

The faculty members will award internal marks out of 15(5+5+5) and the bifurcation is mentioned in the scheme of internal marks. The end semester examination will be worth 85(15+35+35) marks having theory.

English

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	5	2	10
C	Long Answer Types of Questions	4	5	20
				35

The faculty member will award internal marks out of 10 and the bifurcation is mentioned in the scheme of internal marks. The end year examination will be worth 50 marks having theory and have 3 sections A, B and C.

Moral values and Hindi

Section	Types of Questions	No. of Questions	Marks	Total
A	Objective Types of Questions	5	1	5
B	Short Answer Types of Questions	3	5	15
C	Long Answer Types of Questions	3	10	30
				50

III: Course Outcomes (CO) :

1. vkt dh izfrLi/kkZRed thou 'kSyh esa ,d Nk= dks i;kZlr vkRefo'okl o laizs" k.kh;rk dh 'kfDr iznku djsu esa vk/kkj ikB~;dze dh lajpuk vR;ar vk/kkjHkwr ladYiuk dh Hkwfedk vnk djsxhA
2. fizaV] bysDV^kfud ,oa lks'ky ehfM;k dk mi;ksx lgh rjhds ls dj ik;saxsaA
3. The students not only become conversant with literary types of Hindi and English but they might develop understanding of social and historical surroundings .They may acquire knowledge of Indian culture and traditions.
4. The students will earn competency in LSRW skills; that help them to improve communication in both the languages. This will prepare them to participate in competitive examination

English Session Plan

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1		Introduction , Syllabus	Discussion regarding the entire syllabus	
CO: 3 The student will learn about the different thoughts expressed in the text .They will also learn about the various literary devices used in the text.				
LO : The students will acquire with English language and Literature by studying this. They will also learn about allusions, references, poets, writers and stories etc.				
2	IV	Stopping By Woods on a Snowy Evening	Explanation of the Poem, Poet.	B.NO 1
3			Discussion of Question and answer	B.NO 1
4		Communication Education and Information Technology	Discussion about the author and then explaining the story in detail.	B.NO 1
5			Discussion of exercises related to story	B.NO 1
6		The Gif Of Maggi	Explanation of Story	B.NO 1
7			Discuss the Importance and the exercises of it.	B.NO 1
8		The Cherry Tree	Discussion about the author and the topic	B.NO 1
9			Discussion of Question and answer	B.NO 1
CO:4				
LO: 5 Vocabulary plays an important role in enriching language. Students will improve their communication by enhancing their vocabulary.				
10		Translation	Translation of passage English to Hindi and Hindi to English	B.NO.2
11		Email-Writing	Format and Importance of Email writing	B.NO 3

12	V	Power Point Presentation	Elements of power point presentation skills and its role in today's scenario	B.NO 2,3
13		Basic language Skills Countable and Uncountable Nouns, Verbs, Adverbs	Common nouns, Collective nouns , material nouns and abstract nouns, Transitive and Intransitive verbs and types of Adverbs	B.NO 4,5
14		Sentence Correction	Common Errors will be dealt.	B.NO 3

Department of computers

Program Outcome of BCA

The Program enables the student to:

1. Understand the fundamental concepts of Computers, Business environment and IT Applications in Business.
2. Successfully understand & analyze technical data to reach actionable conclusions, including technological solutions to the business.
3. Learn technologies & IT languages, so the business problems could be addressed.
4. Develop competent technical writing skills so as to enable the graduate to communicate business ideas to senior management and general public.
5. To identify and sharpen their IT/ programming skills.
6. To produce employable IT workforce, that will have sound knowledge of IT and business fundamentals that can be applied to develop and customize solutions for Small and Medium Enterprises (SME)
7. To develop skilled manpower in the various areas of information technology like: Data base management, Software Development, Computer-Languages, Software engineering, Web based applications etc.
8. The ability and the mindset to continuously update and innovate.

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Programming And Problem Solving Through C****Class: BCA-103 - I Sem**

I: Objective of course: The objective of this course are to make the student understand programming language, Programming, concept of loops, reading a set of data, stepwise refinement, function, control structure and arrays. After completion of this course the student is expected to analyze the real life problem and write a program in 'C' to Solve problem.

II: Examination: The examination will be of 50 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/ conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- CO1 To understand the programming concept and its basic constructs.
- CO2 To enhance creativity of mind analytically, logically, mathematically.
- CO3 To analyze the real life problem and solve it by writing programs.
- CO4 To develop a foundation for other programming language.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO6	PO7	PO8

CO 2		3					1	
CO 3		2	3	1		1		3
CO 4	3			1	2	2	3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Algorithm for problem solving	Basic	B.N.7
2			algorithm logic, classification	B.N.7
3			Flowchart	B.N.7
4			classification	B.N.7
5		Program design & implementation issues	programming technique, structured programming	B.N.4
6			Modular designing of programs	B.N.4
7		Programming Environment	High level programming language, Low level programming language,	B.N.4
8			Middle level programming language	B.N.1
9			compiler , assembler, interpreter.	B.N.1
CO: 1				
LO: To learn step by step procedure to build algorithm, prepare flow chart to solve problem using programming techniques.				
10	2	What is C	Historical development of C where C stands	B.N.3
11		Getting Started with C	The C Character set,C keywords	B.N.8
12			identifiers	B.N.3
13			Types of C Constants	B.N.7
14			Types of C Variables	B.N.7
15			C Instructions	Type Declaration Instruction
16		Integer and Float Conversions		B.N.3
17		type conversion in assignment		B.N.3
18		operators	Arithmetic operators	B.N.3
19			Relational, logical	B.N.3
20			bitwise	B.N.3
21			Special operators	B.N.3
22			Hierarchy of operators	B.N.3
CO: 1,2				
LO: To learn basic fundamental construct to build instruction with its rules and proper documentation for each program.				
23	3	Decision control structure	If, if- else	B.N.7
24			Nested if –else	B.N.7
25			Switch case	B.N.7

26	Loop control structure	For loop	B.N.3
27		Forms of for	B.N.3
28		While loop	B.N.3
29		Practice	
30		Do-while	B.N.3
31		Practice	
32		Nested loops	B.N.5
33		Break, continue	B.N.7
34		Goto, exit	B.N.7

CO: 2,3,4**LO:** To learn how decision making operation, loop based evaluation and jumping statement work using logical skill.

35	4	Array	Array, array initialization	B.N.3
36			1D array programming	B.N.3
37			2 d array	B.N.5
38			memory map of 1D and 2D array	B.N.3
39			2 d array programming	B.N.3
40			Multidimensional array	B.N.5
41		Strings	String	B.N.8
42			String library functions	B.N.8
43			practice	B.N.7
44			2D array of characters	B.N.3

CO: 3,4**LO:** To learn how to work on collection of data and make operation on it like:search and make an arrangement.

45	5	Structure	declaration of structure, accessing structure elements	B.N.3
46			how structure elements are stored	B.N.3
47			array of structure	B.N.5
48			uses of structure	B.N.5
49		Preprocessor	features of C Preprocessor	B.N.3
50			macro expansion, macro with arguments	B.N.3
51			file inclusion, conditional, #if, #elif	B.N.7
52			miscellaneous directives, #include, #define directives	B.N.7
53			#undef, #pragma directives	B.N.7

CO: 3,4**LO:** To learn how to create structure of different data according to requirement along with all basic building block of this language.

VI: Book References:

8. Y. Kanetkar, "Let us C", BPB Publications

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII: Rubric for practical Assessment			
Subject: Programming and problem solving through c			
BCA I Sem			
Goal : Students analyze problems and make programs to solve these problems.			
Objective: Students learn programming techniques and develop base for other programming languages.			
20-25 Marks	15-20 Marks	10-15 Marks	05-10 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students can work on collection of data and organize it.	% Students having logical skills to take decisions and program further.	% Students having understanding about basic constructs of programming.	% Students Need More Efforts for programming.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 25	Final practical Marks Out of 25
Presentation Out of 5	Practical Out of 5	Assignment Out of 5	VIVA Out of 5	Practical written Out of 5		

Lesson Plan

Subject: Digital Computer organization

Class: BCA-105 – I Sem

I: Objective of course: To introduce the concept of digital computer organization.

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- | | |
|-----|---|
| CO1 | 1. To acquire the basic knowledge of digital logic levels and application of knowledge to understand digital computer organization. |
| CO2 | 2. It introduces the fundamentals of digital arithmetic and programmable logic. |
| CO3 | 3. To prepare students to perform the analysis and design of various digital electronic. |
| CO4 | 4. The ability to understand, analyze and design various combinational and sequential circuits. |

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3						3	2
CO 2	2		2			2	3	
CO 3			3	2	2	1		2
CO 4			2	2				3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
CO: 1				
LO:.student will be able to know what is block diagram of computer and input and output device.				
1	1	Block diagram of computer, input and output device	Block diagram of computer and concept,processing.	B.NO.1,2
2			Hardware and software concept	
3			Microprocessor concept	
4			Keyboard,mouse joystick,scanner,printers,	
5			Types of printer,plotters,devices.	
CO: 1				
LO: Students will be able to solve problems using binary numbers, hexadecimal and octal notation, and the representation of information using digital codes. Solve problems using computer arithmetic including signed number representations in 1's and 2's complement form				
6	2	Basic of Number System and their operations,Concepts of Codes	Introduction to Number System and their conversions. Perform binary addition, subtraction, multiplication and division.	B.NO.1,2
7			ASCII code	
8			Grey Code	
9			Excess-3 code	
			1'complement and 2'complements	
CO: 1,2				
LO: Students will learn Application of logic to design and creation, using gates, to solutions to a problem. Use De Morgan's Theorem to simplify a negated expression. Students will be able to compute Karnaugh Map to reduce Boolean expressions and logic circuits to their simplest forms.				
10	3	Logic gates, Boolean function	NOT, OR, AND,NAND,NOR,XOR,XNOR gates	B.NO.1,2
11			Boolean Algebra	
12			De Morgan's Theorem	
13			Half adder and full adder	
			Concept of Boolean functions.	
			SOP, POS, minterms	
			Simplification of logical circuits	

			Karnaugh maps	
CO:3,4				
LO : Students will learn the concept of Sequential Circuits: Latches, Clock Signals and Clocked Flip-Flops, State Diagrams, Tables, and Machines. Design and implement various combinational and sequential circuits.				
14	4	Flip-Flop, Registers and Counters	Flip-Flop & their types	B.NO.1,2
15			Register and counter	
16			RS-flipflop level clocked D, F/P edge triggered D flipflop.	
17			JK flip flop, racing condtion master-slave flip flop,	
18			Buffer register, shift register, ripple counter,	
19			Synchronous counter, ring counter, mod counter	
CO:1,2				
LO: Students will learn the concept of Memory cell Organization such as RAM,ROM,PROM,EPROM,MANETIC DISK, cpu and memory.				
20	5	Computer memory	Memory cell Organization,	B.NO.1,2
21			RAM,ROM PROM,EPROM,EEPROM	
22			Magnetic hard disk, pen drive cache memory	
23			Optical disk, input device, cpu and memory	

VI: Book References:

1. Digital Computer Electronics by Malovino and Brown McGraw Hill
2. Computer fundamental Architecture and Organization by B.Ram.
3. Computer organization by Hayes.
4. Computer fundamental by P.K. Sinha & Priti sinha, BPB publication.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.

4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assesment			
Subject: digital computer organization			
BCA I Sem			
Goal : Students develop the ability to prepare and analyze advancement of the theory and practice of Computer Science, Electronics and Technology, information processing and related arts and sciences for the service of mankind and the advancement of general welfare.			
Objective: Students gain understanding of the Digital Computer Electronics, To become familiar with how digital information is represented, stored, and manipulate.			
8-10 Marks	06-08 Marks	04-06 Marks	00-04 Marks
Student	Student	Student	Student
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Digital Computer and further to develop understanding of Gates, Flip-flop, and making circuits, and computer memory,	% Students having the basic concept Digital Computer and further to develop understanding of Gates, Flip-flop, and making circuits.	% Students having understanding about Digital computer and circuits	% Students Need More Efforts for Solution and Basic Concept of Digital computer

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 10	Final Internal Marks Out of 10
Presentation Out of 2	Quiz Out of 2	Assignment Out of 2	VIVA Out of 2	Internal Out of 2		

Lesson Plan**Subject:** English**Class:** BCA - 106**I: Objective of course:**

The Objective of this course is to enhance LSRW Skills. It intends to enable the students to communicate effectively. It helps them to overcome their inhibitions and self consciousness while speaking and writing in English. It focuses on the employability skills of the students.

II: Examination:

The faculty member will award internal marks out of 5 and the bifurcation is mentioned in the scheme of internal marks. The end year examination will be worth 25 marks having theory.

III: Course Outcomes (CO):

CO1. Students are able to apply functional Grammar and use grammatically accurate English and will able to form correct sentences, after reading the text. They will also enrich their vocabulary

CO2. Students will also enrich their vocabulary by learning the formation of new words through suffixes- prefixes, synonyms- antonyms. They will also implement it through reading comprehension

CO3. Students are able to compose paragraph consistently.

CO4. Students are able to draft all kinds of Business Correspondence, Resume and E-mail Writing.

2			About seclpture , Archacology	&
		Iconography & other social Art	Indian culture	
3		LIFE IN VEDIC LITERATURE	Indian literature vedic granthas, ramanayan, mahabharat etc	
A-1. First assignment				
CO: 1				
LO: The students will acquire with English language and Literature by studying this. They will also learn about allusions, references, poets, writers and stories etc.				
4	I	Freedom movement in India	Short question / answer	Text book of
5			Exercise based on chapter	English languag e
6		Aspects of Indian consitution	Tenses, vocalubary , building, exercise	& Indian culture
A-2. Second assignment				
CO: 1,				
LO: Vocabulary plays an important role in enriching language. Students will improve their communication by enhancing their vocabulary.				
Lesson 5 and 6				
7	I	Individual freedom	Significance of fundamental duties	Text book of
8		Fundamental duties	“Article based on universal Declaration of Human Rights”.	English languag e

			About Indian constitution	& Indian culture
9				
A-3. Group assignment				
CO: 1&2				
LO: Students will also enrich their vocabulary by learning the formation of new words through suffixes- prefixes, synonyms- antonyms. They will also implement it through reading comprehension.				
10	II		Group test , class test , practice and unsolved paper	Wren Martain
CO: 3 Students will also enrich their vocabulary by learning the formation of new words through suffixes- prefixes, synonyms- antonyms. They will also implement it through reading comprehension				
LO: Grammar plays a crucial role in learning language on the basis of rules. By that students get benefitted by correct usage.				
11	III		Group presentation on Indian art and culture , Rules of grammar, business correspondence etc.	Wren Martain
A-4. Presentations				
CO: 3 Students will also enrich their vocabulary by learning the formation of new words through suffixes- prefixes, synonyms- antonyms. They will also implement it through reading comprehension				
LO: Students will enrich the ability to understand the text and Passages				
12	III		Group presentation on Indian art and culture , Rules of grammar, business correspondence etc.	Wren Martain
CO: 4 Students are able to draft all kinds of Business Correspondence, Resume and E-mail Writing.				
LO: Students will enrich the ability to understand the text and Passages.				
13	IV		Students will also enrich their vocabulary by learning	English Gramma r and composi tion (warrine rs)
			the formation of new words through suffixes- prefixes, synonyms- antonyms	
			They will also implement it through reading comprehension	
A-5. Assignment				
CO: 3 Students are able to compose paragraph consistently.				
LO: Students will learn the art of composition on various topics that enhances their ability to express their				

thoughts on different aspects.				
14	V		Paragraph writing & Business correspondence,	Krishna Sharma (Business correspondence and report writing)
			Resume And E.mail writing	& Ashraf Rizwi
15			Class test	(Business correspondence and report writing)
			All type of business letters and correspondence	

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book Reference:

1. English language and Indian culture (Text book of English language)
2. Business correspondence and report writing(Sharma and Mohan, Tata Mc GRAW HILL)
3. English Grammar and composition (Mc GRAW HILL)

VII: Notes:

1. There will be individual assignment, presentations and group assignments .
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assesment			
Subject: ENGLISH			
BCA III Sem			
Goal : This course is to enhance LSRW skills. It intends to enable the students to communicate Effectively. It helps them to overcome their inhibitions and self consciousness while speaking and writing in English. It focuses on the employability skills of the students.			
Objective:. The objective of this course is to given knowledge about the basic of English language and literature and usage of Grammar			
25-20 Marks	20-15 Marks	15-10 Marks	10-01 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% student having an understanding about basic of Grammar & LSRW SKILLS.	% student having understanding about English language literature & grammar.	% student having understanding about speaking abilities & writing skills.	English language & basically Spoken abilities Writing skills.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 10	Final Internal Marks Out of 10
Presentatin Out of 2	Quiz Out of 2	Assignmet Out of 2	VIVA Out of 2	Internal Out of 2		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE

Lesson Plan

Subject: Mathematics- I

Class: BCA - I Sem

I: Objective of course:

The objective of this subject is to help students to understand the basics of calculus, application of vector functions, and uses of matrix in solving simultaneous equations with the help of rank and nullity

II: Examination:

The internal examination will carry 20% marks i.e. 10 marks. The internal examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate combination of sub section in each question.

III: Course Outcomes (CO):

CO1: Communicate mathematics both orally and in well written sentences and should be able to explain solutions to problems.

CO2: Work with functions represented in a variety of ways: graphical, numerical, analytical, or verbal. They should understand the connections among these representations.

CO3 : Meaning of the derivative in terms of a rate of change and local linear approximation and should be able to use derivatives to solve a variety of problems

Co4: To identify areas in mathematics and other fields where Calculus is useful

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1								1
CO 2	3	1	2	2				
CO 3	2			2		3		
CO 4		1	2					3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Review of concept of functions of one variable	Constants, Variables, Functions,	D.C Agrawal.
2			Definition of limits, Left hand and right hand limits,	D.C Agrawal
3			Evaluation of limits, Some important limits	D.C Agrawal
4		Concept of continuity	Concept of continuity and discontinuity	D.C Agrawal
5	Types of discontinuity		D.C Agrawal	
6	Left and right hand derivatives		D.C Agrawal	
7	Problems on differentiability and continuity		D.C Agrawal	
Assignment-Problems based on continuity, Limit and differentiability				
CO	2			
LO:	Understand the concept of limit, continuity differentiability constant and variables			
8	2	Successive Differentiation	Successive differentiation of function,	D.C Agrawal
9			and nth different ion of functions,	D.C Agrawal

10			Application of Leibnitz theorem	D.C Agrawal
11			Problems on Leibnitz theorem	
13			State and prove of Rolles, Lagranges mean value theorem, and problems based on these theorems	D.C Agrawal
14			Maclaurin Series	D.C Agrawal
15			Taylor Series	D.C Agrawal
16			Indeterminate form of limits	D.C Agrawal
17			Problems based on $0/0$ form	D.C Agrawal
18			Problem based on $\infty \times 0$	D.C Agrawal
19			Problem based on ∞/∞	D.C Agrawal
20			Problem based on $\infty - \infty$	D.C Agrawal

Assignment- Problems based on Rolles Theorem, Leibnitz theorem, Taylor's series, Maclaurin series and in determinant form of limits.

CO: 4

LO: Understand the concept of successive differentiation Leibnitz theorem, Taylor and Maclaurin Series and indeterminate forms of limit

21			Tangent and normal to a curve on a given point	D.C Agrawal
22			Finding angle of intersection between two curves	D.C Agrawal
23			Curvature, radius of curvature,	D.C Agrawal
24			chord of curvature, centre of curvature	D.C Agrawal
25			Asymptote parallel to the coordinate axis	D.C Agrawal
26			Finding oblique asymptotes	D.C Agrawal
27			Reduction formula for $\sin^n x$ and $\cos^n x$	D.C Agrawal
28			Reduction formula for $\tan^n x$, $\cot^n x$	D.C Agrawal
29			Reduction formula for $e^{ax}\cos^n bx$ and $e^{ax}\sin^n bx$	D.C Agrawal

Assignment- Problems based on reduction formulas

CO: 4

LO: Understand the concept of tangent, normal, curvature, asymptotes and reduction formulas for various trigonometric functions

30	4	Vector calculus	Derivative of a vector function	D.C Agrawal
31			Gradient of a vector function,divergence of a vector function,	D.C Agrawal
32			Curl of a vector function	D.C Agrawal
Assignment- Problems based on Divergence, Gradient curl of a vector function, irrotational and solenoidal vector				
CO: 2				
LO: Understand the concept of divergence , gradient curl of vector function				
33	5	Matrices	Rank and nullity of a matrix, Echelon form	D.C Agrawal
34			Normal form of a matrix	D.C Agrawal
35			Solving simultaneous equations using matrix , unique solution , no solution and infinite solution	D.C Agrawal
Assignment- Problems based on Matrix rank and nullity, solving simultaneous equation by using rank and nullity of a matrix				
CO: 1				
LO: Understand the concept of rank ,nullity and application of rank and nullity in solving simultaneous equations				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. A text book of calculus by Dr. H.S.Sharma, Ratan Prakashan
2. Vector Calculus & Geometric by Dr. H.K.Pathak, & D.C. Agrawal
3. Discrete Mathematics by Dr. H.K.Pathak, & D.C. Agrawal – (shikha sahitya prakashan)

VII: Note:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on the aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Mathematics I			
BCA I Sem			
Goal : Students develop the ability to understand the concept of constant, and variable, functions differentiate, limit and continuity , application of calculus in real life, differentiation of vector functions and solution of linear equations by using matrix method .			
Objective: Student must be able to apply calculus in real life problems, find areas where calculus is applicable and find rate of change of one variable with respect to other, velocity and acceleration			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of differentiation, integration, application of differentiation, integration, vector function, application of matrix in solving simultaneous equation	% Students having the basic concept of differentiation integration ,vectors and matrix operations.	% Students having understanding about differentiation, and integration.	% Students Need more Efforts for Concept of calculus.

IX: Scheme of internal marks

Class Participation	Internal Assessment	Total 10	Practical marks 10
Presentation and Assignment Out of 05	Class Test out of 05		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: PC SOFTWARE****Class: BCA-104 -I Sem**

I: Objective of course: The objective of this course is to give knowledge about the basic of a computer and its application.

II: Examination: The external examination will be of 50 marks. The question paper will contain questions equally distributed in all units. The balance will be maintained by including appropriate (numerical/objective/conceptual/analytical/theoretical) combination of subsection in each question.

III: Course Outcomes (CO):

- CO1 This course introduces the concepts of computer fundamental & their applications for the efficient use of office technology.
- CO2 Demonstrate the basic technicalities of creating Word documents.
- CO3 Create and design a spreadsheet for general office.
- CO4 Demonstrate the basic technicalities of creating a PowerPoint presentation.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3				2	3	2	
CO 2	3		2			3		2
CO 3	3		2			3	2	2
CO 4			2					2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic of computer MS-Windows: Operating system-	Block dig of computer, classification of comp, comp memory	B.N. 2
2			Operating system-Definition & functions	B.N.2
3			Basics of Windows. Basic components of windows	
4			running applications, exploring computer, managing files and folders, copying and moving files and folders	B.N.3
5			Control panel – display properties, adding and removing software and hardware	
6			setting date and time, screen saver and appearance. Using windows accessories.	B.N.2
7			I/O device, types of language, compiler, interpreter, assembler	B.N.3
A-1 First Assignment				
CO: 1				
LO: Students will be able to learn computer fundamentals and windows operating system and its properties.				
8	2	Documentation Using MS-Word	Introduction to Office Automation, Creating & Editing Document,	B.N.1
9			Exercise on word	
10			Formatting Document, Auto-text, Autocorrect, Spelling and Grammar Tool,	B.N.3
11			Document Dictionary, Page Formatting,	
12			Bookmark, Advance Features of MS-Word-Mail Merge,	B.N.2
13			Exercise on Mail-merge, Macros,	
14			Tables, File Management, Printing, Styles,	
15			Linking and embedding object, Template.	
A-2 Second Assignment				
CO: 2				
LO: Students will be able to learn office automation using MS-word.				

16	3	Electronic Spread Sheet using MS-Excel	Introduction to MS-Excel, Creating & Editing Worksheet	B.N.1
17			Formatting and Essential Operations,	B.N.1
18			Exercise on worksheet	
19			Formulas and Functions,	B.N.1
20			Advance features of MS-Excel	
21			Pivot table -Pivot Chart	B.N.2
22			Charts	B.N.2
23			Linking and Consolidation.	B.N.2

A-3 Third Assignment

CO: 3

LO: Students will be able to learn spread sheet creation using MS- excel.

24	4	Database Management using Excel	Database Management	B.N.3
25			Database Management using Excel-Sorting,	B.N.3
26			Filtering, Practice	B.N.3
27			Table , Practice	B.N.3
28			Validation,	B.N.3
29			Goal Seek,	
30			Scenario, Exercise	B.N.3

A-4 Fourth Assignment

CO: 1,3

LO: Concept of managing spread sheets will student learn in MS- excel.

31	5	Presentation using MS-PowerPoint:	Presentations, Creating, Manipulating & Enhancing Slides,	B.N. 5
32			Organizational Charts, Excel Charts, Word Art,	B.N. 5
33			Layering art Objects, Animations and Sounds,	
34			Inserting Animated Pictures	B.N. 5
35			Inserting Recorded Sound Effect or In-Built Sound .	

A-5 Fifth Assignment

CO:4

LO: Students will be able to learn create power point presentation.

VI: Book References:

1. Courter, G Marquis (1999). Microsoft Office 2000: Professional Edition. BPB
2. Microsoft Office – Complete Reference – BPB Publication
3. Computer Fundamental – Anita Goel - Pearson
4. PC Software – Shree Sai Prakashan, Meerut
5. Microsoft Office – Ron Mansfied, BPB Publication

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Practical Assessment			
Subject: PC SOFTWARE			
BCA I Sem			
Goal: Students develop the ability to understand the relevance of computers in our society to understand the various components of the computer, to understand the difference between software and hardware, and to introduce the various categories of computers.			
Objective: Students gain understanding the components of a computer using my computer. Have students categorize the various components as input, output, hardware, software, system unit, storage device.			
20-25 Marks	15-20 Marks	10-15 Marks	00-10 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having an understanding about computer and its Application, MS windows and knowledge about MS word, MS Excel, and MS PowerPoint.	% Students having the basic concept of computer fundamental and MS office.	% Students having understanding about computer and its fundamental.	% Students Need More Efforts for concept of basic of computers.

IX: Scheme of Practical marks

Class Participation			Practical Assessment		Total 25	Final Practical Marks Out of 25
Presentation Out of 05	Written exam 05 Out of 05	Assignment Out of 05	VIVA Out of 05	Practical Out of 05		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE

Lesson Plan

Subject: statistical methods part I:

Class: BCA-102 - I Sem

I: Objective of course: The objective of this course is to introduce the concept of statistical methods and its application

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- | | |
|-----|--|
| CO1 | How to calculate and apply measures of location and measures of dispersion -- grouped and ungrouped data cases |
| CO2 | How to apply discrete and continuous probability distributions to various business problems. |
| CO3 | Offers a broad coverage of standards and established methods through leading edge techniques. |
| CO4 | The course is designed to acquaint students with the basic principles of applying statistical methods to management and their utilization in technological processes |

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO5	PO6	PO7	PO8
CO 1	2	3			3		3	
CO 2	2		3	3				2
CO 3					2	3	3	3
CO 4	3	2	3	2		2		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Types of data	Introduction of statistical methods	B.N. 3
2			Types of observations	B.N.3
3			Individual observation, discrete series, and continuous series	B.N.3
4			Pictorial representation of data	B.N.3
5			histrogram	B.N.2
6			Frequency curve, and frequency polygon	B.N.2
7			Cumulative frequency curve (ogive)	B.N.2

CO: 1**LO: understand different types of data used in real life**

8	2	Measures of central tendency:	Introduction simple arithematic mean	B.N.1
9			Step deviation method to calculate A.M in continuous series	B.N. 3
10			Median, and some numericals based on medians	B.N.2
11			Calculation of mode, quartiles and deciles	B.N. 3
12			Measures of dispersion	B.N. 3
13			Calculation of standard deviation and mean deviation	B.N. 3
14			Some more examples on mean deviation	B.N. 3

CO: II

LO: After this lesson, students will be able to: calculate the **mean, median, mode**, and range for a set of data they collected

15	3	Skewness and kurtosis, and theory of probability	Introduction of skewness	B.N.1
16			Pearsons coefficient of skewness	B.N.1
17			Bowleys coefficient of skewness	B.N.1
18			Introduction of moments, central moments, non central moments	B.N.1
19			Introduction of of moment about origin	B.N.2
20			Calculation of skewness and kurtosis based on moments	B.N.2
21			Introduction of elementary probability theory	B.N.2

COIII

LO: :- know the complementary relationship of skewness with measures of central tendency and dispersion in describing a set of data..

22	4	Theoretical distribution	Introduction of theoretical distribution	B.N.2
23			Binomial distribution and its constants	B.N.1
25			Some numerical based on binomial distribution	B.N.1
26			Poisson distribution and its constants	B.N.1
27			Numerical based on Poisson distribution	B.N.1
28			Normal distribution	B.N.1

CO: 4

LO: Calculate the simple linear regression equation for a set of data and know the basic assumptions behind regression analysis.

29	5	Correlation and regression	Definition of correlation positive and negative correlation	B.N. 2
30			Karl pearsons coefficient of correlation	B.N. 1
31			Spearman rank correlation coefficient of correlation	B.N. 2

32			Regression line and its equations	B.N. 2
----	--	--	-----------------------------------	--------

CO:5

LO: . :- Emphasis is placed on theoretical understanding combined with problem solving using algebra and calculus-based method

VI: Book References:

1. Statistics schaum's outline series, Spiegel, M.R.McGraw Hill Publishing Company.
2. Mathematical statistics Kapoor & Saxena : - S,Chand & sons.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance

VIII Rubric for Internal Assessment**Subject: Statistical methods****BCA I Sem**

Goal : The study of statistical methods focus on statistical sampling , and emphasizes the structure and behavior of sample and population There are a fundamental relationship between null hypothesis alternative hypothesis and calculated values and tabulated values

Objective: The objective of this course is to introduce the concept of statistical methods..

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks

IX: Scheme of practical marks

Class Participation			Internal Assessment		Total 25	Final practical Marks Out of 25
Presentation Out of 5	Practical Out of 5	Assignment Out of 5	VIVA Out of 5	Practical written Out of 5		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Advance calculus Session:****Class: BCA-201 - II Sem****I: Objective of course:** The objective of this course is to introduce the concept of advanced calculus

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- CO1 The objective of this class is to be able to write rigorous mathematical proofs for basic theorems in multi-variable calculus involving the fundamental tools such as continuity and differentiability.
- CO2 model spatial problems with vectors, lines, planes, curves and surfaces in three-dimensional space a,b,c.
- CO3 Mathematics majors will learn and retain basic knowledge in the core branches of
- CO4 Mathematics majors will be able to learn and explain mathematics on their own.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO5	PO6	PO7	PO8
CO 1	2	3			2	2	3	2
CO 2	3		2	2	3			
CO 3		2	3			3	2	2
CO 4	2	3		3		3		3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	CURVE TRACING AND IMPROPER INTEGRALS	Introduction.how to sketch graph	B.N. 3
2			Symmetry, asymptotes ,tangent and normals of curves	B.N.3
3			Tracing of curves in polar form	B.N.3
4			Convergence of improper integral of kind first	B.N.3
5			Convergence of improper integral of kind second	B.N.2
6			Convergence of improper integra of kind third	B.N.2
7			Different examples	B.N.2
CO: 1				
LO: After this topic Sketch circles, ellipses and graphs of functions starting from algebraic formulae in the form of a parametrized curve				
8	2	GAMMA AND BETA FUNCTION AND RECTIFICATION	Introduction of gamma function	B.N.1
9			Properties of gamma function	B.N. 3
10			Beta function .	B.N.2
11			Properties of beta function	B.N. 3
12			Relation between beta and gamma function	B.N. 3
13			Legendres duplication formula	B.N. 3
14			Introduction of rectification	B.N. 3
CO: III				
LO: After this lesson, students will be able to understand area and arc length of curves;				
15	3	Multiple integrals	Introduction of line integral	B.N.1

16			Double, and triple integrals	B.N.1
17			Vectore integrals	B.N.1
18			Surface and volume integrals	B.N.1
19			Gauss divergence theorem	B.N.2
20			Stokes theorem	B.N.2
21			Different examples	B.N.2

CO:1,4

LO: After this lesson student will Memorize the statement of the change of variables theorem for double integrals, and will be able to illustrate its geometric meaning with the aid of sketches, and apply it to compute integrals over regions that are neither type I nor type II. (d) Memorize the formulae for integration in cylindrical and spherical.

22			Introduction of partial differentiations.	B.N.2
23			Eulers theorem for homogeneous function	B.N.1
25			Introduction of partial differentiations	B.N.1
26	4	partial differentiation	Different numerical based on partial differentiations	B.N.1
27			Examples based on partial differentiation	B.N.1
28			Examples based on partial differentiations	B.N.1

CO: 4

LO: . After this lesson, students will be able to Calculate first and second partial derivatives .

29		Maxima & Minima function of two and three variables.	Introduction of maximum and minimum of function of two variables	B.N. 2
30	5	convergence and divergence of series	Examples based on maximum and minimum.	B.N. 2
31			Lagranges method to get maximum and minimum	B.N. 1

32		Convergence and divergence of series	B.N. 2
CO:5			
LO: After this lesson, students will be able to Calculate first and second partial derivatives.			

VI: Book References:

2. A text book of higher calculus for B.Sc II by Dr. H. S. Sharma Ratan Prakashan

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: advanced calculus			
BCA IISem			
Goal : The study of Advanced calculus calculus of functions of two or more than two variables.			
Objective: The objective of this course is to introduce the concept of advanced calculus..			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Student	Student	Student	Student
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of computer organization and architecture	% Students having the basic concept computer organization and architecture	% Students having understanding about computer organization and architecture.	% Students Need More Efforts for computer organization and architecture

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 25
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Operating System Fundamentals****Class: BCA 205 – IIInd Sem**

I: Objective of course: To understand fundamental components of a computer operating system and policies for scheduling, deadlocks, memory management, synchronization, system calls.

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- | | |
|-----|---|
| CO1 | 1. Describe and explain the fundamental components of a computer operating system |
| CO2 | 2. The course will cover an introduction on the policies for scheduling, deadlocks, memory management, synchronization, system calls. |
| CO3 | 3. To learn the mechanisms of OS to handle processes and threads and their communication. |
| CO4 | 4. To learn the mechanisms involved in memory management in contemporary |

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3					3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Introduction to Operating System:	Introduction to Operating system, Operating system services.	B.N. 1
2			Multiprogramming, Time sharing system	B.N.2
3			Storage structures, system calls.	
4			Multiprocessors system	B.N.2
5			Device management, device drivers.	B.N.2
CO: 1				
LO: Students learned about different types of operating system and their advantages.				
6	2	Process Concept and CPU Scheduling:	Process Concept and CPU Scheduling	B.N.2
7			Scheduling Criteria	
8			Scheduling Algorithms	B.N.2
9			Algorithm Evaluation	B.N.2
CO: 1				
LO: Students learned about different types of scheduling algorithms and their advantages.				
10	3	Inter Process Communication	Inter Process Communication	B.N.2
11			Precedence Graphs	B.N.2
12			Critical Section Problem	B.N.2
13			Semaphores	
14			classical problem of Synchronization	B.N.2
CO: 2, 3				
LO: Students learned concept of Inter process communication and classical problem of Synchronization.				
17	4	Deadlock Problem:	Deadlock Characterization	B.N.2
18			Deadlock Prevention	
19			Deadlock Avoidance	

20			Deadlock Detection	
21			Recovery from Deadlock	
22			Methods of Deadlock Handling	
CO: 2,				
LO : Students learned methods of Deadlock Handling. How to detect, prevent and avoid deadlock and how to recover from it.				
23	5	Concept of memory management:	Logical and Physical address space, swapping.	B.N. 2
24			Contiguous and non-contiguous allocation	B.N. 2
25			Demand paging	B.N. 2
26			Page replacement algorithms.	
CO:2,4				
		LO: Students learned how to manage memory. Contiguous and non-contiguous allocation, demand paging and algorithms.		

VI: Book References:

1. Operating System by Deitel.
2. Operating System concept by A. Silberschatz and P. Galvin.
3. Operating System by William Stallings.

IPS ACADEMY, SCHOOL OF COMPUTERS (SOC), INDORE**Lesson Plan****Subject: Problem solving and programming through c –II****Session Jul-Dec****Class: BCA - II Sem**

I: Objective of course: The objective of this course are to make the student understand the programming language ,programming concepts of loops ,reading a set of data , stepwise refinements , Function, control structure& arrays. After completion of this course the students is expected to analyze the real life problems & write a program in ‘c’ language to solve problem. The main emphasis of the course will be on problem solving aspect that is, developing proper algorithms.

II: Examination: The external examination will be of 50 marks. The question paper will contain question equally distributed in all units. The balance of paper will be maintained by including appropriate numerical/objective/conceptual/analytic/theoretical) combination of subsection in each question.

III: Course Outcomes (CO):

- CO1 Understand modular programming.
- CO2 Access values by address and dynamic memory allocation.
- CO3 Understand about data storing in files
- CO4 Understand GUI programming.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 4	2		2	3		3	2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference	
1	1	Functions	Definition, declaration, calling & use.	B.N. 2	
2			Passing values b\w function, scope rule of function.	B.N. 2	
3		Advanced feature of functions	call by value, call by reference,	B.N. 4	
4			macro verses function	B.N. 2	
5			Recursion, need of recursion,	B.N.2	
6			Types of recursion	B.N.2	
CO: 1					
LO: understand module based programming					
7	2	Pointer	Definition & declaration, pointer assignment, pointers & 2D array	B.N.4	
8			pointer & arrays, passing entire array to function	B.N.4	
9			pointers array, pointer to array	B.N.4	
10			array of pointer to string	B.N.6	
11			Pointer to structures, use of pointer,	B.N.6	
12			malloc(), calloc() library function	B.N.4	
13		Union	Union definition & declaration, accessing a union member	B.N.4	
14			union of structures	B.N.4	
15			uses of union	B.N.5	
16			use of user defined data types	B.N.5	
CO:1,2					
LO: Way to access data in real time					
17		Console I/O function	Formatted console I/O function	B.N.4	
18			Unformatted consol I/O functions.	B.N.5	
19		Disk I/O function	File opening modes	B.N.5	
20			writing, closing files(fclose)	B.N.5	
21			formatted disk I/O function	B.N.5	
22			text verses binary mode	B.N.5	
23			record I/O in files	B.N.5	

24	3		a file copy program, using argc, argv,	B.N.1
25			detecting error in reading & writing	B.N.5
26			I/O redirection in DOS.	B.N.1
27			Practice	
28			practice	
CO:3				
LO: handle records in file				
29	4	Components of VDU	Display Adapters, Display Screens (monitor)	B.N. 3
30			Video Display modes, resolution	B.N. 3
31		Text or Graphics	Color in text in modes	B.N. 3
32			color in graphic mode	B.N. 3
33			video pages	B.N.3
34			Writing to VDU memory in text mode.	B.N.3
35			Programs based on above	B.N. 3
CO:4				
LO: learn basics of graphics				
36	5	Graphic programming	lines, stylish lines	B.N. 3
37			drawing & filling images	B.N. 3
38			patterns with differences	B.N. 3
39			Filling regular & nonregular shapes	B.N. 3
40			outputting text, justifying text	B.N. 3
41			A bit of animation, system matrices.	B.N. 3
42			practice	B.N. 3
CO:3,4				
LO: How to plan graphics elements on to screen.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

CO 2			3	3	2			
CO 3		3	2				3	
CO 4	3			2		2		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Estimation theory	Introduction of an Estimator	B.N. 3
2			Point and interval Estimator	B.N.3
3			Properties of a good Estimator	B.N.3
4			Method to find Maximum likelihood estimator	B.N.3
5			Numerical based on maximum likelihood estimator	B.N.2
6			Cramer rao inequality	B.N.2
7			Different examples	B.N.2
CO: 1				
LO: After the course students will able to apply appropriate estimators – including linear, least squares, maximum likelihood, and method of moments estimators – after considering estimation accuracy and complexity requirements				
8	2	Testing of hypothesis:	Introduction simple and composite hypothesis	B.N.1
9			Null and alternative hypothesis	B.N. 3
10			Type first and second error	B.N.2
11			Numerical based on type first and second errors	B.N. 3
12			Neymann pearsons lemma	B.N. 3
13			Numerical based on neymann pearsons lemma	B.N. 3
14			Some more examples on power of the test	B.N. 3
CO:2				
LO: Make a decision using p-value and draw an appropriate conclusion and student will get to know what is type 1 and type 2 error				
15	3	Student t test, f test and Chi square test	Introduction of chi square distribution	B.N.1
16			Constants of chi square distribution	B.N.1

17			Application of chi square distribution	B.N.1
18			Chi square test for goodness of fit, and chi square test for independence of attributes	B.N.1
19			Introduction of student t test. And numerical based on t test for single mean	B.N.2
20			Numerical based on t test for difference of means	B.N.2
21			Numerical based on paired t test	B.N.2

CO: 3

LO: After successfully completing this module, the student will be able to Explain and use the standard normal distribution and use of the t distribution

22			Introduction of non parametric test.	B.N.2
23			Methods to find sign test for single mean and paired sample	B.N.1
25	4	Non parametric test	Methods to find sign rank test for single mean and difference of means	B.N.1
26			Introduction of run test	B.N.1
27			Numerical based on run test	B.N.1
28			Median test and numerical based on that.	B.N.1

Co4

After this module students will be able to understand what is sign test

29		“ analysis of variance	Introduction of “ANOVA”	B.N. 2
30	5		One way classification and numerical Based on this	B.N. 1
31			Two way classification and numericals	B.N. 2
32			Lattin square design and numerical s based on them	B.N. 2

Co5

LO: after this module student will Understand what ‘ANOVA’ stands for, and why

The external examination will be of 80% marks i.e. 20 marks .The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/ conceptual/Analytical/ Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- CO1 Recognized different styles of communication and how to improve understanding and build rapport with other.
- CO2 Appreciated the role of body language and voice tone in effective communication.
- CO3 Gaining active listening and responding skills.
- CO4 Communicated their message in an effective and engaging way for the recipient.

6. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assessment

Subject: communication skills

BCA III Sem

Goal : student develop the ability to prepare and analyze and increasing communication skills. Topics may be include in overview such as listening., barriers to communication, presentation speech, advance communication, written communication and oral communication, negotiation skills, letter, resume, report.

Objective: Students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization

8-10 Marks	06-08 Marks	04-06 Marks	00-04 Marks
Student	Student	Student	Student
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%Student having the a lot of knowledge about the communication skills, like presentation, speech, report, letter and so on.	% student having the basic concept of communication skills. And understanding of how to communicate.	% student having understanding communication skills.	% student Need More efforts for solution and basic concept of communication.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 10	Final Internal Marks Out of 10
Presentation Out of 2	Quiz Out of 2	Assignment Out of 2	VIVA Out of 2	Internal Out of 2		

[Type text]

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Data Structure using C++****Class: BCA -III Sem****I: Objective of course:** To introduce the concept of Data structure in which study algorithms and complexity.**II: Examination:** The examination will be of 50 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/ conceptual/Analytical/ Theoretical) combination of sub section in each question**III: Course Outcomes (CO):**

- CO1 Understand data arrangement and program run time.
- CO2 Understand problems and implement solutions stepwise
- CO3 Understand which data structure is used according to the requirements
- CO4 Implements better approach to solve a problem

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2		3	3	3	2	2	2
CO 2		2	2		2	3	3	
CO 3	3			3				3
CO 4	2	3	2	3		3	3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Data structure and types of variable	Static variable dynamic variable	B.N. 1
2			Representation and address calculation of single and multidimensional array in memory	B.N.2
3,			Pointers, sparse matrix representation	B.N. 1, B.N.2
4			Time and space complexity of algorithm.	B.N.3
CO: 1				
LO: understand benefits of data structure and need of data structure				
5	2	Stack Data structure	Representation of stacks	B.N.3
6			Operation on stacks	B.N.2,B.N.3
7			multiple stacks	B.N.2
8			Infix and post fix notations	B.N.1
9			Exchanging the value of two stacks,	B.N.2
10			Application of stacks	B.N.2
11			Recursion techniques and expression evaluation.	B.N.1
CO: 2				
LO: understand behavior of Stack and where it is use.				
	3	Queue Data structure	Representation of queues	B.N. 3

12			Operation on queues	B.N. 4
13			Multiple queues	B.N.2
14			Circular queues, D queues	B.N.2
15			Application of queues	B.N.2
			Link List	B.N.1
16			Singly Link list	B.N. 4
17			Doubly link list	B.N.3
18			Circular link list	B.N.1
19			Generalized lists,	B.N.2
20			List traversal.	B.N.4
21			Problem solving with dynamic storage management	B.N. 2
22			Insertions and deletion algorithms	B.N. 1
CO: 3				
LO: understand limitation of static and dynamic data structure				
23			Basic concept and definitions	B.N.1
24			Basic operation on binary trees	B.N.2
25			Tree search and Insertion	B.N.4
26			Tree deletion	B.N. 2
27			Balanced tree	B.N.1
28			Balanced tree Insertion and Deletion	B.N.2

29			B-tree	B.N.3
30			Graphs Basics	B.N.2
31			Representation.	B.N.4
32			Hash table, Hash techniques	B.N. 2
33			Traversal and Applications	B.N.1
CO: 4				
LO: Able to find out maximum profit and minimum distant in real life application				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

3. Data structure with C++ by Drozdek
4. Data Structures-Lipschutz, Schaum's Outline Series

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric For Internal Assessment			
Subject: Data Structure Using C++			
BCA III Sem			
Goal : The goal of this course is to provide an introduction to the theory and practical of data arrangements and operations on that data. This will create to developed new concepts.			
Objective: understand various types of data model .how to efficiently data can manage in memory.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students having the basic concept of data structure and various types of algorithms with complexity	% Students having the basic concept of memory management in run time memory	% Students having understanding about data structure.	% Students Need More Efforts for algorithms and complexity.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 25	Final Internal Marks Out of 25
Presentation Out of 2.5	Quiz Out of 2.5	Assignment Out of 10	VIVA Out of 5	Internal Out of 5		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Digital Computer Electronics****Class: BCA-303 - III Sem****I: Objective of course:** To introduce the concept of digital electronics.**II: Examination:** The examination will be of 50 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/ conceptual/Analytical/ Theoretical) combination of sub section in each question**III: Course Outcomes (CO):**

- CO1 To acquire the basic knowledge of digital logic levels and application of knowledge to understand digital electronics circuits.
- CO2 It introduces the fundamentals of digital arithmetic and programmable logic.
- CO3 To prepare students to perform the analysis and design of various digital electronic.
- CO4 The ability to understand, analyze and design various combinational and sequential circuits.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	2	2				3	2
CO 2	2	2	2			2	3	
CO 3			3	2	2	2	3	2
CO 4		2	2	2			3	3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic of Number System and their operations	Introduction to Number System and their conversions..	B.N. 1
2		Binary Operations	Binary addition	
3			Binary subtraction	
4			Binary multiplication	
5			Binary division	
6			Concepts of Codes	ASCII code
7		Grey Code		
8		Excess-3 code		B.N.2
9		BCD number		B.N.2
CO: 1				
LO: Students will be able to solve problems using binary numbers, hexadecimal and octal notation, and the representation of information using digital codes. Solve problems using computer arithmetic including signed number representations in 1's and 2's complement form				
10	2	Logic gates:	NOT, OR, AND GATES	B.N.1
11			NAND GATE	
12			NOR GATE	
13			XOR GATE	
14			XNOR GATE	
15			Boolean Algebra	B.N.1
16			De Morgan’s Theorem	B.N.2
17			Half adder and full adder	B.N.2
CO: 1,2				
LO:. Students will learn Application of logic to design and creation, using gates, to solutions to a problem. Use De Morgan’s Theorem to simplify a negated expression.				
18	3	Boolean functions & truth table	Concept of Boolean functions.	B.N.1
19			SOP, POS, minterms	B.N.1

20			Simplification of logical circuits	B.N.1
21			Karnaugh maps	B.N.1

CO:1,2

LO: Students will be able to compute Karnaugh Map to reduce Boolean expressions and logic circuits to their simplest forms

22	4	TTL, Circuits	Understanding TTL & circuits, circuits	B.N.2
23			Totem pole and open collector gates	B.N.4
24			Multiplexer	B.N.1
25			Demultiplexer	B.N.1
26			Encoder	B.N.2
27			Decoder	B.N.1

CO:3,4

LO: Students will learn the concept of TTL circuit, multiplexer, demultiplexer , encoder and decoder

28	5	Flip-Flop, Registers and Counters	Flip-Flop & their types	B.N. 3
29			Triggered	B.N. 3
30			Concept of Register and their types	B.N. 1
31			Define Counter & Types of Counter	B.N.1

CO:3,4

LO: Students will learn the concept of Sequential Circuits: Latches, Clock Signals and Clocked Flip-Flops, State Diagrams, Tables, and Machines. Design and implement various combinational and sequential circuits.

3. Digital computer Fundamental by Thomas C Bartee. , 6th edition, Mc Graw Hill 1986.
4. Digital Systems- Principles and Design, Pearson Education, 2007.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
5. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assesment			
Subject: Digital Computer Electronics			
BCA III Sem			
Goal : Students develop the ability to prepare and analyze advancement of the theory and practice of Computer Science, Electronics and Technology, information processing and related arts and sciences for the service of mankind and the advancement of general welfare.			
Objective: Students gain understanding of the Digital Computer Electronics, To become familiar with how digital information is represented, stored, and manipulate.			
20-25 Marks	15-20 Marks	10-15 Marks	00-10 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Digital Computer and further to develop understanding of Gates, Flip-flop, and making circuits.	% Students having the basic concept Digital Computer and further to develop understanding of Gates, Flip-flop, and making circuits.	% Students having understanding about Digital computer and circuits.	% Students Need More Efforts for Solution and Basic Concept of Digital computer.

IX: Scheme of Practical Marks:

Class Participation			Internal Assessment		Total 25	Final Practical Marks Out of 25
Presentation Out of 05	Written exam Out of 05	Assignment Out of 05	VIVA Out of 05	Practical Out of 05		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Differential equation****Class: BCA - 301 III Sem****I: Objective of course:**

The objective of this subject is to familiarize students differential equation and types of differential equations ,solving various s types differential equations and Identifying kind of differential equation.

II: Examination:

The internal examination will carry 20% marks i.e. 10 marks .The internal examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units .The balance of the paper will be maintained by including appropriate combination of sub section in each question.

III: Course Outcomes (CO):

CO1: Solve the problems choosing the most suitable method.

CO2: Apply the fundamental concepts of Ordinary Differential Equations and Partial Differential Equations and the basic numerical methods for their resolution

CO3 : Understand the difficulty of solving problems analytically and the need to use numerical approximations for their resolution

Co4: Apply series solutions to ordinary differential equations

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1					3		2	
CO 2	2	3	2		2		2	1
CO 3	3	1	2		2	3		3
CO 4			3	3				

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Differential equation of first order and first degree	Homogeneous differential equations.	D.C Agrawal.
2			Reducible to homogenous differential equation	D.C Agrawal
3			Linear differential equations	D.C Agrawal
4			Reducible to linear differential equations	D.C Agrawal
5			Exact differential equation	D.C Agrawal
6			Change of variables	D.C Agrawal
7			Differential equation solvable for p	D.C Agrawal
8			Solvable for x and y and clairauts equation	D.C Agrawal, H. K. Pathak
Assignment : Problems based on exact, homogenous, reducible to homogeneous diff. equations				
CO: 1				
LO:. Understand the concept of Homogeneous, Reducible to homogenous linear,Exact and solvable for p,x,y differential equation .				
9	2	Family of curves	Trajectories, Orthogonal Trajectories	D.C Agrawal, H. K. Pathak
10			Solving auxiliary equation with different types of roots	D.C Agrawal
11			Finding PI of various trigonometric and algebraic functions.	D.C Agrawal, H. K. Pathak
12			Finding PI of sum and product of functions	D.C Agrawal
13			Reducing differential equations to liner form	D.C Agrawal
Assignment : Problems based on finding CF, PI and reduction of diff equation to linear form				
CO: 3				
LO : Understand the concept of CF, PI and reducing the differential equation to linear constant coefficient form				
14	3	Linear differential equation of second order	Finding complete solution when an integral of C.F. is known	D.C Agrawal
15			Removal of first derivative	D.C Agrawal
16			Change of independent variable,	D.C Agrawal
17			Method of variation of parameters	D.C Agrawal
18			Simultaneous differential equations of first order	D.C Agrawal

Assignment : Problems based on simultaneous diff. equations, and variation of parameters, an integral of C.F. is known.				
CO: 3				
LO: Understand the concept of second order liner diff. equation and Simultaneous differential equations of first order.				
19	4	Initial and boundary value problem, Picard method and series solution	Initial value problems	D.C Agrawal
20			Picard method of Successive approximation	D.C Agrawal
21			Existence and uniqueness theorem	D.C Agrawal ,& H. K. Pathak
22			Series solution for regular singular point	D.C Agrawal
23			Series solution for iregular singular point	D.C Agrawal
Assignment- Problems based on Picard method , series solution				
CO: 4				
LO: Understand the concept of initial and boundary value problem, Picard method and series solution				
24	5	Partial differential equations	Formation of partial differential equations of first order	D.C Agrawal
25			Lagranges method	D.C Agrawal
26			Standard forms	D.C Agrawal, H. K. Pathak
27			Charpit method	D.C Agrawal
28			Linear partia diff.equation of higher order with constant coefficient	D.C Agrawal H. K. Pathak
Assignment- Problems based on Lagranges Method, Charpit method and partial diff equaions				
CO: 2				
LO:. Understand concept of partial differential equations, Lagranges form, Charpit form, Standard form				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- 1.A text book of Differential equation by Dr. H.K.Pathak, & D.C. Agrawal– (shikha sahitya prakashan)
2. A text book of Differential equation by N.M. Kapoor Pitambara Publication NewDelhi
3. A text book of Differential equation by S.N. Agrawal Yougbohd prakashan Raipur
- 4.Ordinary differential equation by Gundddhar Paria,Scholar Pub.Indore

VII: Note:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on the aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject:Differential Equations			
BCA III Sem			
Goal : Students develop the ability to understand the concept of degree and order of differential equation ,must recognize differential equation of first order and first degree and first order and higher degree, differentiate between initial and boundary value problem,will differentiate CF and P.I.and identify partial differential equation.			
Objective: Student must be able to find order and degree of a differential equation, will be able to solve homogeneous, linear diff equations, higher order linear differential equation, can find CF and PI of various algebraic and trigonometric functions , be able to find series solution of differential equaton,can solve boundary and initial value problems and will solve partial differential equations.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
student	student	student	student
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students recognizes, solve all types of diff.equations	Student recognizes diff equations, solve first order differential equation, and second order diff equation	student can recognize and find solution of first order differential equation	Students can not recognize type of differential equation

IX: Scheme of internal marks

Class Participation	Internal Assessment	Total 10	Final Internal Marks Out of 10
Presentation and assignment of 5	Class test 5		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: OBJECT ORIENTED PROGRAMMING THROUGH C++****Class: BCA-302 - III Sem****I: Objective of course:** The objective of this course is to introduce the concept of object oriented programming through C++.**II: Examination:** The examination will be of 50 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/ conceptual/Analytical/ Theoretical) combination of sub section in each question.**III: Course Outcomes (CO):**

- CO1 This course describes the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects.
- CO2 It aims students to be familiar with using C++ functions and the concepts related to good modular design.
- CO3 It aims students to be able to build C++ classes using appropriate encapsulation and design principles.
- CO4 The ultimate goal is to make students a good programmer.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO6	PO7	PO8
CO 1	3		2		2		2

CO 3		2		3		2	2	3
CO 4				3		3		3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Introduction	characteristics of OOP's languages and application of OOP's	B.N. 5
2		OOP's paradigm & concepts	object, class, data abstraction	B.N. 5
3			data encapsulation, inheritance, and polymorphism.	B.N. 5
4			Static and dynamic binding, message passing	B.N.3
5			benefits of OOP's, disadvantage of OOP's.	B.N.3
CO: 1				
LO: Students are now able to differentiate between object oriented programming and procedural programming.				
6	2	C++ programming basics	data types, operator, type conversions	B.N.1
7		Control structure	if, if-else, Switch case	B.N.1
8			for	B.N.1
9			while, do-while	B.N.5
10		Jump statement	break, continue, go to, exit.	B.N.5
CO: 1,2				
LO: Students learned and revised their decision making skills using c++.				
11	3	Functions	Call by value, call by reference	B.N.3
12			exercise	
13		class	Defining classes and instances	B.N.3
14			constructors	B.N.3
15			Types of constructors	B.N.3
16			exercise	
17			destructor	B.N.5
18			Friend function	B.N.1
19			exercise	
20			Inline function	B.N.1
21			String handling function	B.N.3

22			exercise		
CO:2,4					
LO: Students learned to make programs with class.					
23	4	Data encapsulation	Encapsulation	B.N. 3	
24			Implementation	B.N. 3	
25			exercise		
26		Polymorphism	Operator Overloading	B.N. 5	
27			Operator Overloading exercise	B.N.5	
28			Function overloading	B.N.3	
29			exercise	B.N.3	
30			Virtual functions	B.N.5	
31			exercise		
CO: 2,3,4					
LO: Students learned to apply the concept of overloading.					
32	5	Inheritance	Basics	B.N. 1	
33			Inheritance and protected members	B.N.3	
35			Inheriting multiple base classes	B.N.3	
36			Exercise		
37			Pure virtual functions	B.N.5	
38		Data abstraction	Abstract class	B.N.5	
39			exercise		
40			Try –catch	B.N.3	
41			Multiple catch	B.N.3	
42		Exception handling	Handling derived class exception	B.N.5	
43			Catching all exceptions	B.N.5	
44			exercise		
45			revision		
CO: 3,4					
LO: Students learned to make programs with more classes as well as handle errors.					

VI: Book References:

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII: Rubric for practical Assessment			
Subject: Object oriented programming through c++			
BCA III Sem			
Goal : Students learn concept of reusability of code and implement it. Also students make better programs using basic concepts of object oriented programming and they become a good programmer.			
Objective: Students develop modular programs and implement each concept like inheritance, encapsulation, abstraction as well as exception handling to make programs run in every situation.			
20-25 Marks	15-20 Marks	10-15 Marks	05-10 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of classes, inheritance, encapsulation and can handle small projects.	% Students having the basic concept of classes, inheritance, encapsulation.	% Students having understanding about class and object	% Students Need More Efforts for programming.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 25	Final practical Marks Out of 25
Presentation Out of 5	Practical Out of 5	Assignment Out of 5	VIVA Out of 5	Practical written Out of 5		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject:** Three dimensional coordinate geometry:**Class:** BCA-401 - IV Sem**I: Objective of course:** The objective of this course is to introduce the concept of three dimensional geometry

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

CO1	To familiarize the students with concept and applications Coordinate Geometry of Three Dimensions
CO2	To give the knowledge of geometry and its applications in the real world..
CO3	To make them aware that how they can communicate geometric ideas in the language of the mathematician
CO4	To familiarize the students with the fundamental theorems of Euclidean geometry

CO 2			3	2				
CO 3		3	2		3	3	2	2
CO 4	3			3				3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic concepts of 3d geometry	Introduction To three dimensions geometry	B.N. 3
2			Introduction to plane and section formula	B.N.3
3			Numerical based on angle between two plans	B.N.3
4			Numerical based on direction cosine and direction ratios of a straight line	B.N.3
5			Introduction of straighy line in three dimensional geometry	B.N.2
6			Relation betwwn straight line and plane	B.N.2
7			Numerical based on angles between two lines	B.N.2
CO:1				
LO: after this unit student will able to Create complex solids and surfaces.				
8	2	The sphere:	Introduction of sphere	B.N.1
9			General equation of sphere	B.N. 3
10			Numerical based on centers and radius of sphere.	B.N.2
11			Touching spheres	B.N. 3
12			Tangent plane of sphere	B.N. 3
13			Tangent line and angle between two spheres	B.N. 3
14			Orthonormal spheres	B.N. 3
CO: 2				
LO: Student will be able to understand basic structure of sphere				
15	3	Conicoids	General equation of conicoid	B.N.1
16			Particular conicoid	B.N.1

17			Principal planes of conicoid	B.N.1
18			Introduction of ellipsoids	B.N.1
19			Tangent plane of ellipsoid	B.N.2
20			Normal of ellipsoid	B.N.2
21			Discussion on Some more examples	B.N.2

CO: 3

LO: After studying this course students will be able to obtain tangent lines and tangent planes at a point to a central Conicoid.

22			Introduction paraboloid and its general equation	B.N.2
23			Tangent plane of paraboloid	B.N.1
25	4	Paraboloid	Condition on a plane to be a tangent plane of paraboloid	B.N.1
26			Normal of paraboloid	B.N.1
27			Number of normal from a point to baraboloid.	B.N.1
28			Equation of diametral plane of a paraboloid	B.N.1

CO: 4

LO: After this lesson, Student will be able to find the area and Volumes of curves

29		Cone cylinder and	Introduction of cone and its general equation	B.N. 3
30	5		Equation of cone with vertex at origin and given guiding curve.	B.N. 3
31			Equation of right circular cone and equation of enveloping cone	B.N. 3
32			Introduction of cylinder and its general equation	B.N. 3

CO: 5

LO: After studying this, students will be able to explain the properties of a cylinder and Measure and determine the surface area of a cylinder

1. Coordinate Geometry of three Dimensions by G. Paria, Scholar Publishing House, Indore
- 2 Differential Equations, Fourier Series and Analytical Solid Geometry : P.R. Vittal.
3. Engineering Mathematics Volume 3: M. K. Venkataraman (National Publishing)

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject. 3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment

Subject: **Computer Organization and Architecture**

BCA V Sem

Goal : The **study of three dimensional** focuses on visulisation of basic structures of three dimension like cone cylinder , hyperboloid and ellipsoid , and emphasizes the structure and behavior of the system. ... There are a fundamental relationship between understanding the methods and excute them.

Objective: The objective of this course is to introduce the concept of Computer Organization and Architecture..

16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of computer organization and architecture	% Students having the basic concept computer organization and architecture	% Students having understanding about computer organization and architecture.	% Students Need More Efforts for computer organization and architecture

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 50	Internal marks
Presentation Out of 10	Quiz Out of 10	Assignment Out of 10	VIVA Out of 10	Internal Out of 10		

IPS ACADEMY, DEPARTMENT OF COMPUTER, INDORE**Lesson Plan****Subject: Data & Network Communication****Class: BCA - 403 IV Sem****I: Objective of course:** To introduce the concept of data and network communication.

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical/objectives/conceptual/analytical/theoretical) combination of subsection in each question

III: Course Outcomes (CO):

- CO1** This course is to provide students with an overview of the concepts and fundamentals of data communication and computer networks.
- CO2** Familiarize the student with the basic taxonomy and terminology of the computer Networking area, Various types of networks (LAN, MAN, WAN and Wireless networks) and their protocols.
- CO3** How computer network hardware and software operate.
- CO4** Investigate the fundamental issues driving network design. Learn about dominant network technologies.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 2	2		3	3	2		1	
CO 3					2	3	3	
CO 4	3				3	3		2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	“Data communication system.”	Data communication system, data communication links.	B.N. 1
2			character codes, digital data rates	B.N.1
3			serial data formats encoded data formats,	B.N.1
4			telephones systems	B.N.1
5			error detection & correction	B.N.1
CO:1				
LO: Students learned data communication system and links concept, data formats and error detection & correction.				
6	2	“Data Model.”	Model, data topologies	B.N.1
7			data switching, type of networks	B.N.1
8			networking medium twisted pairs, coaxial cable, optical fibers,	B.N.1,2,3
9			system network architecture SNA operating system.	B.N.1,2,3
10			Introduction to OSI & TCP/IP.	B.N.1,2,3
CO: 2				
LO: Study the basic taxonomy and terminology of the computer networking and enumerate the layers of OSI model and TCP/IP model				
11	3	“Limits of Communication.”	Limits of communication	B.N.1
12			RS449 interface standards,RS422 & RS423	B.N.1
13			F5K & V0 modems, multiplexing methods	B.N.1
14			sampling theorem and quantization,	

15			delta modulation, digital T carrier, CODEC	B.N. 1,3,4
CO: 2,3				
LO: Learned interface standards , multiplexing methods, sampling theorem and quantization.				
16	4	“Data Network Protocols.”	Data link protocol,	B.N. 1,2,3
17			character oriented protocol &	B.N. 12,3
18			bit oriented protocol	B.N. 1,
19			network architecture protocols,.	B.N. 1,2,3
20			Ethernet & token ring	B.N. 1
21			Practical Questions LAB	B.N. 4
22			Assignment- Based on Numerical and questions.	B.N. 1,4 ,5
CO:2,3				
LO: : Students able to classify the various protocols and IP addresses for the given network.				
24	5	Integrated services & routing protocols, B-ISDN, DSL& ATM, and Internet	routing protocols	B.N. 1,3
25			B-ISDN	B.N. 1,2,5
26			OSI Model Layers	B.N.1,2,3
27			TCP model & IP Protocol	B.N. 1,3
28			bit oriented protocol	B.N. 1,2,3
29			Character oriented Protocol	B.N. 1,3
30			Assignment- Based on Numerical/Practical’s	B.N. 1,2
31			SMTP,SNMP, Topologies for basic	B.N. 1,2,5
CO: 2,3,4				
LO: Students learned various Routing protocols and Analyze the features and operations of various application layer protocols such as Http, DNS, and SMTP...

3. Computer Network by Andrew S. Tannenbaum PHI, Fourth Edition.
4. Computer Networking Problems and Solutions: Aninnovative approach to building resilient, modern networks.
5. Computer Networks and **Internets** (6th Edition)

VII: Notes: 1. There will be individual assignment, presentations and group assignments.

2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Internal Assessment			
Data & Network Communication			
BCA IVsem 403			
Goal : The goal of this course is to provide an introduction to the theory and practice of data and network communication Resource and load sharing Programs do not need to run on a single machine Reduced cost Several machines can share printers, tape drives, etc. High reliability If a machine goes down, another can take over Mail and communication.			
Objective: The main objective of data communication and networking is to enable seamless exchange of data between any two points in the world. This exchange of data takes place over a computer network. Data refers to the raw facts that are collected while information refers to processed data that enables us to take decisions.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students having the basic concept of Data network communication and they able to direction and flow of data pack in network and connection establishment between two or more device in short and long distance students create a telephone working with the help of hardware and software and proceed it .	% Students having the basic concept of data network communication student understanding how to data send on internet, and .define a well of features of data network communication.	% Students having understanding about Data Network and Communication.	% Students Need More Efforts for understand of Basic Concept of Data Network and communication.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 10	Final Internal Marks Out of 10
Presentation Out of 2	Quiz Out of 2	Assignment Out of 2	VIVA Out of 2	Internal Out of 2		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Database Management System****Class: BCA-402 - IV Sem****I: Objective of course:** The objective of this course is to introduce the concept of Database Management System.**II: Examination:** The internal examination will carry 20% marks i.e. 10 marks .The external examination will be of 80% marks i.e.40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (Conceptual/Practical/Theoretical) combination of sub section in each question.**III: Course Outcomes (CO):**

CO1	Define the terminology, features, classifications, and characteristics embodied in database systems. Differentiate database systems from file system . Demonstrate an understanding of the data model.
CO2	Analyze an information storage problem and derive an information model expressed in the form of an entity relation diagram and other optional analysis forms, Demonstrate an understanding of the relational data model.
CO3	Transform an information model into a relational database schema and to use a data definition language and/or utilities to implement the schema using a DBMS. Formulate, using SQL, solutions to a broad range of query and data update problems.
CO4	Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database .Oracle tools ,security, Codd's Rules

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	Po1	Po2	Po3	Po4	Po5	Po6	Po7	Po8

Co4	3	2	3		3	3	2	1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic of Database System	Purpose of DBMS, Advantages and Disadvantages of DBMS	B.N. 1
2		View of data, data models, Overall system structure	Physical model, logical model, Relational model	B.N.2
3			Hierarchical model, network model. Object oriented model	
4			Database languages, Architecture of DBMS	B.N.2
5			Database administrator, database user	B.N.2
CO: 1				
LO: Describe the conceptual framework of Database System: Introduction of DBMS, Concepts, and Characteristics.				
6	2	Entity Relationship Model	Entity relationship model: basic concepts, mapping constraints	B.N.1
7			Weak and Strong Entities	
8			Reduction of ER diagram into tables	B.N.2
9			Keys concept	
10			ER diagram question	
CO: 1,2				
LO: Understand the concept of Entity Relationship Model(ER-Diagram)				
11	3	Structured Query Language	Basic structure of SQL	B.N.1
12			Data Definition Language	B.N.1
13			Data Manipulation Language	B.N.1
14			Set operations ,Aggregate operation on SQL	
15			Sub Queries	B.N.2
16			DCL and TCL	B.N.2

17			QBE,QUEL languages	B.N.2
18			Practical Questions on SQL	
CO: 2, 3				
LO: Learn use of SQL to define a relational data model				
19	4	Relational Database Design and Normalization	Introduction of relational database ,Normalization	B.N.2
20			Decomposition ,Concept of Functional Dependencies	B.N.3
21			Full Functional Dependencies ,Join Dependencies	B.N.3
22			Normal Forms 1NF,2NF,3NF	B.N.3
23			BCNF,4NF,Multivalued Dependencies	
24			Integrity Constraints, Referential Integrity	
25			assertion, triggers, functions	
26			procedures, cursors	
27			Practical Question on Normalization	
CO: 3,4				
LO: Demonstrate and understanding of normalization theory and apply such knowledge to the normalization of a database				
28	5	Concept of RDBMS	RDBMS, characteristics of RDBMS	B.N.3
29			Codd’s 12 rules,	B.N.3
30			introduction to oracle tools, security	B.N.3
CO:3,4				
LO: Understand the concept of Codd’s 12 Rule. Also introduce Oracle Tools and Security Tools.				

I: Book References:

4. Database Management System by Alexis Leon.
5. C.J. Date “An Introduction to Database System”.
6. Elmasri & Navathe “Fundamental of Databas System.

VII: Notes:

1. There will be individual assignment.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII: Practical Exercise:

1. E-R diagram based on queries.
2. Structured Query Language (SQL): DDL, DML, DCL and TCL commands,
3. Queries based on SQL including set operations & aggregate functions.
4. Queries based on SQL including other operators like in operators, between operators, like operators, check operators.
5. Retrieve data from the table using SQL statement.
6. 6. Queries based on Quel & QBE(Query by example)

VIII Rubric for Internal Assessment			
Subject:Database Management System			
BCA IV Sem			
Goal : database management system is to provide a way to store and retrieve database information that is convenient and efficient. Management of data involves both defining structure for storage of information and providing mechanism for manipulation of information.			
Objective: Student understand the database design and creation . Emphasis is on data dictionaries, normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms.			
20-25 Marks	15-20 Marks	10-15 Marks	0-10 Marks
Students	Students	Students	Students

Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Student having the basic concept of DBMS and understanding of RDBMS , generating and solving simple SQL queries.	%. Student having the basic concept of DBMS and understanding of RDBMS , generating and solving simple SQL queries	% Students having understanding about database management functions.	% Students Need More Efforts for Solution and Basic Concept of DBMS.

X: Scheme of internal ,Externals and Practical marks

Class Participation		Practical Assessment	Total External 50	Final Internal Marks Out of 10
Presentation Out of 5	Assignment Out of 5	VIVA Out of 25		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Digital Computer Organization****Class: BCA-404 - IV Sem****I: Objective of course:** To introduce the concept of digital Computer Organization.**II: Examination:** The examination will be of 50 marks. The question will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical/objectives/conceptual/analytical/theoretical) combination of subsection in each question.**III: Course Outcomes (CO):**

- CO1 This course provides the brief introduction of Computer Organization that helps students to learn the processing of the system
- CO2 It aims to provide the usage of different input and output devices
- CO3 it aims to provide how memory will be efficiently utilized and what are the different types of memory required at the time of processing
- CO4 it aims to provide different ways of processing the data

CO 4		2	1		2	2		1

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Environment meaning, structure & type of environment, components of environment	Environment meaning, structure & type of environment	B.N 1
2			components of environment and society environment and resources	
3			Man environment relationship	
4			approach to study, man interaction with environment	
CO:1				
LO: student develop acquire awareness about immediate/wider surroundings through lived experiences on various themes related to daily life for example Family, Plants, Animals, Food, Water, Travel, and Shelter etc. Develop sensitivity for the natural, physical and human resources in the immediate environment.				
5	2	Environment Degradation	Meaning of degradation	B.N 1,2
6			process ofdegradation	
7			types of degradation	
8			cause of degradation	
9			religious & philosophical factors of deforestation agricultural development & degradation population growth & degradation	
10			urbanization & degradation modern technology & degradation	
CO: 1				
LO: To Environmental degradation, nearly all of them rooted in human technology. While some are the result of the unintended consequences of technological advancement, others are examples of humans becoming too successful and efficient at resource extraction. Here are some of the ultimate causes of environmental deterioration.				
11	3	Ecology	Definition of ecology & ecosystem	internet
12			Types of ecosystem components of ecosystem	
13			functions of ecosystem	
14			productivity & stability of ecosystems	

15			Environmental disasters: meaning & concepts, types of hazard & disaster maninduced & natural hazards global warming, ozone depletion,	
16			green house effect & other major environmental problem	
17			biodiversity	
CO: 3,4				
LO: Student they have learned biotic and biotic factors that are related to individual, population, community and ecosystem and defines the relationships between them.				
18	4	Environmental Pollution	Air, water, solid, noise pollution	B.N 1
19			Meaning, definition, source, types, adverse effects & methods of control	
CO: 2				
LO: The student will be able to Identify and discuss different kinds of pollution Identify and discuss sources of pollution. Discuss and explain why it is important to keep the environment free of pollution.				
20	5	Environmental Planning & Management	Concepts, aspects and Approaches,	B.N 1,4
21			resources management	
22			ecological Mgt.	
23			Biosphere Reserves, Management of wild life.	
24			Environmental Regulation and Rules: Vision of environment by Govt. of India	
25			Environmental Policy	
26			waste disposal rules and laws and legislation enacted by Parliament for environmental protection	
CO: 1,4				
LO:. Student will be able to Gain an understanding of the role of corporations and their responsibilities. Learn the role of corporate strategic and management planning in achieving sustainable outcomes;

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assessment			
Subject: Environmental Awareness			
BCA IV Sem			
Goal : student develop the ability to prepare and analyze. Topics may be include in overview such as environment education like attitude knowledge, awareness, skills, and, participation.			
Objective: Students gain understanding of the functions and responsibilities of the manager, provide them tools and techniques to be used in the performance of the managerial job, and enable them to analyze and understand the environment of the organization			
8-10 Marks	06- 08Marks	04-06 Marks	00-04 Marks
Student	Student	Student	Student
Outstanding	Accomplished	Meets the Criteria	Need Improvement
%Student having the a lot of knowledge about the environment awareness, ecology system, pollution, planning,etc.	% student having the basic concept of environment awareness.	% student having understanding introduction environment awareness.	% student Need More efforts for solution and basic concept of environment awareness.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 10	Final Internal Marks Out of 10
Presentation Out of 2	Quiz Out of 2	Assignment Out of 2	VIVA Out of 2	Internal Out of 2		

IPS ACADEMY, DEPARTMENT OF COMPUTER SCIENCE, INDORE**Lesson Plan****Subject: UNIX Operating System****Class: BCA–IV Sem****I: Objective of course:**

To introduce the concept of Unix Operating System, its features from other Operating system, utility command and shell programming.

II: Examination:

The faculty member will award marks of an external viva-voce and cases/practical problems will be of 50 marks. The end semester examination will be worth 50 marks having theory.

III: Course Outcomes (CO):

- CO 1. This course covers the features of the UNIX Operating system kernel, shell commands And scripts.
- CO 2. Master the ability to use a variety of common UNIX commands and utilities.
- CO 3. Master the ability to execute shell commands interactively and write shell scripts.
- CO 4. Be familiar with basic UNIX communications and networking commands.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	2	2	2					1
CO 2	2		2		2			2
CO 3			2			2		2
CO 4		2	2		2			

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Features of Unix os and commands	Unix operating system, background	B.N. 1,2,3
2			philosophy, help facility,	B.N. 1,2,3
3			The file system, structure of file system	B.N. 1,2,3
4			pwd, cd, ls, mkdir, cp, mv, rm commands.	B.N. 1,2,3
5			chmod, and its prepration	B.N. 1,2,3
6			Features of unixos	B.N. 1,2,3
A-1. First assignment				
CO: 1				
LO:Students understand UNIX OS fundamentals and basic commands, UNIX file system tree.				
7	2	Utility commands and Shell types	Utilities: more, file, wc, cmp, comm	B.N. 1,2,3
8			diff, lp, banner, cal, date, who, tty, stty commands.	B.N. 1,2,3
9			The Bourne shell: sh preceding a command by its own combining commands,	B.N. 1,2,3
10			pattern matching, echo, pipes	B.N. 1,2,3
11			tees, shell variables	B.N. 1,2,3
12			shell scripts.	B.N. 1,2,3
13			Shell programming	B.N. 1,2,3
A-2. Second assignment				
CO: 2				
LO:To learn general purpose utility command, filters in UNIX operating system and concept of shell and its type.				
14	3	Unix commands and advanced filter	Simple filters: pr, head, tell, cut, paste, sort, uniq, nl	B.N. 1,2,3
15			Advanced filters: grep, egrep, fgrep, sed	B.N. 1,2,3

16			tr, join, awk, filtering.	B.N. 1,2,3
17			The process: shell process, parent and children process status, system processes,	B.N. 1,2,3
18			multiple jobs and background, wait commands,	B.N. 1,2,3
19			pre mature termination of process, job execution with low priority,	B.N. 1,2,3
20			multiple jobs in foreground, shell layers, timing processes.	B.N. 1,2,3
A-3. Group assignment				
CO: 2				
LO:To understand pattern matching command like grep, pipe and echo and advanced filters like cut, paste, uniq commands andrun shell program.				
21	4	Introduction Shell programming	Communication and scheduling: bulletin board, message of day	B.N. 3
22			two way communication, insulation from the other users, address all users,	B.N. 3
23			delay, execute at later running jobs, periodically.	B.N. 3
24			Programming with shell: system variable, profile,	B.N. 3
25			conditional execution, script termination, if, case,	B.N. 3
26			while, until, for, set and shift statement.	B.N. 3
27			Shell programming exercise	B.N. 3
A-4. Presentations				
CO: 3				
LO:To learn programming in C along with use of control statement and decision statement and execute various shell programs.				
28	5	Unix user and security	System Administration: super user	B.N. 1,2,3
29			security, user services	B.N. 1,2,3
30			floppy disk, management operation,	B.N. 1,2,3
31			files system,	B.N. 1,2,3
32			administration backups.	B.N. 1,2,3

33			and Linuxos and its flavours and features	B.N. 1,2,3
A-5. Assignment				
CO: 4				
LO: To understand the inner workings of UNIX-like operating systems and Mathematical command in UNIX and system administration and user service.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book Reference:

- 1 Maurice J. Bach, “Design of the Unix Operating System”, Third Edition,2000,PHI.
- 2 Sumitabha Das “ Unix concepts and Applications”
- 3 Y.Kanetkar “Unix shell programming”, BPB Pub.
- 4 A User guide to unix system”, Thomas Rebecca yate,Second Edition,2002,.Tata McGraw Hill.

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject:UNIXOpearting System			
BCA IV Sem			
Goal :Students acquire the basic knowledge of Unix command to develop shell programming and console application.			
Objective: Student understand the concept of Unix Operating System, its features from other Operating system ,utility command and shell programming .			
21-25 Marks	16-20 Marks	10-15 Marks	0-09 Marks

Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic understand the concept of Unix operating system and Unix file system commands and shell programming.	% Students having the basic concept of general purpose and security commands and shell programming.	% Students having to understand general purpose and filters commands.	% Students Need More Efforts for understands commands and Basic Concept of Unix OS.

IX: Scheme of internal marks

Class Participation			Practical Assessment		Total 100	Final Internal Marks Out of 25
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Practical Out of 20		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE

Lesson Plan

Subject: Computer Organization and Architecture**Class: BCA-502 - V Sem****I: Objective of course:** The objective of this course is to introduce the concept of Computer Organization and Architecture.**II: Examination:** The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.**III: Course Outcomes (CO):**

- CO1 To understand the structure, function and characteristics of computer systems. To understand the design of the various functional units and components of computers. Understand the architecture and functionality of central processing unit.
- CO2 Classify and illustrate the internal and external components of a computer structure and its functionality which include CPU, buses, memory and I/O interfaces.
- CO3 To explain the functionality of different type of internal and external memory
- CO4 To understand how instructions are run in between the CPU and memory. Each micro program is the sequence of microinstructions. And these microinstructions are executed in sequence. The execution sequence is maintained by micro program Counter.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO5	PO6	PO7	PO8
CO 1	3	2			3	2	3	2
CO 2	2		2	3	2			
CO 3		3	3			2	2	2
CO 4	2	3		2		3		3

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Basic structure of computer	Introduction To COA	B.N. 3
2			Explain All component of computer.	B.N.3
3			Explain of All functions of computer	B.N.3
4			Structure and Architecture of computer	B.N.3
5			Inter connection and bus interconnection	B.N.2
6			Design and performance	B.N.2
7			Pentium & power –pc processor	B.N.2
CO: 1				
LO: . To understand the design of the various functional units and components of computers				
8	2	Memory Organization:	Static & Dynamic memory	B.N.1
9			Explain cache memory	B.N. 3
10			Describe DRAM organization.	B.N.2
11			Magnetic Disk	B.N. 3
12			RAID optical memory	B.N. 3
13			Magnetic tap	B.N. 3
14			Characteristics of instruction	B.N. 3
CO: III				
LO: To explain the functionality of different type of internal and external memory				
15	3	Architecture of a simple processor	What operand and opcode	B.N.1
16			Assembly Language programming	B.N.1

17			What is addressing mode	B.N.1
18			What is the role of CPU in processing	B.N.1
19			Different type of register in CPU explain	B.N.2
20			The instruction cycle explain	B.N.2
21			What is instruction pipeline.	B.N.2

CO:1 ,4

LO: To understand how instructions are run in between the CPU and memory.

22	4	Microprogramed control	Hardware implementation.	B.N.2
23			What is the concept of micro programmed	B.N.1
25			Microinstruction sequencing.	B.N.1
26			Micro instruction execution	B.N.1
27			Application of micro programming.	B.N.1
28			Hardware implementation.	B.N.1

CO: 4

LO: .Each micro program is the sequence of microinstructions. And these microinstructions are executed in sequence. The execution sequence is maintained by micro program Counter

29	5	I/O Programmed	Define programmed I/O	B.N. 3
30			What is DMA.	B.N. 3
31			Explain I/O channels and processor	B.N. 3
32			Protocol vector computation	B.N. 3

CO:1

LO: Understand the cost concepts and classifications

VI: Book References:

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for Internal Assessment			
Subject: Computer Organization and Architecture			
BCA V Sem			
Goal : The study of computer architecture and organization focuses on the interface between hardware and software, and emphasizes the structure and behavior of the system. ... There are a fundamental relationship between hardware and the many aspects of programming and software components in computer systems			
Objective: The objective of this course is to introduce the concept of Computer Organization and Architecture..			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of computer organization and architecture	% Students having the basic concept computer organization and architecture	% Students having understanding about computer organization and architecture.	% Students Need More Efforts for computer organization and architecture

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 10
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Discrete Mathematics****Class: BCA -504 V Sem**

I: Objective of course: The objective of this subject is to help students to understand the basics of algebraic structure, application of number system to algebraic structure, vector space, application of matrix for finding basis for vector space.

II: Examination:

The internal examination will carry 20% marks i.e. 10 marks .The internal examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units .The balance of the paper will be maintained by including appropriate combination of sub section in each question.

III: Course Outcomes (CO):

CO1. Present the relationships between abstract algebraic structures with familiar numbers systems such as the integers and real numbers.

CO2. Present concepts and properties of various algebraic structures.

CO3. Present the operation of matrix in solving linear equation and in algebraic structure..

Co4. Present the drawing circuit diagram using Boolean expression and simplifying Boolean expressions

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3				2		2	
CO 2	2	3			3	2		
CO 3		3	3		2	3		
CO 4			3	2			3	2

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
1	1	Algebra of Logic and Boolean algebra	Recall of Statements & Logical Connectives,	D.C Agrawal.
2			Tautologies & Contradictions, Logical Equivalence	D.C Agrawal,H. K. Pathak
3			Algebra of Propositions	D.C Agrawal
4			Quantifiers, Universal & Existential Quantifiers	D.C Agrawal ,& H. K. Pathak
5			Boolean Algebra and its Properties	D.C Agrawal
6			De- Morgan’s Laws, Algebra of Electric Circuits & Its Application	D.C Agrawal
7			Design of Simple Automatic Control System	D.C Agrawal
Assignment :Problems based on design of circuits using Boolean algebra, tautology contradiction , equivalence normal norm				
CO:	4			
LO:	Understand the concept of logic tautology, contradiction logical equivalence, Boolean switching circuit algebra and			
8	2	Boolean function of fundamental form	Disjunction and Conjunction Normal Forms	D.C Agrawal
9			Bools Expansion Theorem	D.C Agrawal,& H. K. Pathak
10	2		Fundamental Forms	D.C Agrawal
11			Many Terminal Networks,	D.C Agrawal
12			Trees and Binominal Networks.	D.C Agrawal

Assignment: Problems based on conjunction, disjunction normal forms, Tree and binomial networks				
CO:	4			
LO:	Understand the concept of conjunction, disjunction normal form, bools expansion theorem, Tree and binomial network			
13	3	Sets, Groups	Union, Intersection, Difference, Complement of a set	D.C Agrawal
14		Rings and Fields	De- Morgan’s Laws, Cartesian Product, Mappings , Types of mappings	D.C Agrawal
15			Identity & Inverse mapping, Product of Mappings	D.C Agrawal,H. K. Pathak
16			Definition of group, definition of order of a group definition of order of a Element	D.C Agrawal
17			Definition of subgroup Necessary and sufficient condition for a subgroup.	D.C Agrawal
18			Right & Left Cosets, Lagrange’s Theorem	D.C Agrawal
19			Quotient group, Homomorphism & Isomorphism of groups	D.C Agrawal
20			Kernel of Homomorphism	D.C Agrawal,& H. K. Pathak
21			Definition of Ring.	D.C Agrawal,& H. K. Pathak
22				Definition of Field and problems
Assignment :Problems based on Group, ring and field				
CO:	1			
LO:	Understand the concept of sets, Functions, Group, Subgroup Ring and Field			
23	4	Vector Spaces and Linear Maps	Vector Space	D.C Agrawal

24			Subspace and Quotient Spaces	D.C Agrawal H. K. Pathak
25			Linearly dependent vectors, Linearly independent vectors	D.C Agrawal
26			Definition & Properties of linear maps.	D.C Agrawal
27			Homomorphism & Isomorphism of Vector Spaces	D.C Agrawal
28			Kernel of A linear Map.	D.C Agrawal
Assignment: Problems based on linearly dependent and independent vectors,Homomorphism and isomorphism of vector spaces				
CO:	1,3			
LO:	Understand the concept of linear maps , homomorphism of linear maps and kernel of linear map, Kernal of a linear map.			
29	5	Matrix Representation and Caley Hamilton theorem	Matrix Representation of a Linear Map	D.C Agrawal
30			Rank and Nullity of Linear Map	D.C Agrawal ,& H. K. PATHAK
31			Fundamental Theorem of Vector Space	D.C Agrawal
32			Homomorphism	D.C Agrawal
Assignment : Problems based on caley Hamilton theorem				
CO:	2			
LO:	Understand the concept of rank, nullity homomorphism of linear maps			

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topics related to the subject.

VI: Book References:

IPS ACADEMY, INDORE (M.P.)

IX: Scheme of internal marks:

Class Participation	Internal Assessment	Total 10	Final Internal Marks Out of 10
Presentation & assignment out of 5	Class test out of 5		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Entrepreneurship****Class: BCA-506-V Sem****I: Objective of course:** To aware with the business entrepreneurship.

II: Examination: The internal examination will carry 20% marks i.e. 5 marks. The external examination will be of 80% marks i.e. 20 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical/objective/conceptual/analytical/theoretical) combination of subsection in each question.

III: Course Outcomes (CO):

CO1	Understand the entrepreneurial decision making process –from business model design to the launch of the new venture.
CO2	Develop a wide range of strategic, financial and human resource planning skills necessary to the new venture planning process.
CO3	Provide an atmosphere in which course participants can apply entrepreneurial and teamwork skills in finding, evaluating and beginning the process of implementing new venture concepts
CO4	Sharpen the presentation skills necessary to effectively communicate new venture ideas to potential investors.

IPS ACADEMY, Department of Computer Science, INDORE

Lesson Plan

Subject: Introduction to basics of JAVA

Class: BCA- 501-V Sem

I: Objective of course:

This course provides an introduction to object oriented programming (OOP) using the Java programming language. Its main objective is to teach the basic concepts and techniques which form the object oriented programming paradigm

II: Examination:

The faculty member will award practical marks out of 25 and the bifurcation is mention in the scheme of practical marks. An External viva-voce will be of 25 marks. The end semester examination will be worth 50 marks having theory and cases/practical problems.

III: Course Outcomes (CO):

CO1. Gain knowledge about basic Java language syntax and semantics to write Java programs and use concepts such as variables, conditional and iterative execution methods etc

CO2. Understand the fundamentals of object-oriented programming in Java, including defining classes, objects, invoking methods etc and exception handling mechanisms.

CO3. Understand the principles of inheritance, packages and interfaces.

CO4. Have the ability to write a computer program to solve specified problems in Java SDK environment to debug and run.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3			3	3		
CO 2	3	2		3		2		
CO 3	3		3		3			
CO 4					2	2	3	2

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Basics Of Language	Primitive data types – integer, Short, Long, byte, float.	B.N. 1
2			Double, Unicode, Character set, Boolean, their ranges.	
3			Defaults initial values, wrapping of integer arithmetic, casting comments	B.N. 1
4			Identifiers and reserved words, local variables, operators	B.N. 1
5			Operator precedence, examples and exercises.	B.N. 1
A-1. First assignment				
CO: 1				
LO::Understand fundamentals of programming such as variables, data types , operator and their preferences.				
6	2	Control Structure	Statements simple and compound.	B.N. 2
7			Uses of control do, for, while, switch, break, case continue, label.	B.N. 1
8			class type data : String, Arrays, example and exercises.	B.N. 1
A-2. Second assignment				
CO: 1				
LO: Learn the concept and syntax of control structure, String and Array.				
9	3	User define Datatype(class)	Definitions and naming conventions for the members of the JAVA classes,	B.N. 1
10			Instance, fields and methods, Initialization by constructor.	B.N. 2
11			Initialization by Default constructor, Multiple Definition of constructors, :	B.N. 2

12			creation of objects, access methods. examples and exercises	B.N. 2
A3- Third Assignment				
CO: 1,2				
LO: Understand the concept of object-oriented programming in JAVA ,including defining classes, invoking methods and concept of constructor.				
13	4	Inheritance & Exception Handling	Inheritance, Super class, Sub class, Method overloading,	B.N. 1
14			interface, thread, Multithreading example, synchronized,	B.N. 1
15			Exception (try-catch-final blocks examples.) examples and exercises.	B.N. 1
A4- Four Assignment				
CO: 3,4				
LO: Learn the concept of polymorphism and inheritance implementation.				
16	5	Java Platform & File Handling	Java Virtual machine concept, Java Platform overview, programming Examples to clarify use of object,	B.N. 2
17			Threads, exceptions and packages for I/O.	B.N. 2
18			File and string handling. examples and exercises.	B.N. 1
CO: 1,4				
LO: Have the ability to work with object, exception, file handling and packages.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book Reference:

1. Complete Reference (Java 2) – Herbert Schildt - Tata McGraw Hill
2. Joseph O'Neil, Teach yourself java, Tata McGraw Hill, New Dehli, 2001.

Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having an understanding about basics of Object oriented programming using Java.Can make their own application using Java	% Students having an understanding about basics of Object oriented programming using Java.	% Students having understanding about control and decision statements.	% Need More Efforts to learn about Fundamental of Computer OOPs concepts.

IX: Scheme of Practical marks:

Class Participation			Practical Assessment		Total 100	Final practical Marks Out of 2
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Practical Out of 20		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Software Engineering****Class: BCA 503 – Vth Sem****I: Objective of course:** Introduce with the concept of software engineering and system analysis.

II: Examination: The internal examination will carry 20% marks i.e.10 marks. The external examination will be of 80% marks i.e.40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate(numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.

III: Course Outcomes (CO):

- | | |
|-----|---|
| CO1 | 1. This course introduces the concepts and methods required for the construction of large software intensive systems. |
| CO2 | 2. It aims to develop a broad understanding of the discipline of software engineering.
... |
| CO3 | 3. It aims to set these techniques in an appropriate engineering and management context. |
| CO4 | 4. It provides a brief account of associated professional and legal issues. |

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE

Lesson Plan

Subject: WEB DESIGNING AND WEB TECHNOLOGY

Class: BCA - V Sem

I: Objective of course:

The objective of this subject is to help students to understand the basics of web designing and web technology. The students use the web applications in day to day life and should know how they are developed and which technology is used.

II: Examination:

The faculty member will award internal marks out of 10 and the bifurcation is mention in the scheme of internal marks. The end semester examination will be worth 40 marks having theory and practical problems. There will be 7/8 questions out of which a student will be required to attempt any 5 questions.

III: Course Outcomes (CO):

After completion of this course student will be able to:-

1. Apply a structured approach to identifying needs, interests, and functionality of a website and design dynamic websites that meet specified needs and interests by writing well-structured, easily maintained, standards-compliant, accessible HTML code.
2. Use JavaScript to add dynamic content to pages by writing well-structured, easily maintained JavaScript code
3. Understand basic fundamental of JavaScript that works to validate on client site.
4. Develop a data driven web application.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2		1		3	
CO 2	3				3		2	
CO 3	3			2				
CO 4							3	2

V: Session Plan:

Lecture no.	Unit no.	Sub Topic	Reference
1	UNIT 1	Introduction to web designing.	B.N 1
2		Client server computing concepts	B.N 1
3		Distributed computing on internet	B.N 1
4		Introduction to web pages and html	B.N 1
5		HTML elements & pages	B.N 1
6		Formatting text & pages	B.N 1
7		Including pictures in a page	B.N 1
8		Creating tables & list	B.N 1
9		Splitting pages into frames	B.N 1
CO 1			
LO:-Basic HTML markup and structure ,Basic HTML tags and elements			
10	UNIT 2	Home page navigation tools	B.N 1
11		Formatting body section using Block level	B.N 1
12		Formatting body section using text level	B.N 1
13		Formatting body section using font style	B.N 1
14		Formatting body section using pharse elements	B.N 1
CO 1			
LO:-Identify the audience, purpose, uses, and structure of site,Learn the elements of HTML, using it to add content to design it in the form of web pages,Formatting web page using block and text level, font style and phrase elements			
15	UNIT 3	Multimedia with web: Creating files, streaming audio and animations	B.N 4
16		Java Script and Browser	B.N 4
17		Java script and server	B.N 4
18		Embedding java script and html	B.N 4
19		JS variables, statements and loops	B.N 4
20		JS conditions and functions	B.N 4
21		Js object properties and methods	B.N 4
22		Event handlers, non- Script Tag	B.N 4
CO 2 & CO 3			
LO:- Basic JavaScript Programming, Find appropriate snippets of JavaScript code and to adapt them to work with your site as well as learn to read and critique JavaScript			

code.To add functionality to site using JavaScript code and the use of JavaScript commands, objects, functions, and tools. Topics addressed include loops, iterations, variables, arrays, objects, functions.			
23	UNIT 4	Comparison of html, dhtml & xml	B.N 5
24		Web casting, domain name selection	B.N 5
25		Web hosting ,web server selection	B.N 5
26		Uploading & downloading from web, incremental uploading of data	B.N 5
27		Introduction to sql server and user management in SQL Server	B.N 5
CO 3			
LO: To be able to understand the process of web server and domain name selection rules and criteria,To be able to understand web hosting and uploading /downloading of data,To be able to understand user management in SQL server			
28	UNIT 5	Introduction to asp	B.N 3
29		Database handling with asp	B.N 3
30		Connection object, record set object	B.N 3
31		Request object, response object, Cookies	B.N 3
32		Creating tables and insert queries through connections	B.N 3
CO 4			
LO: Create a Web form with server controls.Develop a data driven web application.Connecting to data sources and managing them.			

VI: Book References:

1. HTML, Java Script, DHTML, PERL, CGI – Ivan Bayross – BPB
2. HTML Black Book – Steven Holzner – Dreamtech Press
3. Mastering ASP Programming – BPB Publication
4. Java Script, Don Gosselin, Thomson Learning (Vikas Publication)
5. Principles of web Design Jeol Sklar, Thomson Learning (Vikas Publication)
6. Internet and Web technologies, TMH, 2002

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.

5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assesment			
Subject: WEB DESIGNING AND WEB TECHNOLOGY			
BCA V Sem			
Goal : Students develop the ability to design website. Topics include an overview of web designing using HTML, JavaScript and ASP.Net			
Objective: To help students to understand the basics of web designing and web technology. The students use the web applications in day to day life and should know how they are developed and which technology is used.			
07-10 Marks	05-07 Marks	04-05 Marks	00-03 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students having the basic concept of web designing and technology and further to design their own web applications.	Students having the basic concept of web designing and technology.	Students having understanding about web designing.	Students Need More Efforts for basic Concept of web designing.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 50	Final Internal Marks Out of 10
Presentation Out of 10	Quiz Out of 10	Assignment Out of 10	VIVA Out of 10	Internal Out of 10		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Computer Graphics & Multimedia****Class: BCA - 601 VI Sem**

I: Objective of course: To Introduce the concept of Computer Graphics & Multimedia. And to acquaint the students with the basic concept of text animation, understanding of sound, pixel effects work and design for better image creating.

II: Examination: The internal examination will be of 50 marks. The question paper will contain questions equally distributed in all units. The balance of will be maintained by including appropriate (numerical/objective/conceptual/analytical/theoretical) combination of subsection in each question .

III: Course Outcomes (CO):

- CO1** To provide comprehensive introduction about computer graphics system, design algorithms and two dimensional transformations.
- CO2** Familiarize the student with techniques of clipping, three dimensional graphics and three dimensional transformations.
- CO3** The computer graphics course prepares students for activities involving in design, development and testing of modeling,.
- CO4** Learn about rendering, shading and animation.

IV:PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

CO 4					2		2	

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
PART-I “Graphics fundamentals,.”				
1	1	Basic of Computer Graphics of fundamental Application of computer graphics Concepts & Fundamental basic Display Device	Introduction to what is computer graphics and pixel , frame, buffer .	B.N. 1
2			Computer aided design presentation graphics computer Art, Education and training, Entertainment(Games, animation...etc),Image processing, Visualization, Graphical User Interface etc.	B.N.1
3			Raster Graphics fundamentals , Display Devices- Random Scan	B.N.1
4			Raster Scan Monitors	B.N.1
5			Color CRT Monitor, DUST and Plasma Panel	B.N.1
CO: 1				
LO: application of computer graphics, Raster Graphics fundamentals & Display Devices.				
6	2	Graphics Primitives : Algorithms for line Generation, circle generation Description of line generation & Circle generation Algorithm	DDA line drawing algorithm , Bresenham’s Line drawing algorithm	B.N.1
7			midpoint line drawing algorithm , polygon generation	B.N.1
8			Bresenham's Circle generation algorithm, Midpoint circle generation algorithm	B.N.1,2
9			and polygon filling algorithm, Anti aliasing	B.N.1,2
10			2D Transformation : Translation, Scaling, Rotation, Reflection, homogeneous Coordinates. Practical in Lab for line generation and so on...	B.N.1,2
CO: 1,2				
LO convert the basic geometrical 2D form, Show ability to use the facilities provided express basic transformations such as scaling, rotation, translation, reflection, shearing				
11	3	“3-D	Translation, Scaling, Rotation, windowing & clipping windows,	B.N.1

		Transformation.”		
12			View port, line clipping, polygon clipping, windows & view port	B.N.1
13			Transformation. Display file, Segment table, Segment creation, deletion, rename	B.N.1
14			Practical in Lab for line generation	
		Assignment- Based on Numerical/Case Studies ,LAB		
CO: 3				
LO: Demonstrate ability to implement algorithms that perform transformation and clipping operations on simple 2-dimensional and 3-dimensional objects.				
.				
	PART-II “Multimedia”			
15	4	Multimedia- Text Sound and Images.	Text – Font, Faces, animating Text, Hyper Text. Sound : MIDI, Digital audio basics, auto file formats, audio editing, MCI-multimedia control interface.	B.N. 1,3,4
16			Image - Bitmap, Vector drawing	B.N. 1,2
17			Color palate, concept of 3D Modeling,	B.N. 1
18			Image file formats (BMP,JPG)	B.N. 1,
19			Animation : principle of animation cell animation,.	B.N. 1,2,3
20			kinematics, morphing	B.N. 1
21			Practical Questions LAB	B.N. 4
22			Assignment- Based on Numerical/Case Studies	B.N. 1,4
CO: 3				
LO: Students Be able to distinguish the capabilities of different levels of graphics software and describe the appropriateness of each. Be able to create images using a standard graphics API and Sounds.				
23	5	“Multimedia- Video.”	Broadcast video standards (NTSC, PAL)	B.N. 1,4
24			Integrating Computer and television	B.N. 1,4

		Assignment- Based on Numerical /Case Studies		
25		“Multimedia- Video.”	video capture board, video, color, shooting and editing video.	B.N. 1,4
26			Recording formats (S- VHS) video hardware resolution .	B.N.1,4
27			video compression (JPEG, MPEG).	B.N. 1,3
28			Hard copy devices: printers & Plotters	B.N. 1,3
29			Input devices: Mouse, Trackball, Light pen, Scanner, Digital Camera.	B.N. 1,3
30			Assignment- Based on Numerical/Practical’s	B.N. 1,4
31			through C language implement a2D,3D transformation, Rotation ,etc .	B.N. 1,4
CO: 3,4				
LO: Students able to discuss the application of computer graphics concepts in the development of computer games, information visualization, and business applications Understand to utilize and crate to design and animated a text and graphics in multimedia form.				

VI: Book References:

- 4.Computer Graphics Principles and Practice in C: Principles & Practice in C Paperback – 2002by [Andries van Dam](#); [Steven K. Finer](#) (Author)

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric For Internal Assessment			
Subject: Computer Graphics & Multimedia			
BCA VI Sem			
Goal : The goal of this course is to provide an introduction to the theory and practice of computer graphics. The course will assume a good background in programming in C or C++ and a background in mathematics including familiarity with the theory and use of coordinate geometry and of linear algebra such as matrix multiplication.			
Objective: To understand these principles of computer graphics requires not only study of the literature, but experimental work on a graphics system. Therefore, as part of this course, the students will design and implement a substantial computer graphics system/project and will generate some complex illustrations with this system.			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
Students having the basic concept of Computer Graphics, Pixel, and Image generate form of line ,matrix, circle, and implement a Projection ,2D ,3D and many dimensional perform in image .able to perform a pixel values comparison in image .Animating create a with sound effects. Practical implement and execute a image.	% Students having the basic concept of Computer Graphics , and Multimedia understanding of CGM, and .define a well of features of Computer graphics Application .	% Students having understanding about Computer graphics.	% Students Need More Efforts for Solution and Basic Concept of Computer graphics.

IX: Scheme of internal marks

Class Participation			Internal Assessment		Total 25	Final Internal Marks Out of 25
Presentation Out of 2.5	Quiz Out of 2.5	Assignment Out of 10	VIVA Out of 5	Internal Out of 5		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE**Lesson Plan****Subject: Computer Oriented numerical methods Session:****Class: BCA-602 – VI Sem****I: Objective of course:** The objective of this course is to introduce the concept of numerical methods and its application in computer**II: Examination:** The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical objective/Conceptual/Analytical/Theoretical) combination of sub section in each question.**III: Course Outcomes (CO):**

CO1 The objective of this course is to provide conceptual understanding of various numerical methods, in particular, with reference to numerical solution of non linear equations and system of linear equations, interpolation, numerical differentiation and integration and numerical solution of ordinary differential equations. Important theorems and different formulae for various numerical methods to be covered with an aim of helping the students to understand the fundamentals, concepts and practical use of these methods in the field of computer sciences and applications.

CO2 Ability to solve the equation by Newton Raphson Method.

CO3 A study of several standard numerical algorithms.

CO4 Building models based on data, be it through interpolation, Least Square, or other methods.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO5	PO6	PO7	PO8

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference
	1	Numerical computations		
1			Introduction To Error	B.N. 3
2			Explain All types of Errors.	B.N.3
3			Explain Bisection method	B.N.3
4			Explain Regula False method	B.N.3
5			Explain Newton rapshon method	B.N.2
6			Examples based on newton rapshon methods	B.N.2
7			Examples based on regula false method	B.N.2
CO: I				
LO: after this unit student will able to use numerical methods for solving a problem, and also they will be able to locate and use good mathematical software				
8	2	Simultaneous linear equations and curve fitting :	Ill conditions	B.N.1
9			Introduction of gauss elimination	B.N. 3
10			Numerical based on gauss elimination method.	B.N.2
11			Introduction of Gauss Jordan Method	B.N. 3
12			Numericals based on gauss Jordan method	B.N. 3
13			Jacobian Method	B.N. 3
14			Numerical based on jacobian Methods	B.N. 3
CO : 2				
LO: After studying this course, Student will be able to calculate the unknowns of a linear equation set using iterative solution techniques (Jacobian and Gauss-Seidel Iterative Methods) for the unique-solution case;				
15	3	difference	Introduction of forward and backward	B.N.1

		operators and interpolations	interpolation	
16			Newtons forward interpolation formula	B.N.1
17			Newtons backward interpolation formula	B.N.1
18			Some more examples based on newtons interpolation formula	B.N.1
19			Newtons divided difference interpolation formula	B.N.2
20			Some more examples of newtons divided difference formula	B.N.2
21			Langranges interpolation formula and numericals	B.N.2
CO: 3				
LO: In this chapter reader will learn (i) Definition and meaning of interpolation. (ii) How with the help of polynomial we can approximate the value of a function which is not known explicitly.				
22			Introduction of numerical differentiation.	B.N.2
23			Methods to find second and third order derivatives	B.N.1
25			Some more examples based on numerical differentiation	B.N.1
26	4	Numerical differentiation and integration	Simpsons one by third rule to get intergration	B.N.1
27			A brief discussion on Simpsions three by eight and newtons cote formula.	B.N.1
28			Examples based on Simpsions one third and three by eight rule.	B.N.1
29			Introduction of eulers method	B.N. 3
30	5	numerical solution of ordinary differential equations	Introduction of eulers modified method.	B.N. 3
31			Discussion on picards successive differentiation method	B.N. 3

32		Discussion on runge kutta fourth order method	B.N. 3
----	--	---	--------

CO: 4

LO: Each micro program is the sequence of microinstructions. And these microinstructions are executed in sequence. The execution sequence is maintained by micro program Counter After studying this, **students will be able to find** Solutions of ordinary differential equations including: i. Initial value problems ii. Boundary value problems

- 2 Introduction to microprocessor Software , Hardware & Programming , PHI. By L. A. Laventhal

VII: Notes:

1. There will be individual assignment, presentations and group assignments.
2. Class tests will be based on theoretical and practical aspect of the subject.
3. Class performance and discipline will be an important factor for assessing internal marks.
4. The result of each tests/assignment will be declared within one week.
5. Late submissions will not be accepted in any case.
6. Attendance will be a major factor for assessing class performance.

VIII Rubric for internal Assesment			
Subject: MICROPROCESSOR & ASSEMBLY LANGUAGE PROGRAMMING			
BCA VI Sem			
Goal : The assembly language is a fully hardware related programming language. The embedded designers must have sufficient knowledge on hardware of particular processor or controllers before writing the program..			
Objective: To aware with the microprocessor & introduce the concept of Assembly language Programming			
16-20 Marks	11-15 Marks	06-10 Marks	00-05 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the Criteria	Need Improvement
% Students having the basic concept of Microprocessor and assembly language programming	% Students having the basic concept of Microprocessor and assembly language programming	% Students having understanding about Microprocessor and assembly language programming	% Students Need More Efforts for Microprocessor and assembly language programming

IX: Scheme of internal marks:

Class participation			Internal Assessment		Total 100	Final Internal Marks Out of 10
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY, DEPARTMENT OF COMPUTER INDORE

Lesson Plan

Subject: Principles & Practices of Management**Class: BCA –604-VI Sem****I: Objective of course:** To aware with the Principles & Practices of Management

II: Examination: The internal examination will carry 20% marks i.e. 10 marks. The external examination will be of 80% marks i.e. 40 marks. The question paper will contain questions equally distributed in all units. The balance of the paper will be maintained by including appropriate (numerical/objective/conceptual/analytical/theoretical) combination of subsection in each question..

III: Course Outcomes (CO):

- CO1 Cover the basic concepts of management.
- CO2 Discuss and communicate the management evolution and how it will affect future managers
- CO3 Practice the process of management's four functions: planning, organizing, leading, and controlling.
- CO4 Develop the students' ability to work in teams.

IV: PO-CO Mapping : HIGH-3, MEDIUM-2, LOW-1

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	3	3	2	3	3	2	2	1
CO 2		2						
CO 3	3		2		2	2	2	1
CO 4	2			2				

V: Session Plan:

Lecture no.	Unit no.	Topics	Sub Topic	Reference	
1	1	Nature of Management	The Nature of Management	B.N. 1	
2			: Definition and role of management		
3			Scientific Management		
4			Functions of Manager		
5			Human Relations school of Management, Contingency Theory of Management.		
CO: 1					
LO: Student will be able to understand what is meant by management and managerial effectiveness. And identify the roles which are fulfilled while working as a manager					
6	2	Planning	Nature and Purpose of Planning,	B.N. 1	
7			Components of Planning		
8			objective of Business Management by Objectives		
9			Forecasting,		
10			Decision Making,		
11			PolicyFormulation and Strategies.		
CO: 3					
LO: The objectives and outcomes must be differentiated for the individual student. All the learners should be able to see where they are and what they need to do to get to the next level. This should link into subject standards and progression where possible. It is crucial to have high expectations of what can be achieved and engage the students with that belief.					
12	3	Organizing:	Nature of Purpose of Organizing,	B.N. 1,3	
13					
14			Span of management,		
15			Delegation of Authority		
16			Line and Staff Relationships		
17			Departmentation,		
CO: 3					

LO: Student will be explore issues of personal purpose, beliefs (why am I doing what I'm doing?); articulate personal values and beliefs. Such as Delegation, Group management and development, Self-awareness etc.

18	4	Directing Process	Principles of Direction,	B.N. 1,3
19			Problems in Human Relation	
20			Strategies for Establishing Healthy Human Relations	

CO: 1,2

LO: student will be able to a specific problem to be solved. Challenge that must be faced. Information that will construct something of value to me/others.

21	5	Control	Meaning	B.N. 1,4
22			Process of Control	
23			Control Techniques	
24			Control Techniques	

CO: 2, 3

LO: student will be able to learn how they control employee, supervisor, subordinate etc. in an organization.

DEPARTMENT OF FASHION TECHNOLOGY

POST GRADUATION DIPLOMA IN FASHION DESIGNING & MARKETING **(PGDFDM)**

PROGRAM EDUCATIONAL OBJECTIVES & PROGRAM OUTCOME

PROGRAM OUTCOME (Pos) :-

1. Understand design concept holistically.
2. Develop the technical knowledge of fashion design with theories and practice them as an established designer.
3. Expedite and develop analytical thinking abilities for fashion Industry.
4. To develop knowledge of traditional and advanced technique and technology of fashion industry.
5. Ability to understand fashion forecasting with the help of history of fashion.
6. Ability to understand principles and elements of design for enhancing creativity.
7. Ability to develop leadership quality and interpersonal relations to manage fashion.
8. Nurture entrepreneurial skills and capabilities.

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE
Lesson Plan

Subject: New Horizon and Communication Skill
Class: PGDFDM – I Sem

Session: July– Dec.

I: Course Objective:

New Horizon in fashion designing & communication skills. Enhancement of thinking of the students and developing their skill of fashion design.

II: Examination:

The faculty member will award internal marks out of 20 (10(A) +10(B)) and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 (40(A)+40(B)) marks. It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Theory

- CO1 Understanding of fashion, design and fashion deign
- CO2 Accessory design with forecasting and entrepreneurship
- CO3 Fundamental and modern technique of Communication
- CO4 Student will feel confident in communicating their ideas & feelings

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

12. Dimensional Color(Lois , Swirnoff)
13. Encyclopedia of Fashion Details
14. Introduction to Fashion design
15. Dictionary of Fashion
16. Survey of Historic costume

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of marketing environment.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment :

Goal: Students develop the ability to understand what is Fashion, Fashion Terminology, Fashion Shows, Designing Principles ,Career and roles in Fashion Industry .			
Objective: Students gain understanding of analytical thinking and boost their imagination and creative power for enhancing the designing skills.			
9-10 Marks	7-8 Marks	4-6 Marks	0-3Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding of Fashion Designing with brief knowledge of Designing Principle and can create ideas from different themes .	% students having an understanding of Fashion Designing with brief knowledge of Designing Principle.	% Student have basic understanding about designing concept	% Student need more efforts for Design concept .

(B)Communication Skill

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Fundamental of Business Communication& Modern Techniques of Communication	General introduce on Communication	B.N 2, 4
2			Techniques of Communication	B.N 2,4
CO: 1,3				
LO: The student will be able to communicate effectively in the professional world.				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
3	1	Fundamental of Business Communication& Modern Techniques of Communication	Written communication	B.N 2,4
4			Principles of Communication elements of letters	B.N 2 , 3
Assignment: A1 – submission within three days				
CO: 1				
LO: They will be able to use modern information technology effectively.				
5	2	Fundamental of Effective Business Writing	Business letter writing	B.N 1
6			Letters – Enquiry, complaint	B.N 1
7			Letters – Order, Quotation	B.N 1
8			Resume	B.N 1
CO: 2				
LO: The students will be able to state the meaning of business correspondence and its importance. They will be describe the essential qualities of good business letter.				
9	2	Fundamental of Effective Business Writing	Letters of introduction and follow up letters	B.N 1
10			Interview letters and appointment letters	B.N 1
Assignment: A2 – submission within three days				
CO: 2				
LO: The students will acquire various specific features of writing effective resume & job application letter.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Business Correspondence & report writing (R.C Sharma & Krishna Mohan)
2. Effective Technical Communication (Rizvi)
3. Business Communication Today (Bovee Thill)
4. Communication (Dr. C.S Raydu)

VII: Note:

5. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
6. There will be two major group assignments, group size 3-4, each group will be given separate topics for understanding the practical approach of Fashion Industry

7. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
8. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment :

Goal: Students develop the ability to understand Modern techniques of Effective Business Communication for Fashion Industry .			
Objective: The objective of this foundational course is to develop of the second language. It will help the learner to develop the use of the four fundamental language skills. reading, writing, listening & speaking.			
9-10 Marks	7-8 Marks	4-6 Marks	0-3Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement

2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of Fashion illustration..
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment :

Goal: Students develop the ability to understand basic sketching and technique ,fashion figures ,Figures movements.			
Objective: To develop their theoretical knowledge about balance and proportion by illustration,make them understand human figures in different views as well as positions.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding of tools and technique of different body parts movement with draping of different garments .	% students having an brief knowledge of illustration of human figure and basic draping of garment	% Student have basic understanding about basic fashion illustration	% Student need more efforts for fashion illustration skills.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE
Lesson Plan

Subject: Fundamental of Apparel Construction
Class: PGDFDM – I Sem

Session: July – Dec.

I: Course Objective:

To make the students understand techniques of garment construction and upgrade them to latest technology of the industry.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Basic techniques of hand and machine sewing
- CO2 Types of collars used in various garments
- CO3 Types of opening in garments
- CO4 Drafting cutting and construction of ladies and men's wear

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		2						3
CO 2		2		2	2	2		3
CO 3		1			1	2		3
CO 4		3	2			2		3

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Basic techniques of construction	Basic hand stitches – Basting, overcasting, hemming, lock stitch, eyehole, seam, button hole	B.N. 1,2
2			Seams - Plain seam, French seam, lapped seam, counter seam, bound seam, top seam, piping	B.N. 1,2
3			Facing and zip attaching	B.N. 1,2
CO: 1				
LO: Basic hand stitch used in garment construction.				
4	1	Basic techniques of construction	Tucks - Straight pin tucks, diagonal pin tucks, checked pin tucks, blind tucks	B.N. 1,2
5			Pleats – Knife pleat, box pleat, inverted box pleat, permanent pleat	B.N. 1,2
6			Pocket – Patch pocket, slant pocket , welt pocket	B.N. 1,2
7			Dart and gathering - Single pointed dart, double pointed dart, plain gathers, novelty gathers	B.N. 1,2
CO: 1				
LO: Basic machine seam used in garment construction.				
8	1	Basic techniques of construction	Zip – Simple Zip	B.N. 1, 2
9			Hidden Zip	B.N. 1, 2
Assignment: A1 – submission within three days				
CO:1				
LO: Types of pocket and Zip attaching				
10	2	Different types of collar and stand collar	Different type of collar Peter pen, reverse and shawl collar	B.N. 1, 2,3,6
CO: 1				
LO: Flat collar and roll collar.				
11	2	Different types of collar and stand collar	Type of Yoke - Upper garment yoke lower garment yoke	B.N. 1, 2,3,6
12			Type of Sleeve – plain sleeve, puff sleeve, flared sleeve	B.N. 1, 2,3,6
13			Bell sleeve, patel sleeve, cap sleeve	B.N. 1, 2,3,6
14			Kimono , Magyar, dolman and raglan sleeve	B.N. 1, 2,3,6
CO: 2				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Upper garment yoke and lower garment yoke.				
15	2	Different types of collar and stand collar	Kimono , Magyar, dolman and raglan sleeve	B.N. 1, 2,3,6
CO: 2				
LO: Set in sleeves and bodice combination sleeve.				
16	2	Different types of collar and stand collar	Stand collar and shirt collar	B.N. 4
Assignment: A2 – submission within three days				
CO: 2				
LO: Stand collar and shirt collar.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
17	3	Opening	Opening – Standard center opening shirt front opening	B.N. 1,2
LO: Standard centre opening.				
18	3	Opening	Double breasted opening	B.N. 1,2
LO: Double breasted opening.				
19	3	Opening	Asymmetrical opening	B.N. 1, 2
LO: Asymmetrical opening.				
20	3	Opening	Shirt front opening	B.N. 1, 2
Assignment: A1 – submission within three days				
CO:3				
LO: Shirt front opening.				
44	4	Drafting ,cutting & stitching	Basic body block – Layout on fabric marking and stitching and attached on body	B.N. 1, 2, , 4
45			Basic sleeve block – Layout on fabric marking cutting and attached on body	B.N. 1, 2
CO:4				
LO: Drafting of basic / personalize bodice block or garment pattern., marking & cutting of Basic block/garment				
	4	Drafting ,cutting & stitching	Garment construction- Kids Garments	B.N 7,10
			Drafting of personalize bodice block or garment pattern	B.N 7,10
22			Basic skirt block- Layout on fabric making cutting and attached with body or stitched separately	B.N 7,10,2
23			Garment construction – kids	B.N 7,10

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			garment	
24			Jhabla – Drafting, layout, marking and cutting of jhabla	B.N 7,10
25			Stitching and finishing of Jhabla	B.N 7,10,2
26			Baby frock – Drafting, layout, marking and cutting of frock	B.N 7,10
27			Stitching and finishing of frock	B.N 7,10,2
28			Ladies garment – Upper body garment -Top	B.N 4,8
29			Stitching and finishing of Top	B.N 4,8,2
30			Shirt – Drafting, layout, marking and cutting of shirt	B.N 6
31			Stitching prepare finish all component of shirt	B.N 6 ,2
32			Attached all component to complete shirt and finishing process	B.N. 1, 2, , 4
33			Kurta - Drafting, layout, marking and cutting of kurta	B.N 4,8,9
34			Stitching and finishing of kurta	B.N 4,8,2
35			Blouse - Drafting, layout, marking and cutting of blouse	B.N 4,8
36			Stitching and finishing of blouse	B.N 4,8,2
37			Lower Garment – Skirt - Drafting, layout, marking and cutting of skirt	B.N 4,8
38			Stitching and finishing of skirt	B.N 4,8,2
39			Trouser - Drafting, layout, marking and cutting of Trouser	B.N 6
40			Finished all component separately for trouser	B.N 6,2
41			Attached component to finish trouser	B.N 6,2,5
42			Chodidar - Drafting, layout, marking and cutting of Chodidar	B.N 4,8
43			Stitching and finishing of Chodidar	B.N 4,8,2
Assignment: A4 – submission within three days				
CO:4				
LO: Drafting of basic / personalize bodice block or garment pattern., marking & cutting of Basic				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
block/garment & Construction technique of garment.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. The Sewing Book (Alison Smith)
2. The Sewing Book (DK)
3. Complete guide to Sewing Pattern Making for Fashion Design
4. Pattern Making for Fashion Design (Armstrong)
5. Apparel Manufacturing : Sewn Product Analysis
6. Metric Pattern Cutting for Menswear
7. Singer : Sewing for children
8. Pattern Drafting for dressmaking.
9. Dress Pattern designing: the basic principles of cut and fit
10. Pattern Design for Childrens clothes

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of Apparel Construction
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment :

Goal: Students develop the ability to understand basic cutting & sewing techniques of different garment components.			
Objective: To develop their skill of Apparel Construction with traditional & advanced techniques as well as technologies.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement

CO4		2	3	3		1		1

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Tools and equipment for construction and measurement	Cutting Tools- scissor, shear, round knife	B.N. 2
2			Cutter band knife cutter, flat bad cutter, soft ware used in apparel	B.N. 2

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			industry for cutting	
3			Drafting measuring and making tools	B.N. 2
4			Drafting Tools- L shape scale, hip curve, French curve, grading ruler, leg shaper pattern master, mechanical pencil, graph paper, brown paper	B.N. 2
CO: 1				
LO: Describe measuring tools and equipment with their uses.				
5	1	Tools and equipment for construction and measurement	Measuring tools – measuring tape & marking tools – tailing chalk, marking pen, marker for apparel industry other techniques of marking	B.N. 2
CO: 1				
LO: Describe drafting tools and equipment with their uses.				
6	1	Tools and equipment for construction and measurement	Body Measurements – Horizontal measurements Vertical measurements Circumference measurements	B.N. 2
7			Ready garment measurements and standard measurement how to take measurements from ready garment, personalize measurements standard measurement chart	B.N. 2
8			Sequence of recording measurements – recording measure for upper body garments in order	B.N.2
9			Recording measurements for upper body garments in order	B.N. 2
10			Measurements for sleeve	B.N. 2
CO: 1				
LO: Describe cutting tools and equipment with their uses.				
11	1	Tools and equipment for construction and measurement	Direct and indirect measurements – Understanding direct measurements, indirect measurements , Standard measurements	B.N. 2
Assignment: A1 – submission within three days				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
CO: 1				
LO: Describe sewing equipment tools with their uses.				
12	2	Garment Designing	Impact of texture color & print to designing of kids wear according occasion	B.N. 2
CO: 2				
LO: Describe impact of color of garment designing.				
13	2	Garment Designing	Impact of texture to designing of ladies wear according to party	B.N 2
CO: 2				
LO: Describe impact of texture of garment designing.				
14	2	Garment Designing	Impact of color and print to designing of ladies wear according to party	B.N. 2
Assignment: A2 – submission within three days				
CO: 2				
LO: Describe impact of print of garment designing.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
15	3	Regional Dresses	Men’s regional dresses of North Indian states J&K, Himachal, Punjab, Haryana, Rajasthan	B.N. 3,5
16			Women’s regional dresses of North Indian states J&K, Himachal, Punjab, Haryana, Rajasthan	B.N. 3,5
CO: 3				
LO: Describe traditional and tribal costumer of North Indian States.				
17	3	Regional Dresses	Men’s regional dresses of Gujarat, MP, Chhattisgarh, Goa	B.N. 5
18			Women’s regional dresses of Gujarat, MP, Chhattisgarh, Goa	B.N. 5
CO: 3				
LO: Describe and tribal customer of West Indian States.				
19	3	Regional Dresses	Men’s regional dresses of East Indian states Sikkim, Assam, Arunachal, Meghalaya, Mizoram, Tripura, Nagaland, Manipur	B.N. 5
20			Women’s regional dresses of East Indian states Sikkim,	B.N. 5

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			Assam, Arunachal, Meghalaya, Mizoram, Tripura, Nagaland, Manipur	
CO: 3				
LO: Describe traditional and tribal costumer of East Indian States.

Session: Jul. – Dec.

I: Course Objective:

To make the students understand the technique the value addition to the design for mass acceptability in the market.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Understand hand and machine embroidery
- CO2 Understanding hand and machine fabric printing techniques
- CO3 Understanding fabric painting techniques
- CO4 To study of textile for texture knowledge

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	3	1	3				3
CO 2	1	3	2	3	3	1		3
CO 3	1	3	2	3	3	1		3
CO 4	2			2	1	1		

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Embroidery	Embroidery – Hand needle different types of stitches by needle Basic stitches- Even running, uneven running stitch back stitch	
2			Cable chain, stem , lazy-dazy, French knot	
3			Bullion , chickenkari, long French knot, fly	
4			Father, magic chain, couching, fish bone, split chain, phulkari, kasuti	
5			Cast on, picot, basket, cross	
6			Sunflower rosette, satin stitch	
7			Kamal Kashida, spider web, button hole	
8			Open chain, ladder stitch, mirror work with chain, herring bone and button hole stitch	
9			Ribbon embroidery – Rose, lazy-dazy, zigzag, fly and ribbon work	
10			Bead work – Moti bharat, back stich, straight stitch cutdana work	
11			Appliqué work – Border and flower	
CO: 1				
LO: Practice basic and decorative stitches using in Embroidery by hand needle.				
12	1	Embroidery	Embroidery – Aari work Practice of basic chain stitch by Aari	B.N. 3,4
13			Filling stitch on different shaped tikki on motif filling	B.N. 3,4
14			Bead work by Aari, Cutdana, work by aari Salma, Sitara and Kalabattu work by aari	B.N. 3,4
15			Zari and Zardozi work by aari	B.N. 3,4
CO: 1				
LO: Practices different types of stitching by Aari.				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
16	1	Embroidery	Machine embroidery – Adjustment of different stitches on machine	B.N. 3,4
17			Practices of machine embroidery with different motif and design	B.N. 3,4
18			Practices of machine embroidery on different types of fabric texture	B.N. 3,4
Assignment: A1 – submission within three days				
CO:1				
LO:. Practices different types of stitches by Machine.				
19	2	Printing”	Hand printing block printing – select of blocks for design, prepare color paste for printing prepare fabric for printing, printing procedure, single color block printing and double color printing method	B.N. 1, 2
CO: 2				
LO: Practice of fabric hand blocks printing.				
20	2	Printing”	Screen printing - Making of screen oil paint method design transfer on screen by tracing method, covered area of screen by oil paint except the design	B.N. 2, 4
21			Oil paint double coating for filling holes on screen	B.N. 1, 2, , 4
22			Prepare color for screen printing, prepare fabric for screen printing procedure of screen printing single color and double color	B.N. 4
23			Making screen by design exposing method laying and coating of sensitizer on screen	B.N. 1, 2, 4
24			Transfer design on tracing paper for printing , making design negative (filling design by black water proofing	B.N.1,2
25			Exposing screen washing method prepare fabric for printing, prepare color for printing, printing procedure of screen printing with single and double	B.N. 2, 4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			color	
CO: 2				
LO: Practice of fabric screen printing.				
26	2	Printing”	Stencil printing- Transferring design for stencil making on HP sheet or drawing sheet, cutting design with sharp cutter	B.N. 1, 2, , 4
27			Prepare color for printing prepare fabric for print squeeze and spread method printing on fabric	B.N. 1, 2
28			Spray method of stencil printing on fabric with single and double color and shading	B.N. 1, 4
CO: 2				
LO: Practice of fabric stencil printing.				
29	2	Printing”	Batik printing - Prepare fabric for batik printing selection and transferring design on fabric by tracing method waxing process	B.N. 4
30			Double coating of wax on design	B.N. 2, 4
31			Prepare first base color and salt color for first dip and second dip for batik dying	B. N.1, 3, 5
32			Prepare second base color and salt color for first dip and second dip for batik dying	B.N. 1, 2
33			Remove wax by boiling and pressing method	B. N.1, 3, 5
CO:				
LO:. Practice of batik dyeing and printing method by step by step.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
34	2	Printing”	Tie and Dye – Prepare fabric for tie and dye – different types of folding techniques for tie fabric	B.N.1,2, 7
35			Different types of gathering , stitching tie technique of tying fabric	B.N.1,2, 7
36			Tying knot with using different material	B.N.1,2, 7

Lecture No.	Unit No.	Topic	Sub Topic	Reference
37			Prepare color for dying, single color	B.N.1,2, 7
38			Dying double and triple color fixing and finishing process	B.N.1,2, 7
39			Machine – printing roller printing process by roller, creating texture and effect by roller using block screen printing color	B.N.1,2, 7
Assignment: A2– submission within three days				
CO: 2				
LO: Practice of fabric tie & dye method step by step.				
40	3	Painting	Fabric painting – Prepare fabric select transfer of design, painting process with different strokes, shading and precautions.	B.N. 6
41			Nib Painting – Selection and transfer of design for painting and painting process with precautions	B.N. 6
CO: 3				
LO: Practice of fabric painting with different effect.				
42	3	Painting	Glass painting – Select and transfer of design on glass (Or HP sheet) for painting. Painting process with precaution	B.N. 6
CO: 3				
LO: Practice of glass painting using glass and without glass.				
43	3	Painting	Nib painting – Select and transfer of design on nib for painting. Painting process with precaution	B.N. 6
CO: 3				
LO: Practice of nib painting with special tools.				
44	3	Painting	Cone painting – Select and transfer of design on cone for painting. Painting process with precaution	B.N. 6
Assignment: A3 – submission within three days				
CO: 3				
LO: Practice of cone painting.				
45	4	Various fabrics swatches collection & texture knowledge	Showing different types of cotton fabric for texture	B.N 8
46			Describe their composition ,	B.N 8

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			weaving and making process	
CO: 4				
LO: Understanding and knowledge of fabric texture of different types of cotton fabrics.				
47	4	Various fabrics swatches collection & texture knowledge	Showing different types of silk fabric for texture	B.N 8
48			Describe their composition , weaving and making process	B.N 8
CO: 4				
LO: Understanding fabric texture of silk fabrics.				
49	4	Various fabrics swatches collection & texture knowledge	Collection of fabric swatches and trimming materials	B.N 8
50			Showing different types of synthetic fabric for texture	B.N 8
51			Describe their composition , weaving and making process	B.N 8
CO: 4				
LO: Understanding fabric texture of synthetic fabrics.				
52	4	Various fabrics swatches collection & texture knowledge	Showing different types of fabric texture and weaving used in fabric	B.N 8
Assignment: A4 – submission within three days				
CO: 4				
LO: Understanding fabric texture of different types of weaved used in fabric.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. The color book of the Dyeing & Batik
2. Tie Dyed Textile of India
3. Embroidery's Pattern Book
4. Extend Modern Embroidery Design
5. Impressions (K. Prakash)
6. A history of Indian Painting the modern period (Krishna , Chaitanya)
7. Clothing and Textile (Dr. Pramila Verma)
8. Fabric (Suzanne, Trocme & Mitchell Beazley)

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of Ornamentation Technique.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment:

Goal: Students develop the ability to understand various traditional and advanced surface ornamentation techniques for fabric embellishment.			
Objective: To develop their skills and analytical capabilities of ornamentation techniques for fashion designing.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding of tools, equipments, techniques and technologies of traditional and advanced Fabric dyeing ,Printing, Painting and embroidery with basic and fancy stitches.	% students having a brief knowledge of tools, equipments, techniques and technologies of Fabric dyeing, Printing, Painting and embroidery with basic and fancy stitches.	% Student has understanding about tools, equipments, Fabric dyeing, Printing, Painting and embroidery with basic stitches.	% Student need more efforts for Advanced techniques and technology for Ornamentation technique

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE

Subject: Ornamentation Techniques (Theory)
Class: PGDFDM – I Sem

Session: July – Dec.

I: Course Objective:

To make the students understand the technique the value addition to the design for mass acceptability in the market.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Theory

- CO1 Understanding ornamentation technique
- CO2 Understanding Traditional and modern printing technique with dyes
- CO3 Types of painting technique
- CO4 Traditional Indian hand embroidery and machine embroidery

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈
CO ₁	1	3	1	1				1
CO ₂	1	3	2	3	2			3
CO ₃		3	1	2	1			3
CO ₄	1	3	3	3	3	2		3

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction of Ornamentation	Meaning , Defination & its Types	B.N. 8
CO: 1				
LO: To introducing surface ornamentation technique used in fabric.				
2	1	Introduction of Ornamentation	Types of Ornamentation Technique	B.N. 8
3			Dyeing	B.N. 8
4			Printing	B.N. 8
CO: 1				
LO: Describe ornamentation technique.				
5	1	Introduction of Ornamentation	Painting	B.N. 8
6			Embroidery	B.N. 8
CO: 1				
LO:. Material tools and equipment required in ornamentation.				
7	1	Introduction of Ornamentation	Required tools and equipments for dyeing-color,Fixer Utensils,types of color ,equipment for heat tub ,wooden spoon bowl, measuring spoon, gloves etc.	B.N. 1, 2
8			Required tools and equipments for Printing- Padded Table, Color, Binder, Fixer, Wooden blocks, screen, stencil, roller, bowl, spoons,sponge,rough fabric etc.	B.N. 1, 4
9			Required tools & Equipments for Painting-Color & Color medium, brushes with different sizes, motifs and design , glass or transpirancy (OHP sheet) ,Velvet fabric ,Rough Fabric etc	B.N. 1, 3, 4
10			Required tools & Equipments for Embroidery- Hand Needle,Different types of threads,beads, swaroski ,types of mirrors,plastic & wooden embroidery frame,needles for aari work, decorative material for Aari work , Fabric for embroidery etc	

Assignment: A1 – submission within three days				
CO: 2				
LO: Selection of design and transfer of design technique on fabric.				
11	2	Printing	History and origin of block printing	B.N. 8
CO: 2				
LO: Describe history process and method of block printing and its importance in textile.				
12	2	Printing”	History and origin of block printing,various ty es of blocks, ,	B.N. 8
13			Process of block printing ,uses of dyes and colours	B.N. 8
14			Precautions of block printing.	B.N. 8
CO: 2				
LO: History process and method of stencil printing.				
15	2	Printing”	History and origin of Stencil Printing	B.N. 8
16			Stencil Making	B.N. 8
17			Types of Stencils	B.N. 8
18			Printing Process of stencil printing	B.N. 8
19			colors for stencil printing ,Precautions	B.N. 8
CO: 2				
LO:. Historical background and process in detail of screen printing.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
20	2	Printing”	History and origin of Screen Printing	B.N. 1
21			Screen making by Oil Paint Method	B.N. 1, 2
22			Screen Making by design exposing method	B.N. 1
23			Colors for screen printing printing, Process of screen, Precautions	B.N. 1, 4
24			Roller Printing –Origin of Roller Printing, types of Rollar & printing	
25			Methods of Roller Printing, Precautions	
Assignment: A2– submission within three days				
CO: 2				
LO: History process and method of roller printing.				
26	3	Painting	Types of Colors for fabric	B.N. 6,7

			painting,color filling technique	
27			Motifs And design for fabric painting	B.N. 6,7
28			Precautions	B.N. 6,7
CO: 3				
LO: Explain fabric painting with tools color along with method and its variation of color filling.				
29	3	Painting	Tools and materials for Nib Painting	B.N. 6,7
30			Designs and motifs for Nib Painting	B.N. 6,7
31			Methods of Nib Painting	B.N. 6,7
32			Precautions	B.N. 6,7
33			Tools and materials for cone painting	B.N. 6,7
CO: 3				
LO: Describe nib painting materials used in cone material method and precaution.				
34	3	Painting	Designs and motifs for cone painting	B.N. 6,7
35			Methods of Cone painting & Precautions	B.N. 6,7
CO: 3				
LO: Cone painting method materials used in cone painting and explain precautions.				
36	3	Painting	Tools and materials for glass painting	B.N. 6,7
37			Design and motifs for glass paintings	B.N. 6,7
38			Methods of glass paintings & precautions	B.N. 6,7
Assignment: A3 – submission within three days				
CO: 3				
LO: Method and colour description of glass painting with precaution while painting.				
39	4	Dyes	Introduction to dyes	B.N. 1, 2
CO: 4				
LO: Describe classification chart of dyes with source.				
40	4	Dyes	Natural dyes-Vegetable dyes	B.N. 1,2
41			Animal dyes	B.N. 1,2
42			Mineral dyes	B.N. 1,2
Assignment: A4 – submission within three days				
CO: 4				
LO: Describe in detail natural dyes and their types				

43	4	Dyes	Manmade or syenthetic dyes	B.N. 1,2
44			Acid Dye , Alkali Dye,Azoic Dye	B.N. 1,2
45			Reactive dyes, Vat dyes, Disperse Dyes	B. N.1, 2
Assignment:				
CO: 4				
LO: Describe men made or synthetic dyes with method.				
46	4	Dyes	Fabrics for Tie & Dye, Fabric preparation for Tie & Dyes	B.N. 1,2
47			Noted Techniques sor Types , Folding Technique	B.N. 1,2
48			Color preparation Process	B.N. 1,2
49			Dyeing method for tie & dye	B.N. 1,2
Assignment: A5 – submission within three days				
CO: 4				
LO: Describe decorative dying method of fabric.				
50	5	Embroidery	Embroidery of Jammu & Kashmir , Himachal Pradesh	B.N. 8
51			Motifs , Threads, Texture & Colors	B.N. 4,5,8
52			Stitches used in embroidery	B.N. 8
CO: Traditional Indian Hand Embroidery & Machine Embroidery				
LO: Describe Tradional Embroidery techniques				
53	5	Embroidery	Embroidery of Punjab (Phulkari)	, B.N. 8
54			Embroidery of Rajesthan & Gujrat(Kathiwad)	B.N. 8
55			Motifs and design ,thread, color,texture	B.N. 4,5,8
56			Stitches used in embroidery	B.N. 8
57				B.N. 8
CO: Traditional Indian Hand Embroidery & Machine Embroidery				
LO: Describe decorative dying method of fabric.				
58	5	Embroidery	Embroidery of Bengal(Kantha), Karnataka(Kasui),Orrisa (Applique work)	, B.N. 8
59			Motifs and design, color ,texture	B.N. 4,5,8

60			Thread & stitches in embroidery	B. N 8
CO: 4				
LO: Describe decorative dying method of fabric.				
61	5	Embroidery	Introduction to Aari work	B.N. 4,5,6
62			Tools & equipments of Aari work	B.N. 4,5,6
63			Stitches of Aari work,Machine embroidery techniques	B.N. 4,5,6
64			Different type of stitches of Machine embroidery	B.N. 4,5,6
65			Other methods of ornamentation-patch work, pipine,Tubbing,laces,button , ribbon ,beads	B.N. 4,5,6,3
Assignment: A6 – submission within three days				
CO: 4				
LO: Describe decorative dying method of fabric.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: Marketing Management & Packing Presentation
Class: PGDFDM – II Sem

Session: Jan. - June

I: Course Objective:

The objective of this course is to help the students gain understanding of the functions and responsibilities of the marketing manager, provide them tools and techniques to perform the marketing function smoothly in an organization.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks. It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO):

- CO1 Understand the dynamics of marketing in business
- CO2 Develop unique marketing mix
- CO3 Construct sales plan and professional interactive presentation
- CO4 Develop an understanding of the techniques of packing

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈
CO ₁			2				3	3
CO ₂			2				3	3
CO ₃			3				3	3
CO ₄		3		2				3

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Marketing	Definition of Marketing	B.N. 1
2			Importance of Marketing	B.N. 1, 2
3			Marketing and Selling	B.N. 1
4			Marketing Tasks Case: Ramsay Bakery Ltd., Biplab Bose, 3 rd Edition, pp. 140	B.N. 1, 4
Assignment: Analyze the Case and Submit the Write-up				
CO: 1,3				
LO: Identify core concepts of marketing and the role of marketing in business and society.				
5	2	Market Segmentation,	Need for Market Segmentation,	B.N. 2, 4
6			Procedure of Segmentation Case: Segmenting Rural Markets, Kotler, South Asian Edition (13 th), pp. 209	B.N. 1, 2, 7
7			Basics of Targeting	B.N. 1, 2, 8
8			Target Marketing Strategies	B.N. 3, 6
Assignment: Take a Product, Develop its Segmentation Strategy and Submit the PPT.				
CO: 1				
LO: Describe major bases for segmenting consumer and business markets; understand how different situations in the competitive environment will affect choices in target marketing.				
9	2	Market Research & Marketing Mix	Concept, Objectives and importance and methodology marketing research	B.N. 1, 2, 5
10			Definition and concept & type of product	B.N. 1, 4
11			Product Life Cycle 7 its stages	B.N. 4, 8
12			Marketing strategies at various PLC.	B.N. 1, 4
13			Importance of Branding	B.N. 2, 4
CO: 2				
LO: Understand the fundamental concepts of marketing mix and market research.				
14	3	Pricing	Concept & importance of Pricing, Pricing Methods & Strategies	B.N. 1, 2
15			Pricing Objectives Case: Peakon Electronics System Ltd., Biplab Bose, 3rd Edition, pp. 295	B.N. 1, 4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
16			Types of price policies	B.N. 1, 3, 4
Assignment: Group Activity on Analyzing Pricing Strategies of Various Companies				
CO: 2				
LO: Understanding different pricing methods its application in the business world.				
17	4	Distribution	Concept and Importance of Distribution Network	B.N. 2, 4
18			Levels of Distribution Network,	B.N. 1, 2, , 4
19			Channel Members & their importance	B.N. 4
20			Meaning, definition and nature of Channel members	B.N. 1, 2, 4
21			Function of Distribution Channel	B.N.1,2
22			Type of Distribution channels	B.N. 2, 4
23			Role of middle men	B.N. 1, 2, , 4
Assignment: Watch Video Case on <i>Mumbai Dabbawala</i> for In-class Discussion				
CO: 2				
LO: Identify the costs and benefits of marketing channels; discuss the firms and the functions involved in typical channels in India.				
24	5	Promotion	Concept, importance, types of Media.	B.N. 1, 2, , 4
25			Communication Process	B.N. 1, 2
26			Promotion Mix	B.N. 1, 4
27			Advertising, Publicity, Personal Selling & Sales Promotion	B.N. 1, 2
CO: 2, 3				
LO: Understanding the role of promotion mix in marketing.				
28	6	Packaging	Introduction, consideration & function of Packaging	B.N. 4
29			Strategies of Packaging	B.N. 2, 4
30			Importance & criticism of Packaging	B. N.1, 3, 5
31			Hangers, Cartons & bags	B.N. 1, 2
32			Catalogues, Storage & Dispatches	B. N.1, 3, 5
Assignment: Select a Company and study the impact of its packaging pattern on the consumers.				
CO: 4				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Ability to formulate innovative packaging strategies in the competitive environment.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

1	1	Block pattern	Skirt block- making pattern of basic skirt block on paper with different sizes and scale	B.N 1,2
CO: 1				
LO: Pattern making of basic skirt by block method.				
2	1	Block pattern	Making pattern of basic body block on paper with different sizes and scale	B.N 1,2
CO: 1				
LO: Pattern making of basic body block by block method.				
3	1	Block pattern	Making pattern of basic sleeve block on paper with different size and scale	B.N 1,2
CO: 1				
LO: Pattern making of basic sleeve block by block method.				
4	1	Block pattern	Making pattern of trouser on paper with medium size	B.N 1,2
Assignment: A1 – submission within three days				
CO: 2				
LO: Pattern making of medium size trouser block by block method.				
5	2	Cutting, stitching & finishing of garments	Cutting stitching & finishing of garment (A- Line frock)	B.N 1,3,4
6			Cutting of a line frock with design	B.N 1,3,4
CO: 3,4				
LO: Cutting stitching & finishing techniques and process of A-Line frock.				
7	2	Cutting, stitching & finishing of garments	Cutting, stitching and finishing of garment	B.N 1,3,4
8			Cutting of a princess line with design	B.N 1,3,4
CO: 3,4				
LO: Cutting stitching & finishing technique and process of Princess Line dress.				
9	2	Cutting, stitching & finishing of garments	Shirt – Layout of pattern on fabric marking and cutting	B.N 1,3,4
10			Stitching process – Finishing of neck, shoulder attachment and completing design on bodice	B.N 1,3,4
11			Attached bodice and trim garment for complete look	B.N 1,3,4
CO: 3,4				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Cutting stitching & finishing technique of Shirt.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
12	2	Cutting ,stitching & finishing of garments	Trouser- Layout of pattern on fabric marking and cutting	B.N 1,3,4
13			Construct front and back pocket	B.N 1,3,4
14			Finishing of belt, loop construction attached belt with trouser	B.N 1,3,4
15			Hemming , huke, button and trimmed	
CO: 3,4				
LO: Cutting stitching & finishing technique of Trouser.				
16	2	Cutting, stitching & finishing of garments	Lehanga- Layout of patter on fabric marking, cutting	B.N 1,3,4
17			Attached lining and interlining with main fabric	B.N 1,3,4
18			Belt and zip or opening finishing	B.N 1,3,4
19			Finishing and trimming process of Lehanga	B.N 1,3,4
CO: 3,4				
LO: Cutting stitching and finishing process of Lahenga.				
20	2	Cutting, stitching & finishing of garments	Princess line blouse- Layout of pattern on fabric marking and cutting	B.N 1,3,4
21			Stitching, Finishing of blouse	
Assignment: A2 – submission within three days				
CO:3,4				
LO: Cutting stitching and finishing technical process of Blouse.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- 1 .Pattern Making for Fashion Design (Helen Joseph, Armstrong)
- 2 .Fabric, Form & Flat pattern cutting
- 3 .Dress Fitting : Basic Principles and practices.
- 4 .Make your own patterns

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of Apparel Construction and Draping..
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment :

Goal: Students develop the ability to understand Basic block,Study of pattern,Dart manipulation,layout and draping for constructing garment. .			
Objective: The objective of this course is to develop skills for making patterns by flat pattern and draping as well as convert these patterns to desired Designs.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding of Basic block,Study of pattern,Dart manipulation,layout and draping for constructing garment.	% students having an understanding of Basic block,Study of pattern ,layout and draping for constructing garment.	% Student have basic understanding about Basic block,Study of pattern ,layout for constructing garment.	% Student need more efforts for Advance Apparel Construction & Draping for constructing garment.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE
Lesson Plan

Subject: Advance of Apparel Construction and Draping
Class: PGDFDM – II Sem

Session: Jan. – Jun.

I: Course Objective:

To make the students understand techniques of garment construction and upgrade them to latest technology of the industry.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Theory

- CO1 To study of paper pattern for basic blocks
- CO2 Develop paper pattern to basic block for different garment
- CO3 Understand pattern layout with principles
- CO4 To develop pattern by draping method

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO ₄		3		3		3		2

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Study of paper pattern .and Garment components	Describe paper pattern, importance of paper pattern	
CO: 1				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Describe pattern making terminology and types of pattern.				
2	1	Study of paper pattern .and Garment components	Making standard size basic body block with drafting detail	B.N. 1, 2
3			Making customize body block	B.N. 1, 2
4			Making customize skirt block	B.N. 1, 2
5			Making standard size basic sleeve block used basic sleeve for creating cap sleeve and puff sleeve	B.N. 1, 2
6			Used basic sleeve for creating leg-o-mutton sleeve and flared / bell sleeve	B.N. 1, 2
7			Creating bishops sleeve and petal sleeve using basic sleeve block	B.N. 1, 2
8			Creative latest sleeve variation using basic sleeve block (Cold shoulder, full circular etc.	B.N. 1, 2
9			Types of pattern – Master pattern, working pattern, market pattern, production pattern and graded pattern	B.N. 1, 2
CO: 2				
LO: Making pattern of basic body block with drafting detail.				
10	1	Study of paper pattern .and Garment components	Pattern making terminology – Pattern term, fabric term, drafting	B.N. 1, 2
11			Pattern Component – Upper garment components- Front bodice, back bodice, sleeve, collar, yoke button and button hole patti, pocket etc	B.N. 1, 2
12			Lower garment components- waist band front lower part, back lower part, yoke , pocket, fly, loops, frills, etc.	B.N. 1, 2
CO: 2				
LO: Making pattern of basic sleeve block with drafting detail.				
13	1	Study of paper pattern .and Garment components	Making standard size basic skirt block with drafting detail	B.N. 1, 2
Assignment: A1 – submission within three days				
CO: 2				
LO: Making pattern of basic skirt block with drafting detail.				
14	2	Dart Manipulation	Terminology of darts- dart leg,	B.N 1

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			dart intake, vanishing point position of dart, single pointed dart, double pointed dart, used of dart in garment and its importance	
15			Method of dart manipulation – (i) one dart slope (ii) slash spread method of dart manipulation	B.N 1
16			(i) Conversion of one dart at waist line into three dart at waistline (ii) Conversion of three darts at the waist line into gathers	B.N 1
CO: 3				
LO: To study of dart, positions of dart in basic pattern.				
17	2	Dart Manipulation	Style development – Princess style line development (i) Armhole princess line, shoulder princess line neck princess line	B.N 1
18			pivot method of dart manipulation	B.N 1
CO: 3				
LO: Understanding method of dart manipulation.				
19	2	Dart Manipulation	Rules of dart manipulation – shifting of darts- (i) conversion of three darts at shoulder into dart tucks	B.N 1
20			Conversion of one dart at waist line into three dart at waistline	B.N 1
21			Conversion of three darts at waist line into dart tucks	B.N 1
CO: 3				
LO: Development of style line by dart manipulation.				
22	3	Pattern Adaption to basic block for different garment	Pattern adaption to basic block for four dart blouse with sleeve	B.N. 1,4
23			Pattern adaption to basic block for belted one dart blouse with sleeve	B.N. 1,4
24			Pattern adaption to basic block for cholicut blouse with sleeve and designer neck line	B.N. 1,4
25			Pattern adaption to basic block	B.N. 1,4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			for princess cut without belt blouse back opening with sleeve	
Assignment: A1 – submission within three days				
CO: 3				
LO: Adaption of upper body garment from basic bodice block.				
26	3	Pattern Adaption to basic block for different garment	Pattern adaption to basic skirt block for half circular and full circular Lehnga with elastic band and fused band	B.N. 1,4
27			Pattern adaption to basic skirt and bodice block for evening gown with circular	B.N. 1,4
CO: 4				
LO: Adaption of lower body garment from basic skirt block.				
28	3	Pattern Adaption to basic block for different garment	Pattern adaption to basic skirt and bodice block for evening gown with armhole princess style line	B.N. 1,4
Assignment: A1 – submission within three days				
CO:				
LO: Adaption of body combination garment from basic bodice and skirt block.				
29	4	Principal of Lay – Out	Meaning, principles and importance of Layout	B.N. 1, 2
CO: 4				
LO: Describe layout process of pattern on fabric with the special reference to apparel Industry and reference to designers aspect				
30	4	Principal of Lay – Out	Lay out variation – all over print, one direction print striped print, grain line of fabric special print or design	B.N. 1, 2
Assignment: : A4 – submission within three days				
CO: 4				
LO: Study of lay planning of pattern on fabric according to fabric prints and design.				
31	5	Draping	Draping – meaning principles of draping, elements of fabric loss and profit of draping	B.N. 1
CO: 4				
LO: Understanding draping concept and study of draping principles				
32	5	Draping	Basic body block by draping method with dart	B.N. 1
Assignment: : A5 – submission within three days				
CO: 4				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO:. Understanding Importance of draping (Loss and Profit)and making basic body block by draping				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

- 1 .Pattern Making for Fashion Design (Helen Joseph, Armstrong)

Lesson Plan

Subject: CAD for Apparel Design (Practical)
Class: PGDFDM – II Sem

Session: Jan. - Jun.

I: Course Objective:

With in illustration module students are introduced to key contemporary fashion illustrators and explore a diversity of mediums and rendering techniques as a way to generate detailed range drawings tool in fashion practice and consequently students are encouraged to refine their skills in order to accurately communicate design idea and details. The digital component of the subject enables students to translate hand rendered fashion illustrations and technical drawings using industry standard software such as coral draw and adobe photo shop.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Student will able to use computers for their design work.
- CO2 Student will be able to choose the appropriate software for their designing work.
- CO3 Student will able to make a fashion illustration in digital format and will share their work internationally.
- CO4 Student will able to make a different dresses in digital format and will learn to make presentation of their work.

Lesson Plan

Subject: Project
Class: PGDFDM – II Sem

Session: Jan –June

I: Course Objective:

To make them develop the creativity of the student combining all the aspects of Fashion Design with a focused thought process.

II: Examination:

The faculty member will award internal marks out of 50 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 50 marks. It will consist of 10 viva questions out of which student will be required to attempt all questions.

III: Course Outcomes (CO): Practical

- CO1 Conceptualizing with Inspiration
- CO2 Theme selection, understanding and developing mood
- CO3 Understanding and using of elements of design.
- CO4 Construction of the conceptual garment.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈
CO ₁	3	1	3	1	2			2
CO ₂	3	1	3		3	2	1	2
CO ₃	3	3	2	2	1	3		
CO ₄	3	3	2	3		3		3

V: Session Plan:

Students takes inspirations to come out with new themes, following mood boards creations .On the basis of mood boards, they illustrate the garments using elements of design. Next they collect Fabric swatches, then out of those finalizing fabric swatches for final garment. Drafting patterns for finalized garment. Stitching and finishing the conceptualized garment.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Note:

1. There will be one major assignment, each student will be given separate topic for understanding the practical approach of Fashion Industry.
2. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
3. Final assessment on Presentation basis.

VII: Book Reference:

**Dept. of Library and Information Sc., ISLE,
IPS Academy, Indore
B.Lib.I.Sc. Course**

Program Specific Outcome

1. To give the student an understanding of the basic principles and fundamental laws of Library science and changing role of Library in current society
2. To Provide high quality, effective and relevant instruction and experiences in a student-centered and technologically advanced learning environment
3. Effectively incorporate current and emerging relevant instructional and information technologies throughout the curriculum.
4. To train the students in information knowledge processing, organization and retrieval.
5. To provide basic knowledge of computer and its application in LIS activities.
6. Ensure that LIS students acquire the knowledge, skills, and values that are fundamental to professional competence in the library and information services field.
7. Provide general library skills and information literacy training for all students;
8. Develop a culture of assessment and continuous improvement.

CO: 4				
LO: Focusing on traditional & nontraditional prints.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 05 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Fashion Illustration (Collin Barnes)
2. Figure Drawing for Fashion (Iasao Yajima)
3. Indian Textile Prints
4. Fashion Illustration Today
5. The complete Costume History
6. Rendering fashion , fabric & Paints(M. Kathleen , Claussy & Steve , Greenberg)
7. Nine Heads a guide to Drawing Fashion
8. Menswear : Suiting the customer(Suganne , Boswell)

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of Fashion illustration..
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment :

Goal: Students develop the ability to understand basic sketching and technique ,fashion figures ,Figures movements.			
Objective: To develop their theoretical knowledge about balance and proportion by illustration,make them understand human figures in different views as well as positions.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding of tools and technique of different body parts movement with draping of different garments .	% students having an brief knowledge of illustration of human figure and basic draping of garment	% Student have basic understanding about basic fashion illustration	% Student need more efforts for fashion illustration skills.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE
Lesson Plan

Subject: Fundamental of Apparel Construction
Class: PGDFDM – I Sem

Session: July – Dec.

I: Course Objective:

To make the students understand techniques of garment construction and upgrade them to latest technology of the industry.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Basic techniques of hand and machine sewing
- CO2 Types of collars used in various garments
- CO3 Types of opening in garments
- CO4 Drafting cutting and construction of ladies and men's wear

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1		2						3

LO: Types of handling Metal.				
5	1	Traditional Jewellery designing	Making occasional and tribal jewellery of West Indian state	B.N. 1, 2,4
6			Coloring and decoration occasional and tribal jewellery of West Indian state	B.N. 1, 2,4
CO:1				
LO:. Occasional and tribal jewellery of West Indian state.				
7	1	Traditional Jewellery designing	Making occasional and tribal jewellery of East Indian state	B.N. 1, 2,4
8			Coloring and decoration occasional and tribal jewellery of East Indian state	B.N. 1, 2,4
Assignment : A1 – submission within three days				
CO: 1				
LO: Occasional and tribal jewellery of East Indian state.				
9	2	Fashion & Costume jewellery designing and construction	Designing and making of Metal jewellery	B.N.1, 2,3, 4
CO: 2				
LO: Jewellery design and construction with Metal.				
10	2	Fashion & Costume jewellery designing and construction	Collection of carat (Artificial)	B.N. 1, 2, ,
11			Designing and making of Metal jewellery	B.N. 1, 2
CO:2				
LO: Jewellery design and construction with Carat.				
12	2	Fashion & Costume jewellery designing and construction	Design and construction with Stones and other material	B.N.1,2,3, 4
Assignment: A2 – submission within three days				
CO: 2				
LO:. Jewellery design and construction with Stones.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
13	3	Clay & Paper	Making clay jewellery	B.N. 1,3

Lecture No.	Unit No.	Topic	Sub Topic	Reference
14		jewellery	Coloring paper and clay jewellery	B.N. 1,3
15			Making wooden jewellery	B.N. 1,3
16			Decoration and coloring	B.N. 1,3
CO: 2				
LO: Jewellery design and construction with Clay and Wood.				
17	3	Clay & Paper jewellery	Drafting waste paper and quelling jewellery	B.N. 1,3
18			Making waste paper jewellery	B.N. 1,3
CO: 3				
LO: Jewellery design and construction with paper.				
19	3	Clay & Paper jewellery	Making all types of thread jewellery	B.N. 1,3
20			Thread jewellery – earring, necklace, bangles and anklet	B.N. 1,3
21			Fabric jewellery – earring, necklace, bangles	B.N. 1,3
CO:3				
LO: Jewlry design and construction with different types of thread and fabric.				
22	3	Clay & Paper jewellery	Making all type Indo western jewellery	B.N. 1, 3
Assignment: A3 – submission within three days				
CO: 3,4				
LO: Indo western designs.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. Costume Textiles & Jewellery of India
2. Making beads and wire jewellery (Don , Cusick)
3. 20th Century Jewellery : The complete source book (John Peacock)
4. Fashion Magazines

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of jewellery designing..

3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment:

Goal: Students develop the ability to apply tools, equipments, principles and elements, jewellery materials, astrological impact of stones.			
Objective: To develop their Practical skills and capabilities of jewellery designing.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding use of tools, equipments, principles and elements, jewellery materials, astrological impact of stones.	% students having a understanding use of ,tools, equipments, principles and elements, jewellery materials,	% Student has understanding use of tools, equipments, jewellery materials	% Student need more efforts for understanding use of Jewellery designing.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE
Lesson Plan

Subject: Ornamentation Techniques (Practical)
Class: PGDFDM – I Sem

Session: Jul. – Dec.

I: Course Objective:

To make the students understand the technique the value addition to the design for mass acceptability in the market.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Understand hand and machine embroidery
- CO2 Understanding hand and machine fabric printing techniques
- CO3 Understanding fabric painting techniques
- CO4 To study of textile for texture knowledge

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8
CO 1	1	3	1	3				3
CO 2	1	3	2	3	3	1		3
CO 3	1	3	2	3	3	1		3
CO 4	2			2	1	1		

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Embroidery	Embroidery – Hand needle different types of stitches by needle Basic stitches- Even running, uneven running stitch back stitch	
2			Cable chain, stem , lazy-dazy, French knot	
3			Bullion , chickenkari, long French knot, fly	
4			Father, magic chain, couching, fish bone, split chain, phulkari, kasuti	
5			Cast on, picot, basket, cross	
6			Sunflower rosette, satin stitch	
7			Kamal Kashida, spider web, button hole	
8			Open chain, ladder stitch, mirror work with chain, herring bone and button hole stitch	
9			Ribbon embroidery – Rose, lazy-dazy, zigzag, fly and ribbon work	
10			Bead work – Moti bharat, back stich, straight stitch cutdana work	
11			Appliqué work – Border and flower	
CO: 1				
LO: Practice basic and decorative stitches using in Embroidery by hand needle.				
12	1	Embroidery	Embroidery – Aari work Practice of basic chain stitch by Aari	B.N. 3,4
13			Filling stitch on different shaped tikki on motif filling	B.N. 3,4
14			Bead work by Aari, Cutdana, work by aari Salma, Sitara and Kalabattu work by aari	B.N. 3,4
15			Zari and Zardozi work by aari	B.N. 3,4
CO: 1				
LO: Practices different types of stitching by Aari.				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
16	1	Embroidery	Machine embroidery – Adjustment of different stitches on machine	B.N. 3,4
17			Practices of machine embroidery with different motif and design	B.N. 3,4
18			Practices of machine embroidery on different types of fabric texture	B.N. 3,4
Assignment: A1 – submission within three days				
CO:1				
LO:. Practices different types of stitches by Machine.				
19	2	Printing”	Hand printing block printing – select of blocks for design, prepare color paste for printing prepare fabric for printing, printing procedure, single color block printing and double color printing method	B.N. 1, 2
CO: 2				
LO: Practice of fabric hand blocks printing.				
20	2	Printing”	Screen printing - Making of screen oil paint method design transfer on screen by tracing method, covered area of screen by oil paint except the design	B.N. 2, 4
21			Oil paint double coating for filling holes on screen	B.N. 1, 2, , 4
22			Prepare color for screen printing, prepare fabric for screen printing procedure of screen printing single color and double color	B.N. 4
23			Making screen by design exposing method laying and coating of sensitizer on screen	B.N. 1, 2, 4
24			Transfer design on tracing paper for printing , making design negative (filling design by black water proofing	B.N.1,2
25			Exposing screen washing method prepare fabric for printing, prepare color for printing, printing procedure of screen printing with single and double	B.N. 2, 4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			color	
CO: 2				
LO: Practice of fabric screen printing.				
26	2	Printing”	Stencil printing- Transferring design for stencil making on HP sheet or drawing sheet, cutting design with sharp cutter	B.N. 1, 2, , 4
27			Prepare color for printing prepare fabric for print squeeze and spread method printing on fabric	B.N. 1, 2
28			Spray method of stencil printing on fabric with single and double color and shading	B.N. 1, 4
CO: 2				
LO: Practice of fabric stencil printing.				
29	2	Printing”	Batik printing - Prepare fabric for batik printing selection and transferring design on fabric by tracing method waxing process	B.N. 4
30			Double coating of wax on design	B.N. 2, 4
31			Prepare first base color and salt color for first dip and second dip for batik dying	B. N.1, 3, 5
32			Prepare second base color and salt color for first dip and second dip for batik dying	B.N. 1, 2
33			Remove wax by boiling and pressing method	B. N.1, 3, 5
CO:				
LO:. Practice of batik dyeing and printing method by step by step.				
Lecture No.	Unit No.	Topic	Sub Topic	Reference
34	2	Printing”	Tie and Dye – Prepare fabric for tie and dye – different types of folding techniques for tie fabric	B.N.1,2, 7
35			Different types of gathering , stitching tie technique of tying fabric	B.N.1,2, 7
36			Tying knot with using different material	B.N.1,2, 7

Lecture No.	Unit No.	Topic	Sub Topic	Reference
37			Prepare color for dying, single color	B.N.1,2, 7
38			Dying double and triple color fixing and finishing process	B.N.1,2, 7
39			Machine – printing roller printing process by roller, creating texture and effect by roller using block screen printing color	B.N.1,2, 7
Assignment: A2– submission within three days				
CO: 2				
LO: Practice of fabric tie & dye method step by step.				
40	3	Painting	Fabric painting – Prepare fabric select transfer of design, painting process with different strokes, shading and precautions.	B.N. 6
41			Nib Painting – Selection and transfer of design for painting and painting process with precautions	B.N. 6
CO: 3				
LO: Practice of fabric painting with different effect.				
42	3	Painting	Glass painting – Select and transfer of design on glass (Or HP sheet) for painting. Painting process with precaution	B.N. 6
CO: 3				
LO: Practice of glass painting using glass and without glass.				
43	3	Painting	Nib painting – Select and transfer of design on nib for painting. Painting process with precaution	B.N. 6
CO: 3				
LO: Practice of nib painting with special tools.				
44	3	Painting	Cone painting – Select and transfer of design on cone for painting. Painting process with precaution	B.N. 6
Assignment: A3 – submission within three days				
CO: 3				
LO: Practice of cone painting.				
45	4	Various fabrics swatches collection & texture knowledge	Showing different types of cotton fabric for texture	B.N 8
46			Describe their composition ,	B.N 8

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			weaving and making process	
CO: 4				
LO: Understanding and knowledge of fabric texture of different types of cotton fabrics.				
47	4	Various fabrics swatches collection & texture knowledge	Showing different types of silk fabric for texture	B.N 8
48			Describe their composition , weaving and making process	B.N 8
CO: 4				
LO: Understanding fabric texture of silk fabrics.				
49	4	Various fabrics swatches collection & texture knowledge	Collection of fabric swatches and trimming materials	B.N 8
50			Showing different types of synthetic fabric for texture	B.N 8
51			Describe their composition , weaving and making process	B.N 8
CO: 4				
LO: Understanding fabric texture of synthetic fabrics.				
52	4	Various fabrics swatches collection & texture knowledge	Showing different types of fabric texture and weaving used in fabric	B.N 8
Assignment: A4 – submission within three days				
CO: 4				
LO: Understanding fabric texture of different types of weaved used in fabric.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Book References:

1. The color book of the Dyeing & Batik
2. Tie Dyed Textile of India
3. Embroidery's Pattern Book
4. Extend Modern Embroidery Design
5. Impressions (K. Prakash)
6. A history of Indian Painting the modern period (Krishna , Chaitanya)
7. Clothing and Textile (Dr. Pramila Verma)
8. Fabric (Suzanne, Trocme & Mitchell Beazley)

VII: Note:

1. There will be 2 unit wise class tests/assignments/presentations of equal weightage.
2. There will be two major assignments, group or individual , each group will be given separate topics for understanding the practical approach of Ornamentation Technique.
3. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
4. Final assessment on internal test basis.

VIII: Rubric for Internal Assessment:

Goal: Students develop the ability to understand various traditional and advanced surface ornamentation techniques for fabric embellishment.			
Objective: To develop their skills and analytical capabilities of ornamentation techniques for fashion designing.			
16-20 Marks	11-15 Marks	6-10 Marks	0-5 Marks
Students	Students	Students	Students
Outstanding	Accomplished	Meets the criteria	Need Improvement
% students having an understanding of tools, equipments, techniques and technologies of traditional and advanced Fabric dyeing ,Printing, Painting and embroidery with basic and fancy stitches.	% students having a brief knowledge of tools, equipments, techniques and technologies of Fabric dyeing, Printing, Painting and embroidery with basic and fancy stitches.	% Student has understanding about tools, equipments, Fabric dyeing, Printing, Painting and embroidery with basic stitches.	% Student need more efforts for Advanced techniques and technology for Ornamentation technique

Subject: Marketing Management & Packing Presentation
Class: PGDFDM – II Sem

Session: Jan. - June

I: Course Objective:

The objective of this course is to help the students gain understanding of the functions and responsibilities of the marketing manager, provide them tools and techniques to perform the marketing function smoothly in an organization.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks. It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO):

- CO1 Understand the dynamics of marketing in business
- CO2 Develop unique marketing mix
- CO3 Construct sales plan and professional interactive presentation
- CO4 Develop an understanding of the techniques of packing

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈
CO ₁			2				3	3
CO ₂			2				3	3
CO ₃			3				3	3
CO ₄		3		2				3

V: Session Plan:

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Introduction to Marketing	Definition of Marketing	B.N. 1
2			Importance of Marketing	B.N. 1, 2
3			Marketing and Selling	B.N. 1
4			Marketing Tasks Case: Ramsay Bakery Ltd., Biplab Bose, 3 rd Edition, pp. 140	B.N. 1, 4
Assignment: Analyze the Case and Submit the Write-up				
CO: 1,3				
LO: Identify core concepts of marketing and the role of marketing in business and society.				
5	2	Market Segmentation,	Need for Market Segmentation,	B.N. 2, 4
6			Procedure of Segmentation Case: Segmenting Rural Markets, Kotler, South Asian Edition (13 th), pp. 209	B.N. 1, 2, 7
7			Basics of Targeting	B.N. 1, 2, 8
8			Target Marketing Strategies	B.N. 3, 6
Assignment: Take a Product, Develop its Segmentation Strategy and Submit the PPT.				
CO: 1				
LO: Describe major bases for segmenting consumer and business markets; understand how different situations in the competitive environment will affect choices in target marketing.				
9	2	Market Research & Marketing Mix	Concept, Objectives and importance and methodology marketing research	B.N. 1, 2, 5
10			Definition and concept & type of product	B.N. 1, 4
11			Product Life Cycle 7 its stages	B.N. 4, 8
12			Marketing strategies at various PLC.	B.N. 1, 4
13			Importance of Branding	B.N. 2, 4
CO: 2				
LO: Understand the fundamental concepts of marketing mix and market research.				
14	3	Pricing	Concept & importance of Pricing, Pricing Methods & Strategies	B.N. 1, 2
15			Pricing Objectives Case: Peakon Electronics System Ltd., Biplab Bose, 3rd Edition, pp. 295	B.N. 1, 4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
16			Types of price policies	B.N. 1, 3, 4
Assignment: Group Activity on Analyzing Pricing Strategies of Various Companies				
CO: 2				
LO: Understanding different pricing methods its application in the business world.				
17	4	Distribution	Concept and Importance of Distribution Network	B.N. 2, 4
18			Levels of Distribution Network,	B.N. 1, 2, , 4
19			Channel Members & their importance	B.N. 4
20			Meaning, definition and nature of Channel members	B.N. 1, 2, 4
21			Function of Distribution Channel	B.N.1,2
22			Type of Distribution channels	B.N. 2, 4
23			Role of middle men	B.N. 1, 2, , 4
Assignment: Watch Video Case on <i>Mumbai Dabbawala</i> for In-class Discussion				
CO: 2				
LO: Identify the costs and benefits of marketing channels; discuss the firms and the functions involved in typical channels in India.				
24	5	Promotion	Concept, importance, types of Media.	B.N. 1, 2, , 4
25			Communication Process	B.N. 1, 2
26			Promotion Mix	B.N. 1, 4
27			Advertising, Publicity, Personal Selling & Sales Promotion	B.N. 1, 2
CO: 2, 3				
LO: Understanding the role of promotion mix in marketing.				
28	6	Packaging	Introduction, consideration & function of Packaging	B.N. 4
29			Strategies of Packaging	B.N. 2, 4
30			Importance & criticism of Packaging	B. N.1, 3, 5
31			Hangers, Cartons & bags	B.N. 1, 2
32			Catalogues, Storage & Dispatches	B. N.1, 3, 5
Assignment: Select a Company and study the impact of its packaging pattern on the consumers.				
CO: 4				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Ability to formulate innovative packaging strategies in the competitive environment.				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

IX: Scheme of Internal Marks:

Class Participation			Internal Assessment		Total 100	Final Internal Marks Out of 20
Presentation Out of 20	Quiz Out of 20	Assignment Out of 20	VIVA Out of 20	Internal Out of 20		

IPS ACADEMY
INSTITUTE OF FASHION TECHNOLOGY, INDORE
Lesson Plan

Subject: Advance of Apparel Construction and Draping
Class: PGDFDM – II Sem

Session: Jan. – June

I: Course Objective:

To make the students understand techniques of garment construction and upgrade them to latest technology of the industry.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Making of basic block pattern for upper body garments
- CO2 Making of basic block pattern for lower body garments
- CO3 Making of basic sleeve block and its adaption to using in garment for designing
- CO4 Process of cutting, stitching techniques and finishing of garments

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈

Lecture No.	Unit No.	Topic	Sub Topic	Reference
1	1	Study of paper pattern .and Garment components	Describe paper pattern, importance of paper pattern	
CO: 1				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO: Describe pattern making terminology and types of pattern.				
2	1	Study of paper pattern .and Garment components	Making standard size basic body block with drafting detail	B.N. 1, 2
3			Making customize body block	B.N. 1, 2
4			Making customize skirt block	B.N. 1, 2
5			Making standard size basic sleeve block used basic sleeve for creating cap sleeve and puff sleeve	B.N. 1, 2
6			Used basic sleeve for creating leg-o-mutton sleeve and flared / bell sleeve	B.N. 1, 2
7			Creating bishops sleeve and petal sleeve using basic sleeve block	B.N. 1, 2
8			Creative latest sleeve variation using basic sleeve block (Cold shoulder, full circular etc.	B.N. 1, 2
9			Types of pattern – Master pattern, working pattern, market pattern, production pattern and graded pattern	B.N. 1, 2
CO: 2				
LO: Making pattern of basic body block with drafting detail.				
10	1	Study of paper pattern .and Garment components	Pattern making terminology – Pattern term, fabric term, drafting	B.N. 1, 2
11			Pattern Component – Upper garment components- Front bodice, back bodice, sleeve, collar, yoke button and button hole patti, pocket etc	B.N. 1, 2
12			Lower garment components- waist band front lower part, back lower part, yoke , pocket, fly, loops, frills, etc.	B.N. 1, 2
CO: 2				
LO: Making pattern of basic sleeve block with drafting detail.				
13	1	Study of paper pattern .and Garment components	Making standard size basic skirt block with drafting detail	B.N. 1, 2
Assignment: A1 – submission within three days				
CO: 2				
LO: Making pattern of basic skirt block with drafting detail.				
14	2	Dart Manipulation	Terminology of darts- dart leg,	B.N 1

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			dart intake, vanishing point position of dart, single pointed dart, double pointed dart, used of dart in garment and its importance	
15			Method of dart manipulation – (i) one dart slope (ii) slash spread method of dart manipulation	B.N 1
16			(i) Conversion of one dart at waist line into three dart at waistline (ii) Conversion of three darts at the waist line into gathers	B.N 1
CO: 3				
LO: To study of dart, positions of dart in basic pattern.				
17	2	Dart Manipulation	Style development – Princess style line development (i) Armhole princess line, shoulder princess line neck princess line	B.N 1
18			pivot method of dart manipulation	B.N 1
CO: 3				
LO: Understanding method of dart manipulation.				
19	2	Dart Manipulation	Rules of dart manipulation – shifting of darts- (i) conversion of three darts at shoulder into dart tucks	B.N 1
20			Conversion of one dart at waist line into three dart at waistline	B.N 1
21			Conversion of three darts at waist line into dart tucks	B.N 1
CO: 3				
LO: Development of style line by dart manipulation.				
22	3	Pattern Adaption to basic block for different garment	Pattern adaption to basic block for four dart blouse with sleeve	B.N. 1,4
23			Pattern adaption to basic block for belted one dart blouse with sleeve	B.N. 1,4
24			Pattern adaption to basic block for cholicut blouse with sleeve and designer neck line	B.N. 1,4
25			Pattern adaption to basic block	B.N. 1,4

Lecture No.	Unit No.	Topic	Sub Topic	Reference
			for princess cut without belt blouse back opening with sleeve	
Assignment: A1 – submission within three days				
CO: 3				
LO: Adaption of upper body garment from basic bodice block.				
26	3	Pattern Adaption to basic block for different garment	Pattern adaption to basic skirt block for half circular and full circular Lehnga with elastic band and fused band	B.N. 1,4
27			Pattern adaption to basic skirt and bodice block for evening gown with circular	B.N. 1,4
CO: 4				
LO: Adaption of lower body garment from basic skirt block.				
28	3	Pattern Adaption to basic block for different garment	Pattern adaption to basic skirt and bodice block for evening gown with armhole princess style line	B.N. 1,4
Assignment: A1 – submission within three days				
CO:				
LO: Adaption of body combination garment from basic bodice and skirt block.				
29	4	Principal of Lay – Out	Meaning, principles and importance of Layout	B.N. 1, 2
CO: 4				
LO: Describe layout process of pattern on fabric with the special reference to apparel Industry and reference to designers aspect				
30	4	Principal of Lay – Out	Lay out variation – all over print, one direction print striped print, grain line of fabric special print or design	B.N. 1, 2
Assignment: : A4 – submission within three days				
CO: 4				
LO: Study of lay planning of pattern on fabric according to fabric prints and design.				
31	5	Draping	Draping – meaning principles of draping, elements of fabric loss and profit of draping	B.N. 1
CO: 4				
LO: Understanding draping concept and study of draping principles				
32	5	Draping	Basic body block by draping method with dart	B.N. 1
Assignment: : A5 – submission within three days				
CO: 4				

Lecture No.	Unit No.	Topic	Sub Topic	Reference
LO:. Understanding Importance of draping (Loss and Profit)and making basic body block by draping				

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

Subject: CAD for Apparel Design (Practical)
Class: PGDFDM – II Sem

Session: Jan. - Jun.

I: Course Objective:

With in illustration module students are introduced to key contemporary fashion illustrators and explore a diversity of mediums and rendering techniques as a way to generate detailed range drawings tool in fashion practice and consequently students are encouraged to refine their skills in order to accurately communicate design idea and details. The digital component of the subject enables students to translate hand rendered fashion illustrations and technical drawings using industry standard software such as coral draw and adobe photo shop.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Student will able to use computers for their design work.
- CO2 Student will be able to choose the appropriate software for their designing work.
- CO3 Student will able to make a fashion illustration in digital format and will share their work internationally.
- CO4 Student will able to make a different dresses in digital format and will learn to make presentation of their work.

To develop their perception about balance and proportion and make them understand human anatomy with the intercrisis.

II: Examination:

The faculty member will award internal marks out of 20 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 80 marks (40 Marks Theory and 40 marks Practical). It will consist of 8 theory questions out of which student will be required to attempt any 5 questions.

III: Course Outcomes (CO): Practical

- CO1 Draping of Indian & Western garments on flesh figure.
- CO2 Medium for effective illustrations and color effect.
- CO3 Detailed illustration of garment.
- CO4 Drapes & accessories according to season & portfolio presentation.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈
CO ₁		3	1	2		3		1
CO ₂	1	2	2	2		3

Lesson Plan

Subject: Project
Class: PGDFDM – II Sem

Session: Jan –June

I: Course Objective:

To make them develop the creativity of the student combining all the aspects of Fashion Design with a focused thought process.

II: Examination:

The faculty member will award internal marks out of 50 and the bifurcation is mention in the scheme of internal marks. The semester examination will be of 50 marks. It will consist of 10 viva questions out of which student will be required to attempt all questions.

III: Course Outcomes (CO): Practical

- CO1 Conceptualizing with Inspiration
- CO2 Theme selection, understanding and developing mood
- CO3 Understanding and using of elements of design.
- CO4 Construction of the conceptual garment.

IV: PO-CO Mapping: HIGH-3, MEDIUM-2, LOW-1

CO/PO	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈
CO ₁	3	1	3	1	2			2
CO ₂	3	1	3		3	2	1	2
CO ₃	3	3	2	2	1	3		
CO ₄	3	3	2	3		3		3

V: Session Plan:

Students takes inspirations to come out with new themes, following mood boards creations .On the basis of mood boards, they illustrate the garments using elements of design. Next they collect Fabric swatches, then out of those finalizing fabric swatches for final garment. Drafting patterns for finalized garment. Stitching and finishing the conceptualized garment.

Note: Apart from the mentioned lecture schedule faculty members compulsorily have to take 08 to 10 lectures on any of the topic related to the subject.

VI: Note:

1. There will be one major assignment, each student will be given separate topic for understanding the practical approach of Fashion Industry.
2. Regular attendance, class performance and discipline will be an important factor for assigning internal marks.
3. Final assessment on Presentation basis.

VII: Book Reference:

1. Fashion Magazines

VIII: Rubric for Internal Assessment:

Goal: Students develop the Practical and theoretical knowledge of all the fashion designing subjects and apply them together on their project work.			
Objective: the creativity of the student combining all the aspects of Fashion Design with a focused thought process.			
41-50 Marks	31-40 Marks	18-30 Marks	0-17 Marks
Students	Students	Students	Students
